NOTES OF THE WEEK.

The negotiations which have been taking place between M. Zographos, President of the Autonomous Government of Epirus, and the Albanian Government, were reported last week to have reached a satisfactory stage, and hopes of an impending agreement between the two parties were entertained in some quarters. This week interest in the Epirus question has been transferred from the Council Chamber to the battlefield. Fighting has been in progress for some days in the debated territory, and with the prospect of reinforcements for both sides, the Epirotes and Albanians appear to have definitely embarked upon a trial of military strength. The actual cause of the renewal of hostilities is obscure, but the point is immaterial in view of the fact that the armed forces of the two parties were never at any great distance from one another. The Epirotes make the Albanians the aggressors, and credit them with having planned an advance into the Argyrokastro valley. But if the insurgents were at any time on the defensive, they did not long remain so, for advancing at no great distance from Argyrokastro they occupied Kolonia, together with a long line of villages in that district. The Albanians claim to have been successful in a subsequent attack on the Epirotes, and to have recaptured a number of villages.

The news of the Epirote advance appears to have stirred popular feeling in Albania. Volunteers are being rapidly enrolled in Central Albania, and are hurrying to Koritza. The Epirotes, however, have the advantage of being an organised army, possessed of some artillery. Apart from a small force of gendarmerie, stated to be from 1,500 to 2,000 strong, the Albanians seem to rely upon more or less irregular levies recruited from Southern Albanian clan. As far as is known, no attempt has been made to concentrate these irregulars, and they have been left distributed along the frontier, making the advance of any disciplined force a comparatively easy matter. The plans of the Albanian Government are still obscure. As long as negotiations were in progress with M. Zographos they could not well embark upon any definite military enterprise. But events have now passed beyond the control of the responsible authorities, and only a forcible solution seems possible.

Compared with the late struggle in the Balkans, the fighting in Epirus is a small matter, and it is to this circumstance that we must attribute the apparent indifference of the Great Powers to events in Southern Albania. The hopes entertained of the negotiations between the Albanian Government and M. Zographos were based largely on the belief that Italy was exercising her influence in favour of a peaceful settlement. But if the fighting continues, there is the fear that the situation will not remain amenable to peaceful persuasion. Neither side is going to fight with kid gloves on, and even without excesses being committed, reports of atrocities will suffice to inflame passions both in Greece and Albania. The smallness of the numbers engaged is an additional argument against allowing a wider area to become embroiled. That there is a danger of this happening is proved by the reports of complications between the Epirotes and the Mussulmans in their territory. Last week it was stated that M. Zographos had ordered all adult male Moslems to be deported from Argyrokastro. Whether this step was actually taken does not yet appear, but further information throws light upon the attitude of the Autonomous Government. It is stated that about 1,500 Mussulmans from villages in the neighbourhood of Kourvalesi and Liapouria armed themselves with weapons concealed during the Greek occupation, and made an attack on Epirote troops guarding the frontier on the road to Tepeleni. The Mussulmans were eventually driven off, but, according to the same source, the Epirotes are clamouring for extreme measures against the Mussulman inhabitants.

The report emanates from the Epirotes, and may rest on no more solid foundation than a desire to justify action against Mussulmans such as M. Zographos was credited with last week. But before irreparable harm has been done there would seem to be sufficient ground to justify an inquiry into the case of the Mussulmans of Argyrokastro. It is noticeable that M. Zographos himself, in the course of conversation with a *Morning Post* correspondent, complained of the indifference of the Powers towards the Epirus question. He declared that he was personally more than ever averse from deepening the gulf between the two elements of the population whose destiny it was to live together in the Albanian State

Digitized by Google

brought into existence by the mandate of Europe. No one, however, listened to him while there was an opportunity for peaceful negotiation, and it now only remained to him, he added, to end the combat by victory or death. M. Zographos makes out a plausible case, and if the Powers had shouldered responsibilities that were in reality their own, which they threw off on to their fledgling State, the Epirus question would have been solved by now.

An incident related by the Constantinople correspondent of *The Times* and the reports of the oppression of Bulgarians in Macedonia indicate how small is the advance made in some respects in the Balkans since the days of Abdul Hamid. Three Slavs of Dibra, engaged as milkmen in Constantinople, were arrested four months ago on charges even more impossible than those that recently secured the condemnation of Colonel Aziz Ali, and were imprisoned at the War Office. On March 17, three days after the signature of the Turco-Servian Peace Treaty, the Servian Chargé d'Affaires applied for their release, and received official assurances that they would be immediately liberated. On March 23 M. Georgevitch was informed that the Slavs had been condemned to death, and again he made representations to the authorities. He was unable, however, to obtain any proof that the men had been set at liberty, and on renewing his inquiries three weeks later, learned that they had been executed on March 30. If from Constantinople we turn to Macedonia we find the *rôle* of oppressor in other hands. Information received in Sofia from official sources depicts the condition of the Bulgarian population in the new Macedonian districts of Servia as being "worse than ever it was under the Red Sultan." According to one of the official reports, "the Turkish régime was not nearly so harsh, so cruel, and so merciless as the present Servian one." If such statements rested on unsupported testimony no attention would need be paid to them, but detailed information, and the steady stream of hapless refugees arriving at the Bulgarian frontier, makes it difficult not to believe that acts are being committed on Servian territory for which the Government would hesitate to accept responsibility. Charges of the most fantastic nature hurtle through the air in the Balkans and, naturally, breed scepticism among foreign observers of the course of events in these countries. But the Servian Government can hardly be in ignorance of the Bulgarian accusations. It would, therefore, be a very simple course to adopt to invite two Bulgarian officials and a neutral witness to visit the districts in question in order that they might testify to the inaccuracy of the charges brought against Servian officials. Failure to take such a step, in view of the authoritative nature of the indictment, cannot help being regarded as confirmation of the truth of the indictment.

Further progress is reported in the demarcation of the Turco-Persian frontier. The rapid headway now being made by the Boundary Commission gives reason to hope that the whole frontier will have been delimited before the end of the year.

The annual report of the Judicial Adviser to the Egyptian Government is a valuable supplement to the more comprehensive report of the British Agent-General. These documents record the contemporary history of Egypt in a wealth of detail, and with a peculiar knowledge that it is not always at the disposal of unofficial writers. In his present report just issued Sir Malcolm McIlwraith is at pains to account for "the continuous rise in crimes and serious misdemeanours which has unhappily been a marked feature of these reports for several years past." The cause that is most potent in Europe is missing in Egypt. Poverty to the degree of being always on the border line of starvation, and unable to withstand the further suffering imposed by cold and inclement weather, is hardly known in Egypt, where life is more easily sustained and the habitual charity of the people towards each other is more effective than organised charity. At the same time the standard of wealth among the agricultural classes is not high, and a general rise in the standard of living has given a marked impetus to the rapacity and greed that usually mark a peasantry for whom the most insignificant possession has a monetary value or its equivalent. A thirst for revenge when a real or imaginary injury has been suffered, the Judicial Adviser considers is a still more potent cause of crime in Egypt. Murder on the spur of the moment for some quite trifling provocation cannot be put down by law, he points out. A change in the temperament of the people which—as has so frequently been observed—the spread of education may be expected to produce can alone diminish the number of such deeds. But in spite of such a phenomenal increase in misdemeanours as that entailed in the record of 92,938 cases in 1913, compared with 13,932 in 1909, those who have the welfare of Egypt at heart need not be over-anxious. The people are expected to conform more or less to a British standard, and it may be doubted whether any nation of a temperament traditionally associated with warm climates could hope to come well out of the test within a few years of its first application.

The project for the foundation in London of a School of Oriental Studies is one that readers of THE NEAR EAST have particularly close at heart. Lord Curzon and Lord Cromer deserve to be warmly thanked for their strenuous efforts in furthering the cause of the school, and are to be congratulated on the success which they have achieved. The school is to be located in the London Institution in Finsbury Circus; it will be established as a school of the London University, but under a Royal Charter, and the King will be its Patron. Towards the estimated annual expenditure of £14,000 the Government has promised £4,000 and the Indian Government £1,250, while, a grant from the London County Council is also expected. On Wednesday the Lord Mayor presided at the Mansion House over a large and influential meeting, which had been arranged with the object of interesting the City in the project and of enabling the School of Oriental Studies to be opened in 1915 on a satisfactory financial basis. Lord Curzon spoke and reviewed the history of the scheme now nearing completion. He pointed out that to know the languages of the East was a great thing, but that to know the spirit of the East was a greater. With this dictum few people will find fault. As a nation we have prided ourselves in the past on combining the two accomplishments in our Indian administration. In the commercial world we have often succeeded in doing without either, finding other qualifications a satisfactory substitute. But competition has grown keener, and the weak points in our commercial armour have been found out by rivals, and they have put their knowledge to good use. The time has come, therefore, to repair that armour, and the School of Oriental Studies is to play its part in this work. It will also make good any defects that have arisen through one cause or another in the material upon which we rely for the administration of our Indian Empire. The school, therefore, as Lord Curzon insisted, has to be regarded as a great Imperial obligation, and as such we shall hope to see it successfully inaugurated and as successfully conducted.

To be published on May 15.

CONSTANTINOPLE LETTER.

(From Our Own Correspondent.)

Constantinople, May 1.

Turkey's Naval Ambitions.

The event of the week has been the announcement, first made four days ago by Shefik Bey, the President of the Turkish Navy League, at a theatrical performance given in aid of the fleet, that the Government has ordered a Dreadnought from the Armstrong-Vickers group. Whether the contract has actually been signed is not known, but there are reasons to believe that the arrangement was entered into at the time when the Porte first granted the dock and shipbuilding concession to the group in question, and I have good reasons for believing that the "Mohammed Fatih" ("Mohammed the Conqueror") will be very shortly laid down in England. The new ship will be a super-Dreadnought, an improved version of H.I.M.S. "Reshadieh," armed with a primary armament of at least 13.5-in. guns, well protected and fast. The question who is to pay for the new battleship is, of course, a very difficult one. I learn on Ministerial authority that the Turkish Navy League has about £T800,000 in its possession at present, and hopes to raise further large sums by public subscription, especially in the provinces, and also after the Ramazan fast is over. On the other hand, Europeans who are well acquainted with the financial situation say that large parts of Anatolia have been drained as far as subscriptions go to arrive at the result indicated by the Ministerial authority whom I have mentioned; that it is somewhat doubtful whether Shefik Bey, who is shortly leaving for Beyrout, will be as successful in the Arab provinces as he has been in Anatolia, and that if the Government counts on paying for the new battleship exclusively out of the fleet subscriptions three or perhaps four years must elapse before she can be finally delivered. They also hint that the prospect that the Government will probably be compelled to contribute rather largely to the new battleship's cost may have an adverse effect on Turkey's prospects at the Financial Conference at Paris, where Western critics may remark that if the Porte can afford *articles de luxe* such as super-Dreadnoughts, it can bear a larger share of the public debt of the Roumelian provinces than has hitherto been supposed.

In any case the probability that Greece will promptly order a new Dreadnought to bring her naval strength up to the Turkish level is considerable. Turkey will then insist on ordering a fourth, and so on, till both countries find war cheaper than peace—or, till Russia, seeing a large battle squadron growing up at her southern doors, determines to strike. We should, perhaps, do the same were we in Russia's shoes. Germany's determination to find her future "on the water" has been one of the principal causes of Anglo-German rivalry in the past, and the margin between Russian and Turkish strength in the Black Sea is far less than that between England and Germany in 1899. Russia has three Dreadnoughts building in the Black Sea. They cannot be ready till 1916—such at least is the view taken by experts here. She has in addition three battleships of the "Evstafi" type, the old "Rostislav," and "Tri Sviatitelia," and one or two still older ironclads, with two modern cruisers and a dozen destroyers. The battleships now ready are of the pre-Dreadnought epoch. So before, or at all events by the end of this year, Turkey will have two Dreadnoughts with three old ironclads to pit against the half-dozen Russian battleships, and will not be much behind the Muscovites in torpedo craft. This determination, therefore, of the Turkish Government to be supreme in the Ægean may have disagreeable political consequences unless Europe may prevail upon Greece and the Porte to limit their naval armaments. Whether Europe is ever likely to move in this direction is doubtful enough. In Near Eastern matters "Europe" lets ill alone, and is wildly surprised and indignant when her interests suffer in consequence. For this her statesmen, who are too afraid of their rivals and too nervous to "call a bluff," are responsible.

The Evkaf Museum.

On Monday the new Museum of the Ministry of Evkaf was opened in the presence of the Heir Apparent and of many Turkish notabilities. It is well worth visiting, for, though the collection contained therein is small, it is choice and has been well selected. As guide-books, however modern, do not contain any mention whatever of the contents of the majority of the provincial Tekkés and of the libraries and other institutions administered by the Ministry, or, I should say, by the Departments of the Evkaf which have contributed of their store to the new museum, I may be pardoned for devoting some attention to the exhibits of the new museum. First, there is an excellent collection of exquisitely bound and illuminated Korans, which is alone worth visiting. Next there are some carpets of very great antiquity, dating indeed from the later Seljuk period, which must be of great interest to all lovers of Turkish and Persian art. There are a few good pieces of glass, celadon, and porcelain, the latter including some of the earliest examples of Kutahia ware, and a very fine Ming vase, obviously made for the Near Eastern market. The collection of illustrated manuscripts, if small, is very good. There are some attractive examples of brasswork, and, finally, there is a fascinating collection of historical relics. Among these last are the robes and other personal belongings of Sultana Khurrem, better known to Western historians as Roxalana, the Russian slave whom Suleiman the Magnificent took to wife; the dresses of the luckless male children of the Imperial family who were strangled by order of each Sultan as he came to the throne for "reasons of State"; the shirt of Sultan Selim II. which Hussein Hilmi Pasha recovered after it had been carried off by a Russian volunteer when Adrianople fell; a sleeved blue and white garment whereon the whole of the Koran has been written; the orange-sleeved shirt of Bayazid, "the Thunderbolt," brought from his cenotaph at Brusa; a garment which is also inscribed with the whole Koran, no doubt as a talisman against danger in battle. There are some who contest the authenticity of this relic, and say that Timur the Tartar, after he inflicted the most dreadful defeat that the Turks have suffered on Bayazid, took the personal effects of the captive Sultan with him to Central Asia, and that there is no proof whatsoever that he restored any of his trophies to the House of Osman after Bayazid's death. Yet is does not follow that the relic may not have belonged to the great fighting Sultan, even if it were not worn by him at Angora and may not have clothed his iron frame at Kossovo or Nicopolis. May I recommend all readers of The Near East who are likely to visit Constantinople to see this interesting and beautiful collection, which is within fifty yards of the Suleimanieh Mosque; and may I express the hope that Hairi Bey, to whose initiative the formation of this collection is due, may command that the labels and descriptions of each exhibit be written in French as well as in Turkish?

LETTER FROM CAIRO.

(From Our Own Correspondent.)

Cairo, April 30.

The Khedive's Tour in the Delta.

Sunday being the birthday of H.H. the Khedive, a reception was held on that day at Abdin Palace. The attendance was most unusually large, probably owing to the fact that the reception was also a farewell one, his Highness being due to take up his residence for the summer in Alexandria on May 4. On Monday evening a banquet, to which the Ministers, the Advisers and Under-Secretaries, the Acting Ottoman High Commissioner, and many other high officials and notables were invited, was given at Abdin Palace in honour of the anniversary of the Sultan's accession.

On Tuesday morning the Khedive, accompanied by Rushdi Pasha, the Premier, and Sirri Pasha and Moheb Pasha, the Ministers of Public Works and Wakfs, left Cairo by motor-car and started on his tour in the Delta. The most elaborate preparations have been made by the Government, the provincial authorities, and the inhabitants. The tour is to last six days, and his Highness is to traverse every mudiria, the distance to be covered being about 550 miles. The programme has been divided into sections, and it has been arranged for a different Minister to accompany the Khedive through each section, the whole Cabinet assembling at Tanta and at Alexandria. In the course of his journey his Highness will visit a large number of notables, who have made the most extensive arrangements to receive him and have spared no expense to accord him a fitting welcome. It is many years since the Khedive has made a tour of his realm on anything like this scale, and it will be interesting to watch its effects.

The Legislative Assembly.

The Legislative Assembly again stands adjourned—this time until Wednesday, May 6. It has been decided to refer back to Committee the Co-operative Agricultural Syndicates Bill, owing to the fact that the Government desires to make certain amendments which have lately been found necessary. After a long discussion it was agreed to increase the Committee of Agriculture by nine members taken from the Committees of Finance, Justice, and the Interior, so as to ensure that this important measure shall be studied with the greatest care. The decision to re-examine the Bill is an exceedingly wise one, for although it means that the promulgation of the law will be somewhat delayed, the measure is of such vital importance to the economic welfare of the country that if it were introduced with any ill-considered haste its effect might be disastrous.

At the last meeting the replies of the Government to the various requests and observations on the Budget for 1914-15 made by the Assembly were circulated amongst the members. Some of the latter wanted these replies submitted to the Finance Committee so that they could be discussed. It was pointed out that this was contrary to the Organic Law, but as a concession and on the condition that this was not to be taken as a precedent the Government gave way and agreed to allow the questions to be reopened.

Some of the Government's replies are interesting. With regard to the observations made by the Assembly on the question of the investment of the Reserve Fund, the Ministry of Finance considers that any deviation from the present policy of buying foreign bonds would be dangerous, and so it declines to entertain the Assembly's proposal to invest that fund in Egyptian stock. The Government's reasons are those set forth in The Near East at the time the Budget was under discussion. The Government agrees to insert in the annual accounts a statement of the sums advanced to the Sudan and of the military expenses incurred on its behalf and inserted in the War Office Budget, but it declines to publish an account of the interest due, seeing that as yet the Sudan is not in a position to pay any interest. With regard to the State domains, the Government agrees to the proposal to divide the Fayoum estate into plots of five feddans or multiples thereof, and to sell them on terms of payment by instalment. Already 5,700 feddans have been treated in this manner, and are on the point of being sold. It is interesting to note that negotiations are in active progress with the Powers for the reduction in size of the benches in the Appeal and First Instance Courts of the Mixed Tribunals, so as to provide more courts, and that there is every prospect of a satisfactory solution being arrived at very soon. With regard to the vexed question of the palm tax, which the Assembly wanted to have drastically modified, if not suppressed altogether, the Government declines to take any action, as not only does the financial situation not permit it, but it does not consider that the tax is either prejudicial to the date-palm owners or levied in a disproportionate manner.

Aziz Ali Bey El Masri.

Egypt's hero, Aziz Ali Bey El Masri, arrived on Sunday last, and all those who have watched the progress of his case since his arrest at Stamboul over two and a-half months ago now breathe freely once more. He arrived early in the morning at Alexandria, where he was met by his brother-in-law, Ali Pasha Zulficar, the Governor of Cairo, and a deputation from the Cairo Committee. Loud cheers were raised by the crowd of natives on the quay, and Aziz Bey on landing was accorded an enthusiastic reception. He left by special train for Cairo, where another ovation awaited him. Even at the house of his brother-in-law, where he is staying, crowds of natives, high and low, waited in the hopes of catching a glimpse and being able to cheer him.

Aziz Bey has been busy calling on all those who had taken an interest in his case. The afternoon of his arrival he drove to Abdin Palace, where the Khedive received him, and he has since called at the Agency and seen Lord Kitchener, whom he thanked for the assistance the British Government had given him. He has since his arrival been freely interviewed by representatives of the local Press and whole columns have been filled with accounts of what took place at the trial and of the charges preferred against him. The gallant officer, who expressed to me his deep gratitude to the British nation and the British Press, appears to be somewhat tired, and is now taking a well-earned repose after his terrible experiences. He is disinclined to discuss, *ad infinitum*, the details of his case. In fact, he says he wants to forget it; for he feels that whatever mistakes have been made will in due time be repaired.

The Murder of Captain Fawcett.

Alexandria received a terrible shock on Monday when it learnt that Captain Samuel Fawcett, Marine Superintendent of the Khedivial Mail Line, had during the previous night been murdered in his house. The details are not quite clear yet, as the preliminary inquiry has not been concluded; but it appears that Captain Fawcett, who lives alone in the Gumrook (Customs) quarter, returned home at about 11.30 on Sunday night, and, ordering a cup of tea, read the paper for a short time and then went to bed. At about one o'clock his servant, who sleeps on the premises, was awakened by his master calling out to him that someone was in the house. He states that he saw Captain Fawcett come out into the corridor with a candle and that he was then attacked by two or three men (he is not clear as to the number), whereupon he rushed out to warn the *bowab* and the two fetched the police.

When they returned they found Captain Fawcett lying dead on the floor of the corridor in a pool of blood and with the candle under him. He had been brutally stabbed in several places in the chest, at least two of the wounds proving fatal. An inquiry was at once opened, and the cook and the *bowab* were detained. Neighbours testified that at about the time of the murder they heard movements on the roof. The police have now arrested two natives, one, Abdullah Hassan, a notorious burglar, who was implicated about five years ago in another murder case, and who was found to have injuries on his

head and foot. Witnesses have come forward to testify that he was sitting, uninjured, at a café in the same street as Fawcett's house earlier in the evening, and that he was seen limping down the same street at about the hour the murder took place. The police doctor appears to confirm the theory that he sustained his injuries in a fall from the roof. The other arrested man is also a bad character, and it is believed that suspicion rests on him owing to some bloodstains on his clothes. A coil of rope has been found in Captain Fawcett's house, and it is assumed that the murderers—from the state of the house there would appear to have been more than one assailant—used it to enter the house. For this reason suspicion rests on the servant as being an accomplice. His evidence has so far proved most unsatisfactory and contradictory. The *bowab* has in the meantime been released, as there is no evidence against him.

The inquiry continues. The police theory is that the murderers entered the house in order to steal, and that, being detected, they attacked Captain Fawcett. The latter was a most popular and respected member of the British colony. He had been in Alexandria for the past thirteen years, and his loss is much felt by his large circle of friends.

EGYPTIAN LEGISLATION.

The Judicial Adviser's Report.

(By Our Cairo Correspondent.)

The annual report of Sir Malcolm McIlwraith, Judicial Adviser to the Egyptian Government, which has just been published, is, as usual, full of interest, and contains many remarks on the progress of work during 1913 that are worthy of note. It is also remarkable for the very clear manner in which the various statistics are set out, and for the innovations which are noticeable on the system hitherto employed.

During the year under review some adjustments in regard to the disposition and size of the various categories of tribunals were made. As stated in the last report, the institution of the Cantonal Courts has enabled the number of Summary Courts to be increased. During 1913 thirty-one such courts were established, and two more are about to be set up in Cairo; a Central Tribunal was created at Mansura, one of the most important commercial centres of the Delta; and seven more Cantonal Courts were instituted, so that the native tribunals of Egypt will henceforward consist of eight Central Courts, ninety Summary Courts, twenty-eight Markaz Courts, and 235 Cantonal Courts. Yet notwithstanding these additions and modifications, the country does not appear to be over-endowed with law courts, for the work still shows a decided upward tendency.

Native Civil Jurisdiction.

The civil and commercial work of the Native Tribunals continues to increase considerably. The institution of Cantonal Courts affected the work of the Summary and Markaz Courts. The latter, in so far as civil cases were concerned, were abolished in February, 1913, and their arrears—3,475 cases—were taken over by the Summary Courts. The number of cases entered for trial by these courts increased by 35,123, or 20.4 per cent., and notwithstanding the fact that "owing to the rush of litigants to make their claims before the provisions of the Homestead Exemption Law came into force, the number of cases rose from 14,414, which was the average for the month during the preceding year, to 32,363 in March," the number of cases awaiting trial at the end of the year was reduced by 14 per cent. The same satisfactory feature is not revealed in the other courts. In the Appeal Court and the Central Tribunals (in Appeal) the number of cases entered for trial decreased by 5.5 and 8.9 per cent. respectively, yet those awaiting trial at the end of the year had increased by over 8 per cent. in each case; whilst in the First Instance Central Tribunals the increase in cases awaiting trial at the close of the year was double that recorded in new cases entered.

The Cantonal Courts.

As has been mentioned, the Cantonal Courts, which in the first year of their institution (1912) numbered thirty-six, have been increased to 235. Before them were brought 251,236 civil cases, of which 34,087 were Summary Court cases deferred to the Cantonal Courts with a view to effecting a compromise, and 1,756 were brought before that jurisdiction by agreement between both parties. The percentage of cases involving amounts under £E5 was 88.1. Of the Summary Court cases brought before them, 12.4 per cent. were settled by agreement between the parties, and 21.2 per cent. of the cases within their competence were similarly dealt with. The number of cases awaiting trial is 14,676, and of those in suspense 1,969, which "may be, on the whole, considered as satisfactory, allowance being made for the fact that the notables are still new to their duties."

The Judicial Adviser writes "that the general result is fairly satisfactory. The large number of civil cases brought before them would appear to show that they supply a general demand for a cheap and speedy system of justice, although it is questionable whether the supply has created the demand or whether the absence of any such tribunals in the past constituted a denial of justice. . . . There is, however, a general conviction that these courts are better fitted to deal with small debts and actions concerning movable property than with more complicated questions of real property." In consequence of the inexperience of the judges, many irregularities occur, "the most important of which is their tendency to encroach upon the jurisdiction of the Summary Courts." However, as soon as an irregularity is noticed instructions on the matter are promptly issued by the Ministry. On the renewal of mandates the greatest care is being taken to eliminate notables who have proved unsatisfactory and to replace them by better qualified men. That the notables as a rule give their decisions on equitable grounds is proved by the fact that the Summary Courts confirmed the sentences in the majority of the appeals lodged with them. The Judicial Adviser says that "the weak spot in the system is the execution of the judgments by the Omdas, of whose action complaints are frequent. For various reasons, they appear to be unwilling to carry out their duties in this respect, and the matter is one which requires considerable investigation." By all accounts it is not only in this respect that the Omdas have proved unsatisfactory.

Native Criminal Jurisdiction.

The criminal statistics constitute again an unpleasant feature. Crime has increased by 8.2 per cent. Whilst murder (for the first time for many years), rape, and destruction of crops show a decrease, second offences, manslaughter, arson, serious assaults, and cattle poisoning are on the increase, serious assaults leading the way with 61.2 per cent. increase. Second offences, which alone account for 12.5 per cent. of all the crimes, show a marked tendency amongst criminals to resort to large populated centres, and it is evident that the law in this respect is not being adequately enforced. From the statistics adduced, it appears that the urban population bears a much larger proportion of crimes of all kinds than the rural population.

Criminal inquiries increased from 212,916 to 231,429, of which 191,281 were classed as real cases. Misdemeanours, which for years had shown a decided tendency to increase, practically speaking remained stationary, and the Judicial Adviser remarks that "although on analysis this will not be found to be so satisfactory as it appears, yet it is a step in the right direction."

With regard to the work of the courts, 2,147 applications were made for cassation on points of law. Only forty-two of these were admitted. The Assize Courts had to deal with 6 per cent. more cases—2,442—which is, of course, the natural result of the increased criminality. Acquittals have been slightly more

"MILKMAID" BRAND

Sterilised Fresh Milk

Obtainable from all leading Grocers and Druggists in Egypt and the Levant.

Digitized by Google

numerous; but it is shown that in this respect Egypt compares very favourably with France. The courts appear to have done their work expeditiously, but "it is regrettable that the interval between the commission of a crime and its final disposal continues to increase in duration." As in the civil, so in the criminal jurisdiction, the work of the Summary Courts has been increased by the abolition of the Markaz Courts in the provinces, and has risen from 40,521 to 81,612 cases (misdemeanours and contraventions). In delictual cases there is a marked increase in acquittals in the most important categories, which "would appear to disclose neglect in the preparation of cases or in their presentation," whilst the table of sentences certainly shows that these courts are too inclined to leniency. A general rise is noted in the periods of preventive arrest, this being "especially marked in the percentage of persons in Assize Court cases who underwent preventive arrest for periods of five months and upwards." The comparative tables of English assize statistics show that these periods are abnormally high.

Juvenile offenders show a slight decrease (12.6 per cent.). The Judicial Adviser draws attention to the fact that parents now make a practice of availing themselves of Law No. 2 of 1908, dealing with juvenile vagrants, in order to intimidate their unruly children; but although the machinery of the law is not intended to assist in the maintenance of domestic discipline, yet "the result is probably more satisfactory than if the State were compelled to lodge and feed a number of children whom it is the duty of their parents to look after." As last year, the serious problem of dealing with the very large number of vagrant children who infest the cities is dwelt on. It is pointed out that comparatively few can be arrested and sent to the reformatory, and that there do not exist factories and industries to enable the children to obtain work. "The matter is one of great and increasing urgency, and should be taken up by philanthropic societies and agencies or charitable persons."

(To be continued.)

REFUGEES FROM DARFUR.

The Nahud correspondent of the *Sudan Times* reports the arrival there on April 11 of a large party of the Beni Gelul, who had fled with their families and property from El Fasher. When they arrived near the Kordofan border they were overtaken by a force which had been sent by Ali Dinar to take them back to El Fasher. A fight ensued between the two parties, which cost the fleeing tribe five of its best men, and the Sultan's force a much graver loss.

The refugees suffered much hardship in their flight, many of their number having died from thirst. When news of their approach reached El Nahud. the Inspector, accompanied by the Mamur and force of police, left the town in order to meet them. He also issued orders to the owners of wells on the way to render them every possible help, and to supply them with the water they needed without any charge.

THE NEAR EAST.

THE NEAR EAST is on sale at all Bookstalls and Newsagents in the United Kingdom. Should any difficulty be experienced in obtaining the paper, readers will oblige by notifying the Manager. Abroad THE NEAR EAST may be obtained in:

PARIS. Librairie Hachette, 79, Boulevard Saint-Germain; Librairie Galignani, 224, Rue de Rivoli, and at Railway Bookstalls.
VIENNA. Goldschmiedt Brothers, Zeitungsbureau, Wollzeile, 11.
CONSTANTINOPLE. Economic Co-operative Society, Pera; Benjamin Rawe, British Oriental Bazaar; D. Marianopoulo, 280, Grande Rue de Pera.
SALONIKA. Librairie Francaise, Rue Sabri Pasha.
SMYRNA. Dem. Tzannou, Petite Rue de Rose.
BEYROUT. Sarrafian Brothers.
JERUSALEM. Palestine Educational Store, Jaffa Road.
CYPRUS. Cababe and Wilson, Nicosia.
CAIRO. Diemer and Company, Shepheard's Buildings; The British Library, Sharia Kasr-el-Nil, and at Railway Bookstalls.
ALEXANDRIA. Librairie Schuler, Rue Cherif Pasha; Nacamulli and Company, 12, Rue Sesostris; Librairie Calebotta, Rue Cherif Pasha Librairie Cauro, Rue Cherif Pasha; The Eclectic Bookstall; F. Diemer, Cairo Station.
PORT SAID. Charles Evans, and on board vessels in the harbour.
KHARTOUM. Sudan Stationery and Bookstore, and Victoria Bookstall
ATHENS. Eleftheroudakis and Barth, Place de la Constitution.
SOFIA. Librairie de la Cour.

Readers in France who desire to secure THE NEAR EAST regularly are informed that any Newsagent in that country can obtain the paper for them through Messrs. Hachette, in Paris. In the same way any Newsagent in Belgium can readily obtain the paper from the Agence Deohenne, Bruxelles.

NOTES FROM ROUMANIA.

(FROM OUR OWN CORRESPONDENT.)

BUCHAREST, May 2.

The King's Tour.

The excursion on the Danube which his Majesty King Carol, in company of the other members of the Royal Family, will make shortly, as in previous years, will be especially important, as his Majesty will, when visiting Silistria, which has recently been added to his dominions, lay the first stone of large barracks and other military buildings, and thence will visit the new territory, going as far as Dobritch. The day of the departure is fixed for May 10, and the excursion will last ten days. At Verciorova the King will be greeted by a representative of the Kaiser Franz Josef and on the Servian frontier by a deputation from King Peter, whilst down the river at Reni the Tsar of Russia will likewise send a representative.

The Visit of Ottoman Ministers.

The two Turkish Ministers, Talaat Bey and Damad Enver Pasha, have announced their intention of paying a visit of some days to this capital. It is stated at the Ottoman Legation that the visit is one of courtesy, and is in return for those paid by M. Take Jonescu and General Coanda. It is believed here generally that it has originated in the strong wish in Turkey for a still firmer friendship with this country than at present exists, the former believing that an understanding with Roumania can be most useful. It is even declared in some circles that the visits have a far deeper meaning than at first meets the eye, and that an actual defensive Convention is to be arranged between Turkey and Roumania, though inquiries in trustworthy quarters fail to elicit any confirmation of this suggestion.

The Russification of Bessarabia.

Much dissatisfaction is felt at the rumours of a strong policy of late displayed by the Russian authorities for the Russification of Bessarabia. It is stated that with this end in view for a long period Russian peasants in hundreds from the Governments of Tula and Rostoff have been persuaded to settle in Bessarabia, being given special facilities as an inducement.

This news hardly corresponds with that published some little time ago, that the Tsar intended to present Roumania with an important portion of Bessarabia as a wedding present to Prince Carol and with a view of securing Roumanian friendship.

Educational Measures.

A new idea in education is to be introduced into this country by the formation of a group of "wandering players" under Government direction and payment. The best of the actors at the National Theatre will take part in turns; instructive and patriotic pieces, with cinematograph films, will form the performances. All smaller towns and larger villages will be visited. The idea is to be inaugurated to-night at Ploeshti, with a performance under the patronage of H.R.H. the Crown Prince Ferdinand, when a classical piece by the Roumanian writers Josif and Aughel and a film giving episodes in the earlier struggles for liberty will form the programme.

A Story of the War.

An interesting and hitherto unknown episode of the second Balkan War, which relates how near King Ferdinand of Bulgaria was to being made prisoner, has been published in a Roumanian paper.

When the Roumanian cavalry was within three kilometres of Sofia, and when all routes to the capital were occupied by General Mustatza's horsemen, that commander, wishing to show the prowess of the Roumanian cavalry, started for Sofia with a squadron, resolved to seize King Ferdinand, and bring him as a prisoner to Bucharest. When the Chief of Staff General Averescu heard of this move he sent officers in motor-cars to the four roads leading to Sofia, with instructions to catch up with General Mustatza at all costs, and to order him to return, as King Carol had no wish to take King Ferdinand prisoner. The squadron was only caught up very close to Sofia, and so the ambitious general was forced to give up his unauthorised plan at the last moment.

NOTES FROM BULGARIA.

(From Our Own Correspondent.)

Sofia, May 2.

The Narodno Sobranje.

After a fortnight's adjournment for the Easter holidays, the Chamber resumed its sittings last Wednesday. In the first place the Royal decrees granting the Government 3/12th of the Budget for 1912, for carrying on the Administration during October, November, and December, 1913, and also 3/12th of the same Budget for January, February, and March, 1914, were submitted for sanction. After a heated discussion the Government proposals were adopted, and the emergency measures taken by the Cabinet before the sitting of the Chamber were thus legalised.

On May 1 the Socialists celebrated Labour Day, and all the labourers of the capital, led by their Parliamentary deputies, made demonstrations through the streets of Sofia and stopped before the building of the Narodno Sobranje. A special deputation entered, and handed a petition to the Prime Minister and the President of the Chamber stating their demands for legislative reforms tending to the settlement of the labour question. No disturbance whatever occurred during the demonstrations. The Finance Minister, Mr. Toncheff, has elaborated the regular Budget of the country for 1914, which attains the figures of 255,000,000 frs. (£10,200,000) and has been approved by the Cabinet. It will be submitted to the Chamber next week, and it is believed that it will have been adopted by the 15th of the month.

Resumption of the State Trial.

After an interruption of three weeks, the State Tribunal resumed its public sittings last Wednesday. The proceedings were begun by reading the voluminous indictment, a process which will last about ten days. No public interest is manifested in the matter, and there is hardly any attendance in Court except the defendants and their counsel.

Improvement of Greco-Bulgarian Relations.

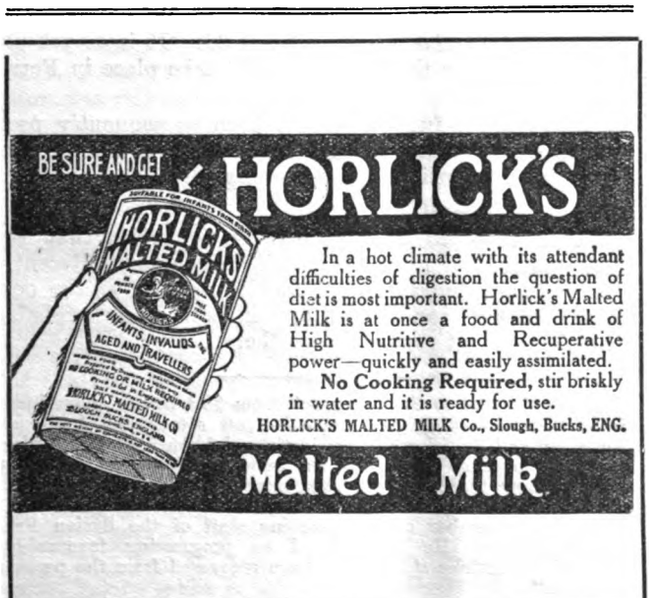
A decided improvement is noticeable in the official relations of this country with Greece, which desires as soon as possible to resume normal relations with Bulgaria, while Servia, on the other hand, constantly puts obstacles in the way. Since Bulgaria is far more closely interested commercially in Greece than in Servia, the Bulgarian Government is anxious to second the efforts of the Cabinet of Athens. Both Governments have agreed upon the appointment of M. Naum as Hellenic Minister here, and of M. Tasaroff, the present Bulgarian Chargé d'Affaires in Vienna, as Bulgarian Minister in Athens. Both Ministers are expected to take up their respective posts shortly.

Administration of New Bulgaria.

The Prime Minister, Dr. Radoslavoff, who is also Minister of the Interior, has prepared a Bill, which will be submitted to the Sobranje, for a separate administration of the new territories. This will lead to a wholesale reorganisation of the administrative staff in the provinces of the Littoral.

Macedonians in the Servian Army.

According to letters published in the Servian Press, the new recruits drawn from the Macedo-Bulgarian population of Servia-Macedonia have shown the greatest unwillingness to undertake military service in the Servian Army, and a detachment of recruits from Sktip publicly refused to take the necessary oath of allegiance when paraded for the purpose at the garrison town of Kraguyeratz, in Old Servia.



THE BULGARIAN CHURCH IN THRACE.

In pursuance of their considered policy for the debulgarisation of Macedonia the Servians have suppressed those of the former Bulgarian sees in Turkey which fell within their territorial jurisdiction in virtue of the Treaty of Bucharest. The Bishops of Ochrida, Bitol (Monastir), Skoplye (Uskub), Dibra, and Veles (Kuprulu) were compelled by the Servian authorities to resign their sees, and were then permitted to retire into Bulgaria. Shortly after this the Exarch Joseph withdrew from Constantinople and took up his residence in Sofia, so that the spiritual chief of the Bulgarian Church was, for the first time, to be found in the political capital of the Bulgarian nation. Of the Exarchist sees formerly in Turkey only two passed to the kingdom as the result of the War of Liberation—Strumitza and Nevrokop—but a new bishopric is being formed for Gumuldjina, and for this Mgr. Boris, exiled from Ochrida, is the Bishop-designate. It is expected that an appointment will shortly be made to the Exarchist see in Adrianople, and Mgr. Neophyt, who was deprived of Skoplye (Uskub) by the Servians, is believed to be the future Bishop. Mgr. Meletii, deprived of Veles, has been sent to administer the Bulgarian Church in Constantinople, and Mgr. Kosma, deprived of Dibra, is expected to go to Nevrokop on the first vacancy. No provision, however, has as yet been made for the extruded Metropolitan of Monastir. With the cession of the Bulgarian Dobruja to Roumania territory has been taken from the sees of Rustchuk and Varna, and this has been placed under the spiritual jurisdiction of Mgr. Bartolomei, the Roumanian Metropolitan of the Lower Danube, who has been showing great activity in introducing the new liturgy with the new political regime.

NOTES FROM SALONIKA.

(From Our Own Correspondent.)

Salonika, April 30.

A Correction.

By some unaccountable aberration of mind I wrote in my last letter (April 15) that April 7 was St. George's Day, whereas it was really the anniversary of Greek Independence, and we are still looking forward to celebrating with the customary ceremonies the festival of St. George on Wednesday next, May 6, that being April 23 (Old Style). The fact is, when there are so many saints' days and fêtes in an official calendar, not to mention the anachronism of an "Old Style," one is apt occasionally to get somewhat mixed up.

The Refugees.

The coming and going of refugees are on a greater scale than ever, the arrivals by sea of Greeks from Rodosto being just now at the rate of two or three thousand daily. Naturally our authorities are sorely taxed to know what to do with them, but they are sending them off into the interior as fast as they can possibly transport them. How, when their destination is reached, they are to live until the harvest time of next year is another big problem our Government will have to solve, the probability being that the vast majority of them will have to be fed until then, seeing that the districts they are to settle in are altogether bare and desolate. And while these, mostly poverty-stricken and for the time being practically helpless, unwelcome thousands are flocking into the country, the Athens newspaper *Esperini* pours out the vials of its

Digitized by Google

spite against the unfortunate Jews, whom it accuses of still refusing to accept Greek domination. It also counsels our new Governor-General to apply the law in the new provinces, and especially in Salonika, against the Jews with the utmost rigour. This rabid paper further adds that one way to Hellenise this town is to encourage the immigration in mass of Greeks, who would submerge the Jewish element. All one can say is that, if this is the policy to be followed, when the Jews here are thus submerged or driven out it will mean the death of Salonika. To say the least, this style of writing, so much indulged in by the Greek Press, is much to be deplored, as it makes all friendly feeling impossible and fosters ill-feeling between the races.

Fresh Band Activities.

A few days ago a good number of wounded soldiers are said to have been quietly brought in here, but nobody seems to know where or when fighting had taken place. There is, however, a strong feeling about that Bulgarian bands are being organised on a very extensive scale—one report gives the number as 18,000—with the object of creating trouble for Greeks and Serbs alike, and to provoke disorders necessitating the intervention of the Powers and the revision of the Treaty of Bucharest. The Serbs are said to have just made big hauls of rifles, bombs, explosives, and munitions of war in Bulgarian houses in the Ochrida and Resna districts; so perfect peace does not yet loom large in the future.

Sultan's Accession Day.

Monday last, being the anniversary of the accession of the Sultan of Turkey, the Turkish Consul-General here, Fuad Selim Bey, was officially visited by the foreign Consuls, the Grand Rabbi, and the Turkish notables of the town. The Consulates, as is customary on such occasions, flew their respective flags; but the Greek flag was conspicuous by its absence. As no mention is made of any of our military, civil, or religious authorities calling on the Turkish Consul-General it is to be presumed that relations between the two countries are somewhat strained.

M. Venizelos's Tour.

M. Souphoulis, transferred from Samos, to succeed M. Repoulis, the late Governor-General of Macedonia (whose duties as Minister of the Interior necessitated his return to Athens), arrived here this morning, and was received with the honours which, by Royal decree, it has just been fixed must be rendered to Governors-General. Over a week ago it was announced that, on coming here to take up the duties of his post, he would be accompanied by M. Venizelos and by M. Ractivan, the Premier wishing to judge for himself the needs of the new territories and of Salonika. The Chamber of Commerce and sundry committees have been working at the elaboration of schemes for the development of Salonika and the new territories, to be submitted to the Prime Minister, in whose enlightened views all our hopes of salvation for this town and district are centred. It was, therefore, a great disappointment when we were informed that, owing to the present unsettled political situation, M. Venizelos's tour would have to be postponed. Now, at the last moment, we learn from an Athens telegram that MM. Venizelos, Repoulis, and Ractivan are to leave this afternoon for this town, to arrive here to-morrow evening, and to leave on Sunday morning for Drama and Kavalla, their tour to last about ten days. It is much to be hoped that M. Venizelos will return this way, for twenty-four hours seem hardly sufficient in which to discuss all the vital questions to be brought before him.

THE PUBLISHER

would be obliged if Readers would inform him if they experience any difficulty in obtaining copies of the paper.

DEATH OF COUNT LEWENHAUPT

(From Our Own Correspondent.)

Teheran, April 23.

News was received in Teheran on Monday that Major Count Lewenhaupt had been seriously wounded, and taken prisoner in an engagement with some brigands east of Hamadan. A detachment of gendarmes, headed by Major Sievfahrt, immediately left Teheran with Dr. Becker to go to his rescue. The following day we learned the worst, when a telegram arrived announcing the death of Count Lewenhaupt and two Persian officers.

For some time past the whole country side between Kazvin, Burujird, and Sultanabad has been laid waste by robbers, and the roads between these places have been unsafe and practically impassable. Matters came to a crisis when Major Moeller, a Swedish officer, returning from Burujird, was attacked by Abbas Dagabadi, near Sorkhab, and was wounded in the leg, and one of the Persian officers with him was killed. The ringleader, Abbas, was killed.

It was then decided to send out an expedition from Teheran against these brigands, and on Monday, April 13, Count Lewenhaupt left here with a number of gendarmes and officers for the purpose of destroying these robber bands. It appears that they were working in concert with other expeditions of the gendarmerie, under Major Terrell from Hamadan, and Major Karlberg from Kazvin. All went well with the gendarmes, and they soon came up with the robbers, from whom they succeeded in recovering much of the loot and animals that had been stolen. From all accounts it would seem that the Count's party fell into a cleverly laid ambush. On Sunday he had been engaged in a sharp conflict with the enemy, and at sunset he entered the village near Nobaran, some seventy miles west of Hamadan, whence the gendarmerie drove out a number of robbers who were known to be in hiding there. Count Lewenhaupt with two other officers went on to the top of a roof to watch the operations, when he noticed some robbers below, whom they fired on and killed. At once the whole village seemed to break out into a volley of firing, and the Count and a cadet, Seif-ullah, were killed on the spot. Another Persian officer was seriously wounded, and died the same night.

The whole community deplores the loss of such a gallant and able officer as Count Lewenhaupt, who had been a Chief Instructor to the cavalry of the Government gendarmerie in Teheran, and the sympathies of all are with his widow, Countess Lewenhaupt, whom he leaves with two small orphan sons.

No less to be mourned are the deaths of Major Hesn-es-Sultaneh, the superior Persian officer in the gendarmerie, and of the young Lieutenant Seif-ullah, who both fell with their leader.

Since the sad news reached Teheran on Tuesday, little information has come to hand. Major Lewenhaupt's body is being brought into Teheran, and is expected to arrive here on April 24. It is as yet uncertain whether the interment will take place in Persia or in Sweden.

Many social functions have been consequently postponed, among them being the reception at the Russian Legation on April 23, this evening.

Governorship of Luristan.

It is reported in authoritative quarters that the Governorship of Luristan is still unoccupied. Recently the Nizam-es-Sultaneh had decided to take up the post under certain conditions, but it now seems probable that he will not consent to go there.

With reference to the paragraph from *The Orient*, reproduced in our last week's issue, reporting an attack by Arabs on American and British travellers in the neighbourhood of Tiberias, our contemporary states in its issue of April 29:—"Later advices show that the man shot near Tiberias, as reported in our last issue, was not Mr. George Scherer, but Mr. R. T. Schearer, a member of the teaching staff of the Syrian Protestant College. He is reported as progressing favourably. Most of the articles stolen have been recovered from the persons arrested."

SERVIA AND AUSTRIA.

(From Our Special Commissioner.)

Belgrade, May 3.

Never for a moment is one allowed to forget here that beyond the Danube and across the Save lies Austria-Hungary. Always in sight, by night and by day, is Semlin, the Dual Monarchy's frontier fortress, and it is pointed out with bitterness to the stranger from the rampart of the park beside the fortifications on the hill. After all, it is not to be wondered at; the horrors of the late war have been forgotten; the strife with Bulgaria is deplored; the acquisition of immense tracts of land in Macedonia is now taken as a matter of course; but never is the fact lost sight of that it was Austria-Hungary who impeded the Slav advance to the Adriatic, who was bent on keeping the Montenegrins and Serbs asunder, and did her utmost to make the eastern and northern frontier delimitations of Albania as unfavourable as possible to Servia and Montenegro. In the Red Book recently published by the Ball Platz in Vienna, Count Berchtold concisely defines (Dispatch No. 60) Austria's aims and policy during the late war. Two of the four points enumerated in this important dispatch directly concern Servia, namely, the "withdrawal of Servia from the Adriatic" (which resulted in the creation of Albania and led up to the second Balkan War) and "guarantees for Austria's economic interests, principally with regard to railway communication with Salonika," which in its turn led up to the purchase by Austria of the Orient Railway shares and the negotiations still pending concerning the internationalisation of the line.

The resultant feeling of mutual antagonism, smouldering but never allowed to die out, is one of the gravest effects of the war. Servia by herself cannot be expected to undertake a successful passage of arms with the Dual Monarchy; but there is a power behind her which let no man underrate—the power which wishes to link up Vladivostok with the Adriatic, thus acquiring a "warm water port" along the line of least resistance. Furthermore, Austria's attitude with regard to Servia and Montenegro—inasmuch as she opposed the extension of the latter's littoral by as much as one inch, and made her give up Scutari to the Albanians—has resulted in drawing the two Slav States closer together. The proposed commercial and Customs union between Servia and Montenegro may eventually lead to an absolute community of policy—even of national feeling—between the two, though, naturally, I have not been able to have this officially confirmed. It is significant, however, that Count Andrassy, the well-known Hungarian statesman, who has just returned from Montenegro, published an interview in the *Neue Freie Presse*, in which he stated that dissatisfaction was rife in Cettinje, and that a great many people were clamouring for "incorporation in the Servian Kingdom." The realisation of any such project depends almost exclusively on Austria herself.

The question of Albania torments Servia as much as it preoccupies Austria. It is less the *fait accompli* that irritates statesmen and strategists here than the delimitation of the eastern frontier. This, I am told here in the most authoritative circles, is progressing on the lines most unfavourable to Servian interests, which are mainly concerned with the facile protection and security of the railway lines to be built between Ochrida and Prizrend. The complaints are two-fold; on the one hand Albania has been given vantage points commanding Servian territory, thus necessitating an increase in the military force for defensive purposes, and secondly, the cost of railway constructions will be greatly increased (principally between Prizrend and Dibra) because the line, if it is to be built on Servian territory only, has to make a technically difficult and expensive detour to the east, instead of following the right bank of the Drin, as was rationally assumed would be the case by the writer on "Servian Railway Activities" published in The Near East, of March 20. On the other hand, the Austrian contention is that not enough territory has been ascribed to the new State, which is being "starved." It is regrettable that a happier delimitation could not (or cannot) have been found by means of compromise or compensation. There is no immediate danger, I am told; but, on the other hand, few statesmen are so bold as to consider the Albanian question definitely settled, and they are anxious to provide for and against eventualities. It is these eventualities which are the preoccupation of the moment, and they principally account for the latent antagonism between the Balkan Slav States and the Dual Monarchy.

Railway Plans.

M. Pashitch, the Prime Minister, accompanied by the Minister of Public Works, has left Belgrade for Mitrovitza, and I have been informed that one of the objects of the journey is to study the tracé of the Rashka-Mitrovitza continuation of the Skoplye-Mitrovitza narrow gauge railway. It will later be continued via Novi-Bazar to Uvatz in order to link up with the Bosnian line from Sarajevo. The survey has been drawn up by the Sociéte Franco-Serbe.

The newspapers state—and I believe the statement to be accurate, though I can obtain no official confirmation of it—that the preliminary survey of the line from Prilep to Tsarevo Selo, near the Bulgarian frontier (via Brod, Shtip and Kotchana), has been granted to a British company. The French company alluded to above, beside having been asked to survey the Rashka-Uvatz line, is to draw up the tracé of that section of the Adriatic Railway lying between Merdare (the line's present terminus) and Prishtina.

THE GENDARMERIE AT BURUJIRD.

In its issue of April 15 *L'Impartial*, of Teheran, gives an account of the operations of the Gendarmerie at Burujird, which opens with the statement that the expedition has nothing but success to chronicle up to date. It continues:—

"La situation peut se résumer ainsi. Au début des opérations, la gendarmerie s'est forcément tenue sur la défensive, les Lôrs entourant Bouroudjerde étant forcés de livrer combat. Après trois rencontres, les Lôrs, complètement battus, ont été obligés de quitter les environs de la ville. Leurs fortifications ont été prises d'assaut et rasés."

After defending the action of the gendarmes in following a cautious policy the account goes on to say:—

"Salar Ekram, chef des Yar Ahmadi, importante tribu de Lorestan, a été envoyé par le major Skjöldebrand en médiateur, en vue d'une soumission complète. Salar Ekram, après les premiers pourparlers, a écrit au major Skjöldebrand, le priant de suspendre les opérations en attendant la réponse des Lôrs.

"Souhaitons que le pacification de Lorestan soit ainsi terminée, et qu'une soumission complète des pillards termine cette campagne qui semblait si difficile. Les victoires successives de la gendarmerie ont certes rafraîchi les idées des pillards, comme la sévérité déployée leur a fait rudement sentir que l'expédition n'est pas allé à Bouroudjerde pour plaisanter.

"Les Lôrs ont quitté les villages du Silahkhor et se sont portés en masse vers les montagnes. La gendarmerie occupe les passes pour empêcher un retour offensif des pillards. Les environs de Bouroudjerde sont complètement dégagés. La population fait de continuelles ovations aux gendarmes et témoigne de son contentement."

PERSIA SOCIETY.

The Persia Committee held a meeting on Thursday afternoon last week at the House of Commons, under the presidency of Lord Lamington, and those attending included Mr. Dillon, Mr. Ponsonby, Mr. Morrell, Professor Browne, and Sir Thomas Barclay. Several resolutions were adopted at the meeting. It was resolved, in view of the approaching coronation of the young Shah in July, that the Government should be asked to urge upon the Russian Government the withdrawal from Northern Persia of the Russian expeditionary force. In another resolution emphasis was laid on the advisability of permitting the Swedish gendarmerie to operate throughout Persia, and not only in the southern provinces as at present. A third resolution was adopted with regard to a Trans-Persian railway from the north-west to the Indian frontier, and the Government was urged not to accept proposals on that subject until the approval of Parliament had been given.

NEAR EAST BOOKSHELF.

TURKS AND RAYAHS.*

Mr. Sidney Whitman in his new book about the Turks describes the fallen Sultan when in the height of his power. Those who look for the picture of Abdul Hamid of modern journalistic fiction or popular imagination will be disappointed. The author presents his readers with the portrait of a man unceasingly working for the welfare of his people, but enmeshed and choked within a wilderness of detail which should never have troubled the Imperial eye at all. Abdul Hamid was the slave of a faulty system, it burthened him like some horrible and incorporeal Old Man of the Sea, he strove against it, but the monster was his master. So fully was the Sultan's time occupied by what he considered it was essential that he should do himself that he had no time to keep in order his advisers, his favourites, and the rest of the people who made up the feared and hated "Palace Gang," and in time reaped, to his own detriment, the whirlwind of their sowing. But amid the multitudinous and overwhelming duties of his office the "Red Sultan" found time for the cultivation of personal friendships, for the performance of many acts of charity and kindness, and for the enjoyment of the society of birds. He also kept an eye upon the haughty diplomatists accredited to his Court, and at times restrained their pride within due limits. Mr. Whitman, indeed, expatiates at some length, but humorously withal, upon the magnificence of port and presence to be seen among the diplomatic colony of Pera, and slyly remarks that if an Ambassador can really enjoy the pleasure of being "somebody" in Turkey, it is very difficult for so stately a personage to take that exercise for which his digestion clamours, with the pompous display of dignity demanded by the protocol.

Passing from the Sovereign to his subjects, Mr. Whitman works hard to show that if the Turk is a Moslem he is not *ipso facto* a blackguardly and merciless oppressor—and, indeed, that he has been most unfairly laden with a burden of opprobrium for which some of his Christian subjects are responsible. Further, Mr. Whitman points out with much justice that the European Press for years past has been only too eager to publish any news tending to discredit the character or administration of Turks—because they are Moslems, just as it has frequently suppressed the unpleasant achievements of the subject races of the Turk—present or past—because they profess and call themselves Christians. In this connection we think Mr. Whitman runs the risk of misleading some of his readers by referring to the Christian subjects of the Porte as Rajahs instead of the more generally accepted transliteration Rayahs, and by describing certain Greek Uniat Christians as "Orthodox Catholics."

A good deal of space is devoted to a consideration of the Armenian difficulty in Turkey, a topic on which the author has much first-hand information, and he carefully describes the difference made between the treatment meted out to Gregorian Armenians in Russia and that reserved for them under the Ottoman dominion. He also makes it clear that at the time of the conspiracies the Turks, even in the extremity of the fear and excitement engendered by the Galata bomb-throwing, made a difference between Armenians and other non-Moslems, and even between the insurgent Gregorians and the loyal Armenian Catholics or Uniats. Like the Bulgarians, the Turks have ever been slow to uplift voice or pen on their own behalf, and Mr. Whitman is able to indicate to what an extent misrepresentation and journalistic imagination has added to the weight of accusations currently believed against the Turks on the subject of Armenian atrocities.

Much of Mr. Whitman's book refers to events of half a generation ago, and he deals with current problems only indirectly. His labours have been directed to a rehabilitation of the reputation of Turks in the past, and less to the indication of any future course of action, but the book is valuable for the fact that the author records the results of his own experience and observation, and does not dress his pages to catch the latest fashion of what the public is persuaded that it ought to think about Turks.

* "Turkish Memories." Sidney Whitman. (Heinemann. 7s. 6d. net.)

NEAR EAST BOOK NOTES.

Mr. Francis Griffiths (34, Maiden Lane, Strand) will publish, early in 1915, a volume entitled "The Ukraine and the Ukrainians." It will deal in a most comprehensive manner with the Ukrainian nation, sometimes referred to as Ruthenians and Little Russians. The author is Mr. George Raffalovich ("Bedwin Sands"), Hon. Sec. of the Ukraine Committee in London. A few chapters will be reserved for recognised authorities on special subjects, such as "The Ruthenians of Canada," "The Oilfields of the Ukraine," "The Folk-Songs of the Ukraine," "Turkey and the Ukraine," etc. The book will contain over 500 pages and fifty full-page illustrations, including sketches by Mr. Frederick Carter. The price will be 10s. 6d., and the edition limited to 2,000 copies, not more than half of which can be reserved for England.

"Hebrew and Babylonian Traditions," by Professor Morris Jastrow, jun., will be published in May by T. Fisher Unwin.

Stanley Gibbons' "Monthly Journal" for April contains the first part of an interesting article on "The First Stamps of Servia," and information about the new issues of Albania, Epirus, and Greece.

Professor Edward G. Browne has a new work in preparation with the Cambridge University Press dealing with "The Press and Poetry of Modern Persia." The first part is devoted to a translation of a Persian treatise, at present unpublished, written by Mírzá Muhammad 'Ali Khan "Tarbiyat" of Tabriz, containing a complete descriptive list of Persian newspapers, with a preface and introduction, followed by an essay on certain productions of the Persian Press other than newspapers, more particularly the books and pamphlets of European origin or inspiration which helped to the "awakening" of Persia. Besides translating this work, Professor Browne has added a number of footnotes and some additional particulars to the text. The second part, which will also be issued separately, contains a selection of "Specimens of the Political and Patriotic Poetry of Modern Persia," compiled and edited by Professor Browne.

Messrs. Constable will shortly issue a book of personal impressions and adventures in Persia and the Near East by Mr. Arthur Moore, who was for some time correspondent of *The Times* in Teheran. The book, which is to be called "The Orient Express," will include the author's experiences during the siege of Tabríz in 1909, as well as those of his ride of a thousand miles from Teheran to the Persian Gulf, and of Turkey in the time of Abdul Hamid and during the Balkan War.

SCHOOL OF ORIENTAL STUDIES.

MANSION HOUSE MEETING.

A large and influential meeting was held last Wednesday at the Mansion House, under the presidency of the Lord Mayor, in support of the School of Oriental Studies. Among the speakers were the Marquess of Crewe, Earl Curzon, Lord Reay, Lord Inchcape, and Sir Montagu Turner, and the attendance included the Persian Minister, the First Secretary of the Turkish Embassy, Viscount Peel, Lord Redesdale, Lord Lamington, Lord Sydenham, Lord George Hamilton, Syed Ameer Ali, Sir W. E. Garstin, Mr. G. A. Lloyd, M.P., Sir Charles Lyall, Mr. Stanley Machin, Sir Carl Meyer, Mr. Charles Roberts (Under-Secretary for India), Sir Walter Prideaux, Sir J. D. Rees, M.P., Sir J. Dunlop Smith, Sir Mark Sykes, M.P., and Mr. P. J. Hartog, secretary of the Oriental Studies Committee.

The secretary read a letter from the Earl of Cromer to the Lord Mayor, saying: "It is with the deepest regret that I find myself prevented by illness from attending and speaking at the meeting which you have been good enough to summon for May 6 in support of the School of Oriental Studies. For the last four years I have had the success of this scheme at heart, and have done my best to surmount the not inconsiderable difficulties which have attended its inception. The only difficulties now remaining are of a financial character, and although I do not under-estimate them, I feel that we can confidently appeal to the citizens of London to help us carry through, within the next few months, a scheme which will be of service to the metropolis as well as to the Empire. I am convinced that the foundation of the school, which will be at once a training ground for those about to proceed to Africa and the East, and a centre of intelligence in regard to our vast Dominions in those parts, is of vital importance to the continued prosperity of our Oriental commerce and of our Oriental administration. It is a matter in which we can no longer afford to remain in a position of inferiority to other countries."

The Lord Mayor said the merchant princes of London were thoroughly in sympathy with the establishment of this School of Oriental Studies, and the City was anxious to remove the reproach that, while England was the greatest Oriental Power in the world, it possessed no school of Oriental studies that could be compared with those of Paris, Berlin, Vienna, or St. Petersburg.

Earl Curzon, who was received with cheers, moved: "That, in view of the great Imperial and commercial interests dependent on adequate provision being made for instruction in the languages, the literature, and the social customs of Oriental and African countries, this meeting desires heartily to support the scheme for the foundation of a School of Oriental Studies in the City of London."

First of all, he said, he would like to express the gratitude they all felt towards the Lord Mayor and their regret at the absence of Lord Cromer, who had been chairman of the committee which for four years had been dealing with the question of the establishment of a School of Oriental Studies. In the main that school, when it came into being, would owe its existence to Lord Cromer's influence and untiring perseverance. As the Lord Mayor had pointed out, this was a movement to place Great Britain in the same position with regard to the countries of the East which were administered by us, or with which we had relations of diplomacy or trade, that was occupied by Continental Powers, whose interests in the East were far inferior to ours. Germany spent £10,000 a year on a school of Oriental languages at Berlin; France, £8,000 a year on one in Paris; Russia, £8,000 a year on one in St. Petersburg, to which had lately been added a sister institution at Vladivostock, with a similar endowment; while even Italy spent £4,000 for a similar purpose. It was hardly credible, having regard to the position of this country in the East, that there should not be an institution of the kind in the British Capital. Our officers and Civil Servants who went out to the East were left to pick up the languages of the countries to which they were sent from munshis or interpreters or the native assistants whom they employed. Nor was there any machinery for teaching these men what was, from some points of view, even more important than languages, namely, an acquaintance with the ideas, traditions, customs, and beliefs of Oriental peoples.

To know the languages of the East was a great thing, but he ventured to suggest that to know the spirit of the East was a greater. There could be no doubt that the real key to success was a knowledge of the national character of the peoples and their point of view, their religious beliefs, their scruples, their prejudices, perhaps. To teach such knowledge would, he thought, be an important part of the work of this School of Oriental Studies.

During the past quarter of a century more than one effort had been made to remedy the state of things in this country to which he had made reference, but none was successful, and they finally dwindled down to the excellent but rather precarious teaching of a small number of Oriental languages in University College and King's College, London. This state of affairs lasted until, in 1906, an influential deputation went to the then Prime Minister, Sir H. Campbell-Bannerman, and made to him a powerful representation of the case. The Prime Minister gave a most sympathetic reply, and the result was the appointment of a Departmental Committee, presided over by Lord Reay. In 1908 Lord Reay's Committee reported, and that report was the basis of all that had happened since. It recommended the institution of a School of Oriental Studies in London, to be ultimately incorporated in the University of London, and to be reasonably endowed by the Government. The next stage was the discussion in the House of Lords in 1909. Lord Cromer and he (Lord Curzon) incautiously took part in that debate, the consequences of which were that the then Secretary of State for India, Lord Morley, pounced down on them and told them that they were to formulate and organise a scheme for the establishment of the school, to find a site for the building, sketch out a scheme of management, and find the necessary income. Their committee had sat ever since. With regard to the site, their attention was directed to the splendid building of the London Institution at Finsbury Circus, which had a magnificent library, large rooms, and a theatre, and was in a quiet position, well adapted to study. With the aid of the chairman of that institution, Lord Aldenham, they succeeded in buying out the interest of the proprietors, the Government promised £20,000 or £25,000 for repairs and alterations, and the building of a new block of class-rooms, and Professor Simpson prepared plans which would be carried out before the middle of next year. This institution was to be established as a school of the University of London, but under a Royal Charter. The bodies represented among the Governors would be the University of London, several provincial universities, the Foreign Office, the War Office, the India Office, the Corporation of the City of London, the London County Council, the Royal Asiatic Society, the British Academy, and the London Chamber of Commerce.

The committee estimated the annual expenditure at £14,000, and towards this the Government had promised £4,000 and the Government of India £1,250. They had hopes that the London County Council would make them a handsome grant. In fact, the Education Committee of the Council had, he believed, recommended a grant of £2,000 a year. With regard to the City, he appealed to the Lord Mayor to use his powerful influence with the munificent body over which he presided. The school would be valuable to the commerce of the City, and once it was established the present Lord Mayor's successors would claim it, and rightly claim it, as a City institution. He greatly hoped that they might be assisted, too, by those admirable bodies the City Companies. The committee desired to raise an endowment fund. It behoved the merchants of the City who traded with the East to support the scheme if they did not want to see the plums from the cake and the spoils of commercial enterprise taken by their indefatigable foreign rivals.

Lord Reay, in seconding the resolution, emphasised the importance of understanding the manners and customs of the peoples of the East. The resolution was carried.

Lord Inchcape proposed, and Mr. F. Faithfull Begg seconded, a resolution appealing to the commercial community of the City and the general public for funds to enable the school to be opened in 1915 on a satisfactory financial basis. This also was adopted.

The Marquess of Crewe proposed a vote of thanks to the Lord Mayor. He trusted that all those connected with the City of London would take a prominent and noble part in supplying the needs of this School of Oriental Studies, and he was certain that countless as were the objects which had been promoted and pressed forward in the Mansion House, there were not many more worthy of general support than the cause they had met to advocate that day.

LETTERS TO THE EDITOR.

The columns of THE NEAR EAST *are always open for the discussion of subjects of general interest to its readers. The publication of such letters must not be taken, however, as indicating that the views expressed by the writers are those of* THE NEAR EAST.

THE TIDE OF PERSIAN AFFAIRS.

To the Editor of THE NEAR EAST.

Sir,—There was a deal of intrigue and counter-intrigue, "sensibly visible" in connection with the recent appointment of the Samsam-es-Saltaneh as Governor of Ispahan, which post, however, he took up in spite of all the intrigues against him. From what I hear I fear he now regrets his decision to accept the post. He is a greatly changed man from what he was in 1909, when he took forcible possession of the city; besides which he does not find things so easy, having from the very first met with Russian (aided by German) opposition and intrigue. The Russians naturally resented his appointment, and, to make things worse, the Russian candidate for the Ispahan Governorship (Sardar-i-Zafar) has taken up his residence in the city. He professes, so I am told, to have gone there to look after his property, and intended to remain only a short time, but he does not seem anxious to leave, rather does he seem inclined to "bide his wee" until the Samsam is utterly disgusted and takes *his* leave. It is openly said that the Sardar and the Russians are "hand in glove" and are secretly working for this object—not at all an unlikely surmise. Unfortunately, too, the Belgian Agent of the Treasury seems to worry the Samsam. As he is greatly influenced by the Russians his action is rather significant. Previous Governors used to be paid by the Treasury Agent a fixed allowance for the Ispahan Regiment, the police, road-guards, etc. Now the Agent refuses to pay without first being satisfied not only that the money is really spent for the intended purposes, but that the stated number of soldiers, police, road-guards, etc., are really enrolled and in evidence and properly paid; in fact, the Agent desires to exercise a real control over the Governor's budget; but the Samsam does not approve the innovation, with the result that he gets no emoluments at all. The Agent's endeavours to prevent useless expenditure are laudable and quite correct, but it is rather strange that nothing of the kind was attempted during the tenure of office of the Sardar-i-Zafar and the Sardar-i-Ashja, both of whom are friendly to Russia.

It is stated that the Zil-us-Sultan is expected to return to

Digitized by Google

Persia for the Coronation of the Shah in July. His son, Akbar Mirza, has left Ispahan for Teheran to meet him, and as a corollary the manager of the Russian Bank followed close on his heels. It is within the range of Persian politics that the Russians may be aiming to bring back the Zil as Governor of Ispahan, in which case it is conceivable that there would be active opposition from the Bakhtiaris and more trouble for the unhappy people.

The Gendarmerie have had a most unfortunate set-back both at Kazerun and in the Lur country, yet they keep on "pegging away." The next force to be raised is at Ispahan, where Major Folke, as officer in command, lately arrived with a nucleus of thirty men; 200 are to be transferred from Burujird and 400 are to be raised locally. This force should eventually prove to be of great advantage in this district, since the wild Boer Ahmedis are again blocking the Ispahan-Shiraz road, and the road to the north of Ispahan is also insecure. It is somewhat strange that 200 gendarmes should be moved from Burujird at a juncture when it is presumed that a force is being specially raised with which to subjugate the Lurs who are blocking the advance of the Khorremabad Railway, but the ways of the Persian—as of the British—Government smack of the ways of Solomon's "man with a maid."

As stated in your Financial Section on March 3, Germany is doing her best to push her influence in the Ispahan province especially. The newly-appointed Consul is, indeed, likely to find plenty to do, since several influential Persians have already applied for German protection—against what or whom?—and the present German representative at Ispahan has already hired whole Persian villages and has brought others under his influence by renting them and then re-letting them to the self-same villagers at an enhanced rental; he not only thereby makes a handsome profit without risk or trouble, but brings the inhabitants under German protection and tutelage—shade of Beaconsfield! Germans at Ispahan!!—the mere recital is enough to make him turn in his grave. What a tribute to British diplomacy! We can only assume that the British Government is deliberately selling our birth-right to the Russians and Germans for something *less* than a mess of potage or that it is being utterly out-manœuvred, to our lasting disgrace. If we have not by our wibble-wobble policy *driven* a large number of the highest and most important personages into the enemy's camp we have at least allowed them to *glide* there through sheer incapacity to prevent it. British prestige counts for very little, and the less said about British prestige in Persia the better. The less likely are we to be laughed and sneered at. So far as trade routes and trade are concerned it would really seem as if the British officials, instead of assisting British trade, do their utmost to injure it. Goods which arrived at Bushire in December had to be re-shipped to Ahwaz at the end of March because there was no transport. And why? Because of an arrangement, said to have been the invention of British intelligence, whereby a so-called "hire" department was instituted in Bushire to control the number of animals hired in proportion to the stock held by the applicant for animals. Previously anybody was at liberty to engage as many animals as they required and to pay any hire agreed upon, but now the "hire" department allots the number of animals and fixes the rate of hire, the parties more nearly concerned being coerced and forced to adhere to this marvellous agreement, whether they like it or not. This will doubtless presently have a further retrograde effect on British "prestige." The Hamburg-American Line of steamers will shortly open agencies for transport all over the country. The Germans "will have none" of the "intellectual invention for impeding transport"; their steamers will bring goods out more rapidly, get them up country with greater facility, less delay and cost, and *we can only look on and smile.*—Yours obediently,

London, May 5, 1914. ABDULLA.

THE THRACIAN PERSECUTIONS.

To the Editor of THE NEAR EAST.

SIR,—The letter from the chairman of the Anglo-Hellenic League which was published in several papers last week is a painful instance of the slow death of prejudices. The Greeks would be merely paying for their iniquities during and after the war if the facts alleged by the Hon. Pember Reeves were at all near the truth. It is almost criminal to appeal to the sentiment of the public in such a way. I quite appreciate the fact that sentiment is the only argument that can be used in this connection, but sentiment should go all the other way. Judging by the support the Ottoman Association is now receiving from all parts of the country, I thought the old legends were things of the past. Here is a chairman of a pro-Greek Society who not only ignores the behaviour of the Greeks in the Epirus, who not only forgets their treatment of Jews and Moslems in Salonika and elsewhere, but who actually has the boldness to ask for sympathy for the "victims of the Turks." The Turks fly for their lives from New Greece; those who are too poor to leave live in constant fear; and sympathy is requested for—the Greeks!

While scores of thousands of Moslems were murdered in cold blood we were silent. Some people thought, perhaps, that once the war was over the last would have been heard of the lies disseminated by the so-called Christians of the Balkans. These people, who set up a most abominable precedent in civilised warfare, who stole, burned, pillaged, raped and murdered, are asking for sympathy! The Crusaders, they called themselves! Not Christian Crusaders, at all events—agrarian Crusaders, mere land-grabbers, if Mr. Reeves likes.

Before he rushes into print with exaggerated tales again he should think of the other persecutions—of Moslems this time—and of the Greeks' behaviour in Epirus and in their ill-gotten new possessions. Were it true that the Turks hunt the Greeks out of Thrace even more roughly than Mr. Reeves alleges, I submit to the common sense of your readers who know the Near East and the true facts about the last war that the Greeks deserve even worse punishment.—I am, Sir, yours obediently,

A MEMBER OF THE OTTOMAN ASSOCIATION.

May 1, 1914.

TURKEY AND RUSSIA.

To the Editor of THE NEAR EAST.

SIR,—I have received to-day THE NEAR EAST of March 6, in which there appears a letter dated February 25, and signed "Margaret Robinson." This writer, who is neither Russian, nor Armenian, nor Turk, goes completely out of her own province when she takes exception to my letter of January 4, printed in the *Sunday Times*, and which she stigmatises as "bristles throughout with the word 'Orthodox.'"

As my letter in the *Sunday Times* was written with the express purpose of refuting the statements of a writer in the same paper signing himself "Henri M. Leon," who tried to prove that "the barking dogs" who were "perpetually shrieking about 'the wrongs of Armenia'" were what he called the Protestant "perverts," and as this same writer asserted that the Orthodox Armenians were "fairly contented" under Turkish rule, I was obliged to prove by facts and figures that the Protestant "perverts" numbered, according to latest statistics, only 49,000, and that these were largely recruited from the ranks of massacre orphans and massacre destitutes, whom (as I said in my letter) "the Good Samaritans of Protestants had protected, supported, and succoured." Also, I proved that the whole Armenian nation (excepting the small minorities of Protestants and Catholics, also the outcome of persecutions) is Orthodox, consequently "the barking dogs" comprised the whole Armenian nation; and, to substantiate my statement, I gave a list, beginning from 1862, of the initiators and leaders of the Armenian movement for emancipation from (I repeat here) "the Turkish hell."

Thus my letter bristled, according to your correspondent, with the word "Orthodox," which, she informs us, "is more detested in England than by the Moslem Turk." We Armenians care very little whether the word "Orthodox" is beloved or detested in England, but we do feel it would benefit the interests of humanity if international and political crimes were more detested in England than they are or have ever been.

On the authority of Pierre Loti and some others, your correspondent "Margaret Robinson" tells us that we Armenians are a race of usurers. As a matter of fact, from 75 to 80 per cent. of the Armenian nation is agricultural (the class that is looked upon in the world not as usurers, but the victims of usurers). Then the Armenian nation represents a large number of artisans, merchants, and traders; also the Church, the educational, medical, and legal professions are well represented; we have also a fairly good number of men of letters and artists; consequently a very small number must remain out of this nation to become usurers. I have lived in India, Burma, China, and Japan, and in these countries Europeans are a mere handful; but yet I have known of many usurers of pure British blood and nationality.

Your correspondent also asserts the opinion that the Armenian massacres were "under provocation." It speaks very poorly indeed for the "advanced people," whom she refers to with an assumption of so much pride, if they believe that massacres are provoked by the victims of the massacres, and if they put forward the plea of "provocation" as an excuse for such diabolical atrocities.

Further, in her letter your correspondent gives advice for which we have not asked. She volunteers a lot of information for which we either do not care or about which we know better; indeed, a people must know better what is to their own interest than other people can tell them. What we do know is that Armenia has been turned into a graveyard by the Turk, assisted by the "Concert of Europe," and as we are determined that Armenia must rise again from the dead, we will (having put our trust in God and seeking His help) take measures to ensure that end without consulting your correspondent "Margaret Robinson."—Yours truly,

(MRS.) DIANA AGABEG APCAR.

220A, Bluff, Yokohama, Japan,
April 19, 1914.

"A WHIRL OF ADVENTURE."

To the Editor of THE NEAR EAST.

SIR,—I have only just seen in your number of April 10 a criticism of the Williamsons' last book, "It Happened in Egypt." As a resident of over thirty-seven years in Egypt I am surprised that such a criticism should have appeared in THE NEAR EAST, in which it might be supposed that critics would be acquainted to some extent with the subject on which they write—and Egypt is the Near East. The case of the American bride of a Turkish Bey being held prisoner in the cabin of an outward-bound steamer has occurred, except that the Bey was considered Egyptian, which is of no importance as the title is Turkish. The whole of the incidents in the book might have occurred, and some very like them have already done so.

Ridicule is attempted with regard to the Hadji disguise, but the critic is evidently ignorant that one of the greatest men living did pass as a native—a disguise which deceived the natives, but not his friends. The book has found favour among readers who are "acquainted" with Egypt, which speaks more for it than the critic's declaration that it will only do so among those "unacquainted" with Egypt. I understand a novel may be nothing but invention from beginning to end, which this is not, and anyone with a knowledge of the country will agree with the views of

A THIRTY-SEVEN YEARS' RESIDENT.

CURRENT COMMENTS.

Both Turks and Greeks are proclaiming aloud their respective opinions of each other, and so many assertions are made and denied that any impartial observer will greatly regret that the Porte has declined M. Streit's proposal that a Joint Commission should examine into the state of affairs both in Hellenic Macedonia and in Turkish Thrace with a view to finding out what really has happened. Both parties have communicated statements to the Press, but neither will believe the other, and in such cases the evidence of impartial witnesses cannot always be obtained. As I have already pointed out on several occasions, a great deal of the emigration of Moslems from the lost provinces into Turkey is due to the dislike of the average Turk to accept as superiors or even as equals those whom from time immemorial he has considered as rayahs and inferior beings—but it is quite possible that popular pressure may have been brought to bear upon the ceded Turks by triumphant majorities, with which officials were unable to cope.

***

The Greeks are taking most energetic unofficial steps to raise money for the purchase of another Dreadnought, and the committee in charge of the collection of the necessary has hit upon an ingenious scheme for tempting even the most niggardly patriot to contribute his drachmai. Attractive certificates are issued for different values, and the collector-spirit is aroused by the possibility of acquiring a "set" of these, beginning with the humble 5 dr. and rising to the stately magnificence of the higher values. I may add that only one certificate has been prepared for issue at the face value of 1,000,000 drs.—the competition among millionaires for this unique specimen should be keen—and should materially add to the 14,000,000 drs. which have already been collected. As our Constantinople Correspondent's letter shows, the amount of money which has been accumulated by street collections, voluntary subscriptions and "benevolences" in Turkey for the Ottoman Fleet is now considerable. It is, however, open to doubt whether the Dreadnought is the naval unit best fitted for Ægean warfare, and amid the rock-studded currents which sweep amid the innumerable islands of the Archipelago one is tempted to suggest that a more numerous fleet of smaller vessels would be alike more useful and less liable to accidental disaster—apart from the risks of war—which might befall a very big basket holding a great many eggs.

***

I gather that all is not well with the Epirotes; they have fallen out among themselves—not on the subject of diehardism or the prospects of last-ditchery, but about stamps. The Independent Committee of Epirus, on high artistic grounds, has declined to recognise the celebrated "skull-and-crossbones" stamps issued by the Chimariots, and asserts that its own set of "Rifleman" adhesives, which are of civilized appearance, are the true representatives of Epirote philately. At this rate the Balkan Peninsula will for some time continue to be the happy hunting ground of the collector of provisional issues, emergency over-prints, and war-specials, and if the sale for these fantastic creations remains as brisk as it has been for some time past no doubt the responsible authorities will again supply the market with tempting rarities of primitive design and a most alluring crudeness of execution.

***

I see that the *Messager d'Athènes* waxes indignant once more about what it effects to consider the woes of the "oppressed majority" in Cyprus. It deplores the inability of the Greek members in the Legislative Council to impose their will upon the Moslem minority, and considers that "the administration of the Island suffers cruelly on account of this anomaly." In the same number, the *Messager d'Athènes* prefers a series of charges against the Ottoman Administration for the persecution of Greeks in Turkey, yet omits to draw the logical conclusion that but for the presence in Cyprus of the British officials, who share with the locusts and the drought the proud position of being the "curses" of that island, the non-Moslem population would be exposed to the rigours of Turkish rule, which are found to be so unpleasant in Anatolia and Thrace. But, really, I am inclined to take the whole effusion as an elaborate piece of humour on the part of our well-known Athenian comtemporary, the more so as it goes on to suggest that Great Britain should give Cyprus to Greece, in order that Sir E. Grey may be in a stronger position to insist upon the evacuation of the Dodecanese—also for the benefit of Greece? Of course, after the celebrated achievement of Mr. Gladstone, who withdrew from the Transvaal after that event had officially been made contingent upon the Vaal River flowing backwards, it is unsafe to prophesy. I am, however, probably safe in announcing that the British will cede Cyprus to Greece on or after that most appropriate date the Greek Kalends, which is generally expected will shortly precede the arrival of the Coqcigrues.

For months past the activities of the Foreign Office have been gravely hampered by the Ulster difficulty, and a correspondent in Syria tells me that the Germans are making great play with the incidents in Ireland for the purpose of belittling Great Britain in the Near East:—

"Here we are beset with rumours. Whether the German who is reorgansing the Turkish Army is really trying to set the Turks against the English or not I really don't know, we hear such conflicting accounts. One thing is certain—that the trouble in England is lowering our prestige out here terribly. Not only the natives, but all the Germans are convinced that our army was on the verge of mutiny, and even now they think we are in a tottering condition. The German Consul is a very bombastic little man, and does not at all mind our knowing what he thinks of the situation."

***

Those who take stock in omens may well prick up their ears at the news from Constantinople. I gather that extensive alterations and improvements have been in hand for some time past, and that the Padishah is shortly to take up his residence in Yildiz. This may suggest to some that the Sultan es Selatim is about to revert to the methods of his predecessor—but, at least, the removal would enable His Imperial Majesty to avoid the daily reminder of fallen greatness which is presented by the sight of his brother's residence, the Beylerbey Palace, on the opposite side of the Bosporus, to the Dolma Bagché. The fact that the Sublime Porte is being carefully repaired after the disastrous fire which affected it so seriously some months ago, may well indicate that the Osmanlis have determined that it is to remain the symbol of their State for many years to come, and that if the Guarded Realms were singed and charred in Roumelia by the fires of disastrous war, at least Stamboul is still under that dominion which Mohammed the Conquerer built upon the ruins of New Rome.

***

Amongst the announcements of new books, I have just come across one title that fills my simple mind with astonishment, to wit: "Russia with Teheran, Port Arthur and Peking." About the two cities last named, I say nothing. But—Teheran! The book referred to is published by the painstaking Baedeker, and I note that it contains "maps and plans." Do the plans, I wonder, throw any light on Russian projects regarding Teheran? If so, it is certainly an unkind stroke on the part of the great producer of guide-books to give the show away quite so openly, even in these days of somewhat strained feeling between Germany and Russia. It not, why include Teheran—to say nothing of Peking—in the book? Surely Russia is a large enough field for any one volume—or for any living soul, except a Russian! Possibly, however, Baedeker is merely taking Time by the fore-lock in view of the rapidity with which events are marching.

***

I see that the Austrian authorities have suddenly realised that they have been most searchingly criticised in "The Hapsburg Monarchy," the recently published book of Mr. Wickham Steed, who had peculiar facilities for studying their procedure during the years that he was correspondent of *The Times* in Vienna. At present it is still doubtful whether this action has been taken because the author has been too outspoken about certain members of the Imperial Family, or has referred disrespectfully to the manners and methods of the great bureaucrats of the capital, or because he fails to express any admiration at all for the Austro-Hungarian policy in the Balkans. In any case, the action of the Vienna authorities will contribute materially to increase the circulation of the book, which, I understand, will shortly be republished in German and French.

***

In addition to the two Turcophile societies already in existence in this country, yet another is to be formed. According to information I have received, several influential people are interesting themselves in this new venture. The society is to be called the Turkey Society, and its chief aim is: "To promote the sympathy existing between the British and Ottoman peoples and to make them better known to each other by means of personal intercourse and publications." I understand that its objects are exclusively literary, economic, and artistic, and it has been agreed that the society should work along lines similar to those followed by the Persia and Japan Societies. Without doubt an organisation of this kind can do very important and necessary work in spreading knowledge and dispelling prejudices, and I wish the Turkey Society all success in its beneficent labours. Amongst those gentlemen who are mentioned as probable members of the council of the society are Lord Denbigh, Lord Bury, Professor Browne, the Right Hon. Ameer Ali, Sir Thomas Barclay, and Mr. E. N. Bennett.

PERSONAL & SOCIAL

CALENDAR OF THE WEEK

Showing Concordance of the Gregorian, Julian, Moslem, and Jewish dates.

Gregorian. New style.	Julian. Old style.	—	Moslem.	Jewish.
1914.	1914.		1332. Jum'da II.	5674 Iyar.
May 8	April 25	Friday	12	12
9	26	Saturday	13	13
10	27	Sunday	14	14
11	28	Monday	15	15
12	29	Tuesday	16	16
13	30	Wednesday	17	17
14	May 1	Thursday	18	18

To-day, being the 12th of Jumada II., 1332, according to the Moslem calendar, is the birthday of Abdul Aziz Effendi, a nephew of the Heir to the Throne of Osman, and son of H.I.H. Seif-ed-din Effendi.

Tuesday will be the anniversary of the wedding of Princess Anastasia, of Montenegro, to the Grand Duke Nicholas Nicholaievitch, at Yalta, in 1907. Her Imperial Highness was previously married to Prince George Romanoffski, Duke of Leuchtenberg.

Tuesday will be the anniversary of the marrage in 1864 of Princess Clotilde, sister of Tsar Ferdinand of Bulgaria, to the late Archduke Joseph, who was the son of the last Palatine of Hungary, and died in 1905.

Wednesday will be the wedding-day of Princess Maria of Greece, who married the Grand Duke George Michailovitch of Russia in 1900.

Wednesday, being 17th of Jumada II., is the birthday of H.I.H. Eumer Hilmi Effendi, who was born in A.H. 1305 (March 2, 1888). Although His Imperial Highness is the Sultan's second son, he is only thirteenth in the succession to the Throne, according to Ottoman practice.

On Thursday, 18th Jumada II., 1332, two Imperial Princesses celebrate their wedding days. Princess Fatma Sultana, the youngest daughter of the late Sultan Murad Khan, who died in 1904, and another of the present Padishah's nieces, Princess Muniré Sultana, were both married on the same day (July 29, 1907) in A.H. 1325, the former to Damad Refik Bey, the latter to General Damad Salih Pasha. The fortunate husbands of Imperial Princesses in Turkey are proclaimed on marriage *Damad-i-Padishahi*—son-in-law of the Sultan—or *Damad-i-Shehriari*—Imperial son-in-law—as the case may be.

Our Roumanian Correspondent writes that the Infante Alfonso d'Orleans of Spain, with his wife the Infanta Beatrice, left Bucharest on Thursday by train for Constanta, accompanied by the Crown Prince and Princess of Roumania. The Royal guests left by the State Service steamer "Romania" for Constantinople, where they will remain for a few days, returning to Spain by way of the Mediterranean.

It is announced that the visit of Queen Eleanor of Bulgaria to the United States has been postponed until the situation in America is more favourable.

On Monday, 27th ultimo, Sir George Barclay, the British Minister in Bucharest, and Lady Barclay gave a grand soirée, at which the Crown Prince and Princess of Roumania, Princess Marie and the Infante and Infanta Alfonso d'Orléans of Spain were present.

M. Chedo Mijatovitch, the well-known writer on Servian affairs, who used to represent his country at the Court of St. James's as the representative of the late King Alexander, has returned to London.

SYRACUSE.—Grand Hotel Villa Politi. Splendidly situated. First class.

Prince Alexander Ypsilanti, who greatly distinguished himself during the second Balkan war, has been appointed Prefect of Corfu in succession to M. Varatassis.

Lord and Lady Lamington and Sir Gerard Lowther were amongst the guests at the wedding of Lord Gerald Wellesley with Miss Ashton on Thursday last week.

According to a message from Salonika, dated May 1, M. Venizelos, the Greek Prime Minister, M. Repoulis, Minister of the Interior, and M. Ractivan, Minister of Justice, arrived at Salonika on Friday evening last and were cordially received by the inhabitants. A large crowd cheered them on their arrival at the station.

Princess Lüdwig of Löwenstein-Wertheim has returned to 8, Upper Belgrave Street, from Egypt, where she flew from Cairo to Luxor with Mr. Olivier in a Farman biplane, taking many interesting photographs en route.

The Hon. Mrs. Byng left for Port Said by special train on April 28, in order to embark on the P. and O. steamer for England. General Byng, who accompanied his wife as far as Port Said, returned the same evening to Cairo.

His Excellency M. Gennadius, the Hellenic Minister, was present at the dinner of the Newspaper Press Fund last Friday, and on Saturday his Excellency was amongst the guests at the Royal Academy banquet held at Burlington House.

Writing from Belgrade, our Special Correspondent in the Balkans informs us that General Popovitch has been relieved of the command of the troops in New Servia, and is being replaced by General Bojovitch.

It is announced that Damad Enver Pasha, the Turkish Minister of War, will shortly move into the estate of the late Süleiman Effendi, brother of the Sultan, at the top of the Bebek hill.

The *Jeune Turc* states that Kiazim Bey, of the Turkish Ministry of Finance, who is attending the International Financial Conference in Paris, will be replaced by Ferid Bey, Director of the Mint.

The Khedive has conferred the Second Class of the Medjidieh upon Mr. James Currie, C.M.G., Director of Education in the Sudan.

Mahmoud Kiamil Bey has been appointed Under Secretary of State for War at the Seraskierate in Stamboul.

H.E. Abdul Halik Bey, the Vali of Bitlis, who has shown great energy and administrative capacity in his new post, received the Grand Cordon of the Order of the Medjidieh on the anniversary of the Sultan's accession.

Ali Munif Bey, Under Secretary of State for the Interior, and H.E. Rahmi Bey, the Vali of Aidin, received a similar honour on the same occasion.

C. Serkis Bey, of the Turkish Embassy, has left London for the Continent on leave.

In a communication to the *Daily Telegraph* of May 4, sent from Bucharest, Dr. E. J. Dillon flatly contradicts the rumour that the intended marriage of the Crown Prince of Greece and Princess Elizabeth of Roumania had been broken off.

Harvey Pasha, Commandant of the Cairo Police, left for England on April 30.

The marriage arranged between John Cyril Douglas Fenn, Colonial Civil Service, and Evelyn Blanche Lawford will take place in Cyprus on Saturday, June 6.

The marriage contract of Dr. Omar Nolan, late Controller of Public Security in the Egyptian Ministry of the Interior, now Inspector General of Police in Turkey, with the daughter of Ahmed Bey El-Bakri, was signed recently at Heliopolis at the residence of Ahmed Bey. Dr. Omar Nolan was represented by Bahgat Bey Wahby, and the marriage contract was written by the Grand Cadi of Egypt. Among those who were present at the ceremony were Prince Omar Toussum, Prince Aziz Hassan, Prince Mohamed Ali Hassan, Rushdi Pasha, the Premier, Ibrahim Pasha Halim, Dr. Ali Bey Labib, El-Sayid Abdul Hamid El-Bakri, and other notables.

The death has occurred at Bournemouth of Lieutenant-Colonel J. A. Shaw, late of the Royal Army Medical Corps. He served in the Sudan Expedition of 1882, when he was mentioned in despatches, receiving the medal with clasp and the bronze star. He also served in the Sudan Expedition of 1887, when he was again mentioned in despatches and received another clasp.

The Servant Minister to Bulgaria, M. Tcholak Antitch, who has been to Belgrade, has now returned to Sofia.

M. Poulieff, the First Secretary of the Bulgarian Legation in Belgrade, has been appointed to a similar post in Athens.

Dr. Semenoff, Chief of the Department of Public Worship in the Bulgarian Foreign Office, succeeds M. Poulieff in Belgrade.

M. de Lázló, who was recently honoured with a commission to paint certain members of King Constantine's family, has received the Cross of Commander of the Order of the Redeemer.

M. Varatassis, the Prefect of Corfu, has been appointed Hellenic diplomatic representative in Durazzo—*en mission spéciale*. For some time past M. Varatassis has been in charge of the Greco-Albanian negotiations for the evacuation of Epirus.

Professor Politis, Professor of International Law at the University of Paris, who was Legal Adviser to the Greek Peace Delegates during the negotiations which ended with the signature of the Treaty of London, has been appointed Director-General of the Ministry of Foreign Affairs in Athens.

Count La Combe, the French Vice-Consul in Cyprus, having been appointed to the Consulate at Newcastle-on-Tyne, left Larnaca on April 29 for a short tour in Palestine, to be followed by a holiday in France, before taking up his new appointment in England. The departure from Larnaca of Count and Countess La Combe, where they have made themselves so deservedly popular, is an event which is greatly deplored by the European community there, for a void has been created which it will be hard indeed to fill. Before leaving Count La Combe was the guest of the members of the English Club, Larnaca, at a farewell dinner.

We regret to learn that Miss Young, who has been staying with Sir Reginald and Lady Oakes (her aunt) at Heliopolis, is ill with typhoid.

Miss Diana Beaumont has returned from Cairo to her cousins, the Misses Wade, at 21, Charleville Road.

Mr. E. A. Harrison, managing director of Messrs. Thomas Cook and Son (Egypt), has arrived in London this week from Cairo.

Mr. and Mrs. Raymond Boileau have returned to 21, Draycott Avenue, from Egypt.

The Hellenic Minister and Mme. Gennadius, the Roumanian Minister and Mme. and Mlle. Mishu, and the Servian Minister, were present at the dance given by Lady Mond last Friday evening at 35, Lowndes Square.

A Paris message announces that M. Olivier Taigny, Counsellor of Embassy, has been appointed the French representative on the International Commission on Hellenic finance.

Dr. Dillon, the St. Petersburg correspondent of the *Daily Telegraph*, was in Bucharest at the end of last week, en route for Albania.

The King has been pleased to grant to Mr. Arthur Trevor Williams, Director of Customs, Port Said, authority to wear the Insignia of the Fourth Class of the Order of the Osmanieh, conferred upon him by the Khedive, authorised by the Sultan.

The King has been pleased to grant to Mr. Alexander Ashton, Chief Engineer at the Ports and Lights Administration, Port Said, authority to wear the Insignia of the Fourth Class of the Order of the Medjidieh, conferred upon him by the Khedive, authorised by the Sultan.

The King has been graciously pleased to appoint Mr. John Selden Willmor to be His Majesty's Consul for the eastern coast of the Red Sea, to reside at Jeddah.

The *Orient* announces that Professor and Mrs. van Millingen, of Robert College, Constantinople, and their daughter Frances have returned to Turkey after an absence of ten months, mainly in the British Isles.

On the occasion of the retirement from the Army of El Lewa Phipps Pasha, the following farewell order was issued to the Army :—The Sirdar wishes to place on record his great appreciation of the excellent services rendered by El Lewa P. R. Phipps Pasha during the fifteen years he served in His Highness the Khedive's Army, in which amongst other appointments, he held the command of the 14th Sudanese. El Lewa Phipps Pasha also filled the following posts :—Assistant Civil Secretary, Sudan Government; Private Secretary to the Sirdar and Governor-General, and for the last eight years filled the responsible position of Civil Secretary, Sudan Government, with marked ability and well-deserved success. The Sirdar, on behalf of all ranks in the Egyptian Army, desires to wish El Lewa Phipps Pasha every success in his future career.

Amongst the recommendations of the Council of the Royal Geographical Society to the Fellows were the following :—That Sir Francis Younghusband should succeed Captain H. G. Lyons, F.R.S., as one of the honorary secretaries, and that one of the new members of the Council should be Colonel P. Molesworth Sykes, C.M.G., C.I.E.

Colonel T. E. Hickman, C.B., D.S.O., M.P., who has been placed on retired pay, served with the Egyptian Army under Lord Kitchener, and for the Sudan operations of 1886 was promoted brevet major, and obtained the D.S.O. For his services during the campaign of 1898, which led to the final reconquest of the Sudan, he was promoted to brevet lieutenant-colonel while still only captain in the Worcestershire Regiment.

Professor W. Ridgeway lectured on "The Early Iron Age in the Ægean Area" at the third general meeting of the Society for the Promotion of Hellenic Studies, held on Tuesday afternoon.

Dr. Wilfred Post, of Konia, is steadily recovering from the attack of typhoid from which he has been suffering, and his brother, who had been in attendance upon him, has returned to Constantinople.

The *Orient* reports that among American Consular nominations recently sent to the Senate are the following :—Mr. A. W. Weddell, transferred from Catania, Sicily, to Athens, Greece; Mr. C. F. Brissel, from Amoy, China, to Baghdad; Mr. Leslie A. Davis, from Batoum to Harpout; Mr. William H. Gale, from Athens to Colon, Panama; Mr. F. Willoughby Smith, from Aden to Batoum.

A correspondent informs us that the name of the newly appointed German Consul at Tabriz is Herr Wilhelm Liken, not von Lindon, as printed in our issue of April 24.

The Venerable Theodore Edward Dowling, D.D., since 1906 Canon Residentiary of St. George's Collegiate Church, Jerusalem, and Archdeacon in Syria, has been compelled, owing to continued ill-health, to tender his resignation of the honorary post of Archdeacon in Syria. The Archdeacon in Syria has had a long and wide experience in Canada, Turkey, Europe, Egypt, and Syria. He was formerly Rural Dean of Fredericton, New Brunswick; Chaplain of the Crimea Memorial Church, Constantinople; Chaplain at Assuan, Egypt; and Chaplain at St. Luke's Mission at Haifa under Mount Carmel. In 1902 he was appointed Canon of St. George's, Jerusalem, and in 1906 Archdeacon in Syria. Dr. Dowling was a diligent student and writer of books, and acted as Bishop's Commissary for intercourse with the Eastern Churches. His books, chiefly on ecclesiastical subjects connected with the Near East, are, no doubt, well-known to many of our readers.

DOMESTIC ANNOUNCEMENTS.

BIRTHS.

CRAIG.—April 27th, at 89, Lower Baggot Street, Dublin, the wife of J. Douglas Craig, Sudan Civil Service, of a daughter.

MONCK-MASON.—On April 17, at the British Vice-Consulate, Adana, Turkey in Asia, to Mr. and Mrs. A. G. E. C. Monck-Mason—a daughter.

MARRIAGE.

ELLIS—PITCHFORD.—On the 30th April, at the Church of the Holy Trinity, Worthing, by the Rev. C. J. Hollis, M.A., Vicar, Bernard Pemberton, youngest son of the late A. A. Ellis, Esq., of King's Norton, to Elizabeth Annie, widow of John Pitchford, Esq., of Penarth, and elder daughter of the late Wilson Pasha and Mrs. Wilson of Cairo.

WHERE TO STAY.

Cairo's Hotels de Luxe.

SHEPHEARD'S HOTEL.
Open all the year round.

SEMIRAMIS HOTEL.
Splendid position on the East Bank of the Nile.

GHEZIREH PALACE.
Formerly the Palace of the late Khedive Ismail.

GHEZIREH CASINO.
In pure Moorish style, with a permanent Restaurant Francaise, is situated in the immediate neighbourhood of Ghezireh Palace.

FRIDAY, MAY 8, 1914.

BULGARIA AFTER THE WAR.

Few people who know Bulgaria and its inhabitants have doubted the ultimate capacity of the country to rise superior to its misfortunes. But the actual rate of recovery from the effects of two severe wars is proving a matter for surprise even to the most optimistic observer. The moratorium proclaimed during the struggle in the Balkans was terminated last September, some six weeks after demobilisation. Since that date the number of bankruptcies has shown no appreciable increase over the figures for a similar period under normal conditions; but more significant still is the fact that the revenue from taxation during the months of January and February should be stated to have shown a marked improvement upon the revenue for the same months in ordinary years in the past. In a recent statement made to the Sobranje the Minister of Finance was able to point to the fall in the rate of exchange from 20 per cent. at the end of 1913 to 7½ per cent. at the present time, with every prospect of par being reached before long. There remains, however, the question of the floating debt, which amounts to more than four hundred million leva, represented by requisitions, Treasury bonds, and advances by the National Bank. To meet these obligations recourse is to be had to a foreign loan, the negotiations for which are said to be proceeding satisfactorily. Apart from the desirability of paying off foreign advances and reducing the Treasury bonds placed in France and Russia, the Government will be anxious to place the National Bank in funds in order that the latter may be in a better position to support the commercial and industrial development of the country. For it is in this direction that Bulgaria's political salvation lies. The indomitable industry of her people, aided by wise statesmanship on the part of the Government, will do more to rehabilitate Bulgaria in the Balkans and to place her once more on a sound economic footing than the most successful appeal to arms.

A country that has had to pass through the experiences of Bulgaria during the last eighteen months is likely to be beset with something more than financial problems. The temptation to probe deep into the sources of her troubles has been strong, and Bulgarian politicians have been unable to withstand it. The carrying out of this task has come to be regarded as a patriotic duty, and preliminary revelations have only served to whet the appetite for more. Counsels of perfection must inevitably fall on deaf ears when political passions have been roused as they have been in Bulgaria, and the country now appears to be committed to an attempt, or a series of attempts, to locate within the narrowest limits the blame for its past misfortunes. The event alone can prove whether these inquiries will serve any useful purpose. With parties in the Sobranje equally balanced, even after two elections, it might be thought that the Government would elect to avoid any action calculated to inflame party feeling, and by confining itself to absolutely necessary legislation would hasten the adjournment of the Chamber, in order that political peace might be restored as far as possible. But the session is proving a stormy one, and the strength of the Opposition has encouraged it to introduce once more international considerations into purely domestic affairs. In regard to the projected loan, the necessity for which cannot be disputed, it would have been thought that the sole aim of all parties must be to obtain the money on the best terms and as quickly as possible. The Government decided to make application to Germany. It has been taunted by the Opposition with the allegation that its foreign policy has left it little hope of being able to raise a loan in Paris, but with some inconsistency the Opposition has subjected the application to Germany to a violent attack. This attitude shows that the old sympathies and antipathies, which have been Bulgaria's bane in the past, are still as keen as ever. Nothing could be more regrettable than that the country's need of funds should be made the occasion for reviving discredited policies. The Bulgarian Government has a large amount of accumulated experience to draw upon in regard to loan negotiations. The flotation of a loan is intended by the lender to be as profitable a proceeding as possible, and an undertaking to place orders with the lender's nationals has become a recognised feature in the loan contracts of minor Powers. Bulgaria can hardly be unaware of the disadvantages of these monopolies, and must realise that it is always better to keep open the approach to two markets than to one. With two sources available for loan purposes the monopoly system can be avoided, or at least curtailed, and we should be sorry to see the taunts of the Opposition apparently justified by the Government's acceptance of terms which would restrict the usefulness of the loan and commit Bulgaria to a foreign policy based on international rivalries. If, on the other hand, the Opposition has no ground for its suspicions, it is doing a disservice to the country by trying to advance claims which bear the stamp of having originated abroad.

The foundation of all that the Balkan States have achieved was laid by an agreement among themselves. For years previously they had grouped themselves in opposing camps as hangers-on of powerful patrons, and it was not until they had cut themselves adrift from this subservient policy that they came within reach of their destiny. There is no ground for supposing that Bulgaria or the other Balkan States will be able to consolidate their new possessions in any more effective way than by the renewal of the agreement among themselves. The personal ambitions of individual politicians may be flattered by means of overtures elsewhere, but they cannot fail to realise that they are adopting the one method calculated to unsettle their country and retard its economic development. It is admitted that the pace cannot be forced in the direction indicated. The Bulgarians as a whole we believe to be prepared to let bygones be bygones in regard to their former allies. Only an unkind fate, therefore, can prompt the Servians to keep open the old sores by the recurrence of frontier incidents and a policy which in the eyes of the Bulgarians at least amounts to one of extermination or compulsory emigration. With regard to the relations between Greece and Bulgaria, however, it is possible to detect some small improvement. In spite of bitter memories which an excitable Press, with no traditions of dignity and self-restraint, continues to inflame, the statesmen and merchants are doing everything in their power to emphasise the community of interests of the Balkan States as a whole. The less any one political party in a country seeks to improve its position by the support, imaginary or real, of a Great Power, the more will the nation be encouraged to look to itself and the other peoples of the Balkans in order to make the Near East a factor in the political and economic history of Europe.

*** SUBSCRIBERS ABROAD who are proceeding to England or the Continent for the Summer may have their copies of "The Near East" posted to any address without extra charge, on furnishing particulars of their movements to the Publisher 16-17, Devonshire Square, London, E.C.

THE SUDAN AND COTTON.

By W. Lawrence Balls.

III.

The southern portion of the Sudan is capable of raising a large amount of rain-grown cotton, but of inferior quality, largely like Indian; and it will probably take several generations of administrative work, railway construction, and organisation before the bulk of this supply is appreciable. Between Khartoum and the rain-districts, however, there lies a country with big possibilities, though its present appearance is not suggestive of them. This Gezira plain forms the triangle between the Blue and White Niles, with its northern point at Khartoum and its southern base along the latitude of Wad Medani; its base and altitude are both about one hundred miles. South of Wad Medani the surface is such as would require much levelling before irrigation could be extended to it, but from there to Khartoum it is as flat as a bowling-green, and with a similar camber, from south to north and from east to west, ready for irrigation.

Possibilities of the South.

Assuming that the whole area could grow Egyptian cotton, there would be one million acres under the crop each year on a three-course rotation. It is probable that the western area will probably give better results under American, but for purposes of irrigation the area is homogeneous. The supply of water will be derived from a barrage on the Blue Nile near Sennaar. Ponded up behind this barrage, the water will overflow down a canal running along the eastern side of the Gezira, parallel to the Blue Nile, and free-flow water will be available from Wad Medani onwards. The work already begun will irrigate about 700 square miles, out of a total possible area of 5,000 square miles, and canalisation will be extended to the rest of the area later. The productivity of the land will probably be rather less than has been assumed, for reasons given below, and will most likely average about 350 lbs. of lint to the acre, which will amount on 1,000,000 acres to about half the present crop of Egypt, of quality corresponding to the ordinary Brown Egyptian. The time taken to develop the whole area will be limited by the supply of labour, and full development can scarcely be effected within twenty-five years, while 1950 is a more likely date.

In the year 1950 the Sudan will probably export more than two million kantars of Egyptian from the Gezira, one million kantars of Upland from the same district, and one-third of a million kantars each of Upland and of Egyptian from the northern area and from Tokar with Kassala.

Such an area as the Gezira must therefore have a fascination which "science for science's sake" could not give, and which—for a tourist—must outweigh its climatic peculiarities.

Scenery of the Gezira.

Immediately the train leaves Khartoum station on its way south, the typical Gezira scenery begins and persists. Considered as scenery, it is nothing special. It is better described in negatives. There are no hills, undulations, nor even hummocks; there are no crops (in January); there are no people to speak about; there are no stations except once in forty minutes; there are no plants except scattered scrub, and a dark line on the eastern horizon, where the vegetation along the Blue Nile is flickering in the mirage. On the other hand, there is unlimited mirage and glare and heat, even in the cool weather. There are signs of past cultivation of rain-crops, in the form of little banks of earth and the remains of maize-stalks, especially towards the south, for the rainfall is rising from four inches at Khartoum to fifteen inches at Wad Medani. These fifteen inches are not distributed over the year like an English rainfall of twenty-five inches, but are concentrated in a couple of months; often a cloud-burst washes the seedling crops out of the ground over several acres.

In January, however, when the cotton will be ripening, there is no sign of this, and the general outlook is intermediate between that from the desert railway and in the Atbara scrub. The people at the wayside stations are dark coffee-coloured, frequently of an Arab cast of feature, clothed in one piece of cotton cloth or less, according to age, and looking thoroughly alive to the external world.

A fellah soldier, chaffering with them for water-melons, throws this cheerful keenness of expression into sharp contrast, and when the tourist finds that every weed on the Tayiba farm has its proper native name, which is regularly used for reference or description, the contrast with Egypt becomes stronger still.

The Tayiba Experimental Station.

At the end of six hours' gentle toasting the train runs into the hard edge of a green rectangle. Probably the green is very dusty and dull, and would be a blot on an English landscape, but in the setting of grey glare it looks dark emerald. Down by the river is the tall chimney of the Tayiba pumping station, with frame bungalows, offices, and stores in between. The cultivated area receiving water from the pumps for this trial demonstration of the possibilities of the Gezira amounts to 1,900 acres in its third year, administered by the Sudan Plantations Syndicate, and represented locally by most excellent hosts.

That the Tayiba farm should have been run entirely as a demonstration of straight cultivation, without comparative experimental treatments from which deductions could be made, must be written up against it as a fault, but probably a necessary one. Still, when an hour's cursory examination shows that Gezira cotton bristles with problems like a thorn-bush, it worries the tourist not to be able to test his provisional hypotheses on actual data, especially when all available data could have been kept with the fullest detail and in sufficient quantity if they had been arranged in the first instance.

It might be challenged as a rash act to generalise on the behaviour and possibilities of 5,000 square miles by watching the behaviour of three square miles in one corner; but the Gezira is remarkably uniform except in its temperature relations, and much of the uncertainty has been eliminated by the Chemical survey. This excellent piece of work has shown that the top four feet of soil scarcely varies. What little change there is moves steadily from heavier land in the south to higher proportions of sandy constituents in the northern apex. The soil is deficient in nitrogen, like others of its kind, and the inclusion of a leguminous crop in a three-year rotation is therefore essential, leaving the third year to grow the food-crop of maize or wheat. The appearance of the unimproved soil is deceptive, the silt particles being aggregated into clumps which are broken down by heavy waterings, such as irrigation would provide, thereby puddling the soil. A soil of this nature cannot be cultivated without free drainage, but at present the natural drainage is sufficient in many places, because the natural water-table is over fifty feet below the surface. In certain spots, however, the land lies wet after irrigation, indicating that the natural under-drainage is hampered by impermeable beds. Since the root of cotton probably descends quite ten feet below the surface in the Sudan conditions of soil-temperature, a much deeper layer than four feet has to be taken into consideration, and it is more than likely that such trapping of drainage may take place erratically over large areas. Further, the experience of the Punjab and Wyoming shows that even a very deep natural water-table may be raised to the surface, quite apart from the superficial water-logging of clay patches. Combining these facts with the effects of the two-metre drains at Khartoum North Farm, it seems clear that drainage provision is highly necessary for the permanent success of the Gezira project, and that only a few years without it might suffice to do serious injury to the credit of the district.

The Labour Supply.

Intimately linked with the provision of drains is the question of labour supply. Without the means of removing all stagnant water, it is impossible to organise an anti-mosquito campaign, and if mosquitos were allowed to flourish in the Gezira it would lower the health and efficiency of the native labour to a serious extent, quite apart from the certainty of malaria for the few white men in control. Labour is too scarce as yet in the Sudan to allow of any reduction of efficiency in the available individuals when the rapid development of a big project is at stake.

The growth of the plants at Tayiba presents many points of interest. The same legginess is notable as at Khartoum, but in other respects they are very different. The flowering branches run out to the normal length, and the leaves have the normal shiny appearance. Defoliation from dry night-cold is unknown, but spells of excessive heat still produce their effect. Another remarkable weather effect is the varnishing of the whole plant with a shiny coating of nectar, excreted in excess by the plant itself, and not by green-fly. This condition has been noted in Upper Egypt, though to a less extent, and the observations of Mr. Wright at Tayiba indicate that it is produced by the usual combination of causes—namely, damp, windless weather, with a warm soil. The after-effect is again defoliation, probably through choking of the leaf-pores, with consequent over-heating in sunshine, and reduction of assimilation.

The Gezira and the other Sudan cotton areas also are thus liable to climatic factors of uncertainty in their yield which no cultural skill can avoid, and the crop might easily by reduced by 10 per cent. over the whole area by any one of these three climatic effects alone.

Insect Dangers.

Lastly, there are no insect troubles at Tayiba as yet, an invasion of boll-worm, which probably came from a single moth, having been stamped out. It is quite hopeless to expect that economic insects will not attain the same importance in the Gezira as they have assumed in Egypt, so that a reduction of 15 per cent. from the present yield at Tayiba may be fairly anticipated. The risk of damage by locust invasions from the south is preventable, except in extreme cases, though at a price.

All things considered, it does not seem justifiable to assume that the Gezira can possibly give so high a yield of cotton

Digitized by Google

per acre as Egypt can, and about 350 lbs. per acre seems a reasonable average for a series of years, or three and a-half million kantars, of which two and a-quarter will be Egyptian, from the south-eastern portion.

To investigate the water-supply was beyond the tourist's powers, but it is certain that water must be given to a later date than that originally contemplated—namely, February 15. If water is withheld after this date the later pickings cannot mature, and if extensive defoliation has taken place during the winter there may have been delay in the second picking, which would thus also be lost through water-shortage. Moreover, the wheat crop cannot fill its grains without late water, and its yield also falls off by 50 per cent. Up to the present the date for the Tayiba cultivators has been extended until the end of March, and it remains to be seen whether this extension can be given permanently over the whole Gezira when the duty of water under Gezira conditions is accurately known.

THE PRESS ON THE NEAR EAST.

The Question of Darfur.

The current number of the *Contemporary Review* has an important article, by Frank R. Cana, on "Egyptian and Sudan Frontiers." With reference to the Franco-Sudanese frontier, and in particular the question of Darfur, the writer says:—

The solution of the Darfur question, while it must give Great Britain the means of making the frontier respected, and of suppressing the slave trade, need not entail the overthrow of the native government. This is indeed undesirable. Ali Dinar is the representative of a line of Sultans who ruled Darfur, previously to its conquest by Zubeir Pasha, for some 400 years, and in Darfur there is the chance of building up a native State that shall enjoy all the blessings of home rule. It has elements making for prosperity. . . . . Darfur's foreign affairs must, however, be in the hands of its suzerain, and this can best be accomplished by the appointment of a Resident at El Fasher, and the placing of the armed levies of the Sultan under the control of a British officer, one of whose duties it would be to guard the Wadai frontier.

We also quote below the concluding paragraph of the article, which neatly sums up the writer's view:—

It will be seen from what has been written that there is much to gain and nothing to lose by coming to a speedy and definite agreement with Italy and France respectively regarding the western frontier of Egypt and the Sudan. It is no case of expansion on the part of Great Britain, but of removing possible causes of disagreement with Powers with whom we are on excellent terms. Especially is it desirable that the Darfur question should be settled, for at any moment an untoward incident there might cause a wave of fanaticism to sweep over the Sudan.

Turkey's Misfortunes.

In the *Asiatic Review* (April) the Hon. Aubrey Herbert, M.P., draws attention to "the spirit of burning resentment that extends through all Mohammedan countries" at the unjust treatment of the Ottoman Empire. The article is entitled "Turkey and the Sicilian Vespers," and the writer develops the historical parallel implied in the title as follows:—

The anger which is felt from and beyond India to Adrianople at the treatment meted out to the Turks is very natural, for the Muhammadan, though he may often live in the waste places of the earth, even in the depth of the desert, is not ignorant of the tragedy that has befallen his spiritual kindred. To him the calamity of the Balkan War appears a conspiracy of Europe, as carefully considered and as well engineered as was the slaughter of the Sicilian Vespers.

It is urged that the geographical argument is of greater validity than the ethnological argument in deciding whether Turkey should surrender Chios and Mytilene or not. The writer says:—

We have guaranteed to Turkey Imbros, Tenedos, and the Rabbit Islands, and the reasons for this action have been purely selfish. For these islands dominate the Dardanelles, and a great part of our food supply passes through the Dardanelles. We recognise that the Greek possession of these islands might constitute a danger to us, and so firmly and quietly we eliminate that risk. On the other hand, where the danger exists only for Turkey we not only acquiesce, but are even ready to take a part in initiating this new peril to the Ottoman Empire. For it is not denied that from Chios and Mytilene there will arise a new Hellenic propaganda whose purpose will be to create a second Macedonia in Asia.

"Minorities in the Balkans."

A note under the above heading in the *Daily Graphic* of May 1, says:—

Although from time to time some echoes of the bitter cries of the religious and racial minorities in the New Balkans manage to escape the rigid censorship of their new masters, Europe has but the faintest idea of the abominations of which they are the victims. We have heard a great deal lately about the sufferings of the Greeks in Eastern Thrace, but they are as nothing in comparison with persecutions of the Mussulmans and Bulgars of New Greece and New Servia, and the oppression with which the inhabitants of the New Dobrudja are threatened by the Rumanian Government. Everywhere, indeed, the result of the so-called War of Liberation has been to establish new bondages—and bondages on a larger and far more galling scale than any that were practised by the Turk. Europe has not only the moral duty, but she has also the legal right to forbid a continuance of these scandals.

An Estimate of King Ferdinand.

In an article on "Personal Impressions of the Sovereigns of Europe," in the *Strand Magazine* (April), H.R.H. the Infanta Eulalia of Spain refers to King Ferdinand of Bulgaria in the following terms:—

Another Sovereign of the Orleans family, little known as yet, but certain to become important, is King Ferdinand of Bulgaria, the strength of whose secret hand has been shown in the recent downfall of the Turkish power in Europe. He is a son of the only daughter of Louis Philippe of France, and therefore my cousin by marriage; and I knew him intimately before he was called to the Throne of Bulgaria. He has made that country almost single-handed, building it up commercially, attracting money to it for railroads and industrial developments, and administering its finances as ably as he administers his own private fortune. His cleverness in using rightly for his own ends circumstances that would pass unperceived by anyone less astute has made him already one of the marked men of Europe. . . . I venture to prophesy that the "Concert of the Powers" in the Balkan situation will find him much too able for them. He has a wonderful mind.

With many of the writer's conclusions there is little latitude for disagreement, but we can hardly understand her description of King Ferdinand as "little known as yet," unless it is intended as a touch of sarcasm on her part!

Persian Influence on Judaism.

The *Interpreter* for April has an interesting article, under the title "Persian Influence on the Development of Biblical Religion," by the Rev. C. T. Harley Walker, M.A. We quote the following passage:—

The later Judaism is distinguished from the earlier by the fact that it possesses a more systematic and fuller eschatology. Mazdeism had a systematic eschatology. There are important differences between them, as Charles and Söderblom have pointed out and Bousset admits. The beginnings of eschatology, it is true, are found in the earlier stages of the religion of Israel. But surely we may account in part for the new emphasis on this subject by attributing it to Persian influence. Still more plain are the traces of Persian dualism in later Judaism. The whole of world history to the mind of the faithful disciple of Zardusht was one long conflict between Ahura-Mazda, the supreme God, and Angra-Mainyu, the author of 9,999 diseases and vices and misfortunes generally, between truth and falsehood, between light and darkness. Judaism rejected the names and myths in which this conception was embodied. But under its influence Satan, "the adversary of Israel," the accusing spirit becomes "the head of the kingdom of evil." The older prophets were familiar with the thought of "the enemies of Jahweh" and of "sin," but they would have been puzzled by the idea of "a kingdom of evil."

Hospitals in Constantinople.

The Constantinople correspondent of the *Lancet*, in its issue of March 28, gives some interesting details of the additional municipal hospitals which it is proposed to erect in Constantinople. The moving spirit in this beneficent enterprise is the Prefect of the city, Dr. Djemil Pasha. It is stated that:—

He has prepared a very extensive report on the matter, and hopes to realise his project in the course of five years. As a beginning, Djerrah-Pasha Hospital in Stambul, which has 200 beds, will be increased to 500, and the female Hasseki Hospital, with 250 beds, to 600. In each of these institutions there will also be provided 100 beds in a separate pavilion for infectious cases. In the quarter of Chishli, above Pera, there will be constructed a great hospital with every modern requisite. Scutari on the Asiatic side and Emirghian on the European will get a new hospital, each with 500 beds, of which 200 will be for women, as well as special pavilions for contagious diseases. Also a number of municipal dispensaries will be erected on the Princes' Islands, in the Sea of Marmora, at Makrikeuy, Stambul, and at Beicos, on the Upper Bosphorus. The children's hospital at Chishli, of Abdul Hamid's fame, will be greatly enlarged, having added also 100 special beds for newly born infants. I have indicated that Dr. Djemil Pasha has undertaken a difficult task, and the financial question presents formidable difficulties, as Turkey is exceedingly poor at present.

Articles to Note.

"The London School of Oriental Studies," by F. H. Brown, in the *Westminster Gazette* (May 4).

"The Day's Work in Albania.—V.," by Anthony Bradford, in the *New Age* (April 30).

NOTES AND NEWS.

Devonshire Square,
London, E.C.

The success of the Turkish Loan appears to have given rise to a good deal of jealousy in certain quarters, which have consequently been doing their best to minimise that success as far as possible. It has been represented, for instance, that only about 50 per cent. of the loan was subscribed by the public, and attempts have been made to represent that as the outside figure. This is sheer nonsense. To my knowledge the greater part of the loan was taken up by the public, and no amount of idle gossip or inspired rumours will alter the fact. Another point which the Turcophobes have been working for all it is worth—and a great deal more—is that the issue price was against the success of the loan. It is much more likely that the Mexican trouble and the generally unsettled state of the market on the day when the loan came out accounted for its not being oversubscribed, as Turkish loans in Paris usually are. The uncertain state of French finances at the present time must also be taken into account. And, regard being had to all these points, Turkey is to be congratulated on its success.

***

The long innings of the politicians in the Balkans is beginning to draw to its close—even the most recent adversaries are beginning to think of commerce, too long neglected for the expensive joys of war and tedious diplomacy. The Cabinets of Athens and Sofia have agreed to re-establish all their respective Consulates which existed before the war, and have arranged to recognise new Consular establishments at Salonika for Bulgaria and at Dedeagatch for Greece. It is to be hoped that this will lead to a decided improvement in the relations of the two countries—such matters probably being safer in the hands of merchants than in those of professional politicians, journalists, or even diplomatists. Germany is also establishing Consulates at Skoplye (Uskub), in New Servia, and Shkodra (Skutari), in Albania.

***

Turco-Bulgarian relations have now become so entirely normal that it is possible to discuss some highly interesting questions which affect both parties strictly on their merits. For example, the Mixed Commission for delimiting the frontier laid down by the Treaty of Constantinople across the delta of the Maritza—a necessary but unproductive task—is also to turn its attention to the canalisation of that river. It would be an immense gain to Adrianople and Central Bulgaria if the Maritza were to be made navigable for the comparatively small steamers which carry most of the Levant trade at present. The modern engineer is a man of immense resource, and, given money, can do almost anything. Nor should the present project prove unduly expensive. Adrianople, which is 100 miles from the sea, is only 134 ft. above it, and Svilengrad (Old Mustafa Pasha), in Bulgaria, is twenty-two miles further inland and 70 ft. higher.

***

The claims of Finance are very imperative nowadays, and nowhere more so than among those younger members of the comity of nations who depend upon the graces of the European bourses for their butter, if not for their bread. The victors in the recent war against Turkey have gained considerable areas of territory—which tend to become, as a rule, more or less depopulated—and Finance has decreed that they must shoulder the mortgages, so to speak, with which the late proprietors had encumbered that portion of their estates. It is a radical change from the German principle which was acted upon in 1871, when the unfortunate French not only lost Alsace-Lorraine, but had to present the Emperor William with £200,000,000 in cash as well. Under the new system it is stated in a telegram to the *Cologne Gazette* that the Porte is to be relieved of over £T24,000,000 worth of debt in consequence of the loss of its Roumelian and insular possessions. Of this Greece, the largest beneficiary among the Allies, is to take over £T14,315,406, Servia is to become responsible for £T4,451,473, Bulgaria for £T4,075,590, and Montenegro for £T151,040. Indebtedness is even to be hereditary, the infant State of Albania, being as it were the daughter of a debtor-parent, is born in debt—to the extent of £T1,090,685, which is presumably considered to be her share of the expenditure upon improvements undertaken by the Turks in Shqipenia!

***

In view of the official approval of the doctrine that every square kilometer of national territory is proportionately burthened by the national debt of its possessors I should like to know how much of the Bulgarian national debt is to be taken over by Roumania with the 7,525 square kilometers of Dobruja which she has recently annexed. According to the amount of Bulgarian indebtedness before the war, this sum should be at least 4,867,170 frs.—without counting the cost of the first Balkan war, during which the lost Dobruja was part and parcel of Bulgaria.

***

There are very good grounds for stating that various rumours that have appeared both in the Greek and the Continental Press regarding the Greco-Austrian and Greco-Servian commercial conventions rest on no solid foundation. I am informed that a perfectly reasonable and even friendly spirit has marked the negotiations, and that no attempt has been made to infringe the sovereign rights of Greece.

***

The arrival of the Germans at Alexandretta and the comprehensive preparations which are being made by them to convert what has hitherto been a comparatively sheltered anchorage off an unimportant village into a first-class harbour, railway terminus, and commercial headquarters, has profoundly affected the position of Great Britain in Cyprus. When we first occupied that island it was as a place of arms, and subsequent events in Egypt have greatly diminished its value as a military centre, while its lack of harbours has prevented Cyprus from becoming a naval station. Now, however, golden opportunity once more holds out her hand to the island of the Lusignans, and it appears possible that the commercial prosperity of Cyprus may revive until it even surpasses the wonderful record of mediæval Famagusta. What has been neglected for years may now be remedied under the bracing effects of vigorous German competition in the Levant by an important British commercial combination having Cyprus as its headquarters and chief distributing centre. In these days of magnificent engineering enterprise, the construction of a first-class harbour of vast capacity, capable of being entered by the largest ships alike from east and west, in what is now the salt lagoon of Akrotiri, is eminently practicable, and should be inexpensive in comparison with the sums which are now being spent on harbour works in the Eastern Mediterranean and Ægean.

***

For years past we have been accustomed to seeing prestige-hunting foreigners mark out for themselves "spheres of interest" and zones of commercial development in Turkey, and if we have said anything about it it has been some zoological reference about "carcases" and "eagles," or the "lion's share." We have certainly observed the difficulties which have beset the Porte on account of this brazen attitude on the part of those who openly consider themselves to be the political heirs-presumptive of Sultan Mohammed Reshad; but our feeling has at most been altruistic. Now we have an opportunity of contemplating the action of neighbours, whom quite recently we were in the habit of patronising and praising, engaged in perfecting their arrangements for the dissection of our own political corpse. Foreseeing the disruption of the British Empire, the Italians are working hard to peg out a claim in Egypt and to educate and colonize Alexandria, so that when the time comes the tradition of the Cæsars may be revived by the military occupation of a former Roman province. So resounding a success as that in Libya deserves repetition. Egypt is desirable, Great Britain plainly on the point of dissolution. Therefore, say the Italians, let us colonize that to which history entitles us and absorb it at the proper time. If things are really as bad as that, and El Lord is to have no further say in Egypt, may I venture humbly to point out to the traditionalists of the Tiber that the Roman occupation of Cleopatra's kingdom was subsequent, and, therefore, less valuable for traditional purposes, to the rule of the Ptolemies, which would, on that principle, entitle the Greeks to the dominion of Egypt, provided that they can square the Persians, who have a prior claim to any of them?

***

When the future economic historian of Egypt reviews the events of this year he will doubtless mention as one of the most significant the appearance of the first number of the *Journal* of the Egyptian Chamber of Commerce. The prophet's

Try MAVRIDES'

SOLD EVERYWHERE.
Factory at Choubra, Cairo.

Digitized by Google

mantle is often assumed with a light-minded irresponsibility, but it will be readily admitted that in this case no rash or groundless prophecy has been hazarded. The *Journal*, which is in the vernacular, is well printed and in every respect a very creditable achievement for so young an institution as the Egyptian Chamber of Commerce. It contains articles and information on subjects likely to be of interest to the members of the chamber, such as foreign trade, Egyptian markets, shipping movements in the Levant, and forthcoming adjudications in the Government departments. It is true that the chamber at present consists of only some eighty members, chiefly Moslem merchants of Cairo. This, however, is only a beginning, and it is hoped that the Alexandrian native merchants and members of the Coptic and other important communities will join. The movement is significant not so much for what it has accomplished as for what it promises to fulfil. It shows at least that Moslems are capable of working together for common ends in the commercial sphere. But, more than that, it points to the future rôle of the Egyptians in the commercial and industrial life of Egypt. It is admitted that the wealth of the country is mainly agricultural. Nevertheless its trade and industry are capable of being extensively developed, and that development has already begun. Most certainly the Egyptians should be encouraged to qualify themselves to share in the great work of the future, and the first number of the well-printed *Journal* we have received is a sign that some of them, at least, are awake, and ready to seize their opportunities.

***

The remarks of our Alexandria Correspondent (page 31) regarding the operations of the local "Oil Trust" in Egypt and their results upon the use of oil engines for the purposes of irrigation will doubtless be read with much interest by those of our readers who remember the article on "Oil Engines in Mesopotamia" which we published a few weeks ago. For the state of affairs depicted by our Alexandria Correspondent is precisely that to which the agriculturists of Baghdad and Busreh fear that they will be reduced if the monopoly for oil is granted in Turkey without some steps being taken for their protection. The Egyptian fellah often finds it impossible to run his pumping plant as it is, we are told, owing to the price of oil; and that is just what the cultivator on the Tigris and the Euphrates fears may be his lot. But whereas in Egypt, which is go-ahead and prosperous, the fellah can find other openings for his energy and enterprise, in Mesopotamia, which is to all effects only on the threshold of a new development, the stopping of his irrigation plant must inevitably mean ruin to many a poor man who was just beginning to hope for better times at last. And, it must be remembered, the very fact that a Baghdadi (for instance) will go to the trouble and expense of installing a pumping plant argues that he is of the progressive type to which the country must look largely for its salvation. It has not too many such men as yet, and if these natives are to be sacrificed in order to put money into the pockets of German speculators, it will indeed be a thousand pities.

***

The pacific penetration of the Sahara has been advanced another step. A French Cabinet Minister last week opened the railway between Biskra—in the "Garden of Allah"—hitherto the railhead of the Algero-Tunisian system and Touggourt, on the caravan route to the south. The ambition of the builders is that the line should ultimately reach Lake Chad, but they still have many weary and waterless miles to go and, at the present rate of desiccation, it is quite possible that the lake will have disappeared as a geographical feature before the railway is able to reach its shores. I am rather inclined to think that strategy may have something to do with the building of this extension, and that the French might not have found any pressing necessity to push their railhead so much further south had the Turks remained their neighbours in Tripoli. It is a remarkable fact that the importance of the time-honoured caravan routes across the Sahara from the rich countries to the South is steadily dwindling. This is undoubtedly due to the opening up and pacification of the coast belt which lies between Sokoto and the sea—and it is probable that the current of commerce will be flowing so strongly southwards by the time the French railway reaches the Chad area that it will be able to do but little to revive the passing glories of the northern trade route.

***

A correspondent in Turkey writes that Russia has obtained from Turkey the right to appoint a Russian delegate to the Ottoman Public Debt. This was a surprise to me, for I have learnt nothing to the same effect from any other source. From inquiries made over here I have not been able to obtain any confirmation of my correspondent's statement. In fact, one informant, who is in a singularly good position to know the facts, said that he had received no news of the appointment, and remarked that it was exceedingly unlikely that Russia could have obtained her desire. It is, however, a sign of the persistency with which Russia has urged her claim that such rumours should be current in the Near East. I see no reason to alter the opinion which I have expressed on a previous occasion with regard to this matter. There is no objection to her having a delegate provided that other countries have two. My correspondent's remarks on this point are worth quoting. "The Russian delegate," he writes, "is to represent Russia, whereas all other delegates represent foreign bondholders. In other words, Russia is aiming at a *political*, not a financial, appointment. Ought we not, therefore, to claim the right to have a similar representative—our new man to represent Great Britain?" A sentiment which—should Russia get her representative—I hope will not be lost sight of by those who watch over our interests.

***

A correspondent who hardly disguises his nationality under the name with which he signs a most interesting letter on "The Tide of Persian Affairs," addressed to the Editor, is most outspoken on the subject of British commerce and prestige in the realms of Sultan Ahmed Shah. He is fully justified in his lament. Our Persian policy is certainly far from perfect, and our Persian commerce vastly less comprehensive than it was. But what will you? How may a player win who abides by all the rules of the game while his adversary plays "all he knows"?

COMMENTATOR.

TRADE OF BAHREIN.

The report for the year 1912-13 on the trade of the Bahrein Islands contains many items of interest. According to the report, which has been drawn up by Major A. P. Trevor, the trade of the islands may be arranged under three heads, viz., the movement of pearls, of specie and of general merchandise. The first-named dominates the whole situation, as the second and third depend almost entirely upon the condition of the pearl trade. Were the take of pearls suddenly to cease, or even be very greatly reduced for some years, the vast majority of the urban population of Bahrein would have to leave the country, and the movements both of specie and merchandise would be reduced to an insignificant figure, as the majority of those inhabitants of Bahrein who are not directly or indirectly connected with the pearl trade are poor cultivators whose wants are few.

The pearling season of 1912 was on the whole a good one, the take being up to the average and the market fairly good until just the end of the season, when it became depressed on account of the outbreak of the Balkan War. As regards the import and export of pearls, the figures for that year showed an increase of 11.2 and 1.9 per cent. respectively. The increase in imports was due to the presence of representatives of two European pearl dealing firms, who bought large quantities of pearls at good prices. The news of this brought in the tawashes (Arab pearl dealers) from Katar and the Hassa coast and even Trucial Oman with pearls for sale, and consequently the imports increased. There can be no doubt that very large quantities were bought personally by dealers which do not figure in the statistics at all. In the season of 1913, when the report was being compiled, many more Europeans dealers came, three French firms and one British firm being represented. It seems possible, if this goes on, that Bahrein will become the market for all Persian Gulf pearls.

There are no industries in Bahrein worthy of the name except the pearl fisheries, and no industries are likely to be started for some years to come at any rate. Nor do there seem to be any promising openings for British trade in Bahrein. India is doing as well as can be expected, and the principal commodities in demand are not manufactured in the United Kingdom. Major Trevor warns exporters that in view of the backward state of the country and the absence of roads, etc., there is no demand for motor engines, pumps, and similar machines at present. Many firms dealing in this class of articles waste their time in circularising the Political Agent. He adds, however, that if there were a direct service of steamers to Bahrein it might be possible for British sugar and perhaps some other minor commodities to compete with Continental sugar and other goods. At present the heavy freight viâ Bombay makes British sugar too expensive.

Smuggling into Persia does not appear to have been quite so brisk during the year in review, but whether that is one of the causes of the reduced imports into Bahrein or merely a result is difficult to determine. There is no doubt that there were large stocks of rice and sugar, the two principal imports, on hand at the beginning of the year; this may account to some extent for the fall in imports.

Trade disputes are usually settled by a body of leading merchants called the Mujlis-ul-Urf, in accordance with local custom. Settlement by the Mujlis according to usage or by a Kazi by Mohammedan law are the only means of settling trade disputes or of recovering debts when one of the parties is a Bahrein subject, as no legal codes exist, nor is there any legislature.

Constantinople Business Letter

(From Our Own Trade Correspondent.)

Constantinople, May 2.

Ottoman Insurance Company.

The balance sheet of this company for the year ended December 31, 1913, reflects the general improvement of insurance business in Turkey during the past year, which for most companies was a profitable one.

The premiums of the fire branch of the company are given as £T93,772 during 1913, as against £T88,063 in 1912. After deduction for reinsurance, the net revenue of this branch was £T31,680 in 1913, as against £T26,211 in 1912. The losses paid amounted to £T26,444 in 1913, as against £T67,323 in 1912, of which the company's share was £T7,714 in 1913, as against £T19,936 in 1912. The premiums in the life and transport branches, which are of minor importance, amounted to £T2,461 and £T1,175 respectively during 1913. The working year shows a net profit of £T10,722, which is deducted from the loss during 1912, £T23.934, and the difference of £T13,211 is carried forward to the debit of 1914.

Ottoman Public Debt Receipts

The total revenues collected by the Ottoman Public Debt during the year ended February (old style), 1914, as reported telegraphically, amount to £T8,653,057, as against £T6,937,796, being the definite figures for the previous year.

The ceded revenues amount to £T4.545,760 to February, 1914, as compared with £T4,165,858 during the year ended February, 1913. The surtax on salt amounts to £T433,656, as compared with £T200,886; that on spirits to £T118.127, as compared with £T77,713; various tithes to £T2,656,338, as compared with £T1.978.128.

The sales of the Tobacco Regie Company during the year ended March, 1914, amount to £T3.119.000, as compared with £T2,558,000 during the corresponding period of the previous year.

Treasury Returns.

The Treasury receipts during the month of January (Old Style), 1914, as shown by the published returns, amounted to £T2,024,735, as compared with £T1,970,007 during the corresponding month of the previous year. If, for sake of careful comparison, deduction be made of certain receipts not figuring in the present returns, some of which from outlying districts have not yet been reported, although appearing in the last year's total returns for that month, this surplus is further increased to £T86,663 for the remainder of the Empire during January, 1914. While there is a very considerable decrease in the receipts during this month in the tithes on cereals, olives, and tobacco, of £T170,000, as also in the military exoneration tax of over £T100,000, increases occur in all the revenues without exception, and this is particularly noticeable in Customs duties, the general heading "Various Revenues," and the war tax.

The actual total receipts reported for the eleven months of the present fiscal year are in excess of those during the same period of the previous year by £T684,133, and if deduction be made of the items already referred to (which, while appearing in the returns of the previous year, do not find a place in the present returns), this surplus is further increased to £T753,051 for the remainder of the Empire during this period. The war tax and the subscription for the war fund to date amount to £T1,689,239. The Customs receipts during January, 1914, were greater by £T100,000 than during the corresponding month of the previous year, the increase being almost entirely in the import duties. During the first eleven months of the present fiscal year the duties on imported goods exceed those of the same period of the previous year, and, notwithstanding the loss of territory, represent an apparent increase of just over five millions of Turkish pounds in the imports during the same period as compared with last year.

Foreign Specialists.

The contract for a period of five years is to be signed by the Ottoman Ambassador in Vienna during this week engaging Mr. Begmann, a functionary of the Austrian Department of Forests, designated by the Austrian Government, who enters the Ottoman service as Director-General of Forests. The Ministry of Agriculture has decided to engage six French specialists, who will be attached to various agricultural schools in the provinces. The contracts of their engagement have been forwarded to the Ottoman Ambassador in Paris for signature.

Electricity for the Prince's Islands

The French firm of Delaunay-Belleville have submitted offers for the electric lighting of the Islands, as also the establishment of electric tramways. The same firm have made propositions for the supply of water to the Islands of Prinkipo by the drilling of artesian wells. The company is said to have withdrawn its proposal for a metal bridge between Halki and Prinkipo, and has substituted plans for a travelling pier in its stead.

Order for British Firm.

I learn just as I am writing this letter, that Messrs. Bradbury, Wilkinson and Co., Ltd., represented locally by Mr. A. Yaremdji, have taken an order for some 60 million stamps of five different denominations, to be issued by the Comité de la Flotte (Navy League). It will be remembered that it was the same British firm that printed the last successful postal issue and the Adrianople commemorative stamps.

THE FINANCES OF THE LEBANON.

Shoucair Pasha's Report.—I.

(By Our Cairo Correspondent.)

About a year ago your Beyrout Correspondent contributed to your columns a series of admirable articles dealing with the reforms that it had been decided to introduce into the administration of the Lebanon, and that were still required to "endow this poor province with real prosperity and advancement." To all those who read these articles it must have been apparent that the financial position of the "Mountain" was in a very precarious condition, and in view of the fact that one of the clauses appended to the protocol of appointment of the new Governor-General, Ohannes Koyounjian Pasha, promised "the preparation of the preliminaries of a general scheme of reforms bearing on the finances of the province," a report which Said Shoucair Pasha, the able Director-General of Accounts to the Sudan Government, and a Lebanese by birth, recently drew up at the request of the Governor-General, acquires very topical interest.

Shoucair Pasha, as one might expect of a man of his reputation and ripe experience, deals very thoroughly with the question. He opens by declaring that the Organic Law of 1861 (subsequently amended in 1864) has outlived its time, and that since the signatories certainly, from the very circumstances under which it was drafted, had no intention of thereby restricting the progress of the province—which is the effect it is having to-day—part of its provisions should be revised, if not abolished. And he then proceeds to examine the situation and explain his suggestions for the extrication of the Lebanon from its present serious financial position.

He has divided his study into three sections: (1) the steps to be taken to wipe out the Budgetary deficit; (2) the existing fiscal system and the reforms that are necessary; (3) the Budget and its administration.

With regard to the deficit, which amounts to £T27,000, this is due to the facts that, as in other countries, the cost of living has risen, and that the alteration in the social position of the Lebanon has necessitated an increase in the strength and in the pay of the Gendarmerie and the creation of a new seat for the district of Deir el Kamar in the Administrative Council. Shoucair Pasha points out that in seeking a means to adjust the deficit the idea of reducing the salaries of the officials must not be entertained for one moment, since as it is they barely suffice to meet the cost of living to-day. Far more sensible is it to endeavour to provide the necessary funds by reduction of expenditure in other directions if possible and by studying in particular what new sources might be tapped for increasing the revenue without further taxing the inhabitants. In this connection the report contains some most important and valuable suggestions.

According to Article 15 of the Organic Law of 1861 and 1864, the Lebanese taxes, the amount of which could be increased up to £T35,000, were to be devoted to the administration and to other expenses of public utility. Any surplus remaining was to go to the Imperial Treasury; and, on the other hand, if the general administrative expenses exceeded the authorised revenue, the Imperial Treasury was to make good the deficit. Basing itself on this Article, the Lebanon Government asked the Sublime Porte to pay to it the sum of £T27,000, the deficit on the 1913-14 Budget. But the Porte has turned a deaf ear to this request—indeed, since 1880 it has not paid the Lebanon one cent towards its administration—and Shoucair Pasha very sagely remarks that in the circumstances the Lebanese would be ill-advised to rely upon the Porte's execution of its obligations, and that they must therefore seek relief in other directions.

He declares that the Lebanon has been most unfairly treated both as to its financial relations with the Central Government and as to its frontiers, and that if only its economic rights were respected its revenues would prove all sufficient for its requirements. He is of opinion that it is to the mutual interest of the Porte and the Lebanon that the latter should be financially independent of the former, and that the abolition of Article 15, accompanied by certain obviously equitable concessions by the Porte, is a *sine quâ non* of the maintenance of the financial stability of the "Mountain."

In the first place, whilst the Imperial Treasury pays nothing to the Lebanon, the latter, notwithstanding its poverty and its restricted area, contributes, indirectly, to the Porte from £T80,000 to £T100,000 per annum. This statement may probably appear astonishing in certain quarters, but Shoucair Pasha clearly demonstrates that it is perfectly correct.

It is a recognised principle nowadays that Customs duties are the rightful reversion of the country consuming the goods on which these duties are levied. The Lebanon, however, has no port where it can levy import duty, and between it and the other vilayets there is no Customs frontier; consequently, all dues levied on goods imported into and consumed in the Lebanon are taken by the Ottoman Treasury. Shoucair Pasha does not suggest the creation of a Lebanese Customs Service, nor does he propose the institution of Customs dues on goods imported into the Lebanon from the other vilayets, but he considers that, in all equity, the Lebanon should be allowed to participate in the Customs receipts. He suggests that the example of the relation of Egypt and the Sudan should be followed, and that just as Egypt pays the Sudan the sums collected by her Customs on goods destined to the Sudan, so the Ottoman Treasury should hand over to the Lebanon Government whatever sum is levied by its Customs on goods consigned to and consumed by the inhabitants of the "Mountain." The amount to be restituted could be assessed every year by a commission, but basing himself on various data Shoucair Pasha considers that the sum reverting to the Lebanon Government under this head would be from £T80,000 to £T100,000. It is, of course, possible that the Ottoman Government would reply to such a proposition that the Customs dues are its rightful reversion in return for the protection it affords the Lebanon. In that event, Shoucair Pasha is of opinion that it would be fairer for the Powers to define the situation, fix the annual tribute due by the Lebanon, and accord to the latter the right to obtain, on the basis of the Egypto-Sudan arrangement, the restitution of the dues levied on its importations. On the face of it, this proposal is most reasonable, and it certainly appears iniquitous that the Powers, who forced the Organic Law on the Porte in the interests of the Lebanon, should connive at the present state of affairs, which is seriously affecti ng that province.

Near East Markets.

SPECIAL REPORTS.

(From Our Own Correspondent.)

Alexandria. May 1.

Owing to the favourable weather conditions of the past winter, the cereal crops have been particularly successful. Wheat, barley, and beans have been less satisfactory in Upper Egypt owing to 400,000 feddans having remained uncultivated in consequence of the low Nile. On the other hand, in Lower Egypt the wheat crop has been very abundant in quantity and very fine in quality.

Egypt, formerly the granary of Rome, exported only a few years ago wheat and beans, but to-day the production is not sufficient for local requirements, and we have to import considerable quantities of flour, wheat, and maize. Egypt has doubled its population since the British Occupation, and it is to be hoped that the Mariut region may be provided with water so as to increase the local production of cereals.

Bucharest. May 2.

Lately much grain has been exported from this country to Austria-Hungary, a state of things which has only once or twice occurred before, in famine times. During the month of March the following quantities were exported by rail by the Nugheni-Itskani frontier: 15,407 tons of maize, 16,000 tons of wheat, 770 tons of barley, and 800 tons of oats.

Braila. May 2.

We have had fine warm weather, with occasional showers, throughout the week, and prospects respecting this year's crops are so far excellent.

The following information is compiled from the weekly bulletins received at the London offices of the Imperial Ottoman Bank from its correspondents in the Near East.

Mosul. March 31.

The following are extracts from the monthly report for March:—

The rainfall during the month was satisfactory, and the outlook for the crops is favourable.

The mild winter and good pasturage have been beneficial to the breeding industry, and good supplies of wool are expected.

Except for a small inflow of cereals from Diarbekir our market has been quiet. In view of the hopeful outlook for the new crop prices of cereals here have recently suffered a drop.

Homs. April 10.

The following are extracts from the monthly report for March:—

There has been almost a complete lack of rain during the month. This has arrested the growth of the crops at the moment when they had greatest need of water. As a result the crops have been put back about a month, and all the advance, as compared with last year's crops, which was made during the favourable weather at the end of last year until February, has actually been lost. It is reported that in some small centres the crop is hopelessly damaged. If the drought continues for about three more weeks the suffering in our district will be great.

In consequence of the drought cereals have been in good demand, and prices tended to rise.

EDGAR WRIGHT Manager

23 Moorgate Street

Aleppo. April 18.

The following are extracts from the monthly report for March:—

Reports concerning the crops are so far favourable, but the persistent lack of rain causes some uneasiness amongst agriculturists. If the drought continues during April, it is predicted that the crops will be seriously injured.

Our market has remained quiet. Imports are satisfactory owing to sales to buyers in the interior.

Exports, however, are stagnant, both in consequence of the unremunerative prices in Europe, especially for cotton, and the delay in the arrivals of products for export. Cereals continue to obtain low prices.

CURRANTS IN GREECE.

(From Our Trade Correspondent.)

Athens, April 27.

The Parliamentary Commission which was appointed to examine into the currant question and into the standing of the "Société Privilégiée pour la protection de la production et le commerce de raisin de Corinthe" has now issued its report. After examining one by one the various methods which have been adopted since the currant crisis commenced, the Commission expresses its opinion that the Société and all the related companies and measures (the Currant Bank, the Retention Law, etc.) have proved a failure. But it comes to the conclusion that under existing circumstances the abolition of the Société Privilégiée would not be advisable since the production, which has been supported by similar means for some twenty years, could not possibly stand being suddenly deprived of such support. Thus, it is indispensable, the Commission considers, to keep the Société Privilégiée going, but with some restrictions and alterations in regard to the management and in the way of dealing; or it would be better still for the Société to be taken over by the Government itself, so as to be under its control.

As to the financial standing of the Société Privilégiée: the first three years the Société distributed a dividend not exceeding the usual bank interest; in 1905 Dr. 6 per share (of Dr. 250=£10), in 1906 Dr. 15 per share, and in 1907 Dr. 25. The five following years there were no profits realised. On the contrary, the Société had losses amounting as follows:—To August 9, 1912, Dr. 1,400,000: 1908, Dr. 719,173; 1909, Dr. 591,579; 1910, Dr. 773,964.

Following is a table showing the crops and quantities of currants reported in the years 1905 to 1913:—

	Crop. Lbs.	Dry Currants. Export. Lbs.	Fresh Currants. Export. Lbs.
1905....	341,500,000	238,931,000	—
1906....	288,500,000	229,200,000	3,514,000
1907....	228,500,000	265,300,000	2,411,000
1908....	400,000,000	226,700,000	3,354,000
1909....	405,000,000	256,200,000	6,193,000
1910....	255,000,000	248,982,000	5,246,000
1911....	334,000,000	239,655,000	14,300,000
1912....	345,000,000	251,933,000	16,657,000
			To 20th March, O.S.
1913....	325,000,000	200,000,000	18,800,000

OPIUM MARKET.

Messrs. Barker Brothers, Smyrna, report as follows for the week ending April 24:—The sales this week on our market amount to 184 cases of manufacturing descriptions at 14s. to 15s. 6d. Sellers are firmly maintaining the position owing to severe frost and snowy weather which set in in the upper districts; and until they ascertain what damage has been caused no change can be effected. The large demand by all the shippers, too, has further strengthened the market, and to-day no eligible material guaranteed 11 per cent. can be procured at anything under 15s. Common mixed low grades have fetched this week 13s. 6d. to 14s., and more sightly and uniform goods, with a doubtful render of 10 per cent., have changed hands at 14s. 3d. The arrivals are 4,546 cases, against 2,368 at same date last year.

PRODUCE REPORT.

Sugar. London, May 7.

The Beet market dull and easier in the beginning of the week, but owing to American reports of an advance of prices became steady, with moderate business passing for May at 9s. 3½d.; August, 9s. 6½d.; October, 9s. 7½d.; and October-December, 9s. 0½d., f.o.b. Hamburg. Refined sugar has been steady and unchanged for English. Foreign is firmer, first marks granulated being quoted, ready, 11s. 4½d.; June-August, 11s. 6½d.; October-December, 11s. 9d., f.o.b. Hamburg. Other descriptions are quoted as follows, all f.o.b.: Say's cubes, prompt, 15s. 1½d.; loaves, 14s. 3d., f.o.b. Paris; German and Austrian cubes, prompt, 13s. 3½d.; May-August, 13s. 5½d., f.o.b. Hamburg. Large supplies of cane sugar were offered at auction this week, and met a rather slow demand, though at about steady prices; Demerara mostly sold at 13s. to 15s. 4½d.

Coffee.

Large supplies were offered at auction, and all met a good demand at steady prices, Costa Rica low mid. to mid. selling at 69s. to 79s. 6d., and bold 76s. to 85s. East Indian small sold at 63s. to 65s. 6d., low mid. to mid. 67s. 6d. to 75s. 6d., and bold 71s. 6d. to 81s. The speculative market opened easy, but is closing steady, though at a 3d. to 6d. decline, May having been sold at 41s. 1½d., July 41s. 9d., and September 42s. 6d.

Seeds.

Linseed has been steady, but generally quiet, London-Calcutta spot and afloat and up to April-May being quoted 49s.; June shipment is offered 49s. 3d., June-July 49s. 9d. Rapeseed is firmer. Yellow Cawnpore, May-June, offered at 53s. 6d., and brown ditto sold at 50s. 3d. to Hamburg. Cotton-seed is very dull and inactive, London-Egyptian being quoted for May £7 15s., June £7 15s., November-January £8 7s. 6d. per ton. Haricot beans are quiet and practically unchanged. There is little variation to note in canary seed. Stocks are small, and although buying is mostly of a retail character prices keep firm in all descriptions.

Oilcakes, etc.

Linseed cakes remain unchanged on the spot, and a quiet trade prevails, while forward positions, although somewhat firmer, attract rather more attention. Best London made are offered at £7 10s. to £7 15s., fine seedy Calcutta are firmly held at £7 10s. to £7 15s. for April-May shipment, and best quality Russian are offered at £7 10s. to £7 12s. 6d. Cotton cakes are in better demand, and a good trade has been done during the week, but owing to a plentiful supply of Egyptian prices are becoming easier; April-May shipments, however, attract more attention at £4 7s. 6d. to £4 8s. 9d. English makes are slightly easier, being offered at £4 15s. to £4 17s. 6d., and Bombay £3 17s. 6d.

Decorticated cotton cake and meal find better inquiry at £7 15s. to £7 17s. 6d. per ton ex quay. Locust beans are still scarce, and the little which is offered is held firmly at £6 10s. for whole and £6 15s. for kibbled.

Corn, etc.

Wheat.—The cargo market is firm and slightly dearer. Barley is firmer, South Russian May-June being offered 21s. 1½d. Oats are steady and unchanged. Maize generally held at 6d. advance owing to unfavourable weather reported during the week.

IVORY REPORT.

In their report dated May 1 Messrs. F. W. Bowyer and Bartleet state:—The second sale of the year commenced on the 28th ulto. and terminated on the 29th ulto. The supply offered was moderate, totalling about 75½ tons. This quantity was mostly sold with good competition at firm prices all round. The supply offered consisted of the following assortments: Zanzibar, etc., fourteen tons; Egyptian, thirty-six tons; West Coast, eight tons; land carriage, seven tons; waste, eight and a-half tons, etc.; remainder, rhinoceros, walrus teeth, etc. East Indian, Zanzibar, etc.—Sold at steady values. Billiard ball ivory very firm. Egyptian and Tripoli.—In good supply, and sold well. Hard rather dearer. Scrivelloes steady. West Coast African.—Sold well at firm values. Abyssinian on the same basis as Zanzibar. The next sale will take place July 21, 1914.

EGYPTIAN COTTON MARKET.

(From Our Own Correspondent.)

Alexandria, May 1.

Prices have remained almost stationary. The bulls have been less active, and the technical position of the market is more healthy. Local speculation is playing only a secondary part, and for the time being it is impossible to foresee anything that is likely to cause an increase in prices. The demand from abroad is better, and in view of the increasing requirements of spinners the position may be regarded as good.

Reports regarding the new crop are very satisfactory. Water for irrigation is abundant everywhere, and already the plant presents a good appearance.

Unlike other years, exporters are hardly buying any of the new crop. This is accounted for by the large stock of old crop cotton held in Alexandria, which the spinners will not be able to use up entirely before the new crop is gathered.

Exports continue to mount up, and will in all probability exceed last year's total. So far we have exported 800,000 bales. Cotton seed continues to decline, owing to the falling off of the demand from abroad.

Messrs. Davies, Benachi and Co., of Liverpool, have received the following telegram from Alexandria, dated Wednesday :—

Market steady. May, 17 2/32, November, 18 3/32. Exchange, three months' date, 96¼.

Steamers Sailed.

April 27.—"Britannia." May 1.—"Venetian.' May 2.—"Corsican Prince," Manchester, May 4.—"Caria."

LIVERPOOL REPORT.

Messrs. Reynolds and Gibson telegraph :—Egyptian Spot.—There has been a slight falling off in the demand, the total sales amounting to 2,300 bales, against 2,700 last week. Inquiries have been principally for medium grade of Afifi, Nubari, Assili. A fair business has been done in Soudan cotton. In lower-grade Sakellarides a small business has been done, but for the better grades, in which the selection seems to have considerably augmented latterly, there has been very little demand. Joannovitch and Upper have only been in limited request. Quotations for Afifi, Nubari, and Upper grades are raised 5 points. Other grades unchanged.

The *Manchester Guardian* reports (April 30) that the export branch in ordinary makes of Manchester goods is dull. The Levant buyers, although they have orders to place, are waiting for better financial reports.

MANCHESTER MARKET.

(From Our Own Correspondent.)

Manchester, May 6.

Compared with a week ago the conditions prevailing in the market have shown very little change. The tone has continued quiet, and prices have been generally unaltered. There seems to be lack of enterprise on the part of buyers at the moment, and most of the transactions have been of a sorting up character. More interest is now being taken in the prospects for supplies in the raw material. In the American belt the conditions for planting have not been altogether favourable, and owing to bad weather it is generally believed that the growth will be about a fortnight late. The position is also rather irregular in Egypt, and the outlook is very uncertain. In piece goods suitable for Egypt a dragging business has been met with in most quarters. No improvement in the general demand can be recorded. Buyers seem to be afraid to purchase for distant delivery. It is said clearances abroad are not altogether satisfactory. The Levant also continues slow, and there are no signs of an early improvement in the turnover. Although operations have not been at a standstill for India, the sales show a distinct falling off compared with a week or two back. There are hopes of China giving larger support in the near future, but at the moment the bids are very poor, and it is only where makers accept decidedly low figures that sales can be arranged. There is considerable irregularity in the position of manufacturers. Some makers are firm and want fairly long delivery, whilst others are in want of orders and can complete contracts quickly. In yarn circles a rather slack state of affairs has been reported. In both American and Egyptian qualities for home use buyers have purchased from hand to mouth. The wide difference in cotton futures between current and distant months has a rather adverse effect upon trade. There has been some business done for India in bundles, but delivery is becoming increasingly difficult to arrange. The Near Eastern outlets have been quiet, and there has not been much done for the Continent.

SETTLEMENT OF NEW BULGARIA.

(From Our Own Correspondent.)

Sofia, May 2.

The Cabinet is now considering the amended proposals of a Belgian company for settling the refugees in New Bulgaria. The company offers to undertake the building of several towns along the coast of the Ægean Sea, on a modern architectural system, with schools and all other indispensable accessories. In the first instance the company is prepared to spend £2,800,000, and will undertake to arrange for the employment of the inhabitants.

FURNITURE IN EGYPT.

The importation of furniture into Egypt is, according to a Belgian Consular report, relatively considerable. During the year 1912 it amounted to £142,986. Many articles in bent wood come from Austria; England and France supply furniture de luxe; and Italy detached pieces in walnut of an ordinary quality which are put together at destination.

French drawing-room furniture, especially of Louis XV. and Louis XVI. styles, enjoys considerable patronage in Egypt. In detail, this furniture, composed of a couch, two chairs, two armchairs covered with silk, a cheffonier, a folding screen, etc., are sold at from £90 to £100 sterling.

Drawing-room furniture after the style of Louis XVI., in European walnut of Italian manufacture, composed of eleven pieces—sofa, armchairs, and chairs, covered with imitation silk—are sold at £25 to £30 sterling.

The local furniture industry recruits its labour from the well-organised professional schools, and offers increasing competition with imported European importation.

There are at present 46 furniture factories in Egypt—37 at Cairo, 7 at Alexandria, 1 at Port Said, and 1 at Tantah. The furniture sold in Egypt is the same as that used in Europe. It is worth bearing in mind that the chattels preferred are those of large size, embellished with carving, and covered with silk in brilliant colours.

GREEK TOBACCO-WORKERS' STRIKE.

(From Our Own Correspondent.)

Salonika, April 29.

After much negotiation, the strike of the tobacco workers in Kavalla, Drama, Pravista, and here was settled by means of concessions on both sides, and it was arranged that work should be resumed on Monday last. At the last moment, however, the men in Kavalla repudiated the agreement arrived at by their representatives, elected a new committee, and decided to continue the strike until the whole of their original demands were granted. They have maintained this attitude, notwithstanding the remonstrances of the Salonika and Drama workers, who have loyally stuck to the arrangement and gone back to work; but Pravista joined the Kavalla malcontents. In the last town there was some demonstrating, which was quickly suppressed by the police; so things are quiet there, but the tobacco establishments are strongly guarded by soldiers. It is thought the Kavalla workers cannot hold out long, as their funds are supposed to be running out.

EGYPT PROMOTION ASSOCIATION.

The second annual general meeting of the Egypt Promotion Association was held at Shepheard's Hotel, Cairo, on April 23. Mr. E. A. Harrison occupied the chair, and amongst those present were Sir Reginald Oakes, Messrs. Baehler, Wild Bey, Flood, Clay, Pecher, Vezey, de Lancker, Meimarachi, Hergel, and Abramson.

The work of the association was explained by the chairman. The annual report and balance-sheet were unanimously adopted, and the belief was generally expressed that the efforts of the association to promote an increase in the number of tourists to Egypt had been well carried out.

The annual report of the association for 1913-14 shows the excellent work it is carrying on. Egypt has had the best season on record, and for this the efforts made by the association are doubtless in part responsible.

For the advertising campaign of 1913-14 the efforts of the association were mainly devoted to Great Britain and America. Next year's efforts are to be concentrated in Germany.

It is stated that the financial support the association has met with has been fairly satisfactory so far, but it is difficult to make many of those who undoubtedly reap a benefit from the tourist traffic realise that it is in their interest to join the association, and it is hoped that contributions may largely increase in the future so as to permit of extension of the functions of the association, and thus to bring them more on a level with those of other tourist centres.

The balance-sheet for the year ending March 31, 1914, shows a total income of £E1,847; of this £E635 went for descriptive booklets in English, £E300 for special advertising in the English papers, and £E146 for bioscope matinées. A most satisfactory feature is the low expenses of management.

The trade in paper of all kinds is showing considerable development at Tripoli. The articles most in demand are paper for the packing of fruit (the importation of which, in 1912, was 600 bales of 100 kilog., the size commonly used being 45/60 in reams of 480 sheets, with 40 reams per bale) and letter paper (value of annual imports of 21,000). There is also a demand for plain letter paper (dimensions, 20/39 cm.).

Engineering Notes.

Motor Boats for the Ægean.

Our Sofia Correspondent informs us (under date of May 2) that the Bulgarian Government three months ago ordered from an engineering firm at Trieste three motor boats for use at Porto Lagos. The first of these boats, which has been named "Zora," was expected to arrive at Porto Lagos about the 5th inst. It is 3.5 metres in length, and 1.62 metres in the beam, and is fitted with a 22-h.p. benzine motor engine capable of driving it at 18.5 kilometres an hour. The cost of the boat is given as 15,000 francs (£600).

Motor Cars in Southern Greece.

In a recent report the United States Consul at Kalamata remarks upon the lack of motor-cars in Southern Greece. He states that though Kalamata is a city of over 18,000 inhabitants, with a good quota of wealthy and well-to-do people, the automobile has yet to make its permanent appearance. Many years ago a second-hand car was purchased by a local tradesman, but it quickly got out of order and was shipped away. Since then only one automobile belonging to an American tourist has entered the town. The public conveyances of Kalamata consist of ten or twelve old and dilapidated carriages and a tram-line, which connects the city with the port, one mile distant. There are no private vehicles of any description. This latter fact will perhaps make the sale of the first automobile difficult, because no one is accustomed to have a conveyance of his own, but, on the other hand, it is thought that a car of undoubted service and low price once sold and seen to give satisfaction will influence other sales. The roads are fair in several directions. On Sundays and holidays every available carriage is requisitioned for the beautiful sea drive, which extends for several miles along the coast of the Gulf of Kalamata. There are many business men who either live at the shore and come to the city daily, or whose business takes them from Kalamata to the harbour several times a week.

Searchlight for the Near East.

A portable searchlight, which has recently been constructed, will undoubtedly be found very suitable for either military or general service in the Balkans. This searchlight, which carries a parabolic mirror of 35 centimetres diameter, has an effective range of from 1,000 to 1,500 metres, only weighs 300 kilograms, including all accessories, benzine, water and oil supplies required to work it for from eight to ten hours, and 200 metres of insulated wire. The apparatus can be taken to pieces so that it may be transported by four draught animals, each carrying about 80 kilograms; one carries the searchlight, its stand and benzine reservoir; another the dynamo and its accessories; another the motor with an oil reservoir; and the fourth, two rolls of wire, the tools, and the water supply. This searchlight is suitable for work in mountainous country, and can be moved readily over any ground. The motor of 4 to 6 h.p. revolves 15,000 times per minute, a supply of 15 litres of benzine suffices for from eight to ten hours' work.

Ploughing Tractors.

It is admitted that ploughing tractors have been doing excellent work in the Near East during the last few years. They have been turning over vast tracts of virgin soil which would have had to remain uncultivated if the owners depended entirely on animal traction. Oil tractors are mostly employed, and are in general favour, but sometimes, and especially in extremely hard and stiff lands, it is found that they are not sufficiently strong for the work for which they are most needed. In such cases a compound steam tractor is more economical and the only one that could plough up some of the stiff soils. The application of superheated steam to this type of tractor enables it to compete with many of the newest systems of agricultural motors. The advantages of convenience and economy in running cost possessed by the oil tractor have at times given it a great advantage, and the interest taken was so general as to considerably limit the prospects of the steam tractor, especially in countries where it is not always easy to procure adequate supplies of suitable water. However, in spite of all this, the steam engine has already caught up the internal combustion engine as regards economy, and it is doubtful whether any type of tractor of equal power and capacity is so low in running cost as the superheated steam tractor. One of these tractors, attached to a six-furrow plough, turned over five acres of clover lea in about nine hours, the furrows being 4 inches deep and 10 inches wide, at a cost, including wear and tear and depreciation, of 5s. per acre. This is less than half the cost of ploughing with horses, to say nothing of the great saving of time. The superheated steam tractor entirely overcomes the difficulties incidental to steam engines in localities where water is scarce; and when not employed in ploughing or for haulage it can be found of great utility for driving threshing and other farm machinery. It has also been proved that a well designed and constructed superheated steam tractor requires much less attention than the petrol-driven vehicle.

Important Shipbuilding Order.

The Times understands that a large order is about to be placed with British shipbuilders by the Hungarian Levant Steamship Co., Limited, of Budapest. It is believed that the company contemplates ordering six large passenger and cargo steamers from different firms, and that the amount to be paid for each is about £100,000. Probably the fall in the price of ship-plates, due partly to the action of German steel-masters in cutting the prices and partly to reduced activity in this country, is responsible for the decision to order the vessels at this moment. The cost of labour is certainly no lower than a few months ago.

Ispahan Telephone Service.

The British Consular report for the year ending March, 1913, states that the Persian telephone service, first established in the town of Ispahan in 1910-11, numbered, when the report was written, about 120 subscribers, and that wires had been carried as far as the villages of Sehdeh, about sixteen miles, and Najafabad, about twenty miles, west of the town. A scheme for the further extension of the line westward was then under consideration.

ROUMANIAN GOVERNMENT'S OIL PROPERTIES.

(From Our Own Correspondent.)

Bucharest, May 2.

The question between the Roumanian Government and the refineries over the price of lamp oil, which had reached a state of deadlock, is again to be taken up, and it is hoped that a solution to the question will now be found.

Ever since the question of the price of lamp oil for the State came under discussion between the Government and the oil companies, rumours have been current that the State was in treaty with a large Roumanian financial group for the exploitation of its petroleum-bearing property, which up till now has lain idle on account of the prohibitive conditions of concession. It is now stated that the State will have its part in the undertaking, and therefore be able to obtain its supply of burning oil at a very favourable figure, and far under that yet contracted for with the companies. It is reported that a considerable amount of capital has already been subscribed.

OIL FIRE AT KHARTOUM.

The *Sudan Times* reports that recently a serious fire broke out at the petroleum warehouse west of the town. About 800 or 900 cases of petroleum, and 650 cases of lubricating oil, belonging to the Vacuum Oil Company, were destroyed. A quantity of oil and alcohol belonging to the Government was also destroyed. The total loss is estimated at £E3,000.

The Engineering Editor of "The Near East" will always be pleased to answer inquiries from readers respecting any machinery or appliances described in these pages.

AUSTRIAN ENTERPRISE IN ANATOLIA.

(From Our Special Correspondent.)

Belgrade, May 3.

It is reported here that an important Austrian group is negotiating with the Ottoman Government for the purchase and exploitation of large forest tracts in Anatolia. At the head of the group is Count Mikcs, chairman of the Zabolaer Sawmills, and interested in the venture are Götz and Co. and Gebrüder Grödel, of Vienna. It is stated that the negotiations with the Ottoman Government are on the point of being concluded. It is the intention of the combine to erect extensive sawmill works in Anatolia, and to devote themselves exclusively to a seaborne export trade.

TENDERS INVITED.

EGYPT.

Span Bridges.—The Ministry of Public Works invites tenders for the supply, transport, and erection of three swing span bridges and four lift span bridges. Tenders to be sent to Director-General, Central Gharbia Drainage Projects, 3, Soliman Pasha Street, Cairo. September 30.

Paper-cutting Machine.—Tenders are invited by the Director of the Printing Department, Ministry of Finance, Cairo, for supply of a paper-cutting machine. May 27.

Tarred Rope, Etc.—The Egyptian War Office invites tenders for the supply of 75 cwts. of tarred rope and 241 cwts. of Italian rope. May 25 (L.).

Raw Silk.—Tenders are invited at the Central Stores, Ministry of Finance, for the supply of raw silk necessary for making the Holy Carpet. June 18.

Iron Hooping.—Tenders are invited for the supply to the War Department Stores, Citadel, Cairo, of 2,000 okes of iron hooping. May 25.

Barley.—Tenders are invited at the War Department Stores, Tura, for the supply of 20,150 ardebs of barley. June 2.

Cyprus Cattle.—The Director-General, Department of Public Health, Cairo, invites tenders for the supply of Cyprus cattle for the Serum Institute, Abbassia. May 22.

Water Vans.—The Central Administration, Department of Public Health, Cairo, invites tenders for the supply of three double water vans. June 22.

Table Linen, etc.—The Ministry of Public Instruction, Cairo, invites tenders for the supply of table furniture, linen, ink, etc., for the schools. June 15.

Chairs.—The War Office, Cairo, invites tenders for the supply of 130 chairs, bent wood, cane-bottomed, at the Citadel Stores, June 1.

ROUMANIA.

Copper Pipes, Etc.—Tenders are invited by the Roumanian State Railways, Bucharest, for the supply of red copper pipes, steel or soft iron water pipes, and forged, puddled, and homogeneous iron bars. May 18.

Martin Steel Sheets.—Tenders invited at the State Railway Offices, Bucharest, for the supply of 110,550 kilogrammes of Martin steel sheets for rails. May 24.

Egyptian Engineering Co., Ltd.
CAIRO and MANSOURAH.
Egyptian Engineering Stores, Alexandria.
Government Contractors, Engineers, Importers of Machinery of every description, Diesel, Steam, Gas and Oil Engines, Pumps Windmills, Agricultural Machinery, &c. Large stocks kept at all depots.

NEWS FROM ALL SOURCES.

M. Stefanovitch, late Servian Minister of Commerce, has left Belgrade for Athens on behalf of his Government to sign the agreement concerning the Servian position in Salonika. He will also be in charge of the negotiations for the conclusion of a new commercial treaty with Greece.

Our Athens Correspondent informs us that M. Zeveleki, manager of the Smyrna branch of the Banque d'Orient, has been arrested on a charge of fraud involving a sum of 800,000 frs.

According to recently published statistics Sofia has increased in population from the 20,856 inhabitants of the 1880 census to 117,964 in 1913.

The Austrian advance of thirty million francs to Bulgaria last autumn, was to have been paid back on April 30, but the term has been prolonged until October 31. This advance will have to be redeemed out of the forthcoming loan.

The Roumanian Parliament has dissolved after reading for the third time the Bill for the revision of the Constitution. The new elections will begin on May 31, and the Constituent Assembly which is to carry out the revision will meet on June 18.

The receipts from the two Golden Horn bridges for the month of March were £T8,525, as compared with £T6,627, £T5,928, £T6,575, and £T6,618 for the preceding four years respectively. The trolley running across the Karakeuy Bridge has brought up the receipts there considerably.

The *Orient* reports that a rich Armenian of Egypt has given the sum of £T10,000 to establish an agricultural school at Adana, with the promise of further funds as they may be needed later for its maintenance.

Messrs. J. Smith, Hargreaves and Co., of 11, Fountain Street, Manchester, have opened a London office at 9 and 10, Foster Lane, E.C., which will be in charge of Mr. W. Lake. The telephone number is Bank 8511.

The *Lokalanzeiger* states that a German Consulate is to be established at Uskub, and adds that this step, in the interests of German trade, was under consideration before the outbreak of the Balkan war.

Mr. J. H. Hartley, manager of the engineering department of Messrs. Edwards and Son, Constantinople, is at present on a visit to this country.

The production of crude oil in the Roumanian fields for March (O.S.) was about 160,000 tons, an estimated increase of nearly 25,000 tons over the February production.

The Roumanian Government recently placed orders for 3,000 tons of rails with an Austrian firm. Our Bucharest Correspondent informs us that a similar quantity is likely to be required, and ordered, during the summer.

In the second half of June a Pan-Hellenic exhibition illustrative of the wine and spirit industry is to be held in Athens. Prizes will be awarded to the makers of the best wines. Wine making apparatus will also be shown, but no prizes are to be awarded in this section.

M. Victor Numa Legoupil, of 21, Boulevard Beausejour, Paris, President of the Ottoman Mining Company (of Cassandra, Thrace), who died in Paris, October 7 last, left estate in the United Kingdom valued at £5,187.

The Monthly Report of the Central Economic Board, Sudan Government, for March, states that during March 2,372,920 kilos of gum, valued at £55,842, were exported, via Port Sudan, and 3,076 kilos, valued at £75, exported via Halfa.

The Persian Government have decided to prohibit the importation of morphine into Persia. Chemists of repute, possessing diplomas, will, however, be allowed to import morphine, for medical purposes, provided that they give an undertaking not to sell it for other than such purposes.

ALBANIA'S COMMERCIAL FUTURE.

With the constitution of Albania as an autonomous principality (says the *Electrical Review*) a new epoch of industrial and commercial progress may be expected to supervene concurrently with the development of the country's resources.

The chief port for imports and exports and for the moment the most considerable business place for transactions with Southern Albania is Valona. Direct dealing with inland localities is, for the present, hardly feasible.

Shipments either outwards or inwards are effected mainly by Austrian and Italian ships. All the articles of daily requirement are comprised among the goods imported, for the country possesses no industries. Later on, with the gradual development of the country, a certain demand for machines will arise, and, of course, in the first place, for those appertaining to agriculture and the tilling of the soil. The circumstances of payment in Valona may be described as on the whole good. No bankruptcy has occurred for some years, and the war has made no difference in this respect. The usual terms are cash against documents. The sending of travellers to Albania is recommended, as signs of an economic awakening are evident, and exports in late months have shown a rising tendency. With respect to the Customs treatment of travellers and their samples, the Turkish regulations for the moment are those prevailing. A permit to travel must be obtained; but at Valona the regulations are not strictly enforced, and there is no need to have passes *visé*. The coinage in use is gold Napoleons (of 10 or 20 fr. value), which are current everywhere. In Valona their value is 95 piastres. The construction of both an Austrian and an Italian hotel is proceeding.

COMMERCIAL TRAVELLERS IN PERSIA.

The most favourable season for commercial travellers to visit Persia, according to a French consular report, is the autumn (October and November).

The daily expenses of a commercial traveller at Teheran, says the report, may be estimated as follows:—Room 5 to 8 francs, meals (breakfast, luncheon, and dinner) 6 to 7 francs. If board and lodging is taken monthly, the expenses are from 275 to 325 francs per month per person.

Shipping Intelligence.

BRAILA NOTES.

(From Our Own Correspondent.)

Braila, May 2.

Larger arrivals of grain and a better grain market abroad have caused a more active enquiry for spot tonnage this week and a larger volume of business has been effected; the number of steamers in port is, however, still in excess of the demand, so that a rise in freights has been impossible. The ruling rates from the Danube (Braila or Galatz) are to-day: 7s. to Rotterdam and 7s. 3d. to Antwerp or Hamburg, whilst from Sulina 6s. to Rotterdam and 6s. 3d. to Antwerp is the utmost obtainable. There has been a small enquiry from Braila for West Italian ports at rates averaging 8.50 fr. according to destination.

Large quantities of maize are reported to have been sold to Hungary and Galicia and this cargo is thus lost to the Danube freight market.

The water in the Danube has risen six inches since my last advices, so that vessels can now load up river and can cross Sulina bar drawing 23 feet.

BAHREIN S.S. SERVICE.

In the report for the year 1912-13 on the trade of the Bahrein Islands by the British Political Agent, a fact is mentioned which British shippers might do well to note. It is stated that there is no direct service of steamers to the United Kingdom from Bahrein, and that if there were it would no doubt ultimately increase the import of goods from the United Kingdom.

The following steamship lines call at Bahrein:—(1) British India Steam Navigation Company weekly up from Bombay and Karachi and fortnightly down to Karachi and Bombay. (2) Hamburg-Amerika Linie about once a month on outward voyage only. (3) Bombay-Persia Line from Bombay, occasionally. (4) Arab Steamers, Limited, from Bombay about once every three weeks, the steamers calling again on return voyage from Busreh. The steamers of the last-named company continued to call during the year, but since its conclusion only one or two have called. One steamer called for pilgrims in September. Very few Bombay-Persia vessels have been here during the year. The mail service (British India Steam Navigation Company) from Bombay was changed back to a weekly one from July 1, 1913, which was a great boon.

CHURCHES IN GREEK STEAMERS.

Like some of the carriages on the Russian Trans-Siberian Railway, each of the ships building at Cammell Laird's shipyard at Birkenhead for the National Steam Navigation Company of Greece has been fitted with a little church.

The first of these vessels, which have been named the "Basileus Konstantinos" and "Basilissa Sophia," after the King and Queen of the Hellenes, and which are approximately 500 ft. long, will be launched in June.

The Press Association's Grimsby correspondent is officially informed that the Great Central Railway Company has completed the sale of their continental steamer "Lincoln" to the Achaia Steamship Company at Patras, Greece. The "Lincoln" was built in 1883, and has been mostly engaged in the Grimsby-Hamburg trade.

PROPOSED NEW BLACK SEA HARBOUR.

(From Our Own Correspondent.)

Bucharest, May 2.

The question of the improvement of Reni as a harbour is once again under the consideration of the Russian authorities, and is causing alarm among business people in Galatz, as the plans drawn up some time ago included the building of a railway through that part of Bessarabia, whose sole means of transport at present is the river Pruth, and the consequent diverting of nearly all grain grown in that district from Galatz, as its shipping station, to Reni.

Some Russian engineers are stated to be now at Reni inquiring into the matter, which looks as though some work, at any rate, were to be undertaken. Some time ago, when the plans proposed (which include the construction of a large quay, a small dock, warehouses, etc.) were being prepared, every shipper and steamship agent of standing in Galatz was approached as to whether he would move his place of business to Reni, special facilities in the way of exemption from quay dues being offered for lighters and steamers, exemption from export tax on grain, etc. A large sum (many millions of roubles) was at that time actually set aside for the undertaking, but was subsequently appropriated for other more necessary work elsewhere.

GREEK STEAMER ASHORE.

The "Penelope," a Greek steamer, is badly ashore off Cape Bougaroni, near Algiers. She was bound from the Black Sea with a cargo of wheat to Hamburg. Her hull (says *Syren and Shipping*) is insured in London for £21,000, and her grain for £25,000. She lies on rocks, and is reported to be leaking badly. 25-30 guineas is paying on her for re-insurances.

BULGARIAN INDUSTRIAL CONDITIONS.

A U.S. Consular report, recently published, states that Bulgarian industries, though not very far advanced at present, are beginning to compete in the local markets with some lines of imported goods. Among these enterprises are factories for the manufacture of food products, including alcoholic beverages, rough textiles, chemical products, attar of rose, perfumeries, and furniture. At Panaguiste, Bulgaria, an American concern is engaged in the manufacture of hand-woven rugs of fine quality. The weaving is done by young Bulgarian girls, and the enterprise has proved successful financially. The entire product of this factory is shipped to New York, the rugs being woven according to a special design ordered in advance. Until recently there was a shoe factory in operation at Sofia, managed by Americans. This enterprise was a success, but has now passed into Bulgarian hands.

COMPANY NOTES.

Cairo Electric Railways and Heliopolis Oases.

The ordinary general meeting will be held on May 19 at the offices of M. Carton de Wiart to receive the directors' report and consider the balance-sheet, etc., and will be followed by an extraordinary general meeting to discuss modifications of the company's statutes.

Fayoum Light Railway.

The report for 1913 hardly makes satisfactory reading for the shareholders. The system has 168 kilometres of open line, a share capital of £E100,877, and 4 per cent. debenture issues, totalling, including amortisations, £E99,606. There are, in addition, debts of £E28,064 to the Anglo-Belgian Company and £E45,386 to the bank, the total liability under all heads being £E331,928. The total receipts for 1913 were £E27,296, as against £E28,004 during the previous year. Of these £E16,688 came from the carriage of passengers and £E10,189 from the movement of goods. 26,875 first-class and 884,276 third-class passengers were carried, while 118,665 tons of goods were moved. To this gross tonnage, cereals 24,477 tons, cotton, 15,720 tons, and building materials 41,110 tons were the principal contributors. From the report it would appear that the net revenue receipts aggregated only £E6,808, and of this the cost of the General Administration was £E983,803, £E1,887,767 went as interest to the bank, and £E2,266,645 to the Anglo-Belgian Company, who would appear to be privileged creditors, as interest on and amortisation of the loan already referred to. The net result is a credit balance of £E1,670 (against £E3,585 the year before), a sum which is insufficient to pay the debenture interest. £E1,000 is being utilised to pay 1912 arrears of debenture interest to the extent of 1 per cent., and both the interest on and amortisation of debentures for 1913 is deferred, the small balance having been carried forward to current revenue account. During the year Mr. Auguste Doncker was appointed to be manager of the Light Railways.

Anglo-Egyptian Oil.

A communication issued last week stated that it was gathered from a telegram received from Gemsah that the production of pure oil from well No. 13 saved April 29 was estimated at 681 tons. The specific gravity of the emulsion was stated to be .984, and the telegram further stated that an analysis made at the refinery at Suez of the oil produced from well No. 13 on April 28 shows that it contained 30 per cent. of water by volume. As this was a much smaller quantity than the specific gravity telegraphed on that day would seem to indicate, a telegram had been sent asking for further information. The following telegram was received from Gemsah on May 1:—Well No. 13 production saved yesterday (Thursday) estimated at 806 tons of oil specific gravity, emulsion 990 at 62. Well No. 14 stopped flowing, fluid standing 52 ft. below surface; are making preparations for baling test. The company announced that it does not purpose sending any more reports to the Press unless the information received involves some material change in the situation.

Mid-Balkan Syndicate.

It was resolved at a meeting held on April 3, and confirmed at a meeting on April 22, that the syndicate should be wound up. Mr. G. Twynam, Poultry Chambers, has been appointed liquidator, and a meeting of creditors is to be held at his offices next Monday afternoon.

ORIENTAL RAILWAYS QUESTION.

A Reuter's message from Buda-Pest, dated May 5, reports that the semi-official *Pester Lloyd* makes the following statement with regard to the Oriental Railways question: "As Austria-Hungary cannot accept the Servian counter-proposal, no other way remains for the Monarchy but to demand the restoration of the railways. This is not merely a right guaranteed by the Turkish concession, but corresponds also with the obligations which Servia has assumed in her treaty with Turkey, as well as with the decisions of the London Conference of Ambassadors on the subject."

EGYPT'S GOLD EXPORTS.

Apropos of our Alexandria Correspondent's remarks upon the shipment of gold from Egypt, the following paragraph from the *Scotsman* is of interest:—

There are rather interesting cross movements in the foreign exchanges just now. Egypt has lately been in a position to part with gold, and it is understood that there is still a fairly large amount available for export. Recently, when the value of the rupee was high, the Indian exchange banks, instead of taking gold from London to supplement Council drafts, took the gold from Egypt, thereby preventing the return of gold from Alexandria to London. Owing to the fall in the rupee exchange the Indian demand has ceased, but France has lately been offering facilities for the import of gold, and has attracted some from New York. She is now looking to Egypt, and Egyptian gold, which, failing the Indian demand, would have come to London, is now, I understand, being diverted to Paris. One shipment has already been made.

PIRÆUS CUSTOMS.

Our Athens Trade Correspondent, writing on April 25, reports that the Piræus Customs receipts from April 1 to April 10 amounted to 583,162 Dr. in paper and 113,448 francs in gold, as compared with 833,752 Dr. in paper and 118,964 francs in gold for the corresponding period of last year. The falling-off may be attributed to the fact that consignees of Colonials have postponed withdrawal of their goods until the new reduced tariff comes into force.

A BIG LAND DEAL.

The *Egyptian Gazette* states that an important land transaction has been carried out between the Daira of Prince Seif-ed-Din and the Gharbieh Land Company and Egyptian Enterprise and Development Company. The deal shows that, though business is at a standstill, the fundamental economic situation of the country is not in any way affected. The business in question consists of the sale to the Daira by each of the above companies of about 2,000 feddans, or 4,000 feddans in all, the companies receiving, in part payment of the price, houses which the Daira had recently purchased, and which may be considered among the best built in Alexandria and the most advantageously situated. The deal is interesting (says the *Gazette*) because it supplies the companies with the funds necessary to carry on their business and develop their unproductive assets, and whatever sacrifices may have been made as to the price, and we understand that a sacrifice was made, is compensated for by the advantage of the companies' realising part of their assets and thus being in a position to develop the remainder. The deal is also an advantage to the Daira, which thus acquires two of the finest domains in Lower Egypt at a most reasonable price. Our contemporary understands that the negotiations between the parties were of a prolonged and difficult nature, that the Meglis el Hasby went most carefully into the details, and that the transaction also had the Government's approval after a full examination of the matter. It seems, therefore, that we may congratulate both parties on the success of this deal, which is one of the biggest that has been carried out for some time.

COMPANY RESULTS, &c.

ALEXANDRIA WATER.—The thirty-sixth ordinary general meeting will be held in Alexandria on May 28. The transfer books will be closed for fourteen days immediately preceding the meeting.

ANGLO-EGYPTIAN OIL.—Production for the week amounted to 3,352 tons, of which 157 tons were from Hurgada, Well No. 3.

ANGLO-ROUMANIAN OIL.—Production for the week ended May 2 was 284 tons.

BANQUE DE CREDIT SERBE.—The net profits for 1913 amounted to 159,907 dinars. The dividend has been fixed at 7 per cent.

CIE HELLENIQUE D'ELECTRICITE SYSTEME THOMSON-HOUSTON.—A dividend of 3 frs. per share is payable on Coupon No. 20.

CREDIT PETROLIER ROUMAIN.—The net profits for 1913 amount to 919,846 lei, as compared with 611,055 lei in 1912. The dividend is 15 per cent., an increase of 5 per cent.

EGYPTIAN DELTA LIGHT RAILWAYS.—Receipts for the ten days ended April 20 amounted to £E7,326, an increase of £E598 over the corresponding period of last year.

EGYPTIAN MARKETS.—Receipts for the week ended April 30 amounted to £1,230, an increase of £348 on same period for last year. Total from commencement of year amounted to £20,909, a decrease of £1,111.

LAND BANK OF EGYPT.—The ordinary general meeting will be held at the offices of the Bank, Alexandria, on May 12. The dividend proposed for 1913-14 is at the rate of 8s. per share, of which 4s. per share has been already paid.

MANUFACTURE DE CIGARETTES LE KHEDIVE.—Profits for 1913 amount to 136,874 frs. A dividend of 6 per cent. on preference and of 5 per cent. on ordinary shares is proposed.

MINES DU LAURIUM.—The profit for 1913 is 2,580,837 frs. as against 2,725,036 frs. in 1912. A dividend of 25 frs. per share is to be paid.

ORIENTAL GAS.—An interim dividend at the rate of 3½ per cent. free of tax on account of the year ending on the 30th prox. has been declared. The dividend is at the same rate as last year, and will be payable on the 27th inst.

OTTOMAN RAILWAY FROM SMYRNA TO AIDIN.—Receipts for the week ended May 2 amounted to £7,639, an increase of £3.047 over the corresponding period of last year.

PERSIA FIVE PER CENT. LOAN (1911).—The Imperial Bank of Persia announces that the coupons due on May 15 on the Imperial Government of Persia Five per Cent. Sterling Loan of 1911 will be paid at their offices or at Messrs. Glyn, Mills, Currie and Co.

ROUMANIAN CONSOLIDATED OILFIELDS.—Production for week ended May 2, 808 tons. Cable from Ploesti, dated May 4:—"Moreni, Well No. 30 (depth 2,506 ft.), have extracted one length of drill stem; now engaged in extracting remainder. Well flowed for six minutes, when disturbed producing ten tons. Well No. 24 struck oil sand at depth of 1,214 ft.; now cleaning. Well No. 39, total depth 1,148 ft.; indications good. Chiciura, Well No. 1, total depth 2,103 ft. Well No. 6 deepened 137 ft. during week.

SOCIETE BELGE-EGYPTIENNE DE L'EZBEKIEH.—A dividend of 26 frs. per share on the preference shares and of 1 fr. on the ordinary shares (Coupon No. 14) will be payable on June 15. On July 1 156 4½ per cent. obligations hypothécaires, drawn for payment on April 23, will be repaid.

SOCIETE HELLENIQUE DES TRAMWAYS D'ATHENES, PIREE, ET EXTENSIONS.—A dividend of 4 drachmai per share has been paid.

SOCIETE OTTOMANE D'EXPLOITATION DU PORT DE SALONIQUE.—The accounts for 1913 show a net profit of 126,001 frs. as compared with 129.908 frs. for 1912. The dividend proposed is 10 frs. per share, as last year.

UPPER EGYPT HOTELS.—A dividend of 5 per cent. was declared at the annual general meeting held on April 25. Payment at the National Bank of Egypt, Cairo, or Alexandria.

Continuation Day.	Ticket Day.	Pay Day.
Tues., May 12.	Wed., May 13.	Thurs., May 14.
Tues., May 26.	Wed., May 27.	Thurs., May 28.

LONDON, May 7.

Depressed.

The markets remain very depressed. There is liquidation in almost every section of the House. It is improbable that any further failures will occur, but it is equally unlikely that we shall see better prices until all the pawned stock has been disposed of. One or two large firms have been talked about, but their affairs have been satisfactorily arranged.

A Sensation.

The sensation of the week has been the announcement that the Canadian Government had agreed to guarantee 45 million dollars of bonds to the Canadian Northern Railway. But the terms of the guarantee are so stringent that the City fears that they have only been made to provide for an inevitable default. A disagreeable feeling has been roused by the attempt to force bondholders of the Mexican Northern Power into foregoing their rights. It is strongly felt that these perpetual attempts on the part of Canadian financiers to hustle bondholders out of their impregnable position must be stopped. One or two new issues have appeared. Leyland Motors went very well, but the Pecol Oil Combine will probably be treated with the contempt it deserves. The Chicoutimi Freehold Estates bonds and the West Penn short-dated notes do not seem desirable securities. But the Spratt's debentures are a gilt-edged security. It is now formally announced that Harrod's will take over the famous firm of Dickins and Jones, and will make an issue of £700,000 5 per cent. preference shares.

Money is a shade harder. The perpetual demand for gold at a very high premium creates an uneasy feeling.

Egyptian Unified Bought.

The Foreign market has been upset by the failure of Neufville and Co., of Paris. London houses are not heavily interested. Bulgarians are harder at 85. There has been a steady demand for Egyptian Unified, which are 99½ ex dividend, and the inscribed stock has also been bought. Greek Fours are better at 52. Hungarian Rentes keep very steady at 83, and Turkish Unified are also better at 82. Most of the dealers in the market are short, and this keeps the quotation hard.

Home and Foreign Rails.

Home Rails are a shade harder, but there is no business. The speculators in the deferred stocks are struggling to get out, but investors continue to purchase small lots of the heavy lines.

Very little business is doing in American Rails, but it is believed that Messrs. Kuhn, Loeb, and Co. will acquire control of Missouri Pacific and provide the funds for the short-dated notes falling due in June. Eries have been bought, but the general tone of the market is dull. The news from Mexico, which was good a few days ago, now assumes a despondent tone.

Rubbers Flat.

Rubber shares have been flattish. The auctions went off moderately well, but the bulls were unable to put up the price of crepe. Linggi report was not liked, the dividend having been halved. Kuala Selangor figures were as good as anyone expected, and 100 per cent. dividend is not only paid, but also seems to be assured for the current year. The shares look cheap.

Egyptian Oil Collapse.

In the Oil market we have seen a serious collapse in Egyptian Oil shares. The weekly output fell by a half, and we are informed officially that the oil from No. 13 well contains 30 per cent. of water. No one quite knows whether this water is a temporary difficulty or whether it will, in the end, overwhelm the oil. As a result the weak bulls rushed to get out. There has been a very large business doing. Another disquieting feature of the Egyptian field is the serious reduction in output from the Hargada field. Spies have been weak, and North Caucasian have also been sold. Dealers, however, believe that we shall get a further revival in the Oil market, and some brokers anticipate a rise in Shell, consequent upon an increased dividend which is confidently looked for.

Mines Neglected.

Mines are neglected. The Central Mining passed its dividend, having devoted the whole of its profits to depreciation. The Goerz group show a depreciation of nearly half a million, and there has been no news from South Africa to counterbalance the depressing influence of these two reports. Broken Hills have been a shade harder, but both Tin and Copper look weak. There has been a little gambling in the Russian group, but prices move within narrow limits. The Burmah Corporation has placed its shares on the market at 5-16 premium, but there is little business. The Kirkland Lake rig continues, and holders should get out.

Egyptian's Improved Tone.

In the Egyptian market business has been small, but, on the whole, the tone is better. There has been some buying in small blocks and very little selling. National Banks have been inquired for at 14½, and a few hundred shares have changed hands at 9-16. Agricultural Banks have also been dealt in, the price being 4¾-4 13-16. The deferred are nominally 250-280. Land Banks are 6½. Bank of Abyssinia are 5s. 6d. Delta Light preferreds have been inquired for at 8 9-16, and a few shares have changed hands. Delta Lands are 8s. 9d. There has been a good deal of buying of Behera in small blocks, and 9 1-16 is now bid. Union Fonciere are unchanged, but there is business in Alexandria Water at 12⅝. Aboukirs are 23s. United Egyptian Lands 1s. 9d. Sidi Salem are nominally 5s.—8s. There are a few buyers of Egyptian Trusts at 5s., and there has been a fair demand for Salts at 14s. 3d. New Egyptian are 10s. 6d., but Markets are unchanged at 25s. Khedivial Mail preferreds have been done at 3¾, and the ordinary are round about 10s. There are buyers about of Daira Sanieh at 3s. Ginners are nominally 13-16, and Gharbieh Land are quoted 1½, but without business.

Miscellaneous.

In the Miscellaneous market there is very little trading. Cuban Ports move backwards and forwards, and are now 32½, a preposterous price, for nothing has been settled with the Cuban Government. Shipping shares have been weak on the Royal Mail report and the rumour that a big rate war is likely to occur.

THE TURKISH DEBT.

Though nothing has been heard of late regarding the International Financial Commission which was appointed to apportion a part of the Turkish debt between the Balkan States on the basis of the benefits likely to accrue from the division of the conquered territory settled by treaty, it is, says the *Daily Telegraph*, apparently steadily at work. At any rate, according to the foreign Press, the Porte has asked the French Government to transmit to the foreign members of this Financial Commission what it considers an equitable division of the public debt and the other obligations of the Ottoman Empire. According to this table, Greece is to be invited to shoulder £T14,315,406, Bulgaria £T4,075,590, Servia £T4,451,473, Albania £T1,090,685, and Montenegro £T151,040. In addition, Turkey has tabled claims for damage caused during the war. It is hardly necessary to point out that the Turkish ideas and those entertained by the Commission may not agree; but certainly a large amount of the public debt will be taken over by the Balkan States, so that the revenues ceded to the Debt Council may be assured for the administration of the debt.

ROUMANIAN LOAN.

Under date of May 6, the Paris correspondent of the *Financial Times* reports that it is rumoured that negotiations are pending between the Roumanian Minister of Finance and a French syndicate for a loan of £12,000,000.

ALEXANDRIA NOTES.

(FROM OUR OWN CORRESPONDENT.)
ALEXANDRIA, May 1.

The Share Market.

The market is quiet, and little business is being done. Speculators are beginning to take less interest in the share market with the approach of summer, which here coincides with a marked slackening in business. The cotton season is nearing its end, and Egypt is now exporting the gold which has served to finance the gathering of the crop. This week we have sent £150,000 to India, which has also absorbed the greater part of the £6,150,000 exported since the beginning of the year. The small investor continues to buy lottery bonds of the Crédit Foncier, Turkish Railway bonds, etc., while the fellaheen invest their available money in agricultural land. The lack of capital, however, interferes with the bringing under cultivation of new lands, and the construction of blocks of dwellings is hindered by the same cause in Cairo, Alexandria, Mansura, Tanta, and Port Said. It is stated that the Government is considering the imposition of fresh taxes for the purpose of financing its great schemes of irrigation and drainage.

The Oil Trust in Egypt.

In spite of the discovery of new oil wells in the Red Sea littoral and the fact that the oil refinery at Suez is working night and day, the price of oil still remains exorbitant. Owing to the operations of the Trust, the price of oil here is practically double what it is in other countries. The Egyptian production of oil having been cornered by the Trust, there is hardly any hope of any considerable reduction in price in the future. This is highly unfortunate for the country at large, for a very large quantity of motor-driven machinery has been installed for the purposes of irrigation, as a result of the low Nile, and the agriculturists often find themselves unable to run their pumping plant owing to the high price of oil. The Government might very well devote some attention to this matter, and particularly insist that the retail business should not be at the mercy of the speculator.

Alexandria Central Buildings Co.

The capital of this company has been increased from £100,000 to £120,000. The premium realised by the issue, amounting to £E5,240, has been placed to the reserve. In order to regularise the financial situation the company has decided to issue £5,000 of 4 per cent. mortgage debentures, which will bring the total amount of debentures up to £60,000, of which £7,900 are unissued, £500 are redeemed, and £51,600 in circulation. These debentures have been issued below par, but the resultant loss has been made up for by the profits realised on the sale of properties. The net profits for 1913 amount to £E6,362, which allows of a dividend of 5½ per cent. on the shares. The decreased dividend is accounted for by the falling-off of receipts due to the reconstruction of one of the company's properties. The company anticipates higher profits for the current year.

Soc. des Immeubles d'Egypte.

This company owns ten properties situated right in the centre of Alexandria, which figure on the balance-sheet for the sum of £E395,647. The reserve fund amounts to £E65,370. The net profits for the last financial year, after allowing for redemption of the 4 per cent. debentures and expenses, amount to £E20,627, to which has to be added £E9,225 brought forward from 1912. A dividend of P.T. 35 per share has been distributed, and £9,050 are carried forward.

Recent Failures.

Amiragan Brothers and Co.—Assets, £E2,885; liabilities, £E7,456.

Bakr Mehemed Choel.—Assets, £E5,300; liabilities, £E8,347.

El Hag Oman Abu el Dahab.—Assets, £E16,827; liabilities, £E10,193.

Nejib and Kamel Adli.—Assets, £E18,725; liabilities, £E18,141.

COOK'S NILE STEAMERS AND DAHABEAHS.

THOS. COOK & SON have unequalled facilities for Travellers visiting Egypt, now the premier Winter Resort of the World. Their fleet of **Fourteen Large Passenger Steamers** consists of the finest vessels on the Nile, specially built, luxuriously appointed throughout, and fitted with every modern convenience.

TOURIST SERVICE.—These large and handsomely-fitted Steel Steamers sail once a week from **Cairo** to **Assuan**, and twice a week from **Assiut** to **Assuan**, the sailings from **Cairo** beginning in November, and from **Assiut** in January.

EXPRESS SERVICE.—The Express Steamers also leave **Cairo** twice a week, the Friday departures commencing in November, and the Monday departures in December.

There is thus a Service of **Five Cook's Steamers per week** ascending the Nile to the **First Cataract** during the Season—three from **Cairo** and two from **Assiut**—calling at all points of interest on the Nile, in connection with which complete arrangements for sightseeing and excursions are made, enabling Travellers to visit, to the best advantage, all the famous

PYRAMIDS, TEMPLES, TOMBS, RUINED CITIES, etc.

SECOND CATARACT SERVICE.—In connection with the above Services there is also a Service twice weekly by First-class Steamer from the **First** to the **Second Cataract**, with through bookings to **Khartoum, the Sudan,** and **Uganda.**

PRIVATE STEAMERS AND DAHABEAHS. — **Thos. Cook & Son** have several small Steamers for charter at moderate rates, specially adapted to the requirements of Families, Private Parties, Sporting Parties, etc., accommodating from eight to sixteen passengers, with competent crews, and thoroughly equipped. Also a large Fleet of First-class Sailing Dahabeahs, the best on the Nile.

Illustrated Nile Pamphlet free from:

CHIEF OFFICE:
LUDGATE CIRCUS, LONDON.
Branches throughout the World.

Khedivial Mail Line.

FIRST-CLASS BRITISH MAIL STEAMERS.

GREECE-TURKEY MAIL SERVICE.

Shortest and most picturesque sea passage between Europe and Egypt. Fast steamers in connection with the Orient express train-de-luxe from Paris, Ostend, Vienna, Berlin, and Budapest leave Constantinople every Tuesday afternoon for Smyrna, Piræus and Alexandria. Return from Alexandria every Wednesday afternoon via same ports.

Service between TURKEY, SYRIA & EGYPT.

Fast steamers leave Constantinople fortnightly on Saturdays for Gallipoli, Dardenelles, Mitylene, Smyrna, Chios, Rhodes, Mersina, Alexandretta, Tripoli, Beyrouth, Caiffa, Jaffa (for Jerusalem), Port Said and Alexandria. The voyage takes ten days.

Departure from Alexandria fortnightly on Saturdays for above ports, and WEEKLY on Saturdays from Alexandria, and on Sundays from Port Said, for all Holy Land and Syrian Ports to Mersina.

CYPRUS SERVICE.

Fast steamers weekly from Alexandria on Tuesday afternoons, and from Port Said on Wednesday mornings, for Famagusta, Larnaca, Limassol and Paphos.

SUDAN MAIL SERVICE.

Steamers leave Suez Docks on Wednesdays, at 5 p.m., for Port Sudan, connecting there with express train to Khartoum, at 1 p.m., on Saturdays. Calls made at Suakim as required.

RED SEA COASTING MAIL SERVICE.

Steamers from Suez Docks every Monday evening, at 5 p.m., for Jeddah, calling one week at Tor, El-Wedj, Yambo and Jeddah; and in the following week at Jeddah, Suakim, Massowah, Hodeidah, and Aden.

For information apply to the Company's London Office, 37, Bishopsgate, or at Alexandria, Constantinople and Suez. Passages may be booked at Company's Agencies at all ports called at, or from the principal Tourist Agencies.

P & O Passenger Services

EGYPT, INDIA, CEYLON, STRAITS, CHINA, JAPAN, AUSTRALASIA, and All Eastern Ports.

NOTES OF THE WEEK.

A more hopeful aspect has been introduced into the situation in Epirus by the intervention of the International Commission of Control. At the request of the Albanian Government the Commission approached M. Zographos, head of the Provisional Government of Epirus, with a view to securing the immediate cessation of all hostilities and of any forward movement. In the event of the Epirote forces being withdrawn the Commission undertook to see that the Albanian troops were also withdrawn, and to communicate to M. Zographos the concessions which the Albanian Government was prepared to offer the Epirotes. If these concessions should be accepted, the Commission was prepared to use its influence to secure their execution and maintenance. In reply to this request M. Zographos at once gave orders for the cessation of hostilities, and a truce has been in force in Southern Albania since May 7. Negotiations are now in progress at Santi Quaranta between the International Commission and the Provisional Government.

The action of the Commission has not been taken without the consent of the Great Powers, and we may welcome their intervention, though tardy, in a situation that was rapidly going from bad to worse. Hitherto, unfortunately, it has been the fashion for certain foreign diplomatists deliberately to throw sand into the mechanism of the Albanian State in order to provide opportunities for insisting upon giving "expert advice" in the matter. The Powers, although still snapping and snarling over the delimitation of the northern boundary of the new State—a task which should be as nearly as possible a question of geography and not of politics—have at last agreed to pour oil—if not on the wheels of the Albanian administration, at least on the troubled waters of the Epirote difficulty. Prince William will be well advised to come to terms with the Epirotes, but he is dealing with people who are accustomed to bargain, and the Epirotes in the end will probably accept considerably less than they at first demanded. Popular feeling in Greece is restive under the strain imposed on it by the policy adopted by M. Venizelos in abandoning Epirus to its fate. If the Epirotes are satisfied with the terms offered them, Greece has no cause to cavil. On the other hand, if any excuse were given to the Greeks for continuing the agitation until the Greek Prime Minister were driven from office, Albania would be the loser and might be confronted with a more serious situation than the one which it is now seeking to solve.

Reports from Macedonia speak well of the improvements that have already been introduced under Greek rule. New industries are springing up where conditions are favourable, while Kavala, the chief town in the tobacco-growing area, is connected with the railway at Drama by means of an excellent service of public motors. The refugees from Turkish Thrace, however, constitute a serious problem for the Greek authorities. Our Salonika correspondent stated last week that the refugees, who are arriving in their thousands, were being drafted off into the interior as rapidly as possible. Encampments of these unhappy people are to be met with at various points along the line. Their maintenance may well tax the present resources of the Greek Government, but there can be little doubt that any expenditure for this purpose will be money well spent. They will form a useful agricultural population for Macedonia, and for this reason a special effort ought to be made to prevent them from drifting into less desirable occupations. One thing to avoid is the concentration of the able-bodied men in large camps with nothing to do. They may have to be fed for some time to come, but the authorities should see to it that the men earn their food either by tilling the ground with instruments provided by the State or in employment on public works which are badly needed in the country. If the men are drafted to the districts where their work is needed the problem of looking after the women and children will be less difficult.

No little interest attaches to the visit about to be paid by the Turkish Minister of the Interior to Bucharest. When M. Take Jonescu, the then Minister of the Interior of Roumania, visited Constantinople in the course of his mission to facilitate the conclusion of peace between Turkey and Greece, it was arranged that at the earliest opportunity Talaat Bey would avail himself of M. Take Jonescu's invitation to be his guest in Roumania. Circumstances have prevented that visit from being paid until the present time, and now Talaat Bey has an opportunity of combining with it a diplomatic errand. The treaty between Greece and Turkey left the question of the Ægean Islands unsettled. The Porte has not yet acquiesced in the trans-

Digitized by Google

fer of the islands of Chios and Mitylene to Greece, and desultory negotiations have been in progress with a view to effecting some modification of the Powers' decision in regard to the Ægean Islands. Roumania's mediation has been sought, and when M. Venizelos was last in Bucharest fresh proposals on the subject were submitted to him by the Roumanian Government on behalf of the Porte. The suggestion made, it is understood, was that six islands in the Dodekanesos should be taken by Greece in exchange for Chios, Mytilene, and Samos. Neither this nor any other proposal has been accepted by the Greek Government, which is by no means minded to forego the material advantages to be derived from possession of the first two islands.

In the meantime additional arguments in support of their respective claims are being sought by the Turkish and Greek Governments in the purchase of extra Dreadnoughts. Turkey for the moment is one vessel to the good in the prospective strength of her navy. But a Greek journal states that the Argentine Government has consented to sell to Greece a Dreadnought, provided the transaction is ratified by the Argentine Chamber. Should this announcement be true and the transaction take place, it is to be feared that the settlement of Macedonia by a Greek agricultural population will be subordinated to this rivalry in naval armaments. The interests of both Turkey and Greece would be better served by expenditure on the economic development of their respective territories. The Roumanian Government has already been instrumental once in bringing the two countries to an agreement, and it is to be hoped that it will succeed now in persuading them that an understanding on the subject of the islands is a far sounder policy to adopt than to cripple the financial resources of both States for many years to come in an attempt to settle a question which at any moment may be taken out of their hands by a higher authority.

The long-drawn controversy between Austria-Hungary and Servia over the Orient Railway seems to be as far off a settlement as ever. The former had hoped to secure a predominant voice in the control of the railway by the purchase of shares. Servia, however, has decided that the interests of the country require that the State should take possession of all railway lines in Servian territory. It was hoped at one time that a compromise could be effected by a scheme of internationalisation. The proposal, however, after having been the subject of discussion for several months, has been virtually rejected by the Servian Government. Austria-Hungary shows no sign of abating her claim, and it is to be feared that a stage has been reached when the negotiations may be broken off and a definite rupture between the two countries ensue.

Financial considerations continue to dominate the situation in Persia. The Government lives from hand to mouth, but owing to mistrust of Russia hesitates to formulate any fresh request for funds. Rightly or wrongly, the impression prevails that the Russian Government never does anything for nothing in Persia. Every time a Persian wish is met, such is the general belief, a *quid pro quo* has to be granted, which, as a rule, takes the form of a consolidation of Russia's position in the North. If such a view is resented in Russia, it would be easy to disabuse the Persian mind. In the present instance, it is known that the country is at a standstill for want of funds. There is no need to wait until Persia in the extremity of her need is forced to appear as a suppliant before the protecting Powers. The necessary loan could be offered, and the negotiations concluded, without any reference to an increase in the strength of the Cossack Brigade or the hint that fresh concessions are awaiting the ratification of the Persian Government.

Persian affairs were the subject of a series of questions in the House of Commons last Tuesday. It is a matter for regret that the Government cannot bring itself to take the public more into its confidence in regard to the situation in that country. In reply to an inquiry whether the Secretary for Foreign Affairs had any information with regard to the emigration on a large scale by Russian peasants and farmers from Turkestan and from European Russia into Northern Persia, the answer given was a monosyllabic affirmative. A further question elicited the information that a superintending emigration officer and other officials had been appointed to regulate and organise the settlement of these Russian emigrants, but the spokesman of the Government could not say what amount of land had been acquired for this purpose by Russians in the valleys of the Gurgen and the Atrek. Here is surely a critical development in the situation in Northern Persia. Those who are familiar with what Russia has accomplished in Eastern Siberia by means of organised settlement and the part played by emigrants in her political and military schemes will at once realise the significance of this settlement of Russian peasants "on a large scale" in Northern Persia. No doubt the position of the British Government in regard to this matter is somewhat delicate, but there can be no excuse for ignoring Russia's action. When asked whether the British Government would urge Russia to withdraw her troops before the Shah's coronation—a proposal that was made some time ago in these columns—the Under-Secretary of State for Foreign Affairs took up the cudgels warmly on Russia's behalf. The withdrawal of troops from Kazvin and Tabriz—not altogether unconnected with the inadequacy of the supply of winter quarters—was to be regarded as a practical illustration of Russia's good faith, and "it could hardly be urged that all the Russian troops should be completely and suddenly withdrawn until it is evident that this would not be followed by any outbreaks of disorder." But in the face of a steady influx of Russian emigrants the withdrawal of a few thousand troops is a farce, as far as the maintenance of the integrity of Persia is concerned. The British Government can hardly be ignorant of this fact, althoug it seems anxious to shut its eyes to it. At the same time it is to be found asking Russia's support for the Trans-Persian Railway scheme, which is to undermine the elaborate scheme of defence that has been built up for the protection of our Indian Empire.

An appeal is being made for funds for the completion of Khartoum Cathedral. The Cathedral, it will be remembered, was consecrated in January, 1912, but lack of funds has delayed the construction of the edifice according to the original plans. A sum amounting to £11,000 is now required to carry out work already in hand or immediately necessary. The honorary treasurer in England of the Khartoum Cathedral Committee announces that a sum of £4,000 has been promised on the condition that the balance, £7,000, is received or promised before October 1 next. In view of the large number of people who visit the Sudan yearly, the appeal should be assured of a ready response.

THE NEAR EAST.

THE NEAR EAST is on sale at all Bookstalls and Newsagents in the United Kingdom. Should any difficulty be experienced in obtaining the paper, readers will oblige by notifying the Manager. Abroad THE NEAR EAST may be obtained in:

PARIS. Librairie Hachette, 79, Boulevard Saint-Germain; Librairie Galignani, 224, Rue de Rivoli, and at Railway Bookstalls.

CONSTANTINOPLE LETTER.

(From Our Own Correspondent.)

Constantinople, May 8.

The Kurdish Trouble.

Of the persons taken prisoners during the fighting at Bitlis, or afterwards arrested, eleven have been executed; seventy-six who have been proved to have had no connection with the outbreak, or who are regarded as mere dupes, have been acquitted; the remainder are being tried. All seems quiet in the Bitlis region, and the columns sent in pursuit of the parties of insurgents who fled after their failure to take Bitlis appear to have met with no opposition worth mentioning. All, too, is quiet in the Diarbekir and Mosul region, save near Barzan, where some of the Sheikh of Barzan's people are still "out," and are occupied in sniping the soldiers who pursue them from one hill to another. They will doubtless tire of this amusement before long.

Talaat Bey's Mission.

The Minister of the Interior, Talaat Bey, leaves to-morrow for Livadia, accompanied by the ex-Generalissimo Izzet Pasha and several military and civil dignitaries who are deputed to greet the Tsar, who is now at Livadia, on behalf of the Sultan. I understand that they bear an autograph letter from his Majesty and certain presents to the ruler of Russia. It has been the custom of the Turkish Government to send a complimentary mission to the Tsar in time of peace on each occasion that H.I.M. visited his southern summer resort. Both Mahmud Mukhtar and Rifaat Pashas have headed missions of this sort. No political signification need be attached to Talaat Bey's mission, but his journey to Bucharest, which he will make after visiting the Tsar, will be fraught with much political importance, as it is known that the Minister desires to ask Roumania to convey certain proposals made by the Porte concerning the future of the Ægean Islands to the Hellenic Government, and hopes that Roumania may be able to suggest a formula which will satisfy both parties. This hope, however, is not very strongly held in the highest official circles here; even Talaat Bey, who is known to have a high opinion of the statesmanship of M. Venizelos, is not very optimistic; and it is believed that no progress will be made towards the settlement of the question of the islands until Turkey has two Dreadnoughts wherewith to back her arguments.

Rumours that Greece may purchase a third Dreadnought from Chili or Argentina are again being circulated here. Meanwhile the Government has signed the contract with the Normand firm, which has always turned out excellent torpedo craft, for six large destroyers of a type, it is believed, similar to that now being built for the French Navy. Two submarines, or, to be strictly accurate, submersibles, have been ordered at the Creusot works. These eight vessels will cost about £1,000,000 more or less.

Armenian Reforms Programme.

The two Inspectors-General of the Armenian Vilayets, Major Hoff and M. Wesntenenk, have arrived. They are full of zeal and good intentions—so say those who have had the pleasure of meeting them—but they naturally confess to a certain ignorance of local conditions. They will not leave Constantinople till their powers have been settled and the Bill for the better government of the eastern vilayets has been passed by the Chamber of Deputies, which meets on the 14th instant. I need only add that they have made an excellent impression on all who have met them, Turks and Europeans alike.

Municipal Activities.

There is much talk of a fusion of the Municipality of Constantinople, or Prefecture of the city, as it is called here, and the Vilayet of Stamboul. Meanwhile the improvements in the capital are making steady progress under our excellent and enlightened Mayor, Dr. Djemil Pasha. The public garden at the Old Serai is green and bright, and when it has been finally completed will be a most attractive spot. The electric trams are running merrily, and now that the wattmen have ceased to try to break records in crowded streets are much less terrifying. The service, however, requires a larger number of cars. The lack of accommodation is particularly noticeable in the early mornings when the swarms of official and other employees descend from the suburbs to Stamboul, and in the early afternoon when they return from work. The road from Scutari to the picturesque Alem-dagh woods is half-finished, and there is talk of the early commencement of a tramway to Alem-dagh from Scutari. I may add that Smyrna, which does not wish to be behindhand, is now anxious to contract a loan, for which the Vali, Rahmi Bey, is negotiating. The projected Adrianople loan scheme has been dropped for the present.

The Refugees Problem.

Much ill-feeling has been caused not only among the Greeks, but among the Turks of Thrace, by the "dumping" in that very unfortunate province of a large number of Albanian "muhadjirs" from Novi-Bazar and the North of Ipek. The Turks have already petitioned the authorities to remove these immigrants, who, they say, are more accustomed to the mauser than to the spade, and show no signs of developing into anything but cattle-stealers. Some have been removed, and have been sent to Anatolia. Whether they will be received with transports of enthusiasm by the inhabitants of the districts where they are planted is doubtful indeed. Some of the Kirk-Kilissé Turks have openly expressed the opinion that the Government would be well advised to allow the expelled Bulgars of that region to come back, on the ground that now that Turkey and Bulgaria are friends they will not be a source of danger, and that as workers they are unsurpassed. These views are worth noting, as they confirm the opinions expressed by The Near East as to the economic unwisdom of the course which Turkey and the Balkan States are now pursuing with such fervour. Already many of the Rumeliot refugees are a burden to local charity. They work for short spells—long enough to get enough to keep their families alive for a few months and to buy tobacco, shoes, and a few other necessities—and then relapse into a dignified coma, to the great annoyance of their employers, who had hoped, trustful souls, that the curse of Anatolia, the shortage of labour, was going to be removed by the advent of thousands of fresh hands. Some of the refugees who have been settled on the land are working well, but, speaking generally, much time must elapse before any large proportion of them becomes self-supporting.

SALONIKA FREE ZONE.

A Greek correspondent writes:—While in Salonika (on the 1st inst.) Mr. Venizelos, in company with Mr. Ractivan, Minister of Justice, and Mr. Repoulis, Minister of the Interior, received Mr. Cleon Hatzilazaros, with a committee of leading citizens, to whom he said: "I am very glad that I have to make a very pleasant announcement to you. It has just been decided to construct the necessary works for the establishment of the free zone. The works in connection therewith will be begun within two months."

The zone will be constructed in accordance with the plans of Mr. Cronmer, the German engineer, who proposed for it a site of several acres beyond the Custom House.

LETTER FROM CAIRO.

(From Our Own Correspondent.)

Cairo, May 7.

The Khedive's Tour.

H.H. the Khedive arrived in Alexandria on Monday evening after a tour through the Delta which, to judge by the accounts to hand, was little short of triumphal. The most extraordinary efforts were made by the native notables whom he honoured with a visit to organise a fitting welcome, and to entertain him in what they considered the proper style. Vast sums were spent on special furniture, whole streets were decorated and illuminated; one notable managed to obtain the loan of some cannon and, on the arrival of His Highness at his estate, had a full salute fired; another is said to have served him coffee in a gold cup encrusted with jewels and worth several hundred pounds. These are only a few instances of the extremes to which the natives went, and it is no exaggeration to say that the amount spent privately on this week's entertainment must approach six figures. The receptions accorded the Khedive at the chief towns, Zagazig, Tanta—where with the Ministers he prayed at the Mosque of Said El Bedawi—Mansura, and Damanhour—where a great luncheon was given—were immense, and culminated in a warm welcome which he received on his arrival at Alexandria. One of the most remarkable effects which his tour has had has been an outburst of poetry, with which his enthusiastic subjects have flooded the vernacular press. Indeed, at well nigh every stopping place some local poet or his spokesman (very often a schoolchild) recited most eulogistic poems to His Highness, who must surely have been impressed by all this enthusiasm. To-day, the first reception of the season will be held in Alexandria at Ras-el-Tin Palace, and after that affairs will settle down to their normal condition. For the past week the Ministers have been engaged in a sort of chassée-croiseé across the Delta in the wake of the Khedive.

The Agricultural Co-operative Syndicates Bill.

The Assembly has resumed its sittings, but the question which prompted the adjournment—the Agricultural Co-operative Syndicates' Bill, which had been referred back to committee—has not yet been settled. It is understood that there are several important points on which the delegates do not see eye to eye with the Government; but no doubt some satisfactory compromise will be arrived at, for all agree on the excellence of the principles underlying the scheme, and its great utility.

Apropos of this measure, *El Moayad*, with whose position on the Egyptian political stage your readers are no doubt acquainted, published on Thursday a most violent article, in the course of which it accused the Occupation of having worked for the past thirty years in Egypt solely for its own ends. The writer declared that this Agricultural Syndicates Bill was nothing short of an inquisition, that it was intended to take away from the Egyptians the last shred of their personal liberty, which had already been slowly and steadily whittled away, since it gave the British Agent the power to control and know all the secrets of the Egyptians. The article particularly criticised Lord Kitchener, and called upon the Legislative Assembly to decline to have anything to do with the Bill.

The publication of this article by *El Moayad*—at the present juncture especially—came as a great surprise, and it was fully expected that the violence of its comments would call down on the heads of the owners the wrath of the powers that be, in the shape of some administrative action. But, as far as the outward eye can see, nothing has been done. That *El Moayad* perceived that it had made a false step is proved, however, by the fact that the following day it published an article, in which it pointed out that it had already written in favour of the project; that the previous day's article was written by a correspondent for whom it accepted no responsibility, and that it printed his contribution so that both sides of the question might be known to its readers. This explanation is, however, too thin to hoodwink anyone, and there appears but little doubt that a deliberate attempt was made to upset the whole policy of the Government, and shipwreck one of its most important measures.

Talking of the vernacular Press, it may be remembered that some few months ago I drew attention to the fact that one of the great London dailies was giving its moral support in the shape of a regular telegraphic service under its own name to a Cairo native paper, and that as the latter has always been noted for its anti-occupation policy, this combination had aroused considerable surprise and adverse criticism. Evidently my remarks have had some effect, for the arrangement in question has now been cancelled, and has been replaced by a service which no longer gives to this paper the cachet which its policy certainly never merited.

The Murder of Captain Fawcett.

The enquiry into the murder of Captain Fawcett still continues. The chain of evidence against Abdulla Hassan seems to be gradually drawing closer round him. A woman, said to be one of his wives, has come forward and stated that he came to her house at two o'clock on the morning of the crime with his foot and arms injured, whereas Abdulla Hassan declared that he had spent the night with his sister. Moreover, none of the tramway officials can prove his statement that he received his injuries in a tram accident at Mex. Of the two other men under arrest, one, Hussein Ahmed, is suspected of being an accomplice, but the other, Ahmed Bakr, is believed not to be implicated. The rope-merchant who sold the rope found on the premises can give no details of the purchaser. The cook has now been released, as it was evident that he was innocent, and that his contradictory evidence was due to fright.

The police maintain that Abdulla Hassan is the chief of a band of burglars, and that the motive for the murder was not revenge. They believe that he and his companions intended to break into the house of a rich old native, which adjoined Captain Fawcett's apartments. Either they mistook the house, or, as the houses were connected, they wanted to use the murdered man's rooms as a means of gaining access to those of the rich native, and, being interrupted, they attacked and killed the owner.

FAIRS v. FIELDS.

(From Our Own Correspondent.)

Alexandria, May 8.

Following on the fair at Tanta, which was attended by 65,000 people, we have the fair at Dessouk, which has so far drawn together 60,000 of the fellaheen. The Fellah pays small heed to his fields, which just now require close attention for the sake of the cotton crop, but goes off to amuse himself at the fairs. Unfortunately this year these fairs have not proved so beneficial as they usually do to the merchants, the Fellah not spending his money so freely as he generally does on these occasions.

LAND ALLOTMENT IN THE SUDAN.

One of the most useful works recently started by the Sudanese Government (says the *Sudan Times*) is the reopening of the Kamlin farm. It has there an area of 150 feddans in excellent condition for cultivation, with a pumping plant. This land has been apportioned among the natives of the district, whose crops failed last year. The land is rented to them at the rate of £E4 per feddan. The rent will be quite sufficient for running the pump and supplying the land with water. The cultivators expect to make a profit of £E15 on each acre, in the meantime making up for the shortage of grain from which they suffered.

EGYPTIAN LEGISLATION.

The Judicial Adviser's Report.—II.

(By Our Cairo Correspondent.)

Reference is made to the unsatisfactory number of cases the sentences in which had not been executed at the end of the year. "Steps will be taken to hasten the execution of these sentences, and in future more control must be exercised by the officials concerned to prevent recurrence of such delays in the execution of sentences." The series of criminal statistics is completed by some interesting figures comparing the degree of education, the profession and average age of criminals in Egypt with those of England and France. In regard to education, only 11 per cent. of male criminals in Egypt are literate, whilst all the female criminals are illiterate. In England 88.4 per cent. of the male and 82.9 per cent. of the female criminals are literate, and in France the proportions are 90.5 and 86.1 per cent. respectively. Under professions 56.2 per cent. of Egyptian criminals come from the agricultural class and 18.5 per cent. from the artisan and commercial class; in France the figures are 23.8 per cent. and 55.6 per cent. respectively. It is noteworthy that in both countries the proportion of officials and servants is practically the same. The most criminal age both for men and women is: in Egypt, from 15 to 25 years; in France, from 20 to 30 years; and in England, from 30 to 40 years.

The Judicial Adviser deals very thoroughly with the question of crime in Egypt and the motives underlying its persistent increase. Space does not permit of my summarising his remarks, which, indeed, would lose a good deal of their cogency and interest by condensation. He offers sound advice to both Parquet and judges on the question of the improvement of this unsatisfactory state of affairs. The former he recommends to arrive speedily on the scene of the crime, as "the only reliable testimony in this country is that which is obtained in the first twenty-four hours after the commission of a crime"; and he advises them to pay due regard to the comfort and convenience of witnesses during the inquiry, "a total disregard of which is sometimes observable and acts as a contributory cause of the general disinclination to assist the authorities." With regard to the judges, he advises them to "remember that it is their duty to pass really deterrent sentences, . . . and to treat witnesses and victims in such a manner as to encourage others to regard the tribunals as their natural protectors and not their enemies."

Mixed Tribunals.

There has been a general increase in business in the Mixed Courts during the past year, 26,876 new cases having been entered for trial as against 24,250 in the preceding year. It is satisfactory to note that all the courts have dealt most effectively with this extra work. The Court of Appeal had to deal with 64, the Alexandria Court with 442, the Cairo Court with 328, and the Mansura Court with 1,369 more cases than during the preceding year; but, in spite of this, the arrears in all but the Mansura Court, which increased by 162, were reduced, those of the Appeal Court falling by 22 and those of the other two courts by 207 and 20 cases respectively.

A slight diminution in the number of judicial sales of real property is again recorded, but with regard to the proceedings for the distribution of the proceeds the position is still unsatisfactory. Although only 28 more new affairs were introduced and the courts made great exertions, the arrears increased by 144 cases. As the Judicial Adviser says, "Measures must plainly be adopted by the courts for dealing with this unsatisfactory state of affairs." Bankruptcies showed a marked decrease (380 as against 573), but Sir Malcolm is doubtful whether this is an indication of any great improvement in the economic situation. He inclines to agree with the Procureur-Général that this decrease may rather be attributed "to the new provisions of the judicial tariff, which require a deposit of £E12 for a declaration of bankruptcy."

In this connection the annual report of the Procureur-Général, which is in French and is annexed to the Judicial Adviser's report, contains some very apt and interesting observations. M. Eeman complains, very rightly, of the laxity of traders in the matter of allowing credit.

School of Law.

For the first time the Khedivial School of Law appears in the Judicial Adviser's report, this institution having been transferred from the Ministry of Education at the end of 1912. As was explained at the time in The Near East, "various reasons induced the Government to make this change, the principal one being the fact that the students of the School of Law are usually destined for a legal career, which will bring them in after life into more or less close contact with the Ministry of Justice," which is therefore better qualified to control and direct the studies. With this end in view a Council of Direction, consisting of the highest legal functionaries, has been created for the school. During 1913 there were 269 students, of whom only 48 were on the French side. Out of these only 51 failed at the examinations—or 18.9 per cent., as against 27 per cent. in 1912. The English section, again, headed the final diploma lists with five students. In the opinion of the examiners, "the students of last year showed themselves to be of superior calibre to those of the preceding year or even of the last few years." With regard to the external candidates, 49.18 per cent. failed at the examinations, and from what the Judicial Adviser writes and the quotations he makes from examiners' reports, it would appear that some restriction should be placed on the admission to the examinations of these students, who are very often unsuccessful ex-students of the school, and who, being employed in other occupations, cannot find the time necessary to proper study. Various modifications in the regulations and course of study, etc., have been made, and they should certainly have for result the infusion of "a more practical spirit into legal education," the discouragement of mere cramming, and of that "well-known and highly regrettable tendency of students to rely on their memories rather than on their brains," and the production of young graduates "better equipped for grappling successfully, whether as advocates or magistrates, with the difficult cases that present themselves in practice."

Legislation.

Owing to the alteration in the Organic Law last summer, the additions to the Native Statute Book were not as great in 1913 as in 1912, although many projects had been prepared. In addition to those already referred to in The Near East, there is under consideration a Code of Personal Status, giving to the Native Courts the administration of tutors, curators and procurators, which has been hitherto enjoyed by the Meglis Hasbys. This law, like the rest, has to await the approval of the Legislative Assembly.

With regard to Mixed Legislation, a law reforming certain portions of the procedure came into force on January 1st last. It suppressed the procedure known as *défaut faute de couverture*, under which a party could make default not only after appearing at the first hearing, but even after appearing at several successive hearings, and it made various amendments which should stop many of the present abuses. The Judicial Adviser, in pointing out that the creation of the Mixed Legislative Assembly has enabled various partial reforms to be introduced into the procedure, states that "even now it will be observed that that Assembly does not appear to be particularly disposed to make any very bold innovations in the existing procedure," but he closes with the hope that if the labours of the Commission that has been appointed to draft a new Code of Native Procedure prove successful, "the Mixed Procedure will, in due course, benefit thereby."

LETTER FROM ATHENS.

(From Our Own Correspondent.)

Athens, May 6.

Fighting in Epirus.

Although the negotiations between the Autonomous Government of Epirus and Major Thomson, representing the Albanian authorities, have led to an agreement on five of the seven points under discussion, hostilities between the Epirotes and the Albanians still continue. Last week the latter made a most determined attack on Argyrokastro, the headquarters of the Autonomous Administration. The assailants, to the number, it is believed, of some 2,000, succeeded in occupying the monastery of Tsepo, to the north of the town. The hierolochites fled before this unexpected onslaught, and spread panic far and wide. They were rallied, however, by a corps of Greek Garibaldians, under M. Romas, and in the end the Albanians were dislodged with loss, and seventy of them were captured. My informant tells me that among the killed was a Bulgarian officer, and he asserts that he heard orders given in Italian during the fighting and even saw an Italian flag in the field against the Epirotes. From the same source I learn that Akif Pasha has been instructed to march with 1,500 to assist in the defence of Koritza against the hierolochites, who are meditating an attack on that town. The Epirotes have succeeded in taking Herseg and Frasheri, which were handed over to the Albanian authorities at the time of their evacuation by the Greek regular troops. I gather that the result of this fighting has been rather to weaken the position of those who hope to settle the Epirote difficulty by negotiation, and fears are expressed that Essad Pasha Toptan may still endeavour to carry out his original plan of crushing the autonomist movement by a personal campaign at the head of his own men, which would make him master of Albania and place the Mpret completely under his control.

Internal Affairs.

The unsatisfactory reply of the Powers to the Hellenic Note on the question of evacuating Epirus and their polite refusal to guarantee Hellas in the possession of Chios and Mytilene, coupled with the distressing situation of the Greeks in Thrace and the news that Turkey has ordered a third Dreadnought, has greatly heartened the Opposition in its fierce attacks upon M. Venizelos's administration. It is possible for an outside observer to perceive that the unexpected success and unlooked-for aggrandisement of Greece must necessarily expose her to international jealousy and diplomatic intrigues, and that force of circumstances has compelled the Prime Minister to make certain sacrifices in Epirus and concessions in Salonika, but no competent observer can justly accuse M. Venizelos of diplomatic incapacity.

The Theotokists abuse the Prime Minister for not having definitely thrown in the lot of Greece with the Triple Alliance, while the Rallists cannot pardon him for having arrived at so good an understanding with Roumania, which is considered to be a satellite of that political combination. Both parties unite in upbraiding him for having yielded to Italian pressure in the matter of the Albanian frontier and in demanding what M. Venizelos means to do about Greek naval supremacy. Finally, even General Zorbas, the leader of the Military Revolution in 1909—who is now retired—has emerged to join in the attack on the Cretan patriot who overthrew all his precious schemes and restored to the headship of the Army the Diadoch, now King Constantine, whom the Military League had dismissed. These people accuse the Prime Minister of being a megalomaniac, regardless of the fact that he, probably alone in Greece, is capable of seeing clearly through the storm of difficulties which assails the country and of steering a moderate course.

Relations with the Porte.

Ghalib Kemaly Bey, the Ottoman Minister in Athens, has recently been displaying great activity in his endeavour to prove that the Moslems resident in Hellenic Macedonia are exposed to persecution and oppression. Doubtless his object is to secure a basis for his argument that the treatment meted out to Greeks in Thrace is purely by way of retaliation for Hellenic action towards the Turks in Macedonia. In spite of the manifest exaggerations which have been circulated by Ghalib Kemaly Bey, it must in all fairness be admitted that the state of Macedonia leaves much to be desired. This may, however, be charged to the shortcomings of the late régime, and is not entirely the fault of the Greek administrators. The Prime Minister is constantly working to improve matters in these new provinces, and much is expected from the appointment of the new Governor, General M. Sophoulis, from Samos.

ALBANIAN NATIONALISM AT KORITZA.

(From Our Own Correspondent.)

Koritza, April 26.

Since my last letter the Koritza district has been quite quiet, and a considerable number of Christian volunteers are assisting the Albanian authorities in the policing of the town and neighbourhood. The inquiry into the recent outbreak is still being carried on, and the prefect, a local Christian, in view of the dangers which are expected owing to the machinations of the insurgent Epirotes, has requested that martial-law should be proclaimed. So far, however, he has not been authorised to do this from Durazzo. According to the evidence which has been collected by the Court of Inquiry, the recent *coup manqué* was undoubtedly inspired by the Hellenic authorities. The court is in possession of the names of all those Greek officers who raided up to the very gates of the town at the head of 300 regular troops and three machine-guns. It has been officially established that the raiders killed twenty-five Albanians and six Kutzo-Vlachs, and that they murdered two women. There are also thirty wounded. The Greeks had nearly sixty killed and a good many wounded; indeed, it is currently reported that no fewer than 150 wounded Greek soldiers retreated to Kastoria. The conspirators had secretly introduced a number of Greek comitajis into the town, but there were very few Albanians concerned in the rising, among the latter being the Metropolitan, Mgr. Germanos, and his kavass, Soulo. As I told you in my last letter, his All Saintliness was arrested and sent to Elbasan for trial, but as for Soulo, he was able to escape, although wounded. With the Bishop several members of the Diocesan Council were also arrested for having devoted themselves to the propaganda of political Hellenism instead of attending to the religious duties for which they had been elected. In order to put an end for good and all to the intrigues of Hellenizing ecclesiastics, the Orthodox inhabitants of Koritza have elected a new Diocesan Council and a Vicar to fulfil the functions of the Metropolitan. The Albanian liturgy, the use of which was forbidden in the days of the Turks and under the religious tyranny of the Greeks, has been adopted in the churches. The vicar and the newly elected Council have sent a petition to the Mpret imploring his Highness on no account to give way to the Greek pretensions.

The following is the text of the petition as sent to the Mpret by the Diocesan Council of Koritza:—

> We, the undersigned, in our capacity as representatives of the Orthodox Albanians at Koritza, have the honour to submit to your Majesty that we have learnt from foreign newspapers that Greece, under the pretext of guaranteeing our churches and our schools, has had the impudence to meddle with the internal affairs of Albania. If this news be true, we, as Albanian citizens, and as subjects of your Majesty, declare that we consider ourselves to be capable of looking after our own interests, and that we shall ask our own Government to meet our wishes, but that we shall never permit outsiders to have the right to interfere in matters relating to the moral and political independence of our nation as a whole and of our Orthodox Church in particular.

To-day, at a service celebrated in the Albanian language in the Church of St. George, two patriotic sermons were preached by the Vicar and by another priest.

The southern districts continue to be occupied by armed Greeks in the name of the somewhat comic "Autonomous Government" of Epirus, but the Netherlands officers in command of the Albanian gendarmerie assert in their official reports that practically all the comitajis are Greek regular soldiers under the command of men trained as officers in the Hellenic Army.

NOTES FROM ROUMANIA.

(From Our Own Correspondent.)
Bucharest, May 10.

Constitutional Revision.

The debate on the proposal for the revision of the Constitution was brought to an end on Friday last, May 5, when the proposal was voted in both Houses. The Conservative Party took no part, except in presenting, some days ago, a declaration generally condemning the idea, and declaring that expropriation is unnecessary, and that the time for an extended suffrage has not yet come.

Parliament was then adjourned till May 31, when the first elections for the Constituent Parliament begin. The Constituent Parliament will meet for the first time on June 18. It is expected that a Commission to study the question will then be chosen, and that Parliament will be prorogued till the autumn.

Roads in New Roumania.

In the Ministry of Public Works everything is being done to push forward the work on the high roads in the annexed territory and the improvement of those already existing. The three high roads:—(1) Turtukaia-Silistria, (2) Silistria-Dobritch, and (3) Dobritch-Constanza are to be completed this month, and those that are being repaired will also be ready for use. About 200 miles will be macadamized this season.

Postal Convention Signed.

The postal convention between this country and Servia, Bulgaria, Greece, and Montenegro was published on Tuesday. The prices fixed are: for telegrams, 5 centimes per word, with a minimum of 1 fr. A letter of 20 grammes 10 centimes; and for money orders 10 centimes per 25 frs. Press telegrams sent between 6 p.m. and 8 a.m. will be taken at half-price.

The Cabmen of Bucharest.

A school for cabmen is to be provided in Bucharest. The sons of cabmen are to have all preference whilst driving, and the plan of the town is to be taught. A newspaper remarks that "It is hoped that the scholars will be instructed in the use of civil language, and not to behave as the present cabmen of Bucharest do, who are perhaps the most brutal and impertinent of any capital in Europe." This is indeed a most undeserved remark, the Bucharest cabmen, with some few exceptions, being wonderful drivers and very civil-spoken. Probably the writer lacks experience in such matters, and never has had a *rencontre* with a Vienna or Berlin "kutscher."

THE ROUMANIAN ARMY.

Reorganisation and Enlargement.

Our Bucharest correspondent writes that very important changes are to be made in the Roumanian Army by increasing the number of men called to the colours. Hitherto, for want of funds, four regiments of infantry possessed only two battalions in place of three, and these are now to be brought up to full strength. Up till now, for this reason, large numbers of recruits were sent back, and these will now be used to form forty new reserve battalions of infantry, so that the Roumanian Army will possess eighty reserve battalions of infantry, a most important reinforcement, as well as five regiments of field artillery (Nos. 21 to 25). These regiments will, on a peace footing, exist *en cadre*, and will serve on war footing as two reserve divisions for each Army Corps, and in connection with this reorganisation five new territorial commands, two cavalry division commands, and one Calarash (heavy cavalry) Brigade command will be created.

The 8th Calarash Regiment will be reorganised, and five light howitzer battalions in regiments of six batteries each will be added; the mountain artillery receives another battery, and each of the five Roshori (light cavalry) regiments, which hitherto have not possessed machine gun sections, will now have one each.

Further, the number of non-commissioned officers of higher grades is to be increased gradually, and a special school of instruction will be introduced, whilst the number of pupils in the various military schools will be sensibly increased.

The general treatment and pay of the rank and file is also to be increased. Sixteen million francs in this year's Budget is set aside for the above improvements. Other important work to be undertaken by the Ministry of War is:—

Artillery barracks at Dobritch, costing 380,000 frs.; cavalry barracks at Dobritch, costing 350,000 frs.; infantry barracks at Dobritch, costing 200,000 frs.; two barracks for infantry and artillery at Turtukaia (Tutrakan), costing 800,000 frs.; infantry barracks at Baltchik, costing 820,000 frs.; infantry barracks at Silistria, costing 220,000 frs.; infantry barracks at Cararua, costing 200,000 frs.; the total cost being, therefore, 2,970,000 frs.

The work, which must be completed in two years, is to be tendered for at the Ministry of War on May 11 and 12, O.S. A further 5,000,000 frs. is to be spent in the erection or repair of different barrack buildings in Roumania.

NEW SERVIA.

The Movement of Peoples.

(From Our Special Correspondent.)
Belgrade, May 11.

The migration of the population in the old Turkish provinces now occupied by Greece, Bulgaria, and Servia is certainly one of the questions of the moment in the Balkans, and I have therefore obtained the following official information concerning the emigration from New Servia:—

During the last fifteen months 250,000 Moslems have left the Balkans via Salonika. Of these, 90,000 have migrated from New Servia, but their numbers are continually increasing, carriage loads leaving every day at the rate of anything between 200 and 1,000 per diem. This migration will increase after the crops have been realised in August and September, and it is believed that when the three-year limit (during which time the Moslem Turks have to opt whether they will leave the country or become Servians) has come, at least two-thirds, or even four-fifths, of the Moslems will have left the country. In the absence of trustworthy statistics, and placing the population of New Servia at 1,600,000, of whom, roughly, half are Moslems, the population will, according to the above computation, have sunk to below one million. The Government, I am assured, is opposed to this migration, and to hinder it has forbidden the sale of land. Fares, however, on the railways have been reduced by one-half for these migrants.

To attract emigrants to New Servia, the Government offers land free under the following conditions: For every family, 5 hectares, but if it consists of more than one male an extra 3 hectares is given for every male over sixteen years of age; another 5 hectares is allowed to the emigrant possessing cattle or agricultural machinery. Fares to New Servia for these farmers are merely nominal. The land pays no taxes for three years, but cannot be sold until it becomes the absolute private property of the emigrant—that is to say, after he has been in possession fifteen years. It is anticipated that about 10,000 emigrants will return this year from America; and up to the present about 2,000 demands have been received from Slavonia, Croatia, and other Slav districts in Austria-Hungary.

Map of the Balkans.—The Royal Geographical Society publishes in the May number of the *Geographical Journal* a map of the Balkan Peninsula between 39° N. (Gulf of Arta) and about 45° N. (Ploesti and the extreme north of Servia), with the latest boundaries shown in colour. The boundaries are based upon the Treaties of Bucharest and Constantinople, and a proper hesitation is shown as to the temporal sovereignty over Mount Athos. Some of the proposed railways are shown in addition to all the existing lines. The map indicates mountains in brown, and is not overloaded with names, but no regular system appears to have been followed in the nomenclature.

NOTES FROM BULGARIA.

(From Our Own Correspondent.)

Sofia, May 9.

The Chamber and the Late Wars.

Yesterday the Chamber began a debate upon a proposal to institute a Parliamentary Commission to inquire how far the Gueshoff and Daneff Cabinets were responsible for the disasters through which the country lately passed. The motion having been duly proposed, M. Karakasheff, a Stambolovist deputy, suggested that the Commission should first inquire whether the treaty concluded with the Balkan States corresponded to Bulgaria's national ideals and was to her advantage; and demanded a strict inquiry into the undertakings entered into by the Government after the battles of Lozengrad and Lule Burgas. The leader of the "Narrow" Socialists, M. Blagoeff, demanded that the scope of the inquiry should be extended to include the preparations for war. He severely criticised the Russophile policy of the Gueshoff and Daneff Cabinets, and censured the conclusion of secret treaties with Russia, which brought nothing but harm to Bulgaria. M. Kirkoff, Socialist, who spoke next, wished that inquiry should also be made as to the responsibility of the King for the nation's misfortunes. The debate will probably last over another four or five sittings.

To-day printed copies of the regular Budget for 1914 were distributed to the deputies, and the Budget debate will begin as soon as the present one is concluded. In this year's Budget, for the first time, an item of 240,000 leva (£9,600) figures in the Budget for the appanage of Crown Prince Boris.

The Bulgarian Church in the Dobruja.

After closing the Bulgarian schools in the Dobruja and driving away the teachers, the Roumanian administrative authorities turned their attention to the churches, handed them over to Roumanian priests, and expelled the Bulgarian. A deputation of the latter have waited on the Prime Minister, Dr. Radoslavoff, and made urgent representations to him upon the serious situation and lack of religious freedom in the Dobruja.

Refugees from Asia Minor.

The stream of Bulgarian refugees from Asia Minor continues unabated. Yesterday the Bulgarian liner "Bulgaria" disembarked at Dedeagatch a further 850 of these poor people, 650 from Panderma and the rest from Kuleli Burgas. They state that the Turks in Asia Minor have lately begun to persecute them and rob them, apparently with the express object of driving them to emigrate.

The Queen's Postponed Visit to the U.S.

In view of the trouble between the United States and Mexico, Queen Eleanor has postponed her visit to the former country. As soon as her purpose of visiting America was known, the Greek colony in the States began an active agitation, distributing leaflets containing attacks on Bulgaria and charges against the correspondent of *The Times* in the Balkan Peninsula. These tactics have aroused much indignation among the Americans resident in this country, who have drawn up a manifesto strongly protesting against them, and denying the unfounded accusations.

Russia and Bulgaria: Remarkable Telegrams.

A great sensation has been caused by disclosures made regarding the exchange of some remarkable telegrams hitherto known to very few people here. Immediately after the victories at Lule Burgas the Tsar of Russia sent to King Ferdinand a telegram saying: "Your troops are still safe and your banks still hold plenty of money. Turn your attention and forces towards Macedonia, the object of this war. Conclude peace with Turkey." To this King Ferdinand is reported to have replied that the prestige of the nation and of the dynasty would suffer if he followed the course suggested; that he was obliged to go forward by the enthusiasm that had taken possession of the Army, otherwise the dynasty would fall. Then the Tsar, through M. Nekludoff, replied that henceforth the Bulgarians must do as they pleased, but without profit, since they had allowed themselves to go further than the earlier conventions between Russia and Bulgaria warranted.

NOTES FROM CYPRUS.

(From Our Own Correspondent.)

Cyprus, May 1.

The "Limassol Week" was moderately successful. The programme was a full one, the chief attractions being the races and the sports. The weather was not all that could have been expected for the time of year, and heavy rain—which, however, benefited the course—necessitated postponing the first day of the race meeting to the 22nd. The attendance on both the 22nd and 23rd was fairly, though not exceptionally, good; but the entries were few. Captain Orr's Messoud again carried all before him, and has enhanced his reputation. Among other runners whose performances in the future will be watched with interest are Ref-Ref, Aris, Baghdad, Zephyros II., and Kildare. It is hoped to see them among the entries at the November meeting at Nicosia.

The Pan-Cyprian athletic sports attracted large crowds, and continued daily from the 23rd to the 26th. Some of the events were hotly contested, but several were devoid of interest to the ordinary spectator.

An animal and agricultural show was held on the 24th and 25th, but owing to the more exciting fixtures for that week, which claimed the time and attention of all, it was somewhat crowded out, and fell a good deal behind the one held at Limassol three years ago, when the late Mr. C. Sozos was the life and soul of the local organising committee.

H.E. the High Commissioner and Lady Goold Adams were at Limassol for the week, and, in addition to the principal events, at which they were present, had a full programme of minor semi-official engagements. Among other visitors were the Chief Secretary, Captain Orr, and Mrs. Orr.

The Legislative Council reassembled on the 28th ult., and progress, even though slow, is presumably being made with the Estimates.

TABRIZ "TOWN IMPROVEMENTS."

Tabriz, April 1.

M. Orloff, the new Russian Consul-General, proposes to have the streets of Tabriz paved with stone and widened. These streets are dusty in summer and muddy in winter. The Consul-General proposes to pay the expenses of paving, etc., by a voluntary subscription from the citizens of something over 20,000 tomans; and he thinks that with a little persuasion he could collect 60,000 tomans. He can do it easily. The Persians could pay that sum without feeling that they had lost a shahi. Shuja-ed-Dowleh alone could subscribe 100,000 tomans and fill his purse again from some other source. All the land-owners whose lands face the main streets, and who intend building shops or stores, have been informed that they must move the foundations of the old walls two yards (one Persian arshin) back, so that the streets may become wider gradually.

M. Orloff intends to spend part of the 60,000 tomans (or more) for lighting the streets at night. The work of paving and widening, etc., has been entrusted to an Armenian named Stepan Khan Eliazarian (who is also assistant to the mayor). The Consul-General and the Khan were driving the other day in a carriage through the streets, and making arrangements to start the work as soon as possible.

Mirza Firooz Khan.

FRENCH NATURAL SPARKLING TABLE WATER.

NOTES FROM PERSIA.

(From Our Own Correspondent.)

Teheran, April 27.

The remains of Major Count Erik Lewenhaupt and Major Hesn es Saltaneh were brought into Teheran from the Bagh-i-Shah yesterday morning. An escort was provided by the Gendarmerie, the Cossack Brigade, and the Police, followed by the band of the Gendarmerie playing a funeral march. Immediately in front of the two hearses, which were covered with wreaths, rode the Swedish officers, and the chief mourners followed after, with the Turkish Ambassador and the representatives of the foreign Legations and the officials of the Persian Government.

On Sunday a service was held at the Atabeg Palace in memory of Count Lewenhaupt. After a solo anthem had been sung by Mme. Andin, the first portion of the burial service was read by the Rev. J. L. Potter, D.D., the head of the American Mission in Teheran. General H. Hjalmarson, Chief Instructor of the Gendarmerie, then delivered an impressive oration, at the close of which he advanced to the coffin and placed thereon the Service Medal of the Persian Empire. Major Borrell also gave an address on behalf of his brother officers, and the brief service terminated with the playing of the Swedish National Anthem by the band of the gendarmerie. The remains of Count Lewenhaupt will be taken to Sweden during the course of the present week.

General Hjalmarson left for Europe on leave this morning.

It is reported that Nizam-es-Saltaneh, who, it was recently stated, had accepted provisionally the Governorship of Luristan, will shortly leave Teheran to take up the post.

PROGRESS AT MESHED.

(From Our Own Correspondent.)

Meshed, April 16.

"A Time of Peace and Quiet."

For some months past the city of Meshed has been quiet on the surface. What developments may be going on secretly are not matters of common talk among the people, though we often hear remarks to the effect that it is about time for something to happen after so long a time of peace and quiet.

But peace and quiet do not necessarily mean that there are no changes going on. The *personnel* of the foreign colony has largely changed. Colonel Percy Molesworth Sykes, C.M.G., C.I.E., the traveller, explorer, and writer, who was British Consul-General here for about eight years, has been succeeded by Colonel T. W. Haig, C.M.G., the well-known author and eminent Orientalist, and the entire staff of the British Consulate-General has changed within a year. Mr. Eldrid, who was for several years manager of the English Bank, has been succeeded by Mr. Wilkinson. The Belgian chief of the Revenue and Customs Departments has gone, and those departments are now administered by the staff who were here at the time of his departure. Prince Dabija, the Russian Consul-General, after thirty-five years' service in Persia, is retiring this spring, and I am told that M. Nickolsky will be transferred from Kermanshah to replace him. Among the Persians also there have been changes. There is a new Karguzar, and a new Military Commander.

The Russian garrison remains about the same strength, and about 200 time-expired men were recently replaced by new men. At present there are about 200 Russian soldiers and officers and two machine guns, with an additional thirty men in Meshed, 100 guarding the road to the Russian frontier, and another 100 soldiers at Kuchan. All told, there are between three and four thousand Russian subjects in Meshed, including officials, soldiers, merchants, tradesmen, artisans, etc.

Town Improvements.

There have been improvements in the physical aspects of the city. There has always been a public square in the north-west quarter of the town, which was an eyesore for many years because it was uncared for and used as a dumping ground for refuse of all kinds. It was here that public executions took place. The gallows has been removed and the square cleaned up, and recently the Government has made walks around the four sides of it, erected a bandstand in the centre—where Persian musicians discourse heartrending music every afternoon—planted trees along the four walks, made flower beds in the centre around the bandstand; and lamp-posts have been erected around the sides of the square, and the bandstand hung with lamps, so that at night it has a very good appearance. The populace take advantage of this open-air space, and every afternoon about sunset, and on Thursdays, Fridays, and on holidays especially, it is thronged with a motley crowd of men and boys. A wide avenue has been opened leading from one corner of the public square past the British Consulate-General towards the bazaars. Facing on this avenue, a large portion of the garden attached to the Governor-General's palace has been thrown open as a public park, and its old mud wall replaced with a neat iron fence set on a low wall of masonry. A systematic organisation for sweeping the streets has been introduced, and this part of the city is kept fairly clean. All these improvements add much to the general appearance of this part of the city, and no doubt contribute something to better sanitation.

An Attractive City.

A new building is being erected on the north side of the public square for the Post Office and Telegraph Office. As one comes from the bazaar and follows along this new avenue passing along the side of the square, a short distance beyond the square brings him to the city entrance, which is known as the Arc Gate. Here there used to be an ordinary city gate, the gate itself, the street leading out of it, and the bridge over the moat, just outside, all being dangerously narrow. Serious accidents occurred at this place from time to time. But all this has been changed. The street has been widened, the gate has been done away with, and in its stead two round towers of white brick and good appearance have been built to mark the entrance into the city; a new and wide bridge has been built over the moat; and wide avenues are being constructed leading from the gate to the north, the west, and the south. Land is being walled in, and undoubtedly the expansion of Meshed is to be in this direction. The north-west part of the city is where practically all the foreigners live, and is sometimes spoken of as the Russian quarter. This quarter, with its well-kept park and public square, wide avenue, good entrance, avenues outside, and stone-paved, well-swept streets inside, presents a more attractive appearance than I know of in any other city of Persia. Living as we have been these last years, midst the groans and death agonies of poor old Persia, it is pleasant to write something on the brighter side of life, even though it may have only a local interest or value.

I may say that the climate of Meshed is splendid. It is not too hot in summer, and is refreshingly cold for a short time in winter, the thermometer sometimes going down to eight degrees below zero, Fahrenheit. Just at present the spring weather is beautiful. We have had an abundance of rain, and it almost seems as if one can see things grow from day to day. The crops ought to be good this year. The expense of living in Meshed is high, and has noticeably increased during the past two years. Fuel is a prominent item in living expenses. Wood is commonly used, and as there are no forests near it is getting very scarce. There seem to be deposits of coal within easy reach of the city, but the enterprise to work them is lacking.

The Elections in Meshed.

The election of deputies from Meshed for the new Parliament has not yet taken place. The city is allowed to return fourteen deputies, and it is said that as many as 400 men aspire to election. They are from all classes, including ecclesiastics, merchants, and officials. I am unable to say how many of these men, if any, are inspired by the proverb, "Deputyship is the ladder to Ministership."

NOTES FROM JERUSALEM.

(From a Correspondent.)

Jerusalem, May 2.

Easter Celebrations.

Now that the Easter ceremonies are over, Jerusalem is beginning to settle down again to a quiet life. The unusual number of visitors, pilgrims, and travellers has been a great boon to the city after the two lean years of war, when people were afraid to visit Palestine because Turkey was at war, though they were hardly safer in Europe or more distant from the seat of action than we were here. This year for Eastertide, in addition to the great number of travellers from Egypt, Europe, and America, there were about 12,000 Russian pilgrims, over 1,000 Armenians, 1,000 Copts, and many Greeks and Bulgarians in the Holy City, as well as many Jews, who came for the Passover (April 10). The crowds at the wonderful Greek Church ceremonies of the Washing of the Feet and the Holy Fire were extraordinary. As such numbers of fasting and excitable pilgrims entail extra anxiety upon the authorities, the Government sent in 200 soldiers from Damascus, but there was not even one small flare-up from first to last. This is surely a tribute equally creditable to the pilgrims' self-control and the good temper of the troops keeping order, who get considerably more shoves and blows than they give. The Greek Easter was celebrated with all its usual magnificence in Jerusalem, in striking contrast to the sombreness and almost mourning that marked it at Constantinople, where the present state of Greek subjects in Epirus and elsewhere seemed entirely to outweigh the Easter rejoicings. The absence of all the usual pomp and festivities at Constantinople has caused much comment, and is certainly remarkable.

Selim Bey's Flight.

The Turkish aeroplane carrying Selim Bey has safely reached Jerusalem from Beyrout early this morning. Everyone is rejoicing that Turkish pluck and perseverance in this department has met with success. As a matter of fact, the townspeople have been saying lately that if only Turkey would pay less attention to airships and more to her distressed and neglected subjects it would be more satisfactory in the end.

The Question of a Water Supply.

A welcome fall of rain last week has brought up our rainfall to 17 ins.—bad enough, but the crops in many places have been saved. At Hebron the rainfall is only 15½ ins., as against the previous lowest record of 16½. The drinking water supply will soon become a matter for acute anxiety. As it is, the townspeople were buying water in January, whereas in an ordinary year this is not necessary before July or August. Christians, Moslems, and Jews all united in praying for rain, and the recent falls (heavier in April than in January) have wonderfully lightened the anxiety for the future. The distress in the country is only equalled by the prevailing apathy of the people, who have almost given up hoping for better times; and when a report from Beyrout reached us that the French had seized the town and country round no one seemed even excited at the idea.

Jewish Hospitals.

Tidings of Jewish activity come from Jaffa and Haifa. At Jaffa the Jews are said to be establishing an ophthalmic hospital; and at Haifa Baroness de Rothschild is presenting an hospital to the Jewish colony, towards the upkeep of which she will personally contribute 6,000 francs annually. There is already a splendid English hospital at Haifa, founded in 1890 by the present Bishop in Jerusalem, Bishop Blyth, and most ably worked by Dr. D. A. Coles and a small but devoted staff; but Haifa is a growing place, and if the Jews gather their sick into their own wards there will undoubtedly be more room for the Gentiles, who come from all parts of the country and from great distances to be under English treatment.

A Typhus Outbreak.

There is a bad outbreak of typhus in the prison at Jerusalem. Some of the patients have been removed to hospital for treatment, and others are in a quarantine hospital near the Mount of Olives, or rather in a building used for the purpose.

NEAR EAST IN PARLIAMENT.

HOUSE OF COMMONS.

Greeks in Albania. May 7.

Mr. Aubrey Herbert asked the Secretary of State for Foreign Affairs whether he was aware that, in spite of the decisions of the London Conference and the Frontier Commission, the Koritza district is being attacked by Greek forces with cannon, and that the Albanian gendarmerie has been obliged to withdraw, and that in the Kolonia district many villages have been burned and women and children killed; and whether he proposes to take any action in the matter.

Sir E. Grey: I have received reports to the effect referred to, but the information which reaches his Majesty's Government from different sources is very contradictory, and they are not in a position to check its accuracy. According to the statement of the Greek Government all their troops have been withdrawn, and are now within the new frontier. The International Commission of Control, at the invitation of the Albanian Government, are endeavouring to secure a settlement of the disorder.

Pillaging by Montenegrins. May 11.

Mr. Aubrey Herbert asked the Secretary of State for Foreign Affairs whether he had received any information from our Consul in the district regarding the fate of Hoti and Gruda, and whether he would use the good offices of the Government to suggest to the Montenegrin Government that they should compensate those inhabitants of Hoti and Gruda whom they had driven from their homes and who had been forced to flee for safety to Scutari, or to reinstate them, and rebuild their houses which the Montenegrin troops had burned and pillaged.

Mr. Acland (Under-Secretary): I have nothing to add to my reply to the hon. member of April 27 (reported in The Near East). I have no information on which I could base action such as that suggested by the hon. member.

Crucifixion of Albanians.

Mr. Herbert also asked the Foreign Secretary if he proposed to make any statement with regard to the reported crucifixion of Albanians captured by the Greek Epirotes.

Mr. Acland: I have no information on this subject.

Moslems in Thrace. May 7.

Mr. Aubrey Herbert also asked the Secretary of State for Foreign Affairs what steps the Government intended to take regarding the recent memorandum addressed to the Ambassadors of the Great Powers by the Porte dealing with the ill-treatment of Moslems in the ceded territories of Thrace, notably in the territory of Karajova; and whether 163,000 Moslems had been compelled to leave their ancient homes through this ill-treatment since November, 1912, and that mosques and cemeteries were being profaned and burned.

Sir Edward Grey: No such memorandum has as yet reached his Majesty's Government. Large numbers of Moslems have left the ceded territories during the past year, but I have no official information as to the outrages referred to by the hon. member.

Russia in Persia. May 12.

Mr. Ponsonby asked the Secretary for Foreign Affairs whether, in view of the approaching coronation of the Shah, his Majesty's Government would urge the Russian Government to withdraw their expeditionary force from Northern Persia in fulfilment of official pledges already given, in order that the Shah might be enthroned as ruler of a country the sovereignty and integrity of which was not seriously impaired.

Mr. Acland: The Russian Government have previously given assurances regarding the Russian troops in Persia, of which the recent withdrawals of over 2,600 men from Kazvin and of some 500 men from Tabriz are a practical illustration, but it can hardly be urged that all the Russian troops should be completely and suddenly withdrawn until it is evident that this would not be followed by any outbreaks of disorder in the north of Persia such as have recently occurred in the south.

Sir G. Scott Robertson: Can the hon. gentleman say where the money is to come from for this ceremony, and is he aware that the Government of Persia is in grave financial difficulties just now?

Mr. Acland: I am sorry to say I am aware of that. I wish I could make some suggestion, but money is very hard to get just now.

Mr. Ponsonby further asked the Foreign Secretary whether he had any information with regard to the emigration on a large scale of Russian peasants and farmers from Turkestan and from European Russia into Northern Persia; whether Russian commissioners had been appointed to regulate and organise the settlement of these Russian emigrants; and what amount of land had been acquired for this purpose by Russians in the valleys of the Gurgen and the Atrek.

Mr. Acland: The answer to the first part is in the affirmative. As to part two, I understand that a superintending emigration officer and other officials have been deputed to inspect the territory to which the emigrants have proceeded. On the third part of the question I have no information.

Alleged Outrage on Moslems.

Mr. Pike Pease, on behalf of Sir J. D. Rees, asked the Secretary for Foreign Affairs whether he could give the House any information regarding the alleged burning and crucifixion of Moslem Albanians by Epirote insurgents.

Mr. Acland: It is reported that some villages have been burnt and the inhabitants in one instance killed; this, if true, is sufficiently distressing. I have no information at all confirming reports of crucifixion.

Digitized by Google

Treaty of Bucharest.

Replying to Mr. Aubrey Herbert, who asked whether Great Britain had yet signified her assent to the Treaty of Bucharest, and, if so, what were the conditions on which that assent had been given, Sir E. Grey said: "His Majesty's Government are in communication with the Powers on this subject. Different views are held by the Powers as to whether express recognition of recent territorial changes is required, and, if so, in what form and on what conditions it should be given."

A Consul's Speech.

May 12.

Sir J. D. Rees asked the Secretary of State for Foreign Affairs if he could now inform the House what disciplinary measures had been enforced against Mr. Consul-General Eyres for his anti-Turkish speech.

Mr. Acland (Under-Secretary): This matter is still under consideration.

Trans-Persian Railway.

Dr. Addison asked whether an opportunity would be given for the House of Commons to discuss the question of the Trans-Persian Railway before the Government came to any decision in the matter.

Mr. Acland: I should hope so, before any final decision, in view of the importance of the matter.

Dr. Addison: Is there any undertaking, direct or indirect, that this Government will participate at all?

Mr. Acland: I do not think so. The general discussion is still going on.

Dr. Addison: Are we to understand that we are entirely free from any commitments in the matter?

No answer was returned.

NEAR EAST BOOKSHELF.

SERVIAN FOR ENGLISHMEN.*

Mr. Petrovitch has now added to the three grammars with which his countrymen are assisted in the learning of English, French, and German a fourth for the benefit of Englishmen and Americans who wish to acquire the Servian language, a tongue which, as the author points out, is spoken by some 8,000,000 free Serbs, inhabiting the kingdoms of Servia and Montenegro, and Croats in Hungary, Dalmatia, and Bosnia. Whether the Kyrillic alphabet be used by the Orthodox Serbs or the Latin by the Roman Catholic Croats, the language is the same, and has the great advantages of being pronounced as it is spelt and spelt as it is pronounced. Arranged on the well-known Gaspey-Otto-Sauer method, Mr. Petrovitch's grammar very soon escapes from the necessary Ollendorfian platitudes on which tradition demands that all knowledge of a foreign language should be based, and encourages the student to acquire an insight into Servian history and ballads in the process of translating from one language into the other. There are numerous reading exercises, combining practice in the use of both alphabets with information about Servian writers and literature, and Mr. Petrovitch has very wisely included a number of examples of the Kyrillic cursive-script. A double vocabulary of some size is included, but we should like to see a chapter for the use of commercial travellers included in the next edition, and a strengthening of the vocabulary by the insertion of more mercantile and financial terms.

NEAR EAST BOOK NOTES.

We have received a copy of the second edition of "The Book of Ruth" in Hebrew, published by the Manchester University Press. This edition is a reprint of the first, the vowels being omitted from the text in order that the student may practise putting them in himself. The addition of blank pages, with a suitable writing surface, opposite the text, and intended to serve for notes, should enhance the usefulness of the book.

Mr. Allister Macmillan has lately spent four months in the island of Malta, the object of his visit being to collect material for a book on Malta and Gibraltar which will be an important addition to the series of Empire publications issued by the house of Macmillan. We understand that Mr. Macmillan has obtained the services of some of the best writers in the island, who will deal with various special aspects of Maltese life with intimate and expert knowledge. The illustrations should prove of special interest, for Mr. Macmillan took away with him a collection of excellent photographs.

* "Servian Conversation Grammar," by Woislav M. Petrovitch, Heidelberg, Julius Gross. London: David Nutt, 212, Shaftesbury Avenue, W.C. 4s.

We have received Vol. III., Part II., of "The Agricultural Journal of Egypt," and it must be said that the new number maintains the high standard which earlier numbers set. There are three important articles relating to the subject of the pink boll worm, and the methods of destroying that destructive pest. We have nothing but praise for the useful tables and diagrams, and the two really beautiful coloured plates with which the text is illustrated. One of these plates shows the various stages in the life history of the common boll worm in such a way that identification should not be difficult. The other is also useful, showing insects affecting cotton, dates, and pomegranates. Other well-written and practical articles deal with "Tree Planting in Provincial Towns," "The Cultivation of Plums in Egypt," and "Sweet Potatoes," together with useful Botanical, Etymological, and Mycological Notes.

On May 28 Messrs. Smith, Elder will publish an illustrated volume entitled "Travel and Politics in Armenia," by Mr. Noel Buxton, M.P., and the Rev. Harold Buxton. Lord Bryce has written an introduction, and Mr. Aram Raffil has contributed chapters on Armenian history and culture.

"The Curse of the Nile," a volume by Douglas Sladen, which, originally published at 6s., ran into several editions, is shortly to be republished at 2s. by Mr. Stanley Paul. Mr. Sladen is at present engaged upon another work dealing with the Near East, and is preparing a book entitled "How to See Egypt," which will be published by Messrs. Kegan Paul, Trench, and Co. during the autumn. Mr. Sladen is a master of descriptive writing, and his work on Italy is the standard *vade mecum* of the Englishman in that country.

DISCOVERIES IN BABYLONIA.

In connection with the Victoria Institute, Dr. T. G. Pinches delivered a lecture on the latest discoveries in Babylonia at the Royal Society of Arts recently. Dealing with the Creation stories, he said the results of Babylonian conceptions concerning the origin of the Universe and the life therein seem to have been three—the two principles of evil with whom Creation originated on the one side, and Merodach and the good and just Gods of heaven who created mankind "to redeem" (seemingly) Tiawath, Apsu, and their evil offspring and followers on the other. Discussing the inscriptions discovered at Niffer, the lecturer considered that it is probable that all the Flood legends are much older than the time when they were written. The third tablet contains on the much-effaced obverse the names of the kings immediately after the Flood. In the opinion of the lecturer it seems not unlikely that the Babylonian chronological document will prove to be a completion of that recognised by George Smith among the treasures of the British Museum in 1873. As to the newly discovered tablets of Erech, it was probable that a hundred thousand more at least awaited discovery. As far as Dr. Pinches had been able to examine them, the new inscriptions were of the later period of Babylonian history, and were mostly trade documents, generally or often mentioning transactions connected with the religious life of the place. The small collections embraced the period from Nabopolassar to the period of the Seleucidæ. As to how the temples of Babylonia obtained their great riches, he considered they came from the offerings of the faithful. The histories of the Babylonian temples had yet to be written, but if the material accumulated as it was now doing this would be possible before long, and many would be the revelations as to their resources.

LETTERS TO THE EDITOR.

The columns of THE NEAR EAST *are always open for the discussion of subjects of general interest to its readers. The publication of such letters must not be taken, however, as indicating that the views expressed by the writers are those of* THE NEAR EAST.

THE ISLANDS OF THE ÆGEAN.

To the Editor of THE NEAR EAST.

Sir,—In your number of May 1, "Macedonicus," in replying to Mr. Simmons, makes what appears to me a very arrogant and, may I say, impertinent remark. Referring to Mr. Simmons, he says: "It is curious to find that Turkey still has such doughty champions as your correspondent. Perhaps if he had seen the Near East at as close quarters as I have he would be less ardent in his support."

What precisely does "Macedonicus" mean? That everyone who sees the Near East at as close quarters as he comes to a point of view unfavourable to the Turks? Such a statement would be so glaringly opposed to facts as not to be worthy of a contradiction. In reality the opposite of this is the case—that Turkey's friends in Europe (and they are not a few, and are, I believe, increasing) are nearly all men who are intimately acquainted with the Near East. It is my personal experience that among the European society in Turkey those who have travelled and seen most of the Near East are the most favourably disposed to Turkey. Her enemies are very frequently those in whose eyes is the beam of prejudice.

As for "Macedonicus's" vaunting of the Greeks' naval prowess, it must be obvious to all that her fleet has had a wonderfully easy war. By the sole lucky fact of their having bought the "Averoff" in time the Greeks were in a position to prevent the Turkish fleet—which contained no strong modern unit—from coming out of the Dardanelles. The rest was a rather pleasant and gratifying sail round. It does not say much for Greek seamanship that a solitary cruiser of the enemy—and that a damaged one—was able to range for months over the Eastern Mediterranean without being caught. As for the future, who can tell? Greece is not the only country who is making efforts and sacrifices to strengthen her navy.—

Yours, etc.,

Constantinople, May 8. C. MAYO.

To the Editor of THE NEAR EAST.

Sir,—"Macedonicus," in his letter from Cairo of the 17th ult., published in your issue of the 1st inst., says that Mr. B. Simmons' letter of the 3rd ult. is "interesting if not quite convincing." May I be permitted to retort that "Macedonicus's" own letter is not only unconvincing, but is full of that vague abuse of Turkey which has been used so freely in the past, but which—especially in view of the great efforts that the Ottoman Government has been and is making in the direction of reforms and of the notable results which have already been achieved, in spite of five years of war and calamities, since the establishment of the Constitution—is not only unfair, but defeats its own object when Greece and the Greeks are held up as an example and, if you please, as the proper successors to the Ottoman Empire.

Is there *no* limit to the calm self-complacency and insufferable self-righteousness with which a certain section of Greeks and their sympathisers persist in comparing Greece and its people with the Turks? I and all other well-wishers of the Ottoman Empire can, of course, find much to criticise in many departments of life and administration in Turkey; but, on the other hand, there is also very much to be admired and encouraged. Does "Macedonicus" really think Greece perfect in government, administration, etc., etc.? If so there is really no use in arguing with him. Your issue of the 1st inst. in two places ("The Situation at Salonika," on page 828, and the paragraph beginning "Philhellenes and lovers of religious freedom," under Current Comments on page 829) are only two examples of many and sweeping charges that can be made from the opposite point of view. If, however, he admits that Greece and the Greeks are *not* perfect, let him take up a less strenuous attitude. Turkey welcomes fair and helpful criticism; but you will, I think, agree that that of "Macedonicus" is neither. I could, if I did not desire to spare your space, point out that his line of reasoning with regard to land and sea forces in connection with the taking of Chios and Mytilene is incorrect; for, briefly, if Greece had been fighting Turkey single-handed she would have been far too busy nearer home to have been able to bother about capturing a couple of islands. I cannot, also, I fear, enter into the spirit of "Macedonicus's" raptures about the repetition of "glorious victories of old"—they are beside the mark. I am only sure of one thing, and that is that Greece would be very ill-advised to tackle Turkey without assistance. It is one thing to wage war on a more or less unprepared enemy in company with powerful allies, but quite another to act alone.

I fear also that "Macedonicus" will not find many to sympathise with him in his emotion at the fall of the Greek Empire under Constantine. History shows, I think, pretty clearly that the Greek Empire practically fell to pieces owing to its inner corruption and lack of cohesion and warlike spirit. The religious tyranny displayed by its rulers to any but their own particular form of faith had its full share in the *débacle*, whereas the toleration shown by the Moslems won them numerous bloodless surrenders (I need only quote as an authority for this Arnold's "The Preaching of Islam.")

If, therefore, Greece pretends to be a suitable heir to the Throne of the Osmanlis she will have to first learn to be tolerant of other religions and nationalities than her own, and, so far, she does not seem to have succeeded very well in this. Your correspondent himself, in his very letter of praise of the Greeks, shows himself full of intolerance of one kind by his statement that "Turkey is doomed" and his "failing to see the necessity" of Turkey's continued existence. Is this the language of conciliation or true diplomacy with regard to a nation which has so lately suffered the severest of misfortunes and yet is now full of enthusiasm for progress and doing its best to take the place which belongs to it of right both historically and by virtue of the deep-seated religion of its population?

History will show that Turkey is very far indeed from being moribund, and I should think that the very endurance she has shown in her hours of trial would be sufficient proof of this. Now that the road of progress is once again open to her she ought to be able to count at least on benevolent neutrality in the people of other nations; but it would appear that nothing will satisfy the extremists amongst Greek sympathisers but the extinction, forcibly, if necessary, of the Turk. This is a pity, for the wish is doomed to disappointment. Turkey is very unlikely to be extinguished—certainly not by Greece.

Let me, in conclusion, ask your correspondent to try and draw a little more distinction between Turkey under the old régime (when the nation was oppressed under an absolute despotism that crushed all attempts at progress) and the new Turkey since the Constitution. Let me also ask him to cease taking a part in that unfair abuse and lack of fair play which have so distinguished the Balkan nations who, themselves, took in vain the name of Christianity by masking under a hypocritical pretence of religion their own sordid territorial ambitions, and who cannot even now accord fellow Christians that religious toleration as to which they presume to preach to Turkey.—Yours, etc.,

Constantinople, May 7, 1914. ARTHUR P. TULLY.

THE THRACIAN PERSECUTIONS.

To the Editor of THE NEAR EAST.

SIR,—Those of your readers who are interested in and in touch with recent events in the Balkans will have read the letter of "A Member of the Ottoman Association" of May 1 with somewhat mixed feelings. He states, referring to the Hon. Pember Reeves' letter, that "it is almost criminal to appeal to the sentiment of the public, etc."

I have before me Pierre Loti's "Turkey in Agony," which, I note, is published for the Ottoman Committee (I do not know if the Ottoman Association and Committee are synonymous, but no doubt their objects are identical). While it is impossible, from an artistic point of view, not to admire the sentiments and picturesque pen pictures of M. Pierre Loti, it is equally impossible not to realise that his writings express sentiment and sentimentality only. If anybody will trouble to study carefully the history of the Balkan Peninsula from early times up to the present day he will find that M. Pierre Loti tends to create a very inaccurate impression on people's minds. Your correspondent appears to object to others doing the very thing he is doing himself.

Again, your correspondent writes: "While scores of thousands of Moslems were murdered in cold blood *we were silent* . . . the last would have been heard of the lies disseminated by the so-called Christians of the Balkans." First, as regards figures: no doubt it has been difficult to compile accurately the total death-roll from all causes during the recent wars. Personally I think it would be a great exaggeration to speak of the published estimated figures as "scores of thousands." When one has the numbers of combatants of each nation who were killed or died deducted from the total I do not think it leaves many scores of thousands of murdered Moslems with which your correspondent may harrow our feelings.

Perhaps he can support his statement by actual figures, which would be very interesting.

As regards the words "we were silent," I do not know who the cryptic "we" may be, but I conclude it is the "Ottoman Association." If your correspondent will turn up the files of newspapers of the late summer and autumn of last year he will find that the pro-Turk Press was very busy then, and has been up to the present time, though, owing to the disgust of its readers at the revolting pictures published, there is a distinct cessation of atrocity-mongering by the Press concerned.

It will also be noted that, while the pro-Turk Press was vilifying the Bulgarians and other Christians, the Greeks joined in the chorus, and at the time seem to have been welcomed by the Pro-Turks.

Now, following on Balkan precedents, your correspondent seems to have fallen out with his former allies and abuses them.

To my mind all this mud-slinging by partisans, be they pro-Turks, pro-Greeks, or pro-Albanians, is much to be regretted. If these wish to make out their case and influence the thinking public they can hardly expect to do so by indulging in mutual recriminations. I heartily endorse what you write in your leading article, "Bulgaria After the War," concerning the excitability of the Press and the harm this does.

The Press has given English people an entirely erroneous impression of the inhabitants of the Balkan Peninsula, no matter what nation they may belong to. I must, of course, except our premier paper the *Times*.

All your correspondents, including myself, seem to have found excellent qualities amongst the various peoples of the Balkans. Surely it would be much better for every reason if partisans

Digitized by Google

would cease making capital out of sordid incidents, and work firmly and soberly for the welfare and peace of this fascinating and interesting corner of Europe.—I am, etc.,

G. W. C. HOLLIST, M.R.C.S., etc.

Riseley Lodge, Maidenhead,
May 9, 1914.

RUSSIAN SUNSHINE IN PERSIA.

To the Editor of THE NEAR EAST.

SIR,—W. B. Stainton, in a recent letter addressed to the Editor, says that I have "changed my earlier opinion of having Russian sunshine in Persia," and that I am "not enamoured any more with their sunshine," etc. As I do not happen to have his letter under my hand, I may not quote him quite correctly, but I think that is the sum of what he said. And he makes his "inference" from one of my letters, in which I said that "it is hard to think that Azerbaijan is still a part of Persia."

It is true that an "inference" was to be drawn from my letter, but Mr. Stainton has made the wrong inference.

There is nothing in my letter (published January 9) to show that I have changed my opinion of 1912, and that I do not care to have Russians in this province any more! The only "inference" that was to be drawn from my letter was that Azerbaijan is no more a province of the Shah's kingdom, and that its political affairs are managed not by the Regent's Cabinet, but by the autocratic will of the Russian Vice-Consul Vedinsky. The whole force, tone, and the argument of that letter was to prove that this province is a Persian province *in name only*, that Azerbaijan *is a Russian province*, with the Russian Consul as Governor-General and Shuja-ed-Dowleh (appointed by the Russians) as their Chief of Police. Ask any man in Tabriz—be he a Persian, Armenian, Kurd, Jew, or Russian—and he will at once tell you that Azerbaijan is a Russian province and is ruled by the Russians, although nominally governed by a Persian. In one of my letters I have tried to demonstrate in a more positive and convincing manner that this province, *in reality, is a Russian province*. The British Government and Englishmen living in London look upon Azerbaijan as Persia; my whole aim, intention, and desire was to prove that Azerbaijan *is not* a part of Persia, and never will be hereafter!

A Russian military officer of high rank, to my inquiry whether they intend to remove the Russian troops from this province soon, replied: "Never! We have not even thought of leaving Azerbaijan again." And they never will! M. Orloff, the new Russian Consul-General, has come here with the powers of a Viceroy, as was shown by the pomp of his reception. Shuja-ed-Dowleh is a puppet, a mere figurehead, who could be removed by the Russian Consul within fifteen minutes from the Governorship of this province, and a Russian appointed in his place in about as short a time! But Shuja-ed-Dowleh has made himself too useful to the Russians in the past; his services were too great and could not be bought with money. Hence he is given the opportunity to gather in some harvest for himself, although he is too old (seventy years) to enjoy them all for long. Nor is it likely that he will be removed from the Governorship, for he does as he is told, and never moves a step without first informing the Russian Consulate and getting their consent! He is just the sort of man that the Russians like to have—a man who will do what they tell him to do, no matter what happens; a man who has no conscience, no idea of good and bad, right or wrong, who will do simply what he is ordered to do, and will have no scruple in choosing his means for destroying an opponent!

I always read carefully the letters of Mr. Stainton, as he seems to know a good deal of Persia, Persian people, language, and Persian affairs, but he will pardon me for saying that I fail to see where he gets his "inference" from my letters that I have changed my earlier opinions.

Tabriz, April 1. MIRZA FIROOZ-KHAN.

"A WHIRL OF ADVENTURE."

To the Editor of THE NEAR EAST.

SIR,—A careful perusal of the letter signed "A Twenty-seven Years' Resident," which appeared in your issue of last week, leads me to the conviction that your correspondent honoured my review with but very scanty attention before he sat down to condemn it. He is at pains to convince me that the incidents related in the Williamsons' book might have occurred—I quite agree.

With regard to the Hadji disguise, it must be remembered that circumstances alter cases, and the circumstance of "Captain Fenton's" recognition by a lady at a distance can scarcely be compared with the other incident to which your correspondent refers.

It would be unfair to the authors of "It Happened in Egypt" to dilate further now upon the reasons which prompted me to deal with their book as I did. Opinions differ. But incidentally I did not, as their champion intimates, say that their work would interest only those unacquainted with Egypt.

YOUR REVIEWER.

THE PUBLISHER
would be obliged if Readers would inform him if they experience any difficulty in obtaining copies of the paper.

CURRENT COMMENTS.

It is known, on the authority of Servian newspapers, that the Macedo-Bulgarian recruits from New Servia are manifesting the greatest possible reluctance to become Servian soldiers, and boggle over the Oath of Allegiance to King Peter when paraded for the purpose of being sworn in. Drastic measures are reported to have been taken by the Servian authorities against the recalcitrant conscripts, but I cannot help thinking that some eager journalist has been drawing the long bow when the *Pester Lloyd*, as reported in the *Daily Mail*, announces that the Servians have shot an entire battalion of Bulgarian recruits from Ipek. My natural suspicions about this story find a certain amount of confirmation from the facts that no Macedo-Bulgarians are, or were, to be found in the neighbourhood of Ipek, and that as the district in question now forms part of Montenegro, its annual contingent of recruits would not find themselves required to serve in King Peter's army.

***

The ways of the Levant are sometimes remarkable, and just at this moment the Greeks are full of complaint about the edicts recently issued in Constantinople and Rhodes. In the former city little boys must now no longer run about wearing sailor caps decorated with the ever-victorious name of His Hellenic Majesty's ship "Averoff." It is considered that such a practice may have an adverse effect on the street collections for the Ottoman Navy, and in any case the name evokes unpleasant memories of the late war in the hearts of patriotic passers-by capable of reading Greek. In the City of the Knights, however, the Italians are showing themselves to be even more sensitive to historical allusions calculated to revive forgotten stories of disaster. Every schoolboy is supposed to know that Æneas fled from Troy and was accepted in the Court of Augustus as having been concerned with the origin of Rome; also that Æneas suffered defeat at the hands of the Argives and other Greeks on the plains of windy Nion. In consequence of this, I learn that Italian *amour propre* does not permit the exhibition in Rhodes of cinematograph films dealing with the fall of Troy, as tending to reflect discredit upon the prestige of the Army of Occupation and inspire the local Greek residents to acts of patriotic and anti-Italian impoliteness.

***

With regard to these reports of trouble with Bulgarian-speaking recruits in Servian Macedonia, I notice that the Bulgarian Press, which might reasonably be expected to be full of vociferous interest and comment, is soberly confining itself to the reproduction of those comments and criticisms which appear in Servian newspapers. Yet it is a matter which concerns Bulgaria nearly, and it is satisfactory to find that it is becoming possible once more for a Balkan people to suffer the slings and arrows of outrageous fortune with stoical silence.

***

Two weeks ago, in this column, I reported, on the strength of a correspondent in Janina, that the bottom had fallen out of the Epirote movement. This statement finds a certain amount of confirmation from the preparations which are being made to put forward M. Zographos as a Parliamentary candidate of an Athens constituency on his retirement from the Presidency of the Autonomous Government at Argyrokastro. He is to stand, apparently, at the forthcoming bye-election as an anti-Venizelos candidate, in place of the gentleman who has become Mayor of Athens.

***

The Swedish-officered Gendarmerie force of Persia is certainly attracting a great deal of attention just now, and opinions appear to be almost equally divided as to the merits or demerits of the force. Reading between the lines, I receive the impression that most of the "merit" is due to the Swedish officers, and most of the "demerit" to the material which they have had to work with. But while I am very ready indeed to recognise the value of the work done by the gallant Swedes, I cannot help wondering whether British officers, used to handling Orientals, might not have made a better job of the business. However, my object in mentioning the force was not to criticise it, but to pass on an item of information that has reached me from a correspondent in Persia. Writing in the middle of last month, the correspondent referred to states that the gendarmes recently despatched to Burujird appear to have inflicted severe losses upon the Lurs, who had been plundering and ravishing the districts south of the town. This was at the beginning of April. The gendarmes, however (the writer added), did not apparently consider it prudent to advance into the hills before they had brought the villages in their immediate neighbourhood under comparative control. This certainly seems a wise policy to pursue. The Gendarmerie has uphill work before it still, and it must be content to wait for results—and I wish it luck!

PERSONAL & SOCIAL

Her Majesty Queen Natalie of Servia celebrates her birthday to-day.

To-day is also the birthday of H.I.H. the Grand Duke Andrew Vladimirovitch of Russia, brother of Princess Nicholas of Greece.

To-morrow will be the birthday of Prince Paul, second son of Prince Mirko of Montenegro and his wife Princess Natalie, who was born a Constantinovitch, and is a near relative of the House of Obrenovitch, the former Royal Family of Servia.

Sunday is the birthday of Princess Arthur of Connaught, Duchess of Fife.

Tuesday is the birthday of Prince Carol of Albania, the only son of the Mpret and Mpreteresha. The little Prince will then be one year old.

Tuesday is also the birthday of Prince Roland Bonaparte, father of Princess George of Greece, and only surviving male member of the elder branch of his family.

Tuesday will be the anniversary of the wedding (1897) of Princess Anna, fourth daughter of the King of Montenegro, to Prince Francis Joseph of Battenberg, brother of the late Prince of Bulgaria, and uncle of the Queen of Spain and of Princess Andrew of Greece.

Thursday will be the birthday of her Highness the Mpreteresha of Albania.

The King of Roumania has conferred the Medal of Military Virtue on the Infante Alfonso d'Orleans of Spain.

H.R.H. the Princess Elizabeth of Roumania is expected shortly to visit her aunt the Infanta Beatrice d'Orleans of Spain in Madrid.

Prince George Constantinovitch of Russia, whose elder brother, Prince John, married Princess Helena of Servia, arrived in Constantinople on May 8.

The Sultan has accepted a copy of the poetical works of Faik Ali Bey, Mutessarif of Uskudar (Scutari-in-Asia), which were presented to his Imperial Majesty by H.I.H. Abdul Mejid Effendi, the brother of the Heir-Apparent.

Prince Mohammed Ali, brother of the Khedive of Egypt, arrived in Rome on Sunday to return the visit to Cairo last winter of the Duke of the Abruzzi. His Highness was accompanied by Khali Pasha, President of the Cairo Chamber of Commerce, and on Tuesday was received in audience by King Victor Emmanuel, who gave a State banquet in his honour.

The King of the Hellenes has conferred on Sir John Sandys, Public Orator in the University of Cambridge, the Insignia of Commander of the Royal Greek Order of the Redeemer.

The King of Montenegro has conferred the Grand Cross of the Order of Danilo on M. Alexander Marghiloman, formerly a Roumanian Cabinet Minister.

Lord Lamington has consented to be President of the Research Defence Society, in succession to the late Sir David Gill.

Following an old-established custom, a special mission, presided over by Talaat Bey, Turkish Minister of the Interior, proceeded last Friday on board the Imperial yacht "Ertogrul" from Constantinople to Livadia for the purpose of conveying the birthday greetings of the Sultan to the Emperor Nicholas.

Baron de Giers, the Russian Ambassador in Constantinople, left for Livadia last Saturday in order to be present at the reception of the special Ottoman Mission.

Our Bucharest correspondent writes under date May 10:—

On Monday last King Carol received in audience M. Simos, the proprietor of the well-known Greek journal *Patris*. This journalist has lived a long time in Roumania, and by means of his paper has contributed to establishing a better feeling between this country and Greece.

Russian papers announce that the Tsar is shortly to visit Kishinieff, and that on this occasion King Carol will journey to that town to meet his Imperial Majesty. Here nothing is known of any arrangement of the kind, and it is generally denied.

The Countess of Cromer and Sir Gerard and Lady Lowther attended the memorial service for the late Lady Alfred Paget, which was held, by the permission of the King, at the Chapel Royal, St. James's Palace, on Thursday of last week.

Lord and Lady Metcalfe and Sir Gerard and Lady Lowther were amongst the guests entertained at dinner by the German Ambassador and Princess Lichnowsky on last Friday evening at the Embassy, Carlton House Terrace.

Captain and Lady Joan Mulholland have arrived at 10, Westbourne Street, Hyde Park, for the season.

Mr. and Mrs. Percy Quilter have returned to 13, Grosvenor Street from Egypt. Mrs. Quilter is taking out her sister, Miss Pamela Tudway, who is staying with them for the season.

His Highness Tewfik Pasha, the Turkish Ambassador, was one of the guests at the State banquet given on Saturday by their Majesties the King and Queen in honour of the King and Queen of Denmark.

The Turkish Ambassador, the Hellenic Minister, the Roumanian Minister, and the Servian Minister accepted invitations to be present at the ceremony, which was performed by His Majesty the King on Thursday last week, of opening the King Edward the Seventh's Galleries, the imposing addition to the British Museum buildings which has recently been completed.

The Roumanian Minister and Mme. Mishu were amongst the guests of Mr. William Gillett at dinner at the Bachelors' Club on Wednesday last week.

H.E. Sir Reginald Wingate Pasha, Governor-General of the Sudan, is leaving Khartoum at the end of the month for Cairo, where he will remain for a few days before proceeding to Karlsbad for the "cure."

Our Cairo correspondent writes:—In the course of his annual report, Sir Malcolm McIlwraith, the Judicial Adviser, pays a well-merited tribute to the late Fathy Pasha Zaghlul, who was Under-Secretary of State for Justice, and whose "premature death at a comparatively early age is a real loss to his country, and especially to the Ministry of Justice." He also places on record his appreciation of the excellent work done in the School of Law by Mr. W. H. Hill, who after seven years as Principal has been promoted to the important post of Chief Inspector of Native Tribunals, and expresses his confidence in his successor, Mr. Sheldon Amos, Judge in the Native Court of Appeal, who is a distinguished jurist, and has been a frequent lecturer and examiner in the School of Law in the past.

H.E. Mansour Shakour Pasha has arrived in Brussels from Cairo.

M. Venizelos, the Hellenic Prime Minister, arrived in Athens from Salonika on last Monday.

M. Agamemnon Schliemann, son of the famous professor and archæologist, and Deputy for a Thessalian constituency, has been appointed Hellenic Minister in Washington, where the Legation has been vacant for some time.

Several other diplomatic appointments of considerable importance are also announced from Athens. M. J. Dragoumis, the Hellenic Chargé d'Affaires in St. Petersburg, has been promoted Minister in that capital; M. N. G. Theotoky, Chargé d'Affaires in Berlin, has also been promoted Minister; and M. Panteli Psycha goes to Bucharest as Hellenic Minister, vice M. Papadiamantopoulos, whose appointment dated from the end of 1912.

The following members of the Hellenic Diplomatic Service have been gazetted:—M. Spiro Levidis, as Councillor of Legation in Paris; M. L. Kaftanjoglou, in a similar capacity to Buenos Ayres; and M. P. Skassis, to Rio. It is expected that the latter will shortly be sent as Minister to The Hague.

M. A. Kapsambeli has been gazetted Hellenic Consul-General at Odessa, and M. J. Karatza in Berne.

WHERE TO STAY.

LAUSANNE-OUCHY (Switzerland).

SAVOY HOTEL.
Near the lake, with splendid park.

CECIL HOTEL.
In the town and 5 minutes from the station.

Two First-class Family Hotels.
High-class Cuisine. French Chef.
J. SUMSER, Manager-Proprietor.

Sofia (Bulgaria).
GRAND HOTEL BULGARIE
(opposite the Royal Palace).
First-class Hotel. Entirely renovated and beautifully situated in the centre of the city, near Post Office, Theatre, Museums, Banks, etc. Electric Light. Central heating. Baths. Garage. Telephone. Garden. French Restaurant. Good wines. Café. Foreign newspapers. Most frequented by English and American Visitors. Interpreter meets all trains. Rooms from 4 frs.

Cyprus.
THE CYPRUS HOTEL CO.
Open all the Year round—
LIMASSOL (Olympus Hotel).
FAMAGUSTA (Savoy Hotel).

M. Taigny, Councillor of Embassy, has been appointed to represent France on the International Financial Commission in Athens.

Turkhan Pasha, the Albanian Premier and Minister of Foreign Affairs, left Durazzo on Wednesday morning for Rome, where he will discuss with the Marquis di San Giuliano, the Italian Minister for Foreign Affairs, the present grave condition of Albania.

M. Nedcoff, Bulgarian Consul-General at Adrianople, has been appointed chairman of the Mixed Commission which is supervising the State-aided emigration and exchange of properties between Bulgarian and Ottoman Thrace.

M. Theodore Pavloff, who has hitherto been Consul at Valona, has been appointed Chargé d'Affaires of the newly constituted Bulgarian Legation at Durazzo.

Rifaat Bey, ex-Minister of Finance, has been appointed President of the Turkish Senate.

His Highness Ghazi Ahmed Mukhtar Pasha has left Constantinople for Berlin.

Sureya Bey Vlora, brother of his Highness Ferid Pasha Vlora, formerly Ottoman Grand Vizier, has been appointed to represent the Mpret of Albania in Vienna.

Batzaria Effendi, who is a Kutzo-Vlach, and was formerly Minister of Works, is expected to accompany Talaat Bey on his forthcoming visit to Roumania.

M. Philippe Nogga, who was at one time expected to be Albanian Minister in Vienna, has been appointed Minister of Finance in Turkhan Pasha's Cabinet.

Sir Francis Younghusband was the guest of honour at a luncheon given last Friday in New York by the Pilgrims of the United States.

Mr. Algernon Blackwood, who spent the greater part of the winter in Egypt, is now in Switzerland, and is expected to return to London shortly.

Mr. W. J. Locke has returned to Europe from Egypt.

Mr. William le Queux has lately returned from the Nile, where he had gone to obtain local colour for a novel which has just been published.

Mr. Arthur T. McKillop has been appointed Inspector-General of Agriculture in Egypt.

Captain Orr, Chief Secretary in Cyprus, will be taking early leave.

It is probable that Major Bolton, Commissioner of Limassol, will again act as Chief Secretary during Captain Orr's absence.

Mr. W. Bevan has been appointed Director of Agriculture, Cyprus.

Mr. J. B. Wodehouse, who served for some years in the Cyprus Police, and was at one time Private Secretary and A.D.C. to the late High Commissioner of Cyprus, will be married on June 10 to Miss Gladys Tyrrell.

The engagement of Eileen, only daughter of Colonel S. Grant, late R.E., of Brinnington, Minehead, to Captain John Kennedy, Argyll and Sutherland Highlanders and Egyptian Army, is cancelled.

It was reported at the annual meeting of the Royal Asiatic Society on Tuesday that the society had become entitled to a legacy left on trust by the late Major-General Furlong for the promotion of Oriental studies.

The annual meeting of the Persia Society will be held on May 20 at 22, Albemarle Street, at 4.45 p.m. The Right Hon. Lord Lamington, G.C.I.E., G.C.M.G., will preside. At 5 p.m. Professor E. G. Browne will lecture on "The Religious Influence of Persia."

At the International Congress of Tropical Agriculture, to be held from June 23 to 30, several papers will be read on the problems of Egyptian agriculture by the following specialists in the subject:—Three papers by Mr. G. C. Dudgeon, F.E.S., Consulting Agriculturist to the Egyptian Ministry of Agriculture: (1) "Problems in Connection with Cotton Cultivation in Egypt"; (2) "Technical Education in Tropical Agriculture," and (3) "The Organisation of Agricultural Departments in Relation to Research Work"; two papers by M. Victor Mosseri, member of the Egyptian Institute: (1) "Cotton in Relation to Alkali in Egypt" and (2) "Various Manures Applied to Cotton in Egypt"; two papers by Mr. B. F. E. Keeling, Director of Physical Services Survey Department, Gizeh: (1) "Water Supply in Egypt" and (2) "A Fertility Map of the Egyptian Delta"; and a paper by Dr. L. H. Gough, F.E.S., Entomologist to the Egyptian Ministry of Agriculture, on "Problems Connected with the Pink Boll Worm."

We learn that when Professor Thoumaian, B.D., the new Ottoman Deputy, and only Christian Minister in the Ottoman Parliament, reached Constantinople the other day, he was received with acclamations by some 150 well-wishers (both Christian and Mohammedan), who insisted there and then on his addressing them a speech, both in Armenian and in Turkish. Both the Christians and the Mohammedans received him with tears, kissing his hands in Oriental fashion, and escorted him in triumph. He is to remain in the East little more only than the few months during which the Parliament sits; and his family continues to live at Chigwell.

In connection with the appeal for £3,000 from the people of England to help the refugees in Albania, Mr. E. Telford Erickson, the head of the American Mission at Elbasan, spoke at the Memorial Hall last Friday evening. He had already, he said, raised £20,000 in the United States for the purpose, but £3,000 more was needed to complete the full programme. Miss Edith Durham, who also spoke, said there were many thousands of refugees in Albania who had literally nothing but the rags in which they stood.

A Reuter's message from Khartoum, dated May 12, reports that Mr. H. Morgan, a civil judge in the Sudan Government service, has been found shot, mortally wounded, at Port Sudan. No details have yet been received of the affair, which is believed to have been the result of an accident. Mr. Morgan has been a Judge in the Sudan since 1904. He was the fifth son of Mr. Walter Morgan, formerly Chief Justice of the Madras Presidency, and was educated at Harrow and at Pembroke College, Oxford. He was called to the Bar at the Middle Temple in 1887, and joined the Chester and South Wales Circuit.

We regret to record the death of M. Ch. Gennadieff, Private Secretary to Tsar Ferdinand, and brother of the former Bulgarian Minister of Foreign Affairs, who is now one of the defendants in the State Trial in Sofia.

The funeral of Mr. R. W. Tidrick, of the American Mission at Dolief Hill, Upper Nile Province, who was badly mauled by a lion, and whose death from his injuries we recorded in THE NEAR EAST of April 24, took place on April 21 at the residence of the American Mission, Khartoum.

We regret to report the death in Paris of M. Charles Phérékyde, formerly First President of the High Court in Bucharest. M. Phérékyde was brother of the President of the Roumanian Chamber of Deputies, and brother-in-law of M. Alexander Marghiloman.

DOMESTIC ANNOUNCEMENTS.

MARRIAGE.

FREELOVE — SMITH. — At the English Church, Port Sudan, on May 6, Captain Ernest Freelove, Harbour Master, to Violet Louise, daughter of Mr. and Mrs. N. Smith, of South Norwood, and formerly of Alexandria.

WHERE TO STAY.

Cairo's Hotels de Luxe.

SHEPHEARD'S HOTEL.
Open all the year round.

SEMIRAMIS HOTEL.
Splendid position on the East Bank of the Nile.

GHEZIREH PALACE.
Formerly the Palace of the late Khedive Ismail.

CHURCH AND STATE IN SOUTHERN ALBANIA.

The custom of the Turk in considering that a man's nationality is adequately represented by his religious confession has given rise to no little confusion in the West as to the precise meaning of names and epithets when applied to Christians in the Balkans. Thus a century ago all Christians in the Ottoman dominions in Europe, which then reached from Matapan to the Bukovina, were considered to be "Greeks" in that they were the spiritual subjects of the Œcumenical Patriarchate. Political changes have robbed the Phanar of jurisdiction over all that the Porte has lost in Roumelia, "the country of the Roumis"—that is to say, the "Romans," Ῥωμαῖοι, as the Greeks of the Empire styled themselves. In all the kingdoms which have grown up, when once the shadow of the Horse-Tails had been removed, the Church, while remaining Orthodox, has in becoming national lost its "Greek" character, and is no longer an engine for the hellenization of unwilling Slavonic or other populations—for a Servian or Roumanian Bishop the Œcumenical Patriarch is merely an exalted brother for whom tradition may demand respect; but the Patriarch is not a Pope, his spiritual jurisdiction stops short at the Ottoman frontier, and no priest or prelate outside the Sultan's dominions, except possibly on Mount Athos, can be expected to own any supremacy in an ecclesiastical official of the Porte.

It is this very fact that political separation from Turkey in Europe involves emancipation from the Phanar which is so important a factor in the settlement of the Albanian difficulty at the present juncture. One of the main arguments of the Athens Press, and of those journals in the West which dance to Athenian piping or play Athenian tunes, has been that the frontier drawn by the Powers for Southern Albania has given a great number of Greeks to an alien State, and subjected them to the domination of a hostile race of an inferior civilisation. On these grounds Hellenes have been recruited at large over the whole Greek-speaking world to assist in the rejection of the Albanian yoke by the Epirotes, and on these grounds much sympathy is accorded to the movement in the West. The interesting letter of our Correspondent at Koritza, however, throws a rather new light upon these arguments. He tells us that the Orthodox inhabitants of Koritza, folk who have always figured as "Greeks" in the Turkish census and in the statistics of Phil-Hellenes, have begun to use the Albanian liturgy, a proceeding forbidden under what he describes as "the religious tyranny of the Greeks," and have abolished the old diocesan council, as its members "devoted themselves to the propaganda of political Hellenism instead of attending to the religious duties for which they had been elected." Now Koritza has always been represented as the stronghold *par excellence* of Hellenism in Southern Albania. It is surely a very curious commentary on the value of the arguments adduced in support of the Epirote movement that no sooner is the Hellenic Army withdrawn than the local "Greeks" use their first moments of "abandonment to barbarous Albania" to give up the liturgical use of the Greek language, to chase the Hellenizing priests from their places of power, and to offer armed resistance to those misguided Hellenes who sought to "liberate" them with the assistance of troops and machine-guns. More than that, these very "Greeks," for whose schools and churches Albania is to be compelled to give guarantees satisfactory to the Autonomous Government of Epirus, have informed their new Sovereign that they are quite capable of looking after their own interests and are opposed to outside meddling "in matters relating to the moral and political independence of our nation as a whole and of our Orthodox Church in particular."

We have consistently argued against any armed intervention on the part of the Powers, or any group of them, in Southern Albania. Such intervention would have been tantamount to an official acceptance of the Greek arguments at their face value. The object lesson of Koritza shows that these must be to a certain extent discounted, and that many people whose Hellenic character is being protected by *hierolochites*, recruited largely by imported or professional patriots, will turn out to be Albanians once the political and ecclesiastical pressure to which they are at present subjected be removed. We are quite ready to admit that there are in Epirus a large number of Hellenes, people who wish to pray and speak and think in Greek and as Greeks, but we cannot disguise our opinion that a great many of the inhabitants, apart from Moslems, will eagerly support an Albanian Orthodox Church of their own, just as Servians and Bulgarians, on gaining political liberty from the Porte, have rejected the domination of the Phanar, which has ever enjoyed the reputation of very naturally using its whole influence on behalf of Hellenism.

The Epirote difficulty tends to shrink to its proper proportions. A good deal of its menacing appearance has been due to skilful inflation, which is now shown to be largely artificial. It has very reasonably made a strong appeal to the patriotic instincts of the average Greek, who, like most people, seldom subjects statements in support of a cause he has at heart to a searching criticism. It has, moreover, been seized upon by the political adversaries of M. Venizelos, and used as a weapon against that great statesman both in the Chamber and the Press. Democracies are very easy to ride if the rider gives his mount free rein, but they tend to become restive if submitted even to the most wholesome restraint. The Greek Prime Minister, who fully realises that the almost undreamed of gains which the Treaties of London and Bucharest have secured to Greece have excited the envy of some of her neighbours, just as they are based on the humiliation and disappointment of others, is wise enough to restrain the appetite of acquisition or retention of territory. He knows that Roumania is the friend of Greece only so far as the maintenance of the existing *status quo* is concerned, and that impatience has been on several occasions manifested in Bucharest at what is there considered to be the unconscionable behaviour of the Greeks. It must be remembered that Roumania is much interested in the Albanian settlement, and that if a Greco-Roumanian *entente* is still in existence there is a close family relationship between the Courts of Bucharest and Durazzo. In any case, neither the Powers, nor Roumania, nor, we imagine, M. Venizelos wish to see a new Crete established in South Albania, with an Autonomous Chamber periodically to declare its annexation to Greece and eager deputies to clamour for admission to the Hellenic Parliament at awkward political moments. To such a solution of the Albanian difficulty a wholesale emigration of the discontented minority would be far preferable, such a sorting of discordant ethnological factors as is in progress already in Hellenic and Servian Macedonia and in Ottoman Thrace. Such an operation in Albania, if properly controlled and State-aided, could be divested of that cruelty and hardship which undoubtedly accompanies it in those areas, and would most assuredly contribute to the establishment and maintenance of a lasting peace.

SERVIAN ASPIRATIONS.

INTERVIEW WITH M. PASHITCH.

(From Our Special Correspondent.)

Belgrade, May 10.

M. Pashitch, Prime Minister and Foreign Secretary of Servia, granted me a short but interesting interview yesterday. Several important points were brought into relief in the course of our conversation.

The Orient Railways.

I drew the Prime Minister's attention to a semi-official *communiqué* which had appeared in the *Neue Freie Presse* on Thursday from Buda-pest, where meetings have been held of the Austrian Committee, composed of Government officials and representatives of the banks holding the shares in the railway. (The *communiqué* stated that the bankers were dissatisfied with the policy adopted by the Government, and that the latter were now inclined to abandon their conditional adhesion to the French proposal of the internationalisation of the line, and to revert to the old *convention à quatre.*) M. Pashitch was of opinion that the negotiations would still continue for some weeks, but the outcome would be that Servia would acquire the exclusive right to exploit the line—in other words, that she would buy the shares. Reciprocal treatment by Servia would give Austria certain advantages in connection with the linking up of the Bosnian and Servian lines. Furthermore, the satisfactory settlement of the Orient Railway question might possibly lead up to the revision of the Austro-Servian commercial treaty so ardently advocated by Austrian exporters and importers, and equally firmly opposed by Servia, who sees no reason to modify any of her treaties at the present moment.

The foregoing gives an authoritative view of the trend of the negotiations. Incidentally, I may mention here that I likewise spoke to the Minister of Public Works, the most bitter opponent of the French proposal, who has even gone so far as to state that he would immediately resign if the line were internationalized. In his opinion, Austria is willing to sell the shares held by her, the sole question being the price. The Austrian delegate left Belgrade a few days ago with Servia's lowest terms, and now the compromise has to be found between the Austrian demands and Servian proposals. If necessary, the Minister suggested, the price could be settled at Paris at the Conference, or at the Hague. This reference to the Paris Conference is not devoid of interest; it serves to show, moreover, the desire on the part of Servia to have the matter settled once and for all, and as soon as possible. From the beginning Austria's attitude has been illogical. Prior to the war, the Servian section of the Trans-Macedonian line was Servian, regulated by the *convention à quatre;* now that Macedonia is Servian as far as Gievgeli, why not adopt the same *convention (à cinq)* without procrastination, instead of trying to heighten the tension between Austria and Servia? It serves no good purpose, and in the long run Austria-Hungary is bound to climb down.

Albania.

M. Pashitch is positive on the question of Albania. When the formation of the new State was first mooted, he published a statement in *The Times.* He has not a word to retract from what he then said, and not only that, but anyone reading that statement to-day will see that what he prophesied has come true. There is and can be no optimism concerning Albania in Servian official circles. "Albania may yet be a source of grave danger to Europe." From what I have seen and heard here, and from reading even such pro-Albanian papers as the Austrian Press, where now and again in non-inspired articles the truth is allowed to leak out, I cannot but draw attention to the growing feeling of uneasiness throughout the Balkans as regards the future of bolstered-up Albania.

Regarding Servia's access to the Adriatic—that is to say, the final trans-Albanian section of the Adriatic railway and Servia's port on the sea, M. Pashitch considers that nothing will be done for the next two or three years. Servia has enough to do at present to organise and develop her old and her new territories. Salonika will be her only port for years to come, at least until the Albanian problem has been finally settled. In the meantime peace is essential, and consequently the creation of a firm, free, and self-restrained State, ensuring peace on Servia's western frontier, is an immediate necessity.

Salonika.

The agreement between Greece and Servia concerning the latter's free zone at Salonika will be definitely signed within the next few days, I was told by the Prime Minister, the principal questions having been already settled. The only details available for publication so far are: (1) The Servian zone will amply meet Servia's requirements, the Greek Government having fully realised that the future of the port depends almost exclusively on trade with the neighbouring kingdom; (2) there will be loading and unloading facilities, and ocean-going steamers will be able to discharge and take cargo within a stone's throw of the Servian warehouses.

New Loan.

According to the Prime Minister, no negotiations of any sort or description have taken place concerning the much-talked-of new loan. This autumn the Skuptshina will be asked to empower the Government to negotiate a loan for the purpose of covering railway construction expenses and the purchase of war material; but it is not anticipated that any new loan will be floated in 1914. So far no money market has been officially approached.

National Politics.

Questioned regarding national politics, M. Pashitch—a venerable statesman whose worst enemies recognize his skill in manipulating difficult political situations—scoffed at the rumours which have been even more persistent than usual concerning an impending change of Ministry. The great question of the moment is military rather than administrative (whether generals commanding should have precedence over prefects of the various districts, etc.). The question of the Constitution for New Servia has, for the moment, fallen in the background, but if M. Pashitch, as is to be presumed, is still in office in March next year, the Grand National Assembly will be convoked to decide the constitutional procedure to be followed.

Capitulations.

The last question I put to M. Pashitch concerned the capitulations of the New Territories. *De facto*, of course, the Capitulations were abolished the moment the Servian Government apprised the Powers of the incorporation of the New Territories in the kingdom of Servia; but *de jure* they still exist, because the Powers have not officially recognized their abolition, in spite of the fact that at the ambassadors' meeting in London the change in the map of the Balkans was naturally the basis of all negotiations. In order to avoid in future any misunderstandings such as that which took place a few weeks ago between our consul and the Servian officials in Monastir, common steps will eventually be taken, said M. Pashitch, by Servia, Bulgaria, and Greece together to have the abolition of the Capitulations effectively recognized by the Powers.

THE PRESS ON THE NEAR EAST.

M. Venizelos.

In a leading article under the heading "Princes and Statesmen," which appeared in the *Times* for May 11, the attempt that is now being made to discredit M. Venizelos and to reverse his wise and moderate policy receives outspoken censure. We quote the following passage:—

Nobody who knows the virulence of Greek party passion and the avidity of Greek office-seekers will feel surprise at this campaign. It resembles those which were the staple of Greek political life until the Cretan lawyer saved the Monarchy from revolution, reformed the Constitution, and breathed a new spirit into the army and the nation four short years ago. The great events of those years thrust the old personal and party rivalries into the background. Now they are being revived and directed against the man whose authority is an obstacle fatal to the reign of petty intrigue and of personal corruption. We shall not, however, easily believe that manœuvres of this sort can cause the nation or the Crown to forget the services which M. Venizelos has done them. Their conduct will be watched with interest, for it will afford the outside world a test of the political instinct and capacity of both. It is in the choice of their servants that Kings are best able to show their own judgment as statesmen. What would Prussia have been without Bismarck or "Sardinia" without Cavour? Yet neither of these makers of united nations was altogether acceptable to the Monarch whom he led on to the desired goal. William I. and Victor Emmanuel had many differences with their great Ministers. They had, however, the largeness of mind ot recognise the immeasurable superiority of their servants to themselves, and the self-control to sacrifice to the policy of those servants many personal ideas and feelings of their own. Nations as well as Kings must learn to judge statesmen by their careers as a whole, and to give their confidence freely to those who have proved their worth, even when their action runs counter to the popular will.

The Baghdad Railway.

An instalment of a very important article by A. Géraud appears in the current issue of the *Nineteenth Century*, its title being "A New German Empire: The Story of the Baghdad Railway." The history of that much-discussed project is traced in some detail. In the following passage the writer deplores the probable results:—

Brought face to face with the powerful instrument of economic and political hegemony which Germany has created for herself, the other Powers must either fall back upon "compensations" and accept such safeguards as they afford, or abandon the heritage of a long past. Hence we have the consolidation of zones of economic interest—zones in which the respective Powers will feel, so to speak, on their own ground—a consolidation which is now in progress. This is the first stage of dismemberment. This dismemberment, I greatly fear, will not serve the real interests of the Western Powers. France and England, ruling great empires outside Europe, but preserving in Europe only the moderate territorial size of old kingdoms, have everything to lose by the formation of a greater Europe, which cannot but enlarge the already formidable territorial domain of the neighbouring empires. In that Europe of to-morrow they will be relatively smaller.

That the German design was allowed to proceed without effective opposition is not at all creditable to the foresight of English, French, and Russian statesmen. The writer asks:—

Why is it that England, France, and Russia, whose historical interests cannot fail to be seriously injured by the German enterprise, have allowed it to become an accomplished fact? Because of their fear of taking the necessary initiative, because of their cowardly confidence in the unexpected, in the *deus ex machina*, who would suddenly arise and endow the directors of the Triple Entente with that sureness of vision and that firmness of action in which they have been completely lacking for the last ten years. They began by allowing the Germans, although they were the latest arrivals in the East, to obtain the concession. Let us not speak of Russia, whose *mot d'ordre* until the Potsdam meeting had been "Not a single railway in Asia. Nature herself gives us a monopoly of economic and political actions which means of transport, opening the way to rival civilisations, would destroy. Let the immense Russian glacier, borne onwards by its own weight, sweep over the plains of Asia Minor." But England! and France! Before Germany became so formidable at Constantinople both of them had an opportunity of forging an iron link between the Mediterranean and the Persian Gulf.

Albania's Difficulties.

An article in the *Outlook* (May 9) on "The Position and Difficulties of Prince William of Albania," by H. Charles Woods, gives a good account of the problem with which the Mpret is faced. With regard to the question of Southern Albania, the writer's opinion is as follows:—

Whilst, as I have already said, I am in favour of a strong and determined Royal policy, and whilst to lead a victorious army to the conquest of Southern Albania would certainly greatly enhance the prestige of the Prince amongst all sections of his people, to risk almost certain defeat would not only be to jeopardise the whole future of the country, but also to place its ruler more firmly than ever in the hands of a Minister whose influence is even now all-powerful. Consequently, liable to serious objections as they may be, the only safe courses open to Prince William are again to send emissaries to enter into negotiations with the insurrectionaries, or to go himself, at the head of a peaceful expedition, to the very heart of the disputed zone with the object of taking over districts which have been allotted to him by Europe and of settling with the inhabitants themselves the nature of the *régimé* destined for the moment at least to secure the integrity of Albania.

"Zionism and Christian Missions."

Dr. E. W. G. Masterman contributes an interesting article under the above title to *The East and the West* for April. The writer is of opinion that:—

As the hope of political co-operation with the Young Turks seems to be, at present at any rate, impracticable, the immediate and certainly the wisest plan is that of peaceful penetration. That this must necessarily be a slow movement is a great thing in its favour. No greater disaster to the movement could occur than an enormous influx of immigrants at once. The land of Palestine is not one which can support greatly increased numbers before there has been a vast expenditure of capital on restoration after the devastations of centuries.

Further, he warns those enthusiasts who are in too great a hurry:—

The keen Zionist of Europe all too often forgets also that Palestine is a very poor land, with no mineral wealth, a very scanty water supply, and nothing but agricultural products to sustain its population. For nearly half the year there is no rainfall at all, and almost all over the land all verdure disappears at the onset of early summer.

A more important question even is, What will be the effect of "this semi-tropical climate upon the stamina of the Jews who come from colder lands to settle in Palestine? Will it be possible for them to be exposed from generation to generation to the influence of this climate without the whole race gradually degenerating down to the level of the indigenous inhabitants?" Dr. Masterman continues:—

Unfortunately, the idea is too common that Zionism has for its purpose the affording of a refuge for the persecuted and destitute. Prosperous and wealthy Jews in Europe and America have no wish to leave their comfortable surroundings to live in the Turkish Empire in comparative exile and discomfort. They are more inclined to subscribe to send there those who are unsuccessful elsewhere. If they visit the land at all it is but as passing tourists. The hopes of Zionism can never be realised if this attitude is to continue. The best kind of colonisation for the land is the settlement of the Jew of moderate means, who will develop, by a wise expenditure of capital, his own estate, and employ, as far as possible, other Jews as labourers on the land.

Albanians and Serbs.

An article on "Fresh Dangers in the Balkans," written from Durazzo by Dr. E. J. Dillon to the *Daily Telegraph*, contains the following gloomy view of the outlook in the Balkans. Referring "to the revolting cruelties to which the Albanian Moslems are being subjected by the Serbs," Dr. Dillon says:—

The impression created throughout the country by this inhuman conduct is painful, and the consequences threaten to become serious. This is all the more to be regretted in that the Albanians, far from bearing a grudge against their neighbours, were animated by amicable feelings towards them, and were ready to cultivate relations of good fellowship. This spirit is now being rapidly dispelled by the barbarous treatment which they are now receiving, and which may ultimately prove as disastrous to its authors as to its victims.

The danger is, in the writer's opinion, that the whole of the peninsula will be again involved in war:—

I am now convinced that the danger in the Balkans which the London Conference was believed to have disposed of for ever is as intense to-day as it was five years ago, and that the hopes heretofore cherished of permanent peace there are delusive. Every factor of the situation is being successively driven out of the course appointed by European diplomacy, and the Great Powers look on inactive. At present these unexpected changes in the programme are confined to Albania, but their disastrous consequences will necessarily make themselves felt throughout the entire peninsula. The Bulgarians are complaining as loudly as the Moslems, and powerful under-currents are already running which may sweep away the work so laboriously achieved by the statesmen of the Great Powers.

NOTES AND NEWS.

Devonshire Square,
London, E.C.

If reports be true, it would seem that Busreh, which has so long been conspicuous for its backward state, may at last, shortly, be modernised. The new Vali is a man of ideas, and since his arrival there have been many rumours of concessions being granted for telephones, tramways, electric lighting, and so forth; of the provision of a water supply, the making of roads, and the cleansing of the Ashar Creek. Of course, all these excellent projects may end in talk, as has happened before in Turkey—and other countries of the Near East. But if they mature it is to be hoped that British firms will succeed in securing some of the "plums." Happily, there is good reason for such hope. At all events, some British firms have actually been approached with a request to give an estimate for some of the works referred to; and though several of them do not seem to have evinced any great enthusiasm in the matter, one, at least, has given it serious consideration. Unfortunately, however, certain straightforward and reasonable inquiries regarding the position of the Busreh municipality which the firm in question felt it wise to make do not appear to have been deemed worthy of a reply by the Vali, or his underlings, and so far nothing definite has been done.

***

This, no doubt, will lead cynics to conclude that the Vali's good resolutions are more likely to provide paving material for a certain other place, which shall be nameless, than for the thoroughfares of Busreh. But it would be unwise to jump to such a conclusion just yet. The Turkish officials probably do mean business at last, but they cannot be expected to throw off the traditions of centuries in a day; and Busreh is such a difficult vilayet to administer that the Vali must be excused if he finds his time too fully occupied to attend to correspondence promptly. One thing is certain, if he really means business he could find no better firm to carry out his improvements than the one referred to, which is in every way able to make a good job of whatever they may undertake.

***

Meantime, it is interesting to note that the Germans, who are clearly out to make their mark (or their marks!) in that part of the world, appear to have acquired the knack of carrying *their* negotiations through expeditiously, and getting to work at once. They have, for instance, just connected their own and Messrs. Lynch's depots at Ma'agil by telephone with their respective offices at Busreh, and it is generally expected that they will obtain a concession to continue the line to Abu l' Khassib and Mohammerah. They have also completed a fine brick quay at Busreh, and have got a dredger on the spot, which having been used in the construction of the said quay is now doubtless ready for any further service it may be required for—such, for example, as the dredging of the Ashar Creek!

***

All this shows, of course, commendable foresight and activity on the part of the Germans. But it would be interesting to know how much of this activity is due to private enterprise, and how much to Government assistance. They would doubtless deny that the Fatherland helped in any way save by entirely correct consular intervention; but people on the spot know that the help goes a good deal further than that. Any project that will further German prestige in that part of the world may absolutely rely on most efficient "backing" of every kind that the German Government can give. For the latter is very wide awake to the solid advantages to be gained by judicious "advertising."

***

Just the same tale may be told of the Germans in Persia, where, both in the north and in the south, they are spreading their nets wide—and fast. Their efforts to secure a monopoly of the traffic on the Karun are particularly worthy of note, since they affect our own interests closely. It would not be at all surprising to learn that the British steamers on that river are being run at a heavy loss, owing to the German competition, and more especially to the *unfair character of that competition*. For it is an open secret that the Germans' success has been achieved, not as ours has been by steady work, but by the employment of certain methods which are usually regarded as being more Oriental than Western. And though they may believe in adopting the customs of the country, such methods will hardly commend themselves to the British mind.

***

The *Quarterly Journal* of the British Chamber of Commerce of Smyrna contains a report of the annual general meeting of members of the Chamber, which was held in February. The president, Mr. R. W. Whittall, in his annual address, reviewed the work of the past year, touching on a few of the more important activities of the Chamber. It appears that a satisfactory agreement has been made with regard to the question of goods shipped from Europe to Smyrna for Turkish ports on the neighbouring coast, with the mention of "en transit," on the bill of lading and manifest. The efforts to suppress fraudulent traders and to foster the interests of British trade, it is satisfactory to note, have been continued with marked success. In concluding his address, Mr. Whittall announced his intention of finally resigning the post of president of the Chamber, and made an appeal to the younger generation to lend a willing hand in helping to keep up the prestige of British trade. Mr. Sydney La Fontaine was selected to fill Mr. Whitall's place, and though the services of the latter will certainly be missed, there is no doubt that the new president will prove a worthy successor.

The statistics published on p. 52 showing the position of Great Britain and her rivals in the carrying trade of Egypt and through the Suez Canal are melancholy reading for any man who is interested in the commercial supremacy of the British flag. The more so is this the case as Germany stands as a rule head and shoulders above our other rivals, and her upward progress is alarmingly rapid. These figures refer to 1913. In view of the increasing activity of Germany in the Gulf trade and in Persia, this upward tendency will probably be more marked than ever by next year.

***

The trade statistics for Egyptian ports for 1913 show, in the cases of Greece and Bulgaria, the effect of the war upon their commerce. For example, the number of vessels flying the Hellenic flag decreased by over 250, and the tonnage of cargo discharged from Greek bottoms fell by nearly 20,000, while 3,000 fewer tons of cargo were shipped, and the number of passengers transported declined by nearly 20,000. Bulgarian trade with Egypt, which in 1912 was very small, in 1913 was to all intents and purposes non-existent, there being only five ships to enter Egyptian ports under Bulgarian colours, with 2,469 tons of cargo to discharge and four passengers to land. Now, however, that Bulgaria has two Ægean ports, and is busily engaged in entering into the heritage of the quondam Turkish tobacco trade to Alexandria, a considerable difference in her favour may confidently be expected in the figures for the present year.

***

H.M. Commissioners of Customs and Excise secured a conviction last week against a merchant who had been engaged in smuggling hashish into Egypt. The drug had been most ingeniously concealed in slots contrived in barrels used for packing crockery. The Egyptian authorities confiscated the whole consignment of 267 lbs. of hashish and fined the importer £1,215. He was prosecuted over here on a charge of making a false declaration for export and was fined £100. It is believed that the defendant, a Greek, was a member of the syndicate which is known to have been introducing this prohibited drug into Egypt for some time past, and the Government is to be congratulated on having dealt the traffic a heavy blow.

***

The question of land tenure in the new Roumanian Dobruja, which has been profoundly affected by recent legislation in Bucharest, is again brought into prominence by the proclamation which has just been published. This document, while assuring the new subjects of King Carol that no confiscation of land is intended, warns them that they will receive one month's notice of the arrival of the Royal Commissioners, who are to hold inquisition into the titles to land and demand the production of land-tax receipts for the past twenty-seven years. It is possible that this may mean that the Cabinet of Bucharest is desirous to act as fairly as may be according to the letter of the new law, but, on the other hand, in many quarters fears are expressed that this is a new move on the part of the Government which will, in effect, reduce the period of twelve months, at present allowed for the production of the necessary documents, to one of a poor thirty days.

Egyptian Commerce and the Suez Canal.

The Egyptian Government has published the commercial and tonnage statistics for the various Egyptian ports during 1913, and also the figures for the transit trade through the Suez Canal. We append tables showing the state of trade, and also a series of calculations indicating the various increases and decreases :—

TABLE A.—FIGURES FOR ALL EGYPTIAN PORTS, 1913.

Flag.	No. of Steamers.		Tons of Cargo.		No. of Passengers.	
	Entered.	Cleared.	Discharged.	Shipped.	Landed.	Embarked.
British	1,638	1,619	3,435,147	711,159	68,140	58,798
Austro-Hungarian	354	355	271,471	136,992	21,196	21,737
French	175	169	95,393	53,687	14,473	16,415
German	224	221	387,886	212,305	11,577	10,451
Italian	272	275	111,604	69,797	13,037	10,961
Russian	262	261	209,976	79,968	14,470	14,919
Grand Total, including all other flags	3,334	3,309	5,074,836	1,412,893	161,864	150,095

COMPARISON OF THE FIGURES IN TABLE A WITH THE CORRESPONDING FIGURES FOR 1912 INCREASE + OR DECREASE —.

Flag.	No. of Steamers.		Tons of Cargo.		No. of Passengers.	
	Entered.	Cleared.	Discharged.	Shipped.	Landed.	Embarked.
British	+ 171	+ 142	+ 330,200	— 193,366	+ 15,997	+ 6,826
Austro-Hungarian	+ 16	+ 15	+ 23,457	— 53,184	— 475	— 1,316
French	— 5	+ 10	+ 15,822	— 748	— 1,081	+ 4,165
German	+ 60	+ 55	+ 200,920	+ 16,562	+ 1,474	+ 997
Italian	+ 86	+ 96	+ 28,317	+ 1,198	+ 6,195	+ 1,511
Russian	+ 22	+ 10	+ 13,875	+ 31,440	+ 930	— 508
Grand total, including all other flags	+ 120	+ 85	+ 475,692	— 212,519	+ 13,398	— 6

The six flags making the most use of the Suez Canal, and the respective tonnage which they cover (calculated on the Canal system) are enumerated below in order of numerical importance :—

TABLE B.

Flag.	Number of Vessels.	Canal Tonnage.	Number of Passengers Carried.
British	2,961	12,172,817	139,512
German	778	3,364,585	31,791
Dutch	342	1,290,736	18,362
French	256	931,128	36,923
Austro-Hungarian.	246	849,168	7,491
Russian	110	341,941	12,098
Grand total including all other flags	5,085	20,214,856	289,631

INCREASE OR DECREASE FROM CORRESPONDING FIGURES FOR 1912.

Flag.	Number of Vessels.	Canal. Tonnage.	Number of Pasengers Carried.
British	— 387	— 963,486	— 6,763
German	+ 82	+ 334,774	+ 507
Dutch	+ 1	+ 52,799	+ 2,781
French	+ 35	+ 129,385	+ 8,177
Austro-Hungarian	— 1	+ 35,530	+ 1,764
Russian	— 16	— 24,746	— 5,954
Grand total including all other flags	— 287	— 320,570	+29,020

These figures are very far from satisactory so far as British trade is concerned. It is true that we can point to slight increases in the number of British ships entering Egyptian ports, or in the number of tons of cargo discharged or passengers landed and embarked. Our increases are, however, but a small percentage of our former figures, but the Germans, who show a substantial increase in cargo shipped against the deplorable fall in the British figures in that column, reckon their rises by 20 and 31 and even over 100 per cent. The rise in Russian tonnage may be accounted for partially by the opening or closing of the Dardanelles during the Balkan War. It is, however, disquieting to find that the Germans are pressing so hard in the Egyptian carrying trade, and almost alarming to consider the danger to the time-honoured British commercial supremacy through the Suez Canal, which is manifested by an incrase of 82 ships, 334,774 canal tons, and 507 passengers under the German flag, in a year which shows a decrease of 387 ships, 963,486 canal tons, and 6,763 passengers under the British flag.

A RUSSIAN TRADE PAPER.

By "Mirza Firooz Khan."

TABRIZ, April 1.

Azerbaijansky Listok is the name of the first Russian weekly paper in Tabriz. It is a commercial journal, and each week 2,000 copies will be printed and sent to the leading Persian, Russian, and Armenian merchants in this province. There is no subscription; the paper will be sent to the mercantile firms free; and the expense of publishing, etc., is borne by the Imperial Russian Consulate. Besides this purely Russian weekly, the Russian Consulate assists also a native Armenian, who edits and publishes an Armenian weekly, *Mitk*, and a Persian weekly, *Khorshid* (Sun). After the fifth copy of its issue the *Khorshid's* publication was forbidden by Shuja-ed-Dowleh on account of a leading article and its bold tone. The price of one copy of *Khorshid* was four shahis, but after its suppression a copy could not be had for five krans (100 shahis). Needless to say, the *Khorshid* will reappear shortly, as it is under the lofty protection of the Russian Consul, and Shuja-ed-Dowleh cannot afford to kick against the pricks.

Azerbaijansky Listok is going to be a middleman between the Caucasian mercantile firms and the commercial houses of this province. Up to now the "dallols," or middlemen, have done the work of introducing Caucasian goods to Persian merchants, after quoting a much higher price for the Russian goods than they were really asked by the Russian firm, the motive being, of course, to get a larger commission. Hereafter, however, the talkative "dallol" will be thrown into the background, and his function will be performed by this Russian weekly, which promises to do it faithfully and loyally. The two chief aims of *Azerbaijansky Listok* will be :—(1) To introduce the names of Russian (especially Caucasian) firms to Persian merchants, quoting the exact wholesale factory prices, and (2) to find customers for those firms among the Persian and Armenian merchants. *Azerbaijansky Listok* says that hereafter the Caucasian goods will cost much less in Persia than formerly, because now neither can the Persian merchants be cheated by the "dallol," nor will the cost of exportation from Caucasia be so high, as the Julfa-Tabriz railroad will soon be ready, and the camel—like the "dallol"—also thrown into the shade.

The *Morning Post's* Rome correspondent states that Khalil Pasha, President of the Cairo Chamber of Commerce, who is now in Rome, with Prince Mohammed Ali, will open negotiations with the object of strengthening the commercial relations between Italy and Egypt.

Constantinople Business Letter

(From Our Own Trade Correspondent.)

Constantinople, May 9.

Trade Marks in Turkey—A Glaring Injustice.

I learn of a very important trade mark action, in regard to which the assistance of the British Chamber of Commerce has been asked, and in which I believe both the Embassy and the Foreign Office are moving.

The firm of Robert McClure and Sons, Limited, of Stockport, have for nearly fifty years been shipping to a British firm, Jacob Anzarut, of Beyrout, cotton goods bearing their very characteristic trade mark, which consists of a square design, at the top of which is the head of some creature, with rays round it, the middle of the design being a large mill with smoking chimneys, while on the three sides are inscriptions in English, Turkish, Armenian, Hebrew, Chinese, and Japanese. This trade mark, for some unaccountable reason, they have omitted to register in Turkey. True, after knowing all the facts, one may ask whether the registration of the same—or, for that matter, of any mark in Turkey—would have served any purpose. However, they are technically in the wrong for not having taken the elementary precaution of registering their trade mark, and this omission is likely to cost them a pretty penny. One of their local buyers had the brilliant idea of registering a mark in every way similar to that of McClure's. The head is that of a different species of animal; the mill is there with its chimneys; and there are inscriptions all round in the several languages even to what appears to be Chinese and Japanese.

In view of recent interpretations of the Trade Mark Law by the Cour de Cassation, the very foundation of the law is shattered, in that it has been held that foreign firms, to be entitled to protection, must have branch establishments in the Empire. This decision, taken in conjunction with the above-mentioned Chinese and Japanese inscriptions in the mark which has been registered by the imitator, and which is further stamped on the goods imported after their arrival in Turkey, has an important bearing on the case in point, and gives away the imitator's *bonâ fides* at once. Messrs. McClure rather tardily decided to register their trade mark in Turkey, which was accepted, as would have been the registration of a half a dozen other marks equally alike, as no examination is made as to the previous registration of any mark or design which is submitted.

The acme of impudence is reached, however, when the imitator commences an action in the Correctional Court at Beyrout, claiming heavy damages against Messrs. McClure for having imitated his registered mark, and for stamping the same on goods of inferior quality to those of the righteous (?) and indignant native. He claims that the two marks are so similar as to be difficult for even the "connaisseur" to distinguish between them, let alone the poor deluded peasant who is being deceived.

An interesting coincidence is that the present Minister of Commerce, to whose attention the matter has been brought, is a Syrian himself, and has admitted to interested parties that he has known McClure's trade mark for fifty years or more.

A draft law has been prepared by the Ministry of Commerce, containing certain articles which would prevent abuses like the present glaring instance; but, as in the case of the decision concerning the legal status of the cheque referred to by "Commentator" in your issue of April 24—which has since been put right by the promulgation of a "Loi provisoire"—some immediate steps are necessary to rehabilitate the Trade Mark Law as concerning firms doing business in Turkey. As at present applied the law would seem to have entirely the opposite effect to what should be expected of it, viz., the protection of industrial propriety.

Mesopotamia Oil Fields.

I learn that the Government has been considering a scheme, reported favourably upon by a Commission appointed to study it, by which it was proposed to split up the oil region into small lots of 400 hectares, and to put each lot up separately to public adjudication. The Grand Vizier was, however, averse from this proposal; and it has been decided to grant concessions to the British and German groups for the oilfields already discovered. A map of the oil springs known to exist has been made by the Department of Mines and handed to both the British and German Ambassadors. At the same time, I understand that these known sources are clearly defined, and other sources, which may eventually be discovered, will be treated according to law and put up to adjudication.

Treasury Returns.

In a communication of the Ministry of Finance, the total receipts of the Treasury during the financial year ended February (Old Style) are reported as £T29,927,000, as compared with £T29,199,000 during the previous year, thus showing an apparent increase of £T728,000. As certain receipts figure in the last fiscal year, but do not appear in the previous year, and vice versâ, the Ministry establishes the following comparison. Deduction is made of the subscriptions to the War Fund and the Fleet during the year ended 1914, £T465,800, and in 1913 £T679,000, the war taxes during five months of the year ended 1914, £T698,200, and the Egypt and Cyprus tributes during the same year, £T874,700. From the previous fiscal year ended February, 1913, is deducted the total receipts of the European provinces until the declaration of war, £T1,471,400, also certain collections by the Public Debt not yet appearing in the receipts for the year just ended, £T55,800, and the receipts from certain districts during the previous year, but not yet reported in 1914, £T59,000. After these deductions are made the increase is £T954,500, as compared with the previous year. The receipts from the European provinces having been deducted, as well as the various contributions by tax or voluntary subscription to the Ministries of War and Marine, this evident increase represents the normal progress of the returns from the Asiatic provinces of Turkey.

THE FINANCES OF THE LEBANON.

Shoucair Pasha's Report.—II.

(By Our Cairo Correspondent.)

The encroachment of the Porte on the rights of the Lebanon does not end at the appropriation of the Custom dues and the refusal to make good the Budgetary deficit, to which reference was made in the preceding article. There are several other glaring abuses that require rectification.

In the first place, when the Organic Law was signed, the limits of the "Mountain" were clearly determined. Its area was about 4,000 square kilometres, consisting for the most part of rocky country, and including a part of land to the north called the "Moaissaret," on which an annual land-tax of £T590 was levied. For seven years the Lebanon Government collected this revenue; then suddenly the Tripoli Government, acting under orders from Constantinople, intervened, and it has collected the tax ever since that date. The amount illegally received by the Tripoli authorities comes to £T25,700—almost sufficient to wipe out the Budgetary deficit. It is perhaps too much to expect the Porte to restitute the sum thus seized by it; but it should certainly be prevailed upon to return the area in question to the Lebanon Government, and to cease collecting the taxes imposed thereon.

Further, the Sublime Porte, or, more correctly speaking, the Ottoman Public Debt Commission, illegally derives considerable profit from the salt, tobacco, tombac, and liquors monopolies. In all the concessions it has been clearly stipulated that they do not extend to privileged provinces such as the Lebanon and Samos. Yet no attention has been paid to this, and until the Lebanese authorities took up a very strong stand on the point a few years ago, not one farthing of the profit reached them. An allowance of 10 per cent. up to £T20,000, and of 14 per cent. beyond that sum on the sale of tobacco in the Lebanon, and a bonus of P.T.2 per kilogramme of tombac up to 40,000 kilogrammes, and of P.T.5 beyond that figure were obtained with much difficulty—liquids still pay a high tax to the Ottoman Public Debt, and no participation in the profits of the salt monopoly has been acquired yet—and as a result the Lebanon to-day derives some small benefit from these monopolies. If only it could obtain its proper share in the tobacco and tombac concessions it could increase its revenues by almost £T20,000, whilst if, as is suggested, it could import salt directly a further £T15,000 to £T20,000 per annum would accrue to it.

With regard to the question of salt, the present retail price is too high; direct importation would effect a substantial reduction, and yet give the Lebanon Treasury a very good revenue. To-day the Lebanese pay sixty paras per oke for salt that costs the Public Debt Commission about ten paras per oke. Shoucair Pasha is against the Lebanon Government making a monopoly of the importation of salt, and suggests that its importation should be free, subject to the payment of a duty of twenty paras per oke. The Government, on an estimated consumption in the province of four million okes, would thus obtain a revenue of £T20,000, and the consumers would receive their salt through healthy competition at a cheaper retail price, since it could be sold at forty paras per oke and still leave a profit of about ten paras per oke to the importers.

Moreover, not only does the Lebanon not participate in the Customs receipts and in the monopoly profits, but it actually has to maintain at its own expense between Beyrout and Saida a coastguard service to prevent smuggling. The utter injustice of this arrangement, which strikes one at once, becomes even more glaring when it is explained that the smuggling would benefit the Lebanese, whereas its prevention only puts more money into the coffers of the Porte and of the Ottoman Public Debt Commission. As Shoucair Pasha very rightly says, if the Porte declines to allow the Lebanon to exploit its own fixed rights, it is only logical that the Imperial Treasury should pay the cost of upkeep of the service, the sole object of which is the protection of its interests.

ADALIA RAILWAY.

With reference to the Adalia Railway, an interesting local view is expressed in the *Quarterly Journal* of the British Chamber of Commerce of Smyrna. That journal says, with regard to this question:—"The matter, however, is so important to British interests that every effort should be made by our statesmen to insist on the rights of the Aidin Railway Company being fully recognised, for, once the Italians gain a footing in the Adalia district and are allowed to build a railway to any point approaching the Aidin line, there is absolutely no doubt that the result will be inimical to the interests of the British Company. It may be that the district through which the proposed Italian line will pass will not produce enough to make the line pay for many years, but the Italians are not demanding a foothold in the Adalia district for philanthropic reasons, and the one concession will ultimately lead to another. It is evident that any and every concession granted to Italian companies in this district will be only to the detriment of the British Company, and it is for this reason that we trust the British Government will show a determined front and support the one important British Railway Company in Turkey."

Near East Markets.

SPECIAL REPORTS.

(From Our Own Correspondents.)

Braila. May 9.

Favourable reports regarding autumn and spring sowings arrive from all parts of the country, with the exception of the following districts, where rain is very urgently needed: Braila, Rimic-Sarat (southern part), Buzen, and Yalomika (eastern part). In the Braila and Buzen districts, unless it rains within the next four or five days, the crops will be very seriously damaged.

Cyprus. May. 1

The weather keeps remarkably cool for the time of year, and the very general rains of last week have done much good. The crop prospects are quite satisfactory.

Sofia. May 9.

According to the reports of the Customs, yesterday's average prices of grain throughout the Kingdom per 100 kilograms were:—Wheat, 18.20-18.70 frs.; maize, 11.60 frs.; barley, 13.30 frs.; beans, 20 frs.

Busreh. April 18.

The prospects for the date crop are good. It is impossible as yet to form any sort of comparative estimate, but all conditions have been, and still are, entirely favourable, and on all sides one hears optimistic predictions. Growers concur in saying that Hallawees will be more plentiful than last year, while Siars will be scarcer.

There is a very large grain crop this year.

The following are extracts from the weekly bulletins received at the London offices of the Imperial Ottoman Bank from its correspondents in the Near East:—

Beyrout. May 2.

After the Easter holidays the situation of the market has left much to be desired. Stagnation has set in, and the mercantile community complain of the prevailing inactivity here.

The amount of business done, up till lately satisfactory, has begun to be seriously restricted. Wholesale merchants dare not risk large orders, preferring to draw upon the stocks still remaining at their various depôts.

The plentiful rains during the last week have been beneficial to the crops, which had already begun to suffer from the drought of the previous period. The grain trade has remained practically stationary during the past week.

Busreh. April 16.

The following are extracts from the monthly report for March:—

The market has continued stagnant, although the prospect is not unfavourable. This calm is the result of the prolonged stringency of money, which has restricted the circulation of imported products. But in view of the approach of the harvests, which begin in May, the advances which merchants will have to make to the cultivators will by degrees put money into circulation, and will improve trade. At any rate, a general recovery is expected in the month of July, when important cargoes of cereals for Europe will be paid for.

About 2,000 tons of cereals have recently been bought here and will be despatched to Jeddah at the end of this month. In consequence, the available stocks on the market are reduced to some 3,000 or 4,000 tons.

Shipments of butter have already been sent to ports on the Persian Gulf. Attempts are now being made to send consignments to Constantinople and other Ottoman ports by the Russian steamer, which will leave our town on May 10.

Angora. April 29.

The following are extracts from the monthly report for March:—

The prospect for the new crops continues favourable, and, except in the event of unfortunate circumstances arising, our crop this year ought to be much superior to that of last year. All depends on the weather next month.

The mortality among sheep being almost nil, this year's production of mohair ought also to be superior to last year's. It is unfortunate that the complete calm which continues to reign on the markets at Constantinople and Bradford prevents our realising on our earlier deliveries.

There is very little doing in the export of cereals. In spite of the insignificance of last year's harvest, the export of cereals during March would have been greater had it not been for the fear of the villagers lest their animals should be seized by the Military authorities, who were requisitioning all the means of transport.

Very little business has been done in mohair. Stocks are small and transactions at Bradford and Stamboul insignificant.

ALBERT SINGER
KHARTOUM SUDAN

EXPORT OF GUM ARABIC AND SUDAN PRODUCE.

Agency for firms desirous of introducing their brands of goods into the Sudan.

Established 1900.

EGYPTIAN ONION CROP.

(From Our Own Correspondent.)

Alexandria, May 8.

As a result of the set-back to the onion crop in Spain, prices of Egyptian onions have reached an extraordinary figure. It is stated that an acre of land under onions has yielded £E150. In fact, many agriculturists have actually made a fortune out of their onions this year. Exporters, too, have done remarkably well, for prices have done nothing but rise since the beginning of the season. Egypt will soon have exhausted its supply of onions, and in a month or so will have to import from Asia Minor and Syria to supply its own requirements.

SUDAN GUM.

Mr. Albert Singer, of Khartoum, reports from Khartoum, under date of April 30:—

Gum Arabic, Kordofan Hashab.—The arrivals during the month have been a good average till within a few days, when they decreased owing to unfavourable weather conditions in the Kordofan collecting districts. There has been throughout a strong and active demand, and occasionally the supplies could not meet the inrush of orders. Prices rose in sympathy with the increased export and local speculative demand, and prices are, at the moment, considerably higher than buyers abroad are willing to offer. It is generally expected that supplies will come in largely during May and June next. In anticipation thereof foreign buyers are holding off for lower quotations, but there is no data at hand to make sure of either heavy arrivals or lower prices. In the meantime the impression is gaining ground that the Sudan market will continue firm with, perhaps, even a slight advancing tendency on present rates for both spot and futures.

The quality of the gum is very satisfactory.

OPIUM MARKET.

Messrs. Barker Brothers, Smyrna, report as follows for the week ending May 1:—We have to report again a fairly active market, with sales amounting to sixty-nine cases at last week's prices. The holders firmly maintain the position, and to-day no eligible 11 per cent. material can be procured unless the buyer is prepared to pay 15s. per lb. Mixed qualities with a guarantee of 11 per cent. some shippers may be willing to accept business at 14s. 9d. and even 14s. 6d., but we strongly advise buyers to pay the full price of 15s., so as to ensure getting uniform selected quality and with the best chance of finding the shipment ¼ or ½ per cent. stronger in morphia. The arrivals are 4,569 cases, against 2,374 at same date last year.

PRODUCE REPORT.

Sugar. London, May 14.

The market has been steady in the beginning of this week, but gradually became quiet and easier. In beet sugar only moderate business was done, chiefly in new crop, at 9s. 3½d. for May, 9s. 7d. for August, and 9s. 6¾d. October-December, f.o.b. Hamburg. The Austria-Hungary production (which is of more interest to the Near Eastern markets) for April was 14,800 tons, against 15,300 tons last year; export, 59,500 tons, against 88,400 tons; and stock, 659,200 tons, against 672,900 tons last year. Refined sugar (English) has been steady but quiet, with quotations for Tate's cubes No. 1 at 18s. prompt and 18s. 1½d. for June-July. Granulated, fine 16s. 6d., and standard 16s. Foreign also has been quiet; first marks granulated were sold from 11s. 3¾d. to 11s. 7½d., f.o.b. Hamburg. Say's cubes, prompt, 15s. 1½d., and loaves 14s. 3d., f.o.b. Paris. German and Austrian cubes, prompt, were sold at 13s. 3¾d. to 13s. 6d., f.o.b. Hamburg.

Coffee.

There was only a moderate activity in the market during the week, and a rather slow demand at auctions. Prices, however, have been steady. Costa Rica, low, mid to mid, sold at 69s. to 78s., and bold, 77s. to 86s.; East India, low, mid to good mid, 69s. to 76s., and bold, 66s. to 88s. The speculative market has been dull and easier, September being sold at 43s., July 42s., and May 41s. 3d.

Seeds.

Business is rather quiet, with values in some instances easier. Linseed has been firmer during the week, but is now closing with a quieter tone, London-Calcutta spot being quoted 48s.; April-May sold at 48s. 3d., May-June 48s. 9d., June-July 49s. 3d., July-August 50s. Rapeseed is steady but inactive. Brown Cawnpore May-June quoted 50s. 6d., and Yellow Guzerat 54s. 6d. Cottonseed is very quiet, London-Egyptian quoted: May £7 17s. 6d., June £7 18s. 9d., and November-January £8 8s. 9d. per ton.

Oils.

Linseed oil has had a better demand, spot pipes landed selling 24s. 9d. and barrels 25s. Rapeseed oil is quiet; ordinary brown naked quoted 30s. 9d. and refined casks 33s. Cotton oil is much firmer; crude spot quoted 29s. 6d., refined sweet 32s. 9d. to 34s. 6d. as to make, and ordinary pale 29s. 9d. Petroleum is easier; Roumanian and Russian quoted 7¾d. per gallon, American 7¾d., and water white 8¾d. per gallon.

Oilcakes, etc.

Only very moderate business is passing, more or less of a retail nature in linseed cake, with fine, seedy Calcutta firm at £7 10s. to £7 15s. for May-June shipment, whilst best London-made cakes are offered at £7 10s. to £7 15s., and best quality Russian at £7 7s. 6d. to £7 10s. A somewhat better inquiry is noticeable for cotton cakes, and as there are no fresh supplies of Egyptian due until about three weeks' time, the market is rather firmer in both positions. Egyptian on the quay are firm at £4 11s. 3d. to £4 12s. 6d., with May-June at £4 7s. 6d. to £4 8s. 9d. ex ship, and English makes at £4 17s. 6d. Bombay are offered £3 15s. Decorticated cotton cakes and meal are meeting with a good demand, and owing to the stock being small an advance is anticipated. Business was done this week at £7 12s. 6d. to £7 15s. per ton ex quay. Maize Germ meal: With no fresh arrivals of white African, only English makes are obtainable on rather easier terms of £5 10s. to £5 12s. 6d.

Locust beans continue scarce and dearer, whole being offered at £6 5s. 9d. and kibbled £6 15s.

Corn, etc.

Wheat: The cargo market ruled firm during the week, but with a quieter demand; South Russian on sample April (old style), at 34s. 9d. to 35s. 6d.; and white Kurrachee, choice May, at 38s. 3d. Barley is firmly held at unchanged prices, but quieter. South Russian due out May 15 or May-June offered at 21s. 6d. Maize is also firmly held at late rates, but the demand is quieter. Oats are firm and unaltered.

EGYPTIAN COTTON MARKET.

(From Our Own Correspondent.)

Alexandria, May 8.

Prices are firmer, and the opinion generally held is that they will remain steady for some time. The picking is progressing favourably, and the increased area of cultivation will act as a powerful check upon any fresh set-back.

Speculative transactions are not numerous, and transactions generally are short-term.

Exporters are buying hardly any of the new crop, and with such a large stock at Alexandria spinners have no need to make purchases far ahead.

The slight margin between American and Egyptian cotton is due to the fact that the present stock at Alexandria consists almost entirely of lower grade cotton. Good quality cotton is always sought after and fetches superior prices.

The future of the market will depend upon the American market. The increased acreage, the existence of a large stock, and the falling off in the industrial demand tend for the moment to lower prices. Cotton-seed continues to decline, owing to the absence of demand and the depreciation of oil. The attendance at the market is slight.

Messrs. Davies, Benachi and Co., of Liverpool, have received the following telegram from Alexandria, dated Wednesday :—

Market steady. May, 17⅜, November, 18½. Exchange, three months' date, 96⅛.

To May 1.—"Venetian." May 2.—"Corsican Prince," Manchester. May 4.—"Caria." May 12.—"Esneh."

LIVERPOOL REPORT.

Messrs. Reynolds and Gibson telegraph :—At the commencement of the week there was a good demand, and quite a fair business was put through in Egyptian spot, but latterly the inquiry fell away, and sales during the last three days have been small. There has been no outstanding feature in the demand, except that perhaps Abassi and Voltos—the selection of which is practically exhausted—have been further sought after. Good staple Nubari and Assili have also been in request, but Sakellerides, Joannovich, and Upper Egyptian qualities have been rather neglected. Quotations for Brown and Upper are raised 15 points, Nubari good below raised 15 points, fine and extra 10 points. Joannovich is raised 10 points, with the exception of extra fine, which is reduced 5 points. Sakellerides is advanced 10 points, except extra fine, which is unchanged. Estimated sales, 2,100 bales.

MANCHESTER MARKET.

(From Our Own Correspondent.)

Manchester, May 13.

A stronger tone has prevailed in the market during the past week, there being an upward tendency in raw cotton rates. Business in yarn and cloth has been difficult to arrange, as most buyers have not been willing to follow the higher prices. The general demand in the market continues quieter, and operators do not seem inclined to purchase with any freedom until more is known as to raw material supplies during the coming season. Advices today relating to the American crop are not very favourable, the weather conditions being rather adverse. It is realised throughout the trade that a bountiful yield is required if prices are to be kept on a reasonable level. Much uncertainty exists as to the position of the growth in Egypt, and there is every appearance of the crop being later than last year. The production in yarn and cloth continues on a large scale, and if producers are not to lose ground, it is necessary for fair buying to take place from week to week. In piece goods for Egypt the inquiry has been of a limited nature, and there are complaints as to the poor offers which are coming through from the other side. The markets of the Levant have not given much support, but occasional lots have been put through for Turkey. India is providing fewer orders than a few weeks ago, but operations have not been quite at a standstill, most of the transactions being for Calcutta. Advices from China do not improve, and the outlook is altogether too uncertain for an active trade to be done. There has been very little practicable demand for the South American outlets. Rather worse reports are now coming through from the home trade, and the climatic conditions are not at all favourable to a large turnover in light fancy materials. The position of manufacturers remains irregular, there being considerable variation in order lists. American yarns for home use are dearer to buy than a week ago, but consumers have refused to follow at the higher rates, and business to a large extent has been blocked. Some ground has been lost by producers of the lower numbers in both twist and weft. There has not been much activity in shipping counts, although there is business to be done on certain terms for India. Extra hard descriptions for the near Eastern outlets are quieter. Bolton spinnings have been well held, but a rather restricted trade has been reported.

PLUSH IN PERSIA.

The estimated number of pieces (860) of plush imported into Ispahan (Persia) during the year 1912-13 was about the average of recent years, but the value was considerably higher. It is stated that fully three-quarters of the goods imported were of the higher qualities, which are much more in demand than the lower ones. The proportion of British to Continental (German Austro-Hungarian, French, and Italian), viz., about three-fourths, was considerably higher than in recent years. Prices ranged from 4½ to 11 krans (1s. 7½d. to 4s.) for plush of 21 inches width, and 5 to 13 krans (2s. to 4s. 8½d.) for that of 31 to 32 inches width, according to quality.

OLIVE OIL.

According to the *Quarterly Journal* of the British Chamber of Commerce of Smyrna the general impression is that, taking the whole of the producing districts of the Levant, including Crete, the present is a very large crop, but hardly as large as that of two years ago, say, by about 10 per cent. less. A report from Aivali stated that both quality and quantity were exceptionally good.

SUDAN MARKET REPORT.

The following are extracts from the monthly report for March of the Central Economic Board of the Sudan Government :—

According to a Kordofan Province report for February, large quantities of gum had come into the El Obeid market during the month; in fact, a record for February, 23,680 kantars of 120 rottles having been sold in the market as against 19,887 in February last year, and 11,119 in February, 1912. The report for March states that gum had been coming in well during the month. The total sales for the month, 39,932 kantars, were the second biggest on record, being exceeded only by those of the month of May, 1913, when 46,868 kantars came into El Obeid market. The price during the month had remained very steady.

According to a Sennar Province report for February, there was a good demand for gum, and prices rose very high after the natives held their stocks. From Kassala Province it was reported for February that 3,369 kantars Hashab and 688 kantars Talh were exported from Gedaref during the month, and 3,707 kantars Hashab and 617 kantars Talh imported.

According to a Red Sea Province report for February, the amount of cotton coming into the market at Tokar was considerably less than in the corresponding month of last year, but this was chiefly due to the lateness of the crop. The crop on the whole was healthy, though "Asal" had appeared in small quantities.

A Kordofan Province report for February states that there were considerable quantities of grain in the market at El Obeid throughout the month. At the beginning of February, when people were bringing in more than usual in order to purchase whatever they wanted for the Mulid El Nebi, the price had fallen, but since then it had been rising steadily. For March it was reported that there had been plenty of grain in this market during the month, though the merchants stated that very little more would come in afterwards, as nearly all the Nuba crops had then been bought up. The prices during the month varied.

From Khartoum Province it was reported that during February the experiment of importing and using dura from India to meet local scarcity was found to be successful. The quality was good, that of the first consignment particularly so. According to a Sennar Province report for February, a little more grain than in previous months was put on the markets. This grain was chiefly that of merchants who had purchased for Omdurman and other northern markets, but sold on news of grain arrivals from India. In the markets at Sennar, Wad El Haddad, etc., the dura supply was more than sufficient for the demands of the labourers on the Canal and other works. The natives' complaint of a serious scarcity is groundless, their real complaint being high prices, about which they complain bitterly.

During March the rafting of timber had begun on the Government forest reserve at Nabra Island, White Nile Province, where some 50,000 cubic metres of excellent timber were awaiting disposal.

A Sennar Province report for February stated that at the soap factory at Singa, as a consequence of the very high price of simsil oil, experiments in extracting oil from the "Lalob" (Heglig fruit—*Balenites d'egyptiaca*) were being made during the month.

A report for February stated that Berber Province was again free of cattle disease, and reports from other centres were satisfactory.

Engineering Notes.

Athens Water Supply.

The Bill authorising the Government to proceed with the scheme of bringing the waters of Lake Stymphalis into Athens, frequently mentioned in these columns, is one of the first to be laid before the Chamber of Deputies in Athens. All information and the necessary plans to be used during the discussion are ready, and the Minister of the Interior telegraphed last week to the Government engineer at Corinth to proceed to the lake and measure the quantity of water available at this time of the year. As we mentioned before, an Anglo-Greek group of financiers and engineers is interested in this scheme, for which it submitted proposals to the Government two years ago, with most elaborate survey and plans carried out and drawn up by the late engineer, Mr. Bailey-Denton, which are amongst others considered the best.

Prospecting in Northern Persia.

According to a note received from Elizabetpol, says the *Financier*, a Russo-Persian Mining Company is sending delegates into Northern Persia in order to investigate the land there and report on its value in respect to copper and argentiferous lead mines at Karadag, and also on the best spot on which to erect a properly equipped factory in the valley of the Arax, and further, to investigate the deposits of copper ores in the neighbouring district of Zangerursky. The Russian mining people doubtless hope to be able to turn to account their proximity to Northern Persia and easy approach thereto either by the Caspian Sea through the port of Enzeli, or by the railways that they have constructed on their side of the frontier, which they hope soon to extend far into Persia, or again by the paved roads which they have already constructed in that country for the more efficient transaction of the commerce that is carried on between them.

Steam Boiler Explosions.

Accidents in factories or on board steamboats from boiler explosions are not unusual in the Near East; and this may be attributed, more or less, to an existing risky habit of buying second-hand boilers, discarded, perhaps, from another factory or boat, and of employing unskilled firemen to attend them. Owing to the scarcity of skilled mechanics, these men, who are, as a rule, ignorant, and fit only for stokers, pose as "engineers," and are often entrusted by owners with their property for the sake of economy! Unfortunately, in most places in the Near East there is no official inspection of steam boilers and machinery, and the competency of a man who takes charge as an "engineer" or fireman of a steamboat, a tug, or a factory is very seldom questioned. Hence the frequency of accidents, often attended by loss of life. A case of this kind happened quite recently through the explosion of a boiler in a mill, the engineer and his assistant being killed and the machinery wrecked. It was proved by an examination afterwards that the cause of explosion was over-heating through grease. In the Near East the cost of fuel is an item of great consideration to steam users, for coal, especially in remote districts, is dear, and hence all kinds of feed-water-heaters and other devices for such purpose are used. But very few know that unless these devices are properly and carefully used they are neither economical nor safe.

Some Useful Hints.

As a rule, the exhaust steam is used for heating the feed-water, and when exhaust steam is passed into the feed-water to heat it, or the oily water of condensation from a condensing engine is used as feed-water, grease will be present in the boiler, and as it becomes concentrated on the surface of the flues or tubes, it will not only reduce the efficiency of the boiler, but be a positive source of danger, since it may lead to serious overheating and the subsequent collapse of furnace crowns or tubes. A film of grease one-hundredth of an inch thick offers resistance to the passage of heat equal to a steel plate 10 inches thick. In other words, grease offers a thousand times the resistance of steel to the passage of heat. If, therefore, it were only realised that the apparently harmless film of oil offered as much resistance to the passage of heat as a thick deposit of hard scale, more care would be taken to eliminate it. One of the principal methods now in use for the removal of grease is the filtration of feed-water and the separation of grease from the exhaust steam before the steam enters the condenser or heater. Another method is the chemical treatment of greasy water, and subsequent filtration. The feed-water is automatically treated with correct proportions of suitable re-agents, which collect the minute globules in a form suitable for removal by filters of wood fibre or sand. Another method, and perhaps easier to adopt in existing engines, is to be recommended. If it is desired to heat the feed water by exhaust steam from which the grease has not been removed, the steam should be conveyed in coils of pipes and should not, upon any account, be brought into direct contact with the feed-water.

Egypt Wireless Station.

The construction of the new Egyptian wireless station which is to form one of the links in the Imperial wireless chain will commence forthwith, says the *Egyptian Gazette*, which gives the following particulars of the installation:—The transmitting station will be at Abu Zabal and the receiving station at Abu Soueir. The transmitting station will consist of steam turbines, electric generators, high frequency transformers, and three aerials. The aerials will be supported by thirty-six steel masts, twenty-four of which will be 300 ft., and the remainder 352 ft. in height. The receiving station will consist of ten steel masts of 300 ft. supporting three aerials, a receiving-house, and a small power plant for lighting and other purposes. The transmitting apparatus at Abu Zabal will be controlled from the receiving station at Abou Soueir. For the erection of the masts native labour will be utilised under the superintendence of English engineers. One of the latter, Mr. Charles James, chief assistant engineer, has already arrived in Egypt and others are due shortly. Consignments of mast materials are arriving weekly, some 500 tons being at present stored upon the sites and ready for use.

An Egyptian Irrigation Scheme.

We extract the following from the *Egyptian Mail*:—"We learn that an important new Egyptian company is now in process of formation. The capital of this company will, it is understood, be between £E250,000 and £E300,000, the object to provide water by irrigation to a tract of cultivatable land, some forty kilometres long, in the vicinity of the Nile near Edfu in Upper Egypt. This will be achieved by erecting a powerful set of pumps on the Nile bank which will drive the water along a high level canal to the desired destination. The necessary concession from the Government has already been obtained, and, we believe, preliminary arrangements in connection with the acquisition of land are being undertaken."

A Portable Searchlight Plant.

It is reported that in the list of war materials which military authorities of the Balkan States are about to order there are portable searchlight plants of a light and easily handled construction. Continental firms have not been slow in submitting specifications and prices for these searchlights, and we hope that English firms will also do so. Some time ago we described in these columns a new searchlight apparatus mounted on a military motor-car which the French Army was contemplating adopting, but a still more serviceable and lighter apparatus is one we have seen, of British construction, which the British War Office has acquired. It is a combined self-contained petrol motor and searchlight plant, an interesting combination worked by a 3½-h.p. engine burning ordinary kerosene or petroleum, and a small dynamo. The whole is mounted upon a stationary bed, which, however, can easily be transferred to a trolley for portable purposes if so desired. The engine is equipped with a magneto ignition of the high-tension type. Air cooling is adopted, a fan being fitted for the purpose, while a particularly large exhaust-box is provided to muffle completely the noise of the exhaust. The motor weighs about 65 lbs., while its height is 20 ins. This apparatus was subjected to a six hours' test by the War Office authorities at the time, and the current developed after running for that period was 16 amperes at 75 volts under full charge, the revolutions of the engine ranging from 1,450 to 1,500 per minute.

Roumanian Railways.

Our Bucharest correspondent informs us that the Roumanian State Railways administration will very shortly invite tenders for forty-two passenger carriages and 300 goods wagons and trucks, of which about 100 will be of the open type, for the carrying of live stock. Particulars and drawings will shortly be published, but the date of adjudication is not yet known. Our correspondent adds that the construction of the line from Dorohoi to Novosuliza, on the Bukovina frontier, is being pushed forward rapidly.

TENDERS INVITED.

EGYPT.

Silk.—Tenders are invited at the Central Stores of the Ministry of Finance, Cairo, for the supply of 550 okes (about 1,510 lbs.) of raw silk for making the Holy Carpet. June 18.

Blankets, Towels, etc.—Tenders are invited by the Egyptian War Office for the supply of (1) 16,450 blankets, 1,200 pairs of cotton sheets, 960 bath towels, 1,800 hand Turkish towels, and khaki and drill clothing; (2) 16,000 yards of flannelette; and (3) 2,500 corn sacks. (1) May 27; (2) June 18; (3) June 23.

BULGARIA.

Corridor Carriages.—Tenders are invited by the Bulgarian Directorate-General of Railways and Ports for the supply of thirty corridor carriages. June 2.

Electric Power Plant.—Tenders are invited at the District Finance Offices, Sofia, for the installation of electric power plant at the Pernik coal mines. Estimated cost, £6,750. May 29.

ROUMANIAN OIL.

(From Our Own Correspondent.)

Bucharest, May 10.

The dispute between the Government and the oil companies has at last been settled, the companies accepting the following prices:—150 lei per ton for benzine for factory and mill use, and 52.50 lei per ton for residue for the State Railways. The prices previously agreed upon were 190 lei and 65 lei respectively. The arrangement holds good for two years, after which a new arrangement is to be made.

A purely Roumanian petroleum company is being formed, with a capital of three million lei. The names of the participants have so far not been made public.

Our Trade Correspondent writes from Athens that the Wagon-Lits Company has started a restaurant car service between Athens and Patras. Luncheon costs 3.75 drs., and is on the same lines as in the other restaurant cars run by the company.

THE CAIRO MOTOR CO., Ltd.
The Largest Motor Depot in the Near East.

SHIPPING INTELLIGENCE.

BRAILA NOTES.

(From Our Own Correspondent.)

Braila, May 9.

There is no improvement to report in our freight market, which has been very dull the whole week, the open tonnage in port being in excess of actual requirements. The best demand was for Rotterdam, which berth commanded 7s. 3d. from the Danube, but towards the end of the week the rate fell 3d. owing to competition. The Antwerp market remained dull at 7s. 3d. There was a fair demand for Hamburg the whole week, but as three steamers in port were loading for that port the rate did not rise above 7s. 6d. The Mediterranean market is lifeless; there is just a slight demand for Marseilles at 7.75 fr. to 8 fr.

Little fresh business has been effected at Sulina; the steamers there are loading old engagements. The rate for prompt shipments remains unchanged at 6s. for either Antwerp or Rotterdam.

A bank formed at the second milepost and another one at Sulina Bar, and steamers cannot leave Sulina if drawing more than 21 ft., or load up river to more than 20 ft. 6 ins. The European Commission for the Navigation of the Danube have sent dredgers to the spot, and it is expected that the obstruction will be cleared during the course of the next few days.

THE DANUBE COMMISSION.

(From Our Own Correspondent.)

Bucharest, May 7.

The European Commission of the Danube commences its spring session on May 9 at Sulina. The principal point of discussion is the proposal to improve the canal between the Danube proper and the town of Isacsia, the deepening of which would be of great advantage to the town and shipping in general.

SMYRNA TOBACCO.

According to the *Quarterly Journal* of the British Chamber of Commerce of Smyrna the tobacco crop of 1913 has proved to be the largest on record, exceeding 9,000,000 okes (1 oke=2.82 lbs.). Most of the crop is of a poor quality, owing to the summer rains. About 5,000,000 okes have been bought at fairly good prices, and most of the remainder is being held back for better prices, which planters and speculators hope to obtain when the locusts appear, and on account of the smaller acreage of planting, amounting probably to less than 40 per cent. of last year.

The planting this year in the Eudemish district is on a big scale, as there are over 4,000 refugees from Macedonia quartered there, all more or less interested in the planting.

There is very little buying from Europe so far, and the market is dull, but may become active when Europe becomes aware that the new crop is likely to be badly damaged by locusts.

The total number of steamers of all nationalities that entered the Port of Rhodes during the year 1913 is 748, with an aggregate tonnage of 726,856 tons, out of which 50 steamers and 90,944 tons were under the British flag.

AUSTRIA-HUNGARY AND THE ORIENTAL RAILWAYS.

(From an Occasional Correspondent.)

Budapest, May 5.

The most important question of foreign politics to-day is the attitude of Servia towards the transfer of the Oriental Railways, connecting Hungary (and thus Western Europe) with the Near East, to a financial group of which the bulk is composed of Hungarian and Austrian banks. The significance of such a transfer is evident at first sight to those acquainted with the efforts of Servia to obtain an outlet for her products and with the predominance of Salonika as the objective of Central European diplomacy.

Servia seems determined at all costs to thwart—or at any rate counterbalance—the plan which Hungarian and Austrian financiers have already carried out—on paper; and this in face of the obligations she has undertaken by virtue of her treaty with Turkey, and of the provisions of the London Conference of Ambassadors, by which Austria-Hungary is determined to abide.

The practical control of these Oriental Railways is, of course, of the first importance, both economically and from the strategic point of view; but the disadvantages for Servia should have been anticipated before it was too late. It is scarcely conceivable that Russia (by the aid of French capital) could not have come to the assistance of her Balkan ally when the preliminary negotiations were opened; or was Servia at that time convinced that she was to obtain a port on the Adriatic? As things are at present, however, either international treaties must be abolished as mere useless baubles to be set aside at will, or the parties to them must honestly abide by their provisions.

Austria-Hungary—particularly in view of the projected direct line from Budapest to Athens via Salonika—has too much at stake to allow herself to adopt a yielding attitude; and Servia has everything to gain or lose by adopting a conciliatory or recalcitrant attitude towards her powerful neighbour. Politicians in Austria-Hungary, fully aware of the value of the Balkan States as a market for their industrial output, are equally conscious of the value to Servia (subject to a change, in a non-agrarian direction, of their economic policy, which is bound to ensue as a result of friendly relations) of Hungary and Austria as consumers of her agricultural produce. The unnaturally enormous cost of living in the Dual Monarchy can be reduced only by the suspension of the prohibitive duties levied on imports from the Balkan countries; but, however devoutly wished by the whole population of Hungary and Austria, no such radical change of policy can be introduced except as a recognition of the loyalty of Servia in carrying out the obligations she has undertaken.

To-day's *Pester Lloyd*, in an article which is unquestionably inspired, points out that Austria-Hungary will not brook any infringements of the rights acquired by Hungarian and Austrian citizens; and it is left to Servia to decide whether an ideal that is at present pronouncedly "Utopian" ought to be permitted to stand in the way of the material prosperity of the peoples of three countries.

NEWS FROM ALL SOURCES.

The total importation of coal into Egypt from January 1 to April 30 amounted to 493,393 tons, as against 435,002 tons during the same period of last year.

We understand that Mr. A. Barwell has been appointed Superintendent of the Malta branch of the Eastern Telegraph Co., in succession to Mr. J. H. Davey, retired on pension.

The *Quarterly Journal* of the British Chamber of Commerce of Smyrna states that information has been received that a Jewish firm from Constantinople has been given permission to light the Dardanelles with electric light, and that this company will soon be working for the improvement of the town.

During the first quarter of this year 36,543 tins of American, Russian, and Roumanian petroleum have been imported into Chios. On account of these large arrivals prices have become more favourable.

COMPANY MEETINGS.

UNION FONCIERE D'EGYPTE.

The following is the report of the directors submitted to the annual general meeting held in Alexandria to-day (15th inst.):—The past year has, we are glad to say, been marked by th re-establishment of peace in the Near East; the immediate result has been an improvement in the economic condition of this country, which, it is hoped, will be accentuated as time goes on. The preparation by the Egyptian Government of a law assisting the formation of agricultural syndicates will, we trust, result in improving the credit of the small cultivator. It will be some years, however, before the good effect of such a law will be fully felt, and the restrictive influence of the Five Feddan Law removed. We may, however, look forward with pleasure to a time when the financial stringency due to the cutting off of the sources of credit from the small cultivator will have disappeared and only the advantages of this measure remain. From an agricultural point of view the predominant features of the past year were the very short supply of water during July and August and the damage caused in nearly every district by the pink boll worm. These two factors have been instrumental in reducing the size of a crop which at one time showed signs of being a heavier one, and have had a detrimental effect on the quality of the staple and the seed. The shortage of water during the summer also caused damage to the rice crop. On our estates both the cotton and rice were up to the average, except in the case of the Hessas, Doqmera, and Waziria properties, where they were effected by the adverse conditions mentioned, and this is reflected in our receipts. However, taking the circumstances into consideration, we think we may describe the result of the year's working as satisfactory.

Rural Estates.

Sales.—The bad condition of the cotton crop in certain parts of the country has affected some of our properties. In these localities land sales have been insignificant, and this accounts for our total transactions not having reached the figure we had hoped. 528 feddans 9 kirats have been sold during our financial year. Of this amount feddans 402.01.7 only figure in our balance sheet, the difference of 126 feddans representing sales that were not registered before the closing of our books, and will thus be included in the next year's working. As in our last report, we give in the following table the approximate figures for our yearly land sales since the company commenced operations:—

TABLE I.

Year.	Area Sold. Feddan.	Average Price per Feddan.
1906	151	..... £E79·59
1907	635	..... 111·74
1908	557	..... 77·75
1909	352	..... 73·43
1910	489	..... 87·74
1911	577	..... 72·19
1912	479	..... 74·53
1913	402	..... 71·42
Total	3,653	82·89

You will note that the price obtained last year was approximately equal to the average obtained during the company's working.

TABLE II.

Estates.	Area Sold. 1912-13. Fed.		1913-14. Fed.		Average Price. 1912-13. £E		1913-14. £E	
Hessas Nord....	36	....	—	....	62·97	....	—	
Hessas Sud	46	....	17	....	59·86	....	69·22	
Hessas Alf.....	76	....	54	....	74·46	....	73·15	
TedaOuest&Est	51	....	62	....	70·69	....	73·98	
Doqmera	—	....	—	....	—	....	—	
Dar el Bakar ..	113	....	90	....	89·81	....	83·67	
Waziria.....	25	....	5	....	67·	....	70·	
Kafr el Charki..	53	....	19	....	80·73	....	59·79	
Kom el Hassel..	64	....	151	....	69·82	....	72·65	
Santa	15	....	4	....	56·82	....	55·	

It is interesting to compare the average prices obtained in each property with those for the previous year. An examination of the figures shows that, generally speaking, prices have been maintained, and it is thus possible to estimate the ultimate value of our land in course of reclamation and improvement. The stability of prices is the best index that can be offered of the market value of our properties. From the date our company was founded to March 31 last sales amounting to feddans 3,653, kirats 20, sahms 19. have been registered, representing in value £E302,866.620.

Purchases.—During the year it has been necessary to expropriate a number of our buyers unable to meet their annuities. The restriction of agricultural credit, due to the operation of the Five Feddan Law, has unfavourably affected the position of some of our purchasers. In addition the difficulties encountered by cultivators this season are of themselves quite sufficient to account for some defaulters among the buyers of a total of not less than feddans 3,653. We would point out, however, that with the exception of the expropriation of the owners o: feddans 205, kirats 20, effected in 1911, th total number of cases annually in which we hav taken legal proceedings is relatively small. A we have stated before, the poor results obtaine from the rice and cotton crops in certain dis tricts have unfavourably affected the positio of some of our customers during the past year. We have resumed possession of feddans 53.15.0 at the price of £E4,351.246. Of this area feddans 50.01.16 have been acquired by expropriation and feddans 3.13.12 by purchase The following statement summarises our position as regards land during the past financial year:—

	Fedd.	Kir.	Sah.
Area held by us at March 31, 1913	9,995	16	07
Sales during year ended March 31,1914	402	01	17
Balance	9,593	14	14
Purchases during the year ended March 31, 1914.....	53	15	04
Total area held at March 31, 1914	9,647	05	18

Development.

The plan of campaign described in our last year's report as regards the development of our lands is being pursued, and the increase in our total rents affords the best proof of the success of our efforts. During the present year we hope to push on these works with renewed vigour. The pumping machinery for the irrigation of our Dar el Bakar estate was renewed and extended during the past year. At our Kom el Hassal estate we have also renewed our pumping plant; at Santa we have erected a new engine, and we have also purchased sufficient machinery for the drainage of all our low-lying lands. We have approached the Government and have obtained the necessary authority for working the latter, and we expect that this portion of our projects will be completed at the end of 1914. The digging of canals and levelling works have been proceeded with as actively as the resources at our disposal allow. The development of this work is reflected in the increased total of our rents.

Cultivation.

The receipts from cultivation are slightly lower than for the previous year, due to the partial failure of some of our crops. On the other hand, our working expenses are distinctly reduced. Although we have sold 402 feddans of good land, our rents have increased from £E13,590.185 in 1912 to £E15,483.677 in 1913 The average rental has remained practically the same being £E3.690 the feddan in 1912 against £E3.615 in 1913. The area let by the company has risen from 3,682 feddans in 1912 to 4,283 feddans in 1913, a difference of 601 feddans, which more than counterbalances the quantity sold. The shortage of water from which Egypt is now suffering will prevent us from obtaining during the present year the full increase in rents that at one time we had hoped for. Your attention is called to the steady increase in the figures of our total rents. By the increase of our revenue from cultivation, which depends directly on our rents and by the extension of our sales, we are year by year strengthening the financial position of the company. It is by steady progression in these two directions that we can place the affairs of the company on a healthy basis. Our efforts are tending towards this goal, and we believe our hopes are no longer far from realisation. In our opinion, however, this result can only be obtained by prudent and conservative management. The examination of the principal items of the balance sheet will convince you that we are advancing towards this end.

Balance Sheet.

Rural Lands Account.—This amount represents the net acreage belonging to the company multiplied by the cost price.

Development of Estates Account.—This figure includes the realisable assets on our estates, such as cattle, stores, furniture, etc., etc. Machinery is contained in a separate account, and is subject to the same annual allowances for depreciation as cattle and stores.

Cession of Vendor's Right, Land Bank of Egypt.—This institution has released us from the mortgage held by them on certain of our lands, in return for which we have transferred to the bank the vendor's rights for £E25,559.183. This account last year amounted to £E10,682.894. Our position during the year under review has thus been strengthened to the extent of £E14,876.289.

Land Bank of Egypt—Reduction of Mortgage Account.—The sum of £E3,844.698 resulting from land sales has been utilised in reducing the amount of our mortgage debt, as compared with £E2,335.310 for the previous year. We would point out that the amount of £E25,559.183 mentioned above, together with the sum of £E3,844.698 included in the "Cession of Vendor's Rights Account," or in all £E29,403.881, is set against £E162,803.723, the amount of the loan. The respective figures in our last balance-sheet were £E13,018.204 in our favour against £E163,933.846 in favour of the Land Bank. The improvement in our position is thus clearly shown.

Debtors for Sales of Land.—The amount of our assets under this heading is £E85,953.268. Of this sum £E25,559.183 has been transferred to the Land Bank as mentioned above (Cession of Vendor's Right), the resulting balance shown on the assets side of our balance sheet being £E60,394.085. On the other hand, the amount of our discounts with the Land Bank for which we are jointly liable was £E77,960—this item reduced every year by the payment of annuities, and now stands at £E59,006.170, compared with £E64,274.780 last year.

Annuities in Arrears.—The past financial year commenced with the sum of £E7,028.277 in arrears, of which we have encashed £E5,197.611, leaving outstanding £E1,830.666.

Annuities, 1913.—As we have already stated, the encashment of annuities on land sales has been affected to a certain extent by the difficulties cultivators have experienced during the past year. Of a total due of £E17.914.449 we have received £E11.808.938, leaving a balance outstanding of £E6,105.461, a part of which we hope to collect when the autumn crops are disposed of.

Land Bank Mortgage.—The present year's annuity reduces this charge from £E163,933.846 to £E162,803.723.

Banks and Bankers.—As we have already stated, we have utilised every resource to push on our works of land improvement with the object of increasing our revenue, and we have accordingly taken advantage of a credit offered us by our bankers. Our debit balance at bankers, exclusive of the Land Bank loan, is thus £E50,990.471, against £E42,208.407 last year. The increases in receipts enables us to meet the heavier charges, and as the money thus obtained is being devoted to productive operations, we expect to pay off the debt out of increased revenue. In this connection we would call attention to the fact that although our overdraft with our bankers has increased, our debt to the Land Bank has been reduced by the repayment of this year's instalment and by addition to "Reduction of Mortgage Account."

Provision for Arrears.—We have drawn on this account for £E124.031 in order to write off certain irrecoverable debts. At the same time, we have credited the account with a similar amount by the debit of profit and loss account, maintaining the balance at £E2,000.

You will notice that in addition to the usual provisions made by us for depreciation we have written off £E1,000 for irrecoverable arrears of rent. The examination of our balance sheet for the last financial year, in conjunction with the explanations which we have furnished above, will show you that our company is pursuing the dull but necessary task of restoring elasticity to our financial position, which was so detrimentally affected by the crisis of 1907. Our position continued to improve each year, and we are convinced that in the not very distant future we shall be able to recompense our shareholders for this unremunerative period. The only means to arrive at this point is to continue our present policy of increasing our revenue from cultivation by the improvement of our estates, to realise our lands by sales, and thus ease the burden of our indebtedness. A comparison of the last few balance sheets clearly demonstrates that we are advancing satisfactorily towards this end. The continuation of our works of land development and improvement will perceptibly improve our receipts during the year 1914. We are confident that you will endorse our efforts and ensure the carrying on of the policy which we have outlined to you by adopting the balance sheet for 1913, which shows a credit balance carried forward to the present year's accounts of £E48,338.437.

Election of Directors.—In May, 1913, Mr. S. Bonan, who has been a director of your company since February, 1912, resigned from the Board on account of pressure of other duties, and in spite of our wish to retain this gentleman's assistance, we were obliged to accept his resignation. The number of directors is sufficiently large, and we have not thought it necessary to fill this vacancy up immediately. We consider it preferable to delay making an appointment until a good opportunity offers.

Messrs. Isaac Aghion, E. W. P. Foster, Réné Ismalun, and J. Charles Roux retire from the Board in accordance with the Articles of Association, and, with the exception of Mr. E. W. P. Foster, offer themselves for re-election. Mr. E. W. P. Foster no longer resides in Egypt, and his resignation has therefore been accepted. We would take this opportunity of recording our hearty appreciation of the very valuable assistance he has rendered to the company from the date of its founding, and we are assured that we are expressing your sentiments in thanking him for his services to the company and conveying to him our regrets at his withdrawal from the Board. We would recommend the election of Mr. Guy Foster, Joint Manager of the Behera Co., to the vacancy

Digitized by Google

caused by this resignation; his wide experience of land development works and our close relations with his company makes this choice a most desirable one.

Auditor.—We would also propose that Mr. S. Pappo, Sub-Manager of the Land Bank of Egypt, be re-elected as auditor. Mr. Pappo's duties have been considerably heavier during the past year, and we would suggest that his remuneration should be increased from £E50 to £E80, and that this change should take effect from the commencement of the last financial year.

EGYPTIAN MARKETS.

The ordinary general meeting of the Egyptian Markets, Limited, was held at Winchester House, Old Broad Street, E.C., on the 11th inst, Major W. I. le Breton (Chairman of the company) presiding.

The Secretary (Mr. F. J. Horne) having read the notice convening the meeting and the report of the auditors,

The Chairman said: Gentlemen, you will, I am sure, permit me to take as read the directors' report and the accounts circulated therewith. These will have shown you that our profits are practically the same as in the previous year, and that for the third year in succession the directors are able to recommend that the dividend on the ordinary shares be brought up to 10 per cent. for the year. Of this 4 per cent. was paid in October last and 6 per cent. will, if our recommendation be adopted, be paid on or after to-morrow. Our profits in the year under review are derived, in a greater proportion, from revenues earned under our concession, and as a consequence the Government participation is larger and the amount available for distribution among the deferred shareholders is smaller than in the previous year. The transactions of the year do not seem to me, as such alone, to require explanation beyond that given in the directors' report; but, as bearing upon our future, they merit a wider consideration, and such will, I trust, meet with your acceptance as interesting and, I hope, encouraging. As of first importance to us is the continued existence of cattle plague and the consequent partial closing of our markets. You will have observed that in the past year our earnings responded to the decrease in the number of market days thus partially lost. This year we have commenced badly. Our receipts have fallen because we have lost more market days, and we have further suffered from bad weather and from a shortage in the number of animals brought to our markets; but recently an order has been given effect to exempting buffaloes from cattle plague restrictions. As buffaloes represent at least 50 per cent. of the horned cattle presented for sale at our markets, it follows that the partial loss to us of a market day should in the future only result in one-half of what such loss has been to us in the past. The next point in this connection is, what number of market days we are likely to lose. The closing of our markets during the past two years has been very extensive, as part of the determination of the Government to stamp out the disease as rapidly as possible. The result of the action taken on these lines was so successful that we had every reason to hope that in a very few years the disease would have entirely disappeared, and that this company would have enjoyed a prosperity which it has never yet experienced. But the cost to the Government of these measures was undoubtedly very heavy, and existing financial conditions have interfered with their continuance on this scale. In other words, operations have had to be curtailed, and, I understand, are, or will be, limited to the treatment of cattle brought to the notice of the Government officers voluntarily by the owners, or detected in the ordinary course. The effect of this upon us may well be that, though we may suffer longer, it will not be so acute as during the past two years; indeed, it is not unreasonable to believe that it will be found to be to the assistance of the Government to keep our markets open. Infected animals could not there escape immediate detection, whereas we know that when our markets are closed against them the same kind of business is conducted at unauthorised places, free from any kind of supervision and consequent means of exposure. This view is borne out by the fact that a number of our markets have recently been reopened. As of next importance to us I will refer to a small item figuring in the accounts as "Revenue earned from markets outside our concession." This is its first appearance, and represents a modest beginning of what we hope may prove a valuable addition to our business. It is only the commencing earnings, for broken periods, of two outside markets, but we are satisfied, and we have secured, and are securing, others which, after the most careful investigation we can give to them, we believe will be of two-fold value to us—firstly, in increasing our profits during the period of our concession; and, secondly, in giving to us something to continue upon after its expiration, twenty-four years hence.

During my visit to Egypt in the early part this year I had for a short time the advantage of the presence of my colleague, Mr. Home, and we had the opportunity of discussing matters with Mr. W. O. Joseph, our resident director, and with Mr. C. E. Duffield, our able general manager, both of whom possess very complete knowledge of our circumstances and of the country generally. The conclusion we arrived at, and which is fully shared by the two directors who were unfortunately prevented from giving us their assistance on the spot, was that the best possible direction in which we can look for development is in increasing the number of our markets and that time has now arrived for so doing. We cannot increase this number under our concession. There is certainly room to do so, in the form of extra markets, without encroaching upon the spheres of operations of our already existing markets. I visited the sites of some proposed by our general manager and I was able to give to his proposals my entire approval, which again have been endorsed by the members of the board unanimously. We have made the necessary applications to the Government, and have every reason to hope that during the current year several new markets will be opened. In this matter we are receiving every assistance from the authorities in Egypt, and I do not hesitate to state that we are held to deserve it. I do not believe—and I have good grounds for saying so—that any company in the country transacts its business to the greater satisfaction of the Government than does the Egyptian Markets, Limited—and as regards any kind of comparison between our markets and those conducted by others it is about as impossible as to compare the control exercised over the traffic in the Strand with that in an Eastern bazaar.

I now turn to our miscellaneous business, and as first in importance I take that in nitrates and other chemical manures. The profits derived from the sale of these was, in the year under review, about 30 per cent. less than in the previous year. This was due to causes more or less exceptional—namely, to our having been left at the beginning of the season with some high-priced stocks, to competition and to the delay in the arrival of two consignments of nitrate of soda owing to accidents. I am satisfied that from this latter cause we lost the opportunity of completing our sales of 1,000 or 1,500 tons of nitrate of soda. In regard to the future of this business, it is, I admit somewhat difficult to speak. I see no likelihood of our losing such business as we have got, but to attempt to secure any considerable increase of this appears to me to be beyond our unaided power. It might, I believe, be effected to the advantage of all concerned by a combination of interests, and the possibility of this is under our consideration. The next item for remark is the commission earned by us on the sale of cotton-seed for the Agricultural Department of the Government of Egypt. The Government has decided that these sales are to be effected from their own "halakas" or "cotton markets," wherever such exist. As a consequence this item of revenue is sure to be greatly reduced. It is perhaps a poor satisfaction, but it is some, for us to know that this business was not taken from us owing to any shortcomings on our part. I made particular inquiries, and I found that in every way possible the business had been conducted by us to the complete satisfaction of the Government officers concerned, and I am sure that the change was neither ordered by the Government nor given effect to by its officers without feelings of sincere regret on the part of those who are responsible for the conduct of the business. I will now turn to the revenue derived from our contracts with the United Salt and the Salt and Soda Companies of Egypt. Captain St. J. Cooke explained to you last year, in my absence, that our successful conduct of the salt business with the former company was being nullified by the treatment we received from the Salt and Soda Company of Egypt in connection with the sale of sundry articles. Captain St. J. Cooke also told you that the result of my discussions with the chairman of these two companies in Egypt last year had not been satisfactory. Matters did not improve, and as a consequence we decided to submit certain questions to arbitration, which is the course provided for in our agreement with these companies in case of any dispute. Arrangements for this arbitration are now in progress, and I feel that it would not be right for me to make any comment upon the position; but I must take this opportunity of mentioning that, by the favour of the Anglo-Egyptian Bank, Limited, this company has been allowed the services of Mr. Cookson, their manager in Cairo, as our arbitrator. There is room for considerable improvement in our business in sundry articles, both under our agreement with the Salt and Soda Company and outside it. This is constantly being considered with suppliers, several of whom I and other directors have interviewed personally; the one difficulty here is that we only accept such goods for sale on commission, and I need not tell you it is a great one. There is one matter in this connection which I will mention, both on account of its importance and because it involves departure from our practice just referred to. We are concerned with the sale of soap, among other articles, for the Salt and Soda Company of Egypt, and the difficulty is to do this business at sufficiently low prices to meet the requirements of our markets. A cereal soap has been introduced to us, and the acquisition of the rights for Egypt and the Sudan is now being considered by us, with the Salt and Soda Company as manufacturers. We have made some experiments and propose to proceed with some trial sales in our markets. If satisfactory arrangements can be made we propose to exercise an option that we hold for the acquisition of the rights in question, and this will involve a cash payment of £500, which, practically, is all our risk, for subsequent payment to the soap company concerned would be in the form of a royalty on sales. I am sorry to say that we have again suffered from defalcations in and adulteration of our stocks of goods. This was mentioned to you a year ago, as well as the fact of our staff being guaranteed, and yet our protection was far from complete. Our difficulty is to bring home the necessary proof of guilt in respect of the individual or individuals concerned, in order to establish our claim against the Guarantee Society, and after very careful consideration we have decided to form a guarantee fund under our own control. Taking an average of past years, we find that the premia paid by ourselves and by our staff should be sufficient to

Digitized by Google

meet these liabilities. It only remains for me to make brief reference to our expenses. In spite of every effort to keep these down, I am afraid they must have a tendency to increase, as does the service of our staff; but there is nothing in view pointing to any considerable increase in our cost of working, while the fact remains that we are still capable of undertaking a lot more remunerative work with but slight additions to our staff.

The Chairman then moved:—"That the report of the directors dated April 24, 1914, together with audited statement of accounts and balance-sheet for the year ended December 31, 1913, be and they are hereby approved and adopted."

Captain A. St. John Cooke seconded the resolution, which was carried unanimously.

The Chairman next moved:—"That the interim dividend of 4 per cent., less income-tax at 1s. 2d. in the £, declared on the ordinary share capital of the company, and paid on October 13, 1913, be and it is hereby confirmed, and that a further dividend of 6 per cent., less income-tax at 1s. 2d. in the £, on the ordinary share capital of the company, making 10 per cent. for the year, be and it is hereby declared to be paid to the holders of ordinary shares recorded on the registers of the company on April 27, 1914, and to holders of ordinary share warrants to bearer."

Mr. W. Home seconded the motion, which was unanimously agreed to.

The Chairman also proposed:—"That the sum of £1,861 19s. 9d. (equal to £6 4s. 1d. per share) plus or minus one-third of such additional amount (if any) as may be found due from or to the Egyptian Government, as the case may be, beyond the £2,700 (the amount estimated as due to Government), less income-tax at 1s. 2d. in the £, be declared as dividend on the deferred share capital of the company, payable to holders of the deferred shares on the company's registers on April 27, 1914. That of such figure £5 per share, less income-tax at 1s. 2d. in the £, be paid on May 12, 1914, and balance (if any) immediately after ascertainment thereof."

Mr. A. F. Joseph seconded the motion, and it was unanimously adopted.

The Chairman moved:—"That Captain A. St. John Cooke, the director retiring by rotation, be re-elected."

Colonel P. A. Kenna seconded the resolution, which was carried unanimously.

ALEXANDRIA NOTES.

(FROM OUR OWN CORRESPONDENT.)

ALEXANDRIA, May 8.

The Share Market.

The tone of the market has been decidedly better; leading securities have shown a slight upward tendency; and there has been a slightly increased activity in regard to transactions generally.

A small amount of bullion has been exported this week for India, but these shipments have very nearly reached their limit, for the supply of gold is practically reduced to its minimum. The Caisse de la Dette Publique has just put a sum of £E700,000 at the disposal of the Egyptian Government, as a loan for the summer months, during which public receipts fall off. This advance is to bear interest at the rate of 3 per cent. at the outside, and will become repayable on October 31 next, when the coupon of the Unified Debt becomes payable.

The Government's receipts for the months of January and February last amounted to £E2,396,464, as compared with £E2,466,164 in 1913. Owing to the low Nile the total receipts this year show a slight falling off on those of last year.

Bank of Athens.

A group of financiers, composed of MM. Bonzon, Bonnier, and Massiot, the Banque de l'Union Parisienne, have arrived in Alexandria, where they are investigating the position of the Bank of Athens. It is believed that the idea of converting the Bank of Athens into a French concern will be given up. The directors are determined to rehabilitate the Bank, and to put it on a thoroughly sound basis, and in order to achieve that end they will, if needful, abandon any idea of dividends for some time.

Rodocanachi-Reynolds' Failure.

The creditors of this company have appointed as liquidators Sig. Interdonato, of the Banco di Roma, M. Calamaro, of the Comptoir, financier, and M. P. Simond, a lawyer.

Wadi Kom-Ombo Co.

Last year was a very prosperous one for this company, which has seen its profits increase, and the dividend distributed amongst the shareholders has been at the rate of P.T. 12 per share, as compared with P.T. 10 for the previous financial year. The company has given a fresh impetus to the cultivation of the sugar cane, and has enhanced the value of its extensive properties.

Cie Frigorifique.

The past season was an unfavourable one, and the dividend has only been at the rate of P.T. 12. The directors' report sets forth the serious state of affairs. The Balkan War deprived the ice industry of a very considerable clientele; several shops, bars, cafés, brasseries, etc., have been closed in Alexandria and Cairo; others have been forced to go into liquidation; while the general public has cut down its expenses. These unfavourable conditions necessitate great prudence in the distribution of profits.

Drogueries d'Egypte.

A company has been formed in Egypt, under the title of the Société Anonyme des Drogueries d'Egypte, with a capital of £E100,000 in 25,000 shares, which have been subscribed for by the following in the proportions stated: Enrico del Mar, 9,000; Isaac Benarojo, 9,000; Adolfo del Mar, 2,875; Amedeo Benarojo, 1,250; Umberto del Mar, 750; Max Fischer, 625; Leon Jehiel, 625; Bernard Grünberg, 500; Giuseppe Scava, 250; and Emmanuele del Mar, 125. The object of the company is stated to be the buying and selling of chemical and pharmaceutical products, and all operations directly connected therewith.

Recent Failures.

Basile J. Valsamides.—Liabilities, £E7,588; assets, £E2,967.

Dimitri Pallis.—Liabilities, £E6,688; assets, nil.

Moses Montefiore.—Liabilities, £E13,887; assets, £E8,400.

Basile Bahons and Co.—Liabilities, £E4,000; assets, £E648.

Bassiami Hamadi.—Liabilities, £E2,200; assets, £E700.

THE EASTERN BANK, LIMITED.

Head Office: 4, CROSBY SQUARE, LONDON, E.C.

Subscribed Capital, £1,000,000. Paid up, £400,000. Reserved Liability of Shareholders, £600,000.

Branches:

BAGDAD. BOMBAY. CALCUTTA.

Board of Directors.

Stock and Share Markets.

Bank Rate 3 per cent. (Jan. 29, 1914.)
SETTLING DAYS.

CONSOLS.
Tuesday, June 2.
STOCKS AND SHARES.
In Mining Shares the next carry-over is May 25.

Continuation Day.	Ticket Day.	Pay Day.
Tues., May 26.	Wed., May 27.	Thurs., May 28.
Tues., June 9.	Wed., June 10.	Thurs., June 11.

LONDON, May 14.

The past week has been one of patching up. Everybody has been nervous, and one big promoting agency has had its account taken over and put into strong hands. But this kind of help only means depressed markets, for the stocks will have to be sold. Whether there will be any further trouble is doubtful. It is well-known that some large firms have been hard hit, and that their credit has been curtailed. We must expect dull markets for many weeks to come. The De Trey Company was well received. It was a reasonable Industrial risk.

More Gold Shipments.

There has not been quite so much pressure in the Gold market. The Stock Exchange got all its funds for the settlement without any difficulty. But Lombard Street is nervous, and does not quite like the perpetual purchase of gold by the Continent. New York is now supplying Paris, and if Wall Street continues to export gold the situation in London will be relieved.

Bulgarian Loan Rumour.

In the Foreign market there is a rumour that the new Bulgarian loan will be offered in London. But no one seems to think it at all probable. However, Bulgarians have hardened to 85. There has been some considerable buying of Unified, and Egyptian 3½ per cent. preferred stock have also been purchased, the former at 99, and the latter at 87½. Clearly, the Egyptian finance houses think both stocks undervalued. Hungarian rentes are steady at 82½. There has been a revival in Russians, but Turkish Unified remain at 82.

In the Home Railway market the liquidation in the deferred stocks still continues. The big speculative syndicates that were formed some months ago have been attempting to unload, and it is believed that there is still a good deal of stock to come on the market. Underground Electrics are weak, and look like going lower, but the heavy lines can be bought with safety.

American Market Waiting.

The American market is really waiting to see whether Missouri Pacific will be able to meet the short-dated notes. If the road escapes a receivership, we may get a small rise all round. But the chance is remote. Missouri Kansas would appear to be in a difficult position, and the general feeling in Wall Street is that there will be no improvement until the Mexican question has been settled. Canadas hardened up when it was found that the Canadian group had been helped over. But they have since relapsed, and are likely to go lower. Big operations have been undertaken in Trunks, and here, also, the market is extremely weak.

Rubber is now quoted under 2s. 6d. The reports as they appear give very little encouragement. Merlimau pays a dividend of 6½, but Malayalam reduces its distribution to 5 per cent. Ledbury figures are not good. Lanadron was also bad, but the prospects here may improve during the current year.

Egyptian Oil.

In the Oil market the North Caucasian report was very satisfactory, and the Burmah figures are definitely good. The Egyptian market has been depressed, the output having again fallen. Presumably, the company is curtailing the production from No. 13 well with the object of finding out the source of the water. But no information is available, and the dealers in the market grumble. Anglo-Egyptian "B" are quoted 20s. Red Sea are 21s. 9d., and Egyptian Oil Trust are no better than 3¾.

Mines Neglected.

Mines generally remain neglected. A little sensation was caused by the introduction of the Burmah Corporation shares, but Russians have been very uneasy; the speculation here looks like dying down. De Beers have been bought, but Cam and Motors are now only 18s. 6d. Broken Hills are most of them harder on the week. There is no business in Copper shares, and Mount Elliotts are under 2½.

Egyptians Improving.

The Egyptian market shows signs of a revival. There has been a great deal more business doing during the past week, and there is a feeling of confidence all round. It is quite clear that Egypt has now got through all her troubles, and that the financial position is much sounder. The fellaheen have made money, and are ready buyers of good land. National Bank of Egypt have been dealt in at 14¾. Agricultural Banks have weakened a little, and are now 4 25-32. It is not easy to understand the reason for the fall, as the position of this bank is immensely improved, and the shares are certainly much under-valued. Land Banks are nominally 6½. Delta Light prefs. have been dealt in at 8½. There has been some considerable business in Delta Lands at 8s. 9d. One of the features of the week has been a continued demand for Behera, which have been purchased in small lots at 9¼. It is now understood that the Behera will work the whole of the Sidi Salem land, and that after it has repaid itself the money already owing, the balance of the profits will go to the Sidi Salem. The price of 6s. is, therefore, merely option money on the certainty that sooner or later Sidi Salem will come to its own again. Union Fonciere are 1¼. There has been some steady buying of Alexandria Water at 12¾. Aboukir Land are weak at 22s. 6d. Some thousands of shares have changed hands in United Land at about 1s. 8d. Trusts have been bought at 5s. 6d., and there has been a good deal of business in Salts, buyers having paid 14s. 7½d. We hear very good news of New Egyptian. Mr. Suarez's policy of only offering for sale lands that the fellaheen can cultivate immediately, and on which they have to spend no money, is producing good results. New Egyptians are therefore under-valued at 10s. 6d. Markets are quoted 24s., ex dividend. Khedivial Mail prefs. look dirt cheap at 3½, and the ordinary are being picked up by the insiders at 10s. There is still some business in Daira Sanieh, a few hundred shares having been purchased at 3s.

Miscellaneous.

In the Miscellaneous market Royal Mails were bid up as the result of the meeting, but the general tone in the Shipping market is not good, and lower freights are expected with consequent lower profits. Iron and Steel shares have also been offered, but the whole tone of the Miscellaneous market is dull.

TURKISH DEBT.

The Council of Foreign Bondholders have received from the Council of Administration of the Ottoman Public Debt at Constantinople a statement, of which the following is a summary, of the complete receipts in respect of the month of December, 1913, as compared with those of December, 1912:—

COMPLETE RECEIPTS.

	December, 1913.	December, 1912.
*Five revenues	*£T185,569.94	£T153,469.71
Regie	187,500.00	287,500.00
Cyprus	19,096.47	19,386.99
3% Customs surtax ..	88,776.55	83,649.25
Sundries.....	18,460.15	13,225 64
	£T499,403.11	£T427,231.59

* Including provisional surtaxes imposed on salt and spirits for three years from August 1, 1912.

COMPANY NOTES.

Constantinople Telephone.

The report of the Constantinople Telephone Company for the year ended December 31, 1913, states that during the year installation work has proceeded steadily despite delay occasioned by the non-delivery of material and stores in consequence of the war. Owing to this cause, it became necessary to obtain an extension of the period of construction fixed by the convention, and on October 16, 1913, official sanction was obtained to postpone the opening of the service at the three large exchanges at Stamboul, Pera, and Kadikeuy until February 28, 1914, and of the smaller exchanges until one year from that date. By the date arranged, February 28, 1914, the three principal exchanges were successfully opened for public service, and reports from the general manager bear most gratifying evidence of the growing popularity of the service, which the directors are satisfied will rapidly develop. They regard the success of the undertaking as absolutely assured, and already it has become necessary to make arrangements to increase the plant in the Pera exchange. It is anticipated that all present subscribers will be connected up and the sub-exchanges opened by the end of October, 1914. The submarine cables across the Golden Horn and the Bosphorus in order to give junction service were successfully placed in position before the opening of the exchanges, and the submarine cable work which was necessary to connect up the islands in the Marmora has also been finished. Three large exchange offices have been built on sites purchased by the company. Of these Stamboul has switchboard equipment for 3,560 subscribers' circuits, and can be extended to take over 8,000. Pera exchange has switchboard equipment for 4,100 circuits, and Kadikeuy 1,600 circuits, and in both of these there is room for extension. Each of these buildings is of ferro-concrete, specially designed and constructed for telephone service, thoroughly modern and fire-resisting. Land has also been purchased at each of the places where sub-exchanges are to be opened and buildings particularly adapted for telephone service erected thereon. Relations with the authorities continue to be most friendly. As foreshadowed in the last annual report, in order to raise additional capital, the directors, in accordance with the authority given them at the last general meeting, confirmed by a resolution of February 17 last, offered for subscription £200,000 6 per cent. obligation bonds in February last, and by this means obtained the working capital required for the purposes of the company.

Banque Marmorosch, Blank et Cie.

The directors' report for 1913 refers to the effect of the late wars upon financial and commercial affairs in the Balkans and their reaction upon the business of the bank. The general turnover, however, amounted to 3,533,900,000 lei, as compared with 3,502,700,000 lei in 1912. The profits, amounting to 3,249,626 lei, are brought up to 3,589,424 lei by the amount brought forward from the previous year. 161,981 lei are carried to the statutory reserve; 1,650,000 lei are distributed in dividends, at the rate of 11 per cent. on capital shares, and 252,764 lei on thirds; 921,615 lei are carried to ordinary reserve; and 353,064 lei are carried forward.

COMPANY RESULTS, &c.

BRASSERIES D'EGYPTE.—The annual meeting has been postponed from May 6 to May 27.

EGYPTIAN MARKETS.—The coupons attached to the ordinary share warrants to bearer having become exhausted, new sheets of coupons are now ready for issue. For this purpose holders of ordinary share warrants to bearer must list (upon forms to be obtained from the bank) and deposit such share warrants at the offices of the Anglo-Egyptian Bank, 27, Clements Lane, E.C., on and after May 12. Coupon serial No. 20 on share warrants to bearer for dividend declared of 6 per cent. (less income-tax), being a dividend for six months ended December 31, 1913, will be payable on and after May 12 at the Anglo-Egyptian Bank, London, Cairo, and Alexandria.

OTTOMAN RAILWAY FROM SMYRNA TO AIDIN.—Receipts for the week ended May 9 amounted to £7,956, an increase of £3,288 on the corresponding period of last year.

PIRÆUS-ATHENS-PELOPONNESUS RAILWAY.—The directors have declared a dividend of 5 frs. on the ordinary shares and 1.10 frs. on the participating certificates (actions de jouissance) for the half-year ended December 31 last.

PORTS, QUAYS, AND WAREHOUSES OF BEYROUT.—At the annual general meeting, to be held on June 12, a dividend of 17.50 frs. per share will be proposed, being an increase of 2.50 frs. upon the last dividend.

ROUMANIAN CONSOLIDATED OILFIELDS.—Cable from Ploesti, dated May 8 :—Moreni.—Well No. 30 started to flow again at nine this morning, with such force that boards at top of derrick 110 ft. high were broken by the column of oil. Well still flowing hard at 4 p.m. Pumps working well.

ROUMANIAN GOVERNMENT 4½ PER CENT.—Messrs. J. Henry Schröder and Co. are now prepared to deliver definitive bonds in exchange for their fully-paid scrip of the Royal Roumanian Government 4½ per cent. Gold loan of 1913.

SOCIETE ORIENTALE DE PUBLICITE.—The ordinary general meeting held in Cairo on April 30 unanimously approved the accounts and the payment of the following dividends :—P.T. 36 on old shares; P.T. 18 on new shares Nos. 1-1,250; P.T. 12 on ditto Nos. 1,251-2,500; and P.T. 17 on founders' shares.

TRAMWAYS AND LIGHTING, OF DAMASCUS.—The ordinary general meeting will be held at the offices of the Société Générale de Chemins de fer Economiques (54, Rue de Namur), Brussels, on June 8.

TURKISH FINANCE.

The Constantinople Correspondent of *The Times*, in a message dated May 12, says :—"Economic negotiations between Turkey and Germany have been conducted in the first instance at Constantinople between Djavid Bey and Messrs. Günther and Huguenin, on behalf of the Anatolian Railway Company, with a representative of the Deutsche Bank. Djavid Bey will visit Berlin after the close of the Parliamentary session, which will last for two months, to resume official negotiations with the German Government, interrupted by the loan negotiations in Paris."

THE IMPERIAL BANK OF PERSIA

(Incorporated by Royal Charter, 1889).

CAPITAL (fully paid) - - - £850,000

COOK'S NILE STEAMERS AND DAHABEAHS.

THOS. COOK & SON have unequalled facilities for Travellers visiting Egypt, now the premier Winter Resort of the World. Their fleet of **Fourteen Large Passenger Steamers** consists of the finest vessels on the Nile, specially built, luxuriously appointed throughout, and fitted with every modern convenience.

TOURIST SERVICE.—These large and handsomely-fitted Steel Steamers sail once a week from **Cairo** to **Assuan**, and twice a week from **Assiut** to **Assuan**, the sailings from **Cairo** beginning in November, and from **Assiut** in January.

EXPRESS SERVICE.—The Express Steamers also leave **Cairo** twice a week, the Friday departures commencing in November, and the Monday departures in December.

There is thus a Service of **Five Cook's Steamers per week** ascending the Nile to the **First Cataract** during the Season—three from **Cairo** and two from **Assiut**—calling at all points of interest on the Nile, in connection with which complete arrangements for sightseeing and excursions are made, enabling Travellers to visit, to the best advantage, all the famous

PYRAMIDS, TEMPLES, TOMBS, RUINED CITIES, etc.

SECOND CATARACT SERVICE.—In connection with the above Services there is also a Service twice weekly by First-class Steamer from the **First** to the **Second Cataract**, with through bookings to **Khartoum, the Sudan**, and **Uganda.**

PRIVATE STEAMERS AND DAHABEAHS. — **Thos. Cook & Son** have several small Steamers for charter at moderate rates, specially adapted to the requirements of Families, Private Parties, Sporting Parties, etc., accommodating from eight to sixteen passengers, with competent crews, and thoroughly equipped. Also a large Fleet of First-class Sailing Dahabeahs, the best on the Nile.

Illustrated Nile Pamphlet free from:

Khedivial Mail Line.

FIRST-CLASS BRITISH MAIL STEAMERS.

GREECE-TURKEY MAIL SERVICE.

Shortest and most picturesque sea passage between Europe and Egypt. Fast steamers in connection with the Orient express train-de-luxe from Paris, Ostend, Vienna, Berlin, and Budapest leave Constantinople every Tuesday afternoon for Smyrna, Piræus and Alexandria. Return from Alexandria every Wednesday afternoon via same ports.

Service between TURKEY, SYRIA & EGYPT.

Fast steamers leave Constantinople fortnightly on Saturdays for Gallipoli, Dardenelles, Mitylene, Smyrna, Chios, Rhodes, Mersina, Alexandretta, Tripoli, Beyrouth, Caiffa, Jaffa (for Jerusalem), Port Said and Alexandria. The voyage takes ten days.

Departure from Alexandria fortnightly on Saturdays for above ports, and WEEKLY on Saturdays from Alexandria, and on Sundays from Port Said, for all Holy Land and Syrian Ports to Mersina.

CYPRUS SERVICE.

Fast steamers weekly from Alexandria on Tuesday afternoons, and from Port Said on Wednesday mornings, for Famagusta, Larnaca, Limassol and Paphos.

SUDAN MAIL SERVICE.

Steamers leave Suez Docks on Wednesdays, at 5 p.m., for Port Sudan, connecting there with express train to Khartoum, at 1 p.m., on Saturdays. Calls made at Suakim as required.

RED SEA COASTING MAIL SERVICE.

Steamers from Suez Docks every Monday evening, at 5 p.m., for Jeddah, calling one week at Tor, El-Wedj, Yambo and Jeddah; and in the following week at Jeddah, Suakim, Massowah, Hodeidah, and Aden.

For information apply to the Company's London Office, 37, Bishopsgate, or at Alexandria, Constantinople and Suez. Passages may be booked at Company's Agencies at all ports called at, or from the principal Tourist Agencies.

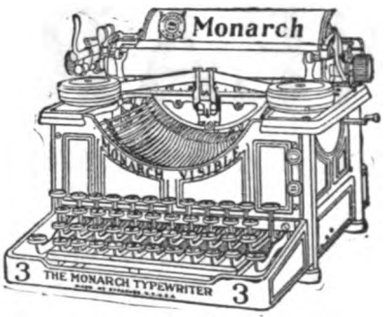
There have been many attempts to design a typewriter for writing Arabic.
There has been only one successful, that is—

The Monarch



The Monarch

With this wonderful machine, built on an entirely new and exclusive system of key leverage, the operator can do **MORE AND BETTER** work than on any other machine, owing to the light touch and easy action.

This is a strong statement, and it can be tested by a trial of this machine from

NOTES OF THE WEEK.

Important events have taken place in Albania during the past week. In the south an agreement has been reached between the Provisional Government of Epirus and the International Commission of Control regarding the future of the districts of Koritza and Argyrokastro; in the north Essad Pasha has been arrested by order of Prince William and deported. From the outset Essad Pasha, who held the two portfolios of War and the Interior in the Albanian Cabinet, has been a thorn in the flesh of Prince William. The latter appears to have acted on the principle of giving this ambitious chieftain as much rope as he was prepared to take, and the policy has proved successful. For some time past agitators have been stirring up the population in the Mat, Dibra, and Tirana districts, and the movement came to a head with the advance of a body of insurgents on Durazzo. Essad Pasha left Durazzo last week for his home at Tirana upon the pretext of coming to terms with the peasants. But Prince William's suspicions appear to have been aroused, and Essad Pasha was placed under observation.

Different versions are current regarding the course of events immediately preceding his arrest. It is not yet clear whether, as the result of an interview with Prince William, Essad Pasha resigned his portfolios and at once increased the number of his bodyguard, or whether the strengthening of his bodyguard decided the Prince to remove him from his post. He was, however, summoned by a Dutch Gendarmerie officer to disband his guard and hand over their arms. He refused, and his men opened fire on the Gendarmerie. A battery of artillery which had been placed in position replied, and Essad Pasha then hoisted the white flag. As soon as the first shot was fired Austro-Hungarian and Italian sailors were landed by arrangement with Prince William, and took steps to guard the Palace. A combined detachment marched to Essad Pasha's house, arrested him, and conveyed him on board an Austro-Hungarian cruiser. He was subsequently transferred to an Italian steamer bound for Brindisi, having previously signed a declaration that he would not return to Albania without Prince William's permission. Unless the indications are at fault, the country no less than its ruler will feel a sense of relief at being rid of Essad Pasha. His attitude both before and since the Prince's arrival has been incompatible with constitutional government, and his conduct amounted to an open affront to his Sovereign. It is pointed out that Prince William would have impressed his subjects still more favourably if he had been able to carry out his *coup de main* without recourse to foreign bluejackets, and it is feared in some quarters that the intervention of Austria-Hungary and Italy at such a critical juncture may serve to strengthen the wish of the two Powers to play an equally important part in subsequent developments in Albania. However that may be, it is to the interest of the new State that its ruler should have acted with determination in putting an end to an impossible state of affairs. With the removal of Essad Pasha and the prospect of peace in the south Albania enters upon a more hopeful stage than it has yet experienced in its chequered career of the last few years.

The intervention of the Powers in the Epirus question has met with success. As a result of the negotiations between the International Commission of Control and the Provisional Government a provisional agreement has been reached and will be submitted for ratification to the Powers, to the Albanian Government, and to the Epirotes. Last week we were able to present the situation on the southern frontier of Albania in its proper perspective. The main features remained unchanged: strong mistrust of the Albanians on the part of the Epirotes and a strong determination not to accept incorporation in the new State without adequate safeguards. On this foundation there had been hurriedly raised a somewhat formidable insurrectionary movement purporting to have as its object the withdrawal of Epirus from Albania with a view to its union with Greece. The agitation, however, overreached itself. Artificially fomented with outside help, it had gone altogether beyond the intentions of the Epirotes themselves, who became less and less enamoured of the methods of their imported champions as the latter developed their plans. M. Zographos, head of the Provisional Government, had never shown himself an irreconcilable; but the insurrectionary operations were beginning to pass beyond his control, when the opportune offer of intervention was made by the International Commission of Control. Hostilities were suspended, and within ten days an agreement for the settlement of the Epirus question had been reached.

Digitized by Google

For the present the arrangement agreed upon at Corfu by the mediators and the Provisional Government of Epirus is happily termed "Dispositions concerning the districts of Southern Albania." The title is significant. The Albanian Government proclaims the administration considered suitable for the southern districts of Albania, the Epirotes express satisfaction with the proposals and bygones can be bygones. According to the provisional scheme the country is to be divided into the two administrative districts of Koritza and Argyrokastro, under Prefects nominated by the Albanian Government, with local councils in which the number of elected members is always to be in excess of the ex-officio members. All existing Greek religious institutions and privileges are to remain unaltered, and the Greek language is to be recognised equally with the Albanian language as a medium of instruction for the three lower classes of the popular schools. Similarly the Greek language will be recognised in matters of local administration and in the Law Courts. The Epirotes will not be disarmed; the Gendarmerie for the two districts will be recruited locally and commanded by Dutch officers. It will not be available for service elsewhere, except in the case of *vis major*, which will have to be recognised as such by the International Commission. The latter is to be responsible for the organisation and maintenance of the new régime, and finally a full amnesty is to be granted to the Epirotes. It is to be hoped that this eminently sound arrangement will be carried into effect without delay. Albania has need of the Epirotes, and the Epirotes, or at least the Orthodox inhabitants of Koritza, have lost no time in indicating how their real sympathies lie by using the Albanian liturgy in their Church services as soon as the Greek army was withdrawn. If Prince William hastens to show himself to the Epirotes in his true light as a Sovereign conscientiously devoted to their interests, he will not only win their loyalty and affection, but he will probably sow the seed of the solution of certain troubles which have manifested themselves in the administration of Northern Albania.

The satisfaction which the Albanian Government is likely to feel with the course that events in Epirus have taken can hardly fail to be shared by the Greek Government. For many months M. Venizelos has been placed in a trying position. From the outset he was probably aware how much of the Epirote agitation was genuine and how much artificial. If he had tried to impart his knowledge to his fellow-countrymen, he would not have been believed. But he sought to obtain for the Epirotes the concessions which have now been granted to them, and he urged the Powers to take action before the movement assumed a more menacing aspect. His advice was not acted upon, and he has been obliged to face a bitter agitation in Greece against his own person. The crowning injustice of driving him from office has not yet been accomplished, and we may hope that the settlement of the Epirus question will put an end to the intrigues of his political opponents. As we stated last week, the Greeks cannot cavil with terms which have been accepted by the Epirotes. In the attitude of the Orthodox inhabitants of Koritza they will find food for reflexion and may bring themselves to realise that M. Venizelos has adopted the wiser policy in urging the claims of Greece on ground where they can be substantiated and in not antagonising the Powers by pretensions in districts where the inhabitants are likely to be the first to repudiate them.

The publication of the report of the Special Committee appointed by the Carnegie Peace Fund to investigate the circumstances attending the two Balkan wars is promised for June 1. An advance notice states that three chapters of the voluminous document deal with the atrocity question. As might have been expected, the Committee finds that there were both truth and exaggeration in the reports circulated. A large number of reported atrocities "were invented or exaggerated by certain belligerents in order to cover their own excesses." But the conduct of the wars, and particularly the second, recalls the darkest days of the Middle Ages or, rather, "the time of the Assyrian conquest." No one with intimate knowledge of the Balkans imagined that war could be waged on any other terms, and it requires a large amount of optimism to imagine that if hostilities were to be renewed tomorrow the conduct of the combatants would be different. But when memories of days of oppression have had time to fade, a new conscience may be awakened in the Near East.

Relations between Roumania and Austria-Hungary have recently been passing through a phase of considerable delicacy, and it is unfortunate that the situation should be complicated by a purely personal matter. The presence of Dr. Mangra, a Rumane, who is a priest and episcopal vicar of a Greek Catholic diocese and a member of the Hungarian Parliament, was resented at a session of the Academy in Bucharest by some students, who insulted him and jostled him as he was leaving the meeting. Such an incident could hardly be ignored in Hungary, and it is natural that the Press should endeavour to make the most of it. The action of the students was reprehensible, but in justice to them it has to be pointed out that Dr. Mangra had courted trouble in presenting himself at the Academy. He had been elected a member in 1909 at a time when he was the champion of the Rumane cause in Hungary, but until last week had not set foot in the building. Since his election he has been held to have deserted the Rumanes and to have gone over, bag and baggage, to the enemy's camp. His appearance, therefore, at the Academy was in the nature of a challenge, and the students were not slow in accepting it. The incident may serve to embitter feeling on both sides of the Carpathian Mountains, but it is not likely to affect the relations between the two Governments. Both recognise the awkwardness of the problem presented by the presence of a large compact body of Rumanes in Hungary, but the Roumanian Government has not allowed itself to take any steps or make any representations which are not consonant with its avowed desire to live on terms of strict friendliness with its powerful neighbour.

Inquiries in the House of Commons have elicited the fact that the Government is still coquetting with the Trans-Persian Railway scheme. Sir Edward Grey's replies, however, seemed to indicate some confusion regarding the geography of Persia. The Trans-Persian Railway scheme, as generally understood, is a proposal to link up the Russian and Indian railway systems by a line across Persia. Sir Edward Grey's remarks would lead the uninitiated to suppose that it was a proposal to develop the chief trade routes in Persia. But these, where not in the Russian or northern zone, are to be found in the neutral zone rather than in the south-eastern or British zone. British interests are centred in the neutral zone, and, if support be given to railway schemes, the lines to be built should follow the movement of trade and not traverse the deserts of Persia and Baluchistan.

The news of Lord Cromer's serious illness will cause more than ordinary concern to the many people who were brought into personal contact with him during the earlier years of his administration of Egypt. In the long roll of illustrious servants of the Empire there is none whose individuality has impressed itself more than Lord Cromer's on those with whom he was associated. It was an uphill fight in the days that succeeded the British Occupation of Egypt, and the small band of Englishmen that was working under Lord Cromer had to encounter every sort of opposition, not only from the Egyptians themselves, but also from their various European colleagues who then formed part of the Administration. Not one of those, we imagine, who took part in the activities that led to the triumph of Efficiency and all it has since brought to the prosperity of Egypt but will gratefully acknowledge that it was Lord Cromer's guiding hand and encouragement that rendered success possible under what then seemed almost hopeless circumstances.

CONSTANTINOPLE LETTER.

(From Our Own Correspondent.)

Constantinople, May 15.

The Speech from the Throne.

The Speech from the Throne which was read at the opening of Parliament yesterday contains some interesting passages. It deals severely with the Cabinets which preceded that headed by Mahmud Shevket Pasha, on the ground that they were too ready to concede all to Turkey's enemies, and refers in moving terms to the disasters sustained by Turkey in the Balkan War and to the loss of Mahmud Shevket Pasha, the victim of a treacherous plot. After referring with natural satisfaction to the re-occupation of Adrianople, which dispelled the pessimism that had brooded over the nation in consequence of its defeats and gave hope of a renewal of national vigour—though one gathers that the German officers of the Military Mission would hardly endorse what is said of the Army's present readiness for war—the Speech deals with the question of the Islands. After noting that the Cabinet which fell before the *coup d'état* of January 23, 1913, had left the question of the Ægean Islands which lie off the coast of Anatolia in the hands of Europe, the Speech continues:

> By the London Protocol the future status of the islands of the Archipelago was left to the decision of the Powers in accordance with their wishes, with the reservation that the assured and pacific possession of Anatolia by Turkey should be taken into consideration. But the contents of a Note afterwards presented by the Powers to the Sublime Porte made us understand with sorrow that the islands, the possession of which is necessary for us if we are to be guaranteed that calm and tranquillity which we require for the progress and development of Anatolia, were abandoned to Greece. In its reply, our Government explained why it was unable to accept this decision, and made it understood that our Empire, while realising the importance and value of the maintenance of peace, would continue its efforts to obtain its rights. I trust that it will be possible to settle this question pacifically in a manner in conformity both with this point of view and with our essential interests.
>
> There can be no reason to doubt that Italy will shortly restore the islands which she is obliged to evacuate and surrender by the Treaty of Lausanne.

Other passages deal with the economic condition of the Empire, which has respected its engagements in the most difficult moments; the economic and commercial agreements concluded and pending with foreign Powers, the engagement of foreign specialists, the necessity of a strong fleet, the construction of ports, and the extension of the railway system. Concessions have been actually granted for the construction of the Samsun Sivas, the Sivas-Harput-Argana-Bitlis-Van, and the Erzinjan-Bikritch, Rayak-Ramleh and Smyrna-Dardanelles railways.

The general impression caused by the Speech is satisfactory. There is a hint of coming trouble with Greece if the Island question is not settled in accordance with Turkey's wishes, but one must make allowances for the natural desire of the Government to create an impression in Athens that some sort of a compromise is necessary.

The Policy of Pinpricks.

Meanwhile both Greeks and Turks seem to be indulging in a somewhat petty and mean policy of pinpricks at one another's expense. Both are contributing to the forced emigration of minorities. Moslems leave Macedonia in shoals, and the Greeks have not yet ceased to quit Thrace. Moslem peasants in Macedonia are the target for all sorts of petty annoyances. Moslem notables at Salonika and other towns are from time to time arrested, taken to the lock-up on charges of conspiracy, and released after days. Greek children at Constantinople who wear sailor hats with "Hydra" or "Averoff" on the ribbon, unlucky recipients of "patriotic" picture postcards from too enthusiastic friends in Hellas, mothers of bold bad schoolboys who sport Greek rosettes or blue and white ties, all go to the "Karakol," and are sometimes fined for their sins; sometimes, in the case of adults, tried by court-martial and imprisoned. The authorities, moreover, have begun to discover a prodigious number of dilapidations in Greek houses in the villages near Constantinople, and are pulling them down. Turkish houses, strangely enough, do not seem to suffer from dilapidation! The policy now in vogue is unworthy of an Empire with a great past or of a monarchy which aspires to a great future. It would be so much easier and simpler for the Turks to order shops to abstain from the sale of Hellenic ribbons and "Averoff" hat-bands, and for the Greeks to forbid their post offices to transmit postcards bearing legends or illustrations offensive to Ottoman sentiment to addresses in Turkey. But the most sensible course is not that which is usually followed by most Near Eastern peoples.

Turco-Russian Relations.

The Minister of the Interior has returned from Livadia, where he has had a most friendly reception from the Tsar and his Ministers. The growth of a friendlier feeling between Russia and Turkey has become very marked of late. It is to be hoped that this change for the better will be durable. Much depends on the inspectors-general of the two Armenian sectors, and on the manner in which their efforts are seconded by their staff and by the Ministry of Finance; for if the gendarmes and police, not to mention other functionaries, are not regularly paid it is hopeless to expect much improvement. It will also be necessary to strike down some of the Kurdish Beys, men like Hajji Musa of Bitlis, of whose crimes murder and rape are the least, and who are more dangerous to the Government than ridiculous dervishes, such as Selim, Seyyid Ali, and Shehab-ed-Din of Hizan. The Government must strike hard if any of these chiefs give any trouble. Its operations against Musa in 1912 were conducted in a manner that gave foreign onlookers the disagreeable impression that it was indulging in an expensive *comedietta* and meant no harm whatever to that villainous but influential robber chief.

SERVIA AND THE PHANAR.

Apparently the negotiations which have been for some time past in progress between the Phanar and M. Stephanovitch on the subject of the Orthodox dioceses in New Servia have resulted in an agreement in principle. As has already been pointed out in The Near East, the transfer of sovereignty in Servian Macedonia has made it necessary for the local Orthodox bishoprics to leave the jurisdiction of the Œcumenical Patriarchate and become subject to that of the National Orthodox Church of Servia. It appears that the Phanar claims some compensation for the loss of its patronage in so considerable an area and suggested as a suitable sum £32,000. The Servians, however, preferred to pay an annual £1,200 in lieu of a capital compensation. It is not known whether the Patriarchate intends to maintain its bishops in those sees which have passed to Bulgaria—as being a schismatic country—but if not, the Phanar will still retain jurisdiction in Europe over eleven bishoprics—Adrianople, Dimotika (Didymoteichon), Enos, Gallipoli, Eregli (Heraklea), Ganosachora, Chataldja (Metrai), Chorlu (Tyroloi), Derkos, Viza, Kirk Kilisse, and over part of that of Aghtebolu (Sozagathoupoli), the episcopal city of which is now in Bulgaria.

LETTER FROM CAIRO.

(From Our Own Correspondent.)

Cairo, May 14.

Progress of the Provinces.

The central topic of conversation and discussion continues to be the Khedive's recent tour. The vernacular Press is still full of articles laying stress on the significance of this journey. His Highness has addressed a letter to the Prime Minister expressing his appreciation of the warm welcome that was extended to him everywhere and his satisfaction at the very great progress which, it was evident, had been made in the provinces. Of the accuracy of the Khedive's observation there can be little doubt. Thanks to the initiative of the mudirs and of the provincial and municipal councils, the last few years have witnessed an enormous advance in the civilisation and improvement in the conditions of the provinces, even in the most distant parts, and the growing prosperity of the fellaheen is unmistakable. Moreover, the cutting of agricultural roads and the laying of new main and light railway lines have had for effect an opening up of the country which would certainly account for the great progress noted by the Khedive. One erroneous statement has crept into the native accounts of the tour. It is freely stated—and undue significance is attached to the fact by the quidnuncs—that on this journey his Highness received no British officials. This is absolutely untrue. Not only was he accompanied during the best part of the tour by high British officials, but at each mudiria town the British inspectors were especially included in the invitations to the receptions, and presented to the Khedive, who went out of his way to show them every attention and demonstrate an interest in their work.

Egyptian Subscriptions for Turkey.

The Turkish airmen, Salem Bey and Kemal Bey, have arrived safely, and are now being fêted by the committee at whose head is Prince Aziz Pasha Hassan. Efforts are being made in the vernacular Press to raise further subscriptions for the purpose of presenting Turkey with aeroplanes, and so far since the flights from Constantinople first started about £E1,400 has been collected. It will be interesting to observe whether the Egyptians display any alacrity and generosity in their response to the appeal that is now being made to their loyalty to the Caliph. It is sincerely to be hoped that they will not allow themselves to be persuaded to unloose their pursestrings in order to go to the assistance of their suzerain. The Egyptians have suffered only too much in the past owing to their readiness to become the "milch-kuh" of the Turks. During the recent three wars they sent hundreds of thousands of pounds to Tripoli and Constantinople, and thereby proved their loyalty to the Caliph. To-day, leaving out of the question the fact that there is no excuse of a war, conditions have changed. Owing to the turn of the wheel of destiny, Egypt and her sons are being called upon to face what might be called a critical period, when every penny that is available will be required. The present is not the time to pour money out of the country. If the rich pashas and beys have any money to spare, it is their duty to use it to assist their poorer brethren to tide over whatever tight period is in store for them. That is the direction in which their charitable feelings should turn. But, setting aside the question of charity and sentiment, the raising of these subscriptions for comparatively foreign objects is a serious matter for the Government. As it is, it is finding it difficult enough to provide the money necessary for the many works of public utility that must be executed, and that will confer such countless benefits on the country; and it will probably have to find new sources of revenue. Under these circumstances, it cannot remain indifferent to the raising of these so-called patriotic funds, which can have but one result—that of reducing the resources of the fellaheen and of diminishing their taxability.

The Legislative Assembly.

The Legislative Assembly has had several meetings this week, and has succeeded in disposing of some of the measures that have been awaiting its approval. The Court of Criminal Appeal Bill, which has aroused no little discussion, has at last been passed, the Government refusing to accept the amendment that all death sentences should be susceptible of appeal, if passed by a majority of votes of the judges of the Assize Court. On the other hand, the Bill dealing with the punishment of Customs House officials caught smuggling was rejected by the House, as it held it to be unsound. The Weights and Measures Bill setting up official standards and inflicting punishments on traders and others using bad weights and measures has also been passed by the Assembly with one or two modifications. As this law has already been approved by the Mixed Courts, it should come into force very shortly, as the modifications now made do not involve questions of principle.

The Agricultural Co-operative Syndicates Bill is still being discussed in Committee. The Wakfs Budget has given rise to the lodging of many objections by the Committee entrusted with the work of examining it, and it is expected that a lively discussion will ensue when the report is presented to the House. Various questions touching on controversial and delicate matters had been addressed to the Government by some of the delegates. It is satisfactory to note that they have now been withdrawn; for no useful purpose could have been served by pressing for answers which would only have led to acrimonious debates.

The Memory of Fathy Pasha Zaghlul.

On Friday last a great meeting—one of the greatest of its kind that has been witnessed in Egypt—was held at the Khedivial Opera House in memory of the late Fathy Pasha Zaghlul. The building was packed, and representatives of every community were present to do honour to this distinguished son of Egypt. Eloquent speeches were given by Rushdi Pasha, Sarwat Pasha, and many others, and various odes were read, after which Saad Pasha Zaghlul rose to return thanks. It was with difficulty that he could say anything, for he still feels the loss of his brother, to whom he was very devoted.

AUSTRALIANS IN EGYPT.

(From Our Own Correspondent.)

Suez, May 11.

The Orient steamer from Australia on Saturday afternoon disembarked over two hundred and sixty passengers, who proceeded by special train to Cairo. They will rejoin the vessel at Port Said after seeing the Pyramids and Sphinx by moonlight, and such other sights as there will be time for during the few hours of their stay. This break in the long sea journey has lately become a regularly organised affair, on the Orient Line in particular, and appears to be very much appreciated. Not long ago the excursionists had the experience, doubtless temporarily very disagreeable, but at least possessing the charm of novelty for most, of being held up for an hour or two on the train in the desert some miles away from Suez by a sandstorm. The season of hot winds, known as the khamaseen, is nearly over now; but the Suez to Ismailia journey by train is always a dusty experience, the line passing over sheer desert from start to finish, and there being little protection afforded against the sand-laden indrift of air.

The Egyptian State Railways run very fine trains on these special services, and the ordinary trains suffer much by the proverbially odious but inevitable comparison. Presumably only the best is good enough for the casual visitor.

TURKISH AIRMEN.

The Flight to Egypt.

(From Our Own Correspondent.)

Port Said, May 9.

Salem Bey, with his passenger Kemal Bey, flew to Port Said from El Arish on Tuesday, the 5th instant, arriving at five o'clock in the morning. Despite the early hour of arrival a most enthusiastic reception awaited them, the native population in particular showing keen appreciation of the exploit, carried out in the face of many difficulties and dangers. It will be remembered that two previous attempts had been made by Turkish aviators to fly from Constantinople to Cairo, both of which unfortunately ended in disaster and loss of life.

The aviators stayed in Port Said two days, during which time they were fêted and entertained by the leading natives of the town. Dinners and dances followed in rapid succession, and the festivities ended on Thursday evening with a banquet at the Eastern Exchange Hotel, given by two of our principal native merchants, at which 150 guests were present, including the Governor of the Suez Canal, Heddaya Bey, several of the foreign Consuls, and many leading residents. On Wednesday afternoon Salem Bey gave exhibition flights in his Blériot monoplane, in the handling of which he displayed considerable skill and audacity. He is an experienced pilot, having gained his brevet in France two years ago.

The airmen left for Cairo at 5 a.m. on Friday, but were forced to descend at Tel-el-Kebir owing to engine trouble.

THE HEALTH OF KHARTOUM.

The Sudan Herald (May 2) has an article on "The Healthiest City in the World," which is the title claimed for Khartoum. This claim "is abundantly borne out by medical statistics, the death rate from disease being below that of any other city, and out of all comparison with that of any other large tropical or sub-tropical town or city." The article continues:—

If this fact of the wonderful health which is always prevalent in Khartoum year in year out were generally recognised, we wonder would the rush and keen anticipation of getting away on leave be so great. The almost perfect health of the city is, of course, in the first place directly attributable to the workings of Dame Nature, who here so lavishly sheds sunshine, the most health giving property there is.

In the second place it is attributable to the work of the Department of Health. The result of its work is given in the following passage:—

A score of years ago if anyone had predicted that Khartoum would eventually be a mosquito free city the statement might have been accepted, but on the understanding that gardens and all cultivation were an unknown quantity; yet at the present day we possess in Khartoum a city of wonderful verdure (the number of grass lawn tennis courts far exceeds that of any other tropical town), and yet are free from the mosquito pest.

EGYPTIAN STUDENTS' FIGHT.

The Daily Mail (May 18) has the following account of a students' quarrel at Edinburgh University:—"During a lecture in the Surgeons' Hall, Edinburgh, where a number of the students were studying for the degree of dental surgeon, paper pellets were thrown across the room. One struck an Egyptian student on the face. Flushed with anger, he turned round and asked a South African sitting behind him if he threw the pellet. The South African denied having done so, but the Egyptian, it is said, kicked him on the legs. Blows were exchanged, and instantly the class was in an uproar. Order was restored on the arrival of two tutors. Later the two men decided to "fight to a finish" on the Blackford Hill, which adjoins the city. Each chose two seconds, and a crowd of students followed. It was arranged that the combatants should stand back to back, march three paces forward, turn round, and then begin a bout of fisticuffs. The fight was fierce from the first. Ultimately the South African, the heavier of the two, got home several telling blows and knocked his rival down. Angered by the cheers of the South Africans the Egyptian seconds set upon the rival party. One Egyptian, it is said, drew a revolver and "covered" an opposing second. The South Africans, now superior in numbers, immediately disarmed the Egyptian, and by the time the police reached the summit of the hill the fight was over.

NOTES FROM BULGARIA.

(From Our Own Correspondent.)

Sofia, May 17.

Bulgaria's Hopes.

The statement made by Sir Edward Grey in the British House of Commons that the Powers were negotiating among themselves about the propriety of recognising the new state of affairs which has arisen in consequence of the Treaties of Bucharest and Constantinople, has revived the widely cherished hopes which are entertained here for revision. The present divisions of the Balkan peninsula are frankly impossible. They are justified by nothing except the vast forces of bayonets with which New Servia and New Greece are occupied; for they have no foundation in ethnography, and are in defiance of the economic and political needs of the territories in question.

The Chamber.

The Chamber was occupied during the whole of last week with the debate on the proposal to inquire how far the Gueshoff and Daneff Cabinets were responsible for the country's recent misfortunes. The leaders of most of the groups represented sketched the views of their parties on the subject; and the most promising fact that emerged from the discussion was that, for the moment, all parties abandon their partisanship and unite in declaring that Bulgaria must be strong. This is distinctly a step in the right direction, for hitherto this necessity has hardly been recognised; but now all parties show themselves favourable to the idea of increasing Bulgaria's military strength.

The most interesting contribution to the debate was made by Mr. Constantine Hajji Caltchoff, a big banker of Philippopolis and deputy for Gumuljina. He told how in November, 1913, he was sent by the headquarters of the Bulgarian Army to Constantinople to negotiate with Kiamil Pasha, and how Kiamil consented to the Enos-Midea frontier. In order to make his points clear he read from cipher telegrams. The first, from Dr. Daneff, asked Mr. Gueshoff to obtain the Cabinet's consent to his (the speaker's) being sent to negotiate with Kiamil Pasha; the second, Mr. Gueshoff's reply, stated that the Cabinet failed to see the need of despatching a special delegate to Constantinople. On November 26 King Ferdinand wired to Mr. Gueshoff: "I approve fully the proposal of the President of the Narodno Sobranje regarding the mission of Constantine Caltchoff, and advise prompt action." The fourth telegram read was from Mr. Gueshoff, and stated that the Cabinet, "fully conscious of its grave responsibility at that fateful time," asked his Majesty to receive the Minister of Finance to report on the proposed mission. Mr. Caltchoff, the telegram added, could not then go as a private individual because Bulgarians were not allowed to enter Constantinople, and it would therefore be necessary to appoint him as a special delegate.

Mr. Caltchoff's remarks regarding his mission made a strong impression in the House; for he proved incontestably that had Mr. Gueshoff's Government desired to conclude peace after the battle of Lule Burgas it could have done so at once, since Kiamil Pasha was ready to make all possible concessions.

The debate on the inquiry will not be over until next Wednesday. Then will follow the debate on the reply to the Speech from the Throne, and afterwards the debate on the regular Budget, which ought to be concluded by June 13 and the Budget adopted; for on that date the credit of the provisional Budget voted by the present Sobranje expires.

THE SITUATION IN SERVIA.

(From Our Own Correspondent.)

Belgrade, May 17.

Reappearance of the Regicides.

In consequence of the arbitrary conduct of the late King of Servia disaffection spread through all ranks of the community, and led to actual mutiny in the army, but the methods adopted by a comparatively small clique of daring officers to annihilate the Obrenovitch dynasty not only met with universal disapproval throughout the whole civilized world, but were also condemned by many officers of the Servian Army, as was shown by subsequent events. This body of military adventurers, however, has always retained a considerable influence, and many of them were permitted to take part in the late war, and therein earned promotion. Amongst these was Colonel (now General) Damian Popovitch, the leader of the conspirators of 1903, and one of the chief causes of the present friction between the military and civil authorities.

An Official Inquiry.

One may fairly say that the country is in the throes of a great crisis, and that since the change of dynasty in 1903 the public has seldom been in such a nervous state. Since the reopening of the Skupshtina, after the Easter holidays, pressing Parliamentary work has been neglected, and the Chamber has been occupied with questions concerning the position of the Army in relation to the civil power, which is nothing more or less than a conflict between the two. The first outcome of this friction was the resignation of the previous Minister for War and the subsequent pensioning of two generals, one of them being General Damian Popovitch, which was followed by the Government appointing a Commission of Inquiry to investigate the affairs of the Officers' Co-operative Society.

This action of the Government has aroused the displeasure of the corps of officers, and the Government having suspended the director and administrators of this society, the officers showed their resentment of the Government's action by calling a meeting of delegates representing the officers of all regiments in the country, who promptly reinstated the suspended officials of the society, and, to crown all, elected General Damian Popovitch chairman of the administrators.

The Inquiry Justified.

The Government's justification in ordering an investigation into the state of the Officers' Co-operative Society is evident when it is borne in mind that three and a-half years ago the society obtained a loan of £160,000 from Russia under the Servian Government's guarantee. As it is, the Commission of Inquiry appointed by the Minister for War and the Minister of the Interior declares that there is a deficit in the society's business of about £40,000, and that irregularities have been discovered in connection with payments made by its officials for debts owing by officers and in connection with the failure to remit accrued interest to Russia. The officers now demand the nomination of a new Commission of Inquiry on the plea that the events of the war necessitated the seeming irregularities, and that the existing Commission of Inquiry has not acted impartially.

A Question of Precedence.

The conflict with the Government is not, however, limited to this episode. The officers, led by the more daring spirits, refuse to be subordinate to the civil functionaries on ceremonial occasions—they demand priority, and especially in the newly acquired Servian territories, and even go so far as to declare that these provinces should remain for five years under military rule. In virtue of a law of 1905 which subordinates the military to the civil power on ceremonial occasions, the Government by a recent administrative order made the military subservient to the civil authorities on such occasions, inasmuch as the latter represent the State. A soon as General Damian Popovitch became aware of the administrative order he criticised it in a very unrestrained manner, and informed the Minister that he refused to obey it, upon which summary measures were taken and he was retired on pension.

Parliament and Press.

Unfortunately the united Opposition in Parliament, anxious to overthrow the Ministry, has taken advantage of this conflict with the officers.

In order to bring this crisis to a close, two Ministerial deputies made an interpellation calling on the Government to give an explanation of the facts concerning the conflict between a body of officers and the civil authorities. After explanation given by the Prime Minister, a vote of confidence was taken which resulted in seventy-seven votes for the Ministry and fifty votes against.

The Opposition, however, determined not to be so easily vanquished, is raising the question of confidence in another form; but beyond all doubt the result will be the same as before. The Press is taking a very active part in the discussion, and greatly increases the excitement of the public. The newspaper *Piemont*, which is said to represent a clique of officers, is particularly violent and subversive in its language.

The Royal Amnesty.

By Royal decree of May 15 a general amnesty has been granted to political offenders. In this amnesty are pardoned all persons who have been tried and condemned previous to October 25, 1913, as spies or for insulting the Crown, civil officials, or parliamentary deputies, or for conspring to revolt or offering resistance to the authorities. The amnesty includes foreigners as well, all of whom have been already liberated.

NOTES FROM ROUMANIA.

(From Our Own Correspondent.)

Bucharest, May 18.

Foreign Relations.

Much discussion has taken place in Hungarian journals of late on the subject of the fortification of the frontier towards Roumania. The Government papers declare that the question should be brought before the Delegations. This attitude is doubtless the consequence of the revival in some Roumanian journals of the idea that after the acquisition of the Bulgarian territory the next task of the Roumanian nation lies towards the west. So long as Roumanians inhabit Transylvania the idea will continue to exist, but only as an idea. It is Roumanian interest in Transylvania, as well as the leaning towards Russia of late, that has produced the feeling of coolness between Austria-Hungary and this country.

Servians and Kutzo-Vlachs.

The journal *Dreptatea* hears from Monastir in New Servia that the Kutzo-Vlachs are being terribly ill-treated by the Servian authorities. "Throughout the Balkan wars," its correspondent writes, "the misery of the Macedonian Roumanians was never so great as at present. They are forced, in order to help in maintaining and building Servian schools, to subscribe immense sums. The Servian authorities have commenced a campaign of extermination."

A local journal states that M. Porumbaru, the Roumanian Minister for Foreign Affairs, received a letter yesterday from Mr. Vanghele Ciamba, a Kutzo-Vlach leader in Servian Macedonia, containing information to the above effect. It also reports that thirteen women from among the leading Kutzo-Vlach inhabitants were barbarously arrested on various flimsy excuses, and that the Servian authorities carry their oppression so far as not even to allow marriage invitations to be printed in the Roumanian language. And yet the Servians had declared that all religious and educational liberty should be accorded to the peaceful Roumanian population.

An Albanian Protest.

The Albanian colony held a large meeting on Tuesday in order to denounce the acts of the Greeks in Epirus, and passed a resolution calling on the Powers to put an end to the terrible state of things in Southern

Digitized by Google

Albania. A circular was also addressed to the heads of the various foreign Missions, begging them to request their Governments to take measures accordingly. The Greek Legation here, however, denies in a most emphatic manner the news from Durazzo that the Epirotes have crucified 200 Albanians and all reports of a like character published of late in the papers.

Child Torturers.

It is generally believed that what is termed in Russia "angel making" exists no longer in civilized Europe, but a case just brought to light at Bucharest proves the belief to be unfounded. A few days ago a little child died in the hospital here, whose leg had been broken by its foster-mother, a gipsy named Banga. It appears that she took the child from peasant parents on payment of a small sum, and that her object was to collect money by exhibiting its deformities. Another victim of this demon in human form is a child eight years old, whose fingers have all been cut off. The arrest of this woman led to the discovery of quite a band of gipsies employed in this damnable trade, who have all been arrested. Yet another victim is a pretty little girl of twelve years of age, with golden hair and blue eyes. Her right foot is practically wanting, and her left leg was covered with sores produced to excite compassion. Her "owner" declared that he hired her from another gipsy for two years at 30 francs per month. This child was driven through the villages and to fairs. In the villages and at the fairs, eggs, maize meal, and the like were given her by sympathisers. From 3 to 4 francs was made daily. The child cannot remember her parents, her earliest recollection being of an old gipsy woman who bound her leg and foot till they became useless.

No less than twenty-three children, about one-half of whom have been maimed, have been found in the hands of the gang. All these show signs of vaccination, whilst none of the gipsies' own children do, proving that all of them have been acquired or stolen within the last six months, as just six months ago all children were vaccinated in accordance with a decree passed at that time. The papers demand that special measures should be taken by the police to root out this terrible trade, as it is believed that the band captured is only one of many such existing.

INDIAN MOSLEMS AND THE BALKANS

In behalf of the Committee of the London All-India Moslem League, a letter has been addressed to the Under Secretary of State for Foreign Affairs inviting his attention to several articles in *The Jeune-Turc* giving details of the cruel treatment to which the Moslem inhabitants of the provinces ceded to Greece have been and are still subjected by the Greeks. The charges made in that paper appear to the Committee to be corroborated by the fact that since the beginning of 1913 over 200,000 men, women, and children have abandoned their homes. "It is impossible," continues the letter, "to conceive that, had these people been treated with ordinary justice and humanity they would have left the land which their forefathers had occupied for centuries, and abandoned in the hands of their persecutors their farms, their flocks, and their chattels, to seek shelter and bread in a strange land." Reference is made to a representation submitted to Sir Edward Grey on the first of November last by the Committee, praying that his Majesty's Government should obtain from the Balkan States the recognition that the international obligations of the Treaty of Berlin guaranteeing full religious and civil liberty and equality to all sections of the population and to their institutions, within the new territories as well as in the old, are binding upon each State, and an assurance that these obligations will be faithfully fulfilled. The Committee "had hoped that working under the eyes of civilised Europe and of the great signatories to the Treaty of Berlin, the Balkan States would treat their Moslem subjects with ordinary humanity. But it appears that in order to populate their newly acquired territories with people of their own race and religion the Greeks have subjected the Moslems to a system of deliberate and appalling cruelty." In conclusion, the Committee express their earnest desire that the Indian Mussulmans should resume their normal feeling of amity towards the Western world, but point out that while the present condition of affairs continues in Macedonia it seems well-nigh impossible to allay the excitement and bitterness that prevail in India. They, therefore, earnestly pray that the Secretary of State should institute inquiries and take steps to give effect to the provisions of the Treaty of Berlin, in order to afford to the Moslem people in the ceded territories the free enjoyment of their civil and religious rights, and to obtain compensation for the unfortunate exiles.

NOTES FROM BEYROUT.

(From Our Own Correspondent.)

Beyrout, May 11.

Jew and Arab in Palestine.

Last month was prolific in distinguished arrivals in Syria. Baron de Rothschild came first in his magnificent yacht, then Mr. Morgenthau, the American Ambassador to Turkey; and it is legitimate to suppose that the visit to the Holy Land of these leading figures in the financial and diplomatic world is not unconnected with the important interests of Jewish colonization in Palestine. Indeed, Mr. Morgenthau is said to have declared openly that he will lend all his personal and official influence towards the development of these interests, while the generous donations of the Baron in favour of Moslem institutions are not without significance.

One of the ardent Arab organs was lately immediately suppressed for quoting the words of the Ambassador and indulging in some severe criticism of them. The Arab press continues, however, to be deeply perturbed by the rapid growth of Jewish influence and colonial expansion. It is now reported that the agent of Baron de Rothschild has recently acquired the concession for a drainage scheme in connection with the marsh lands of Az Zarkaa and Kebara, whose area is said to be over 2,000 acres, and which lie on the sea shore bounded to the East by the flourishing colony of Zummarin, and to the South by Tantourah. The local press now alleges that this concession had been obtained by two native notables, one of whom has actually started the work of drying up the marshes, but that the Government has thought fit to invalidate the concession on illegal grounds. It further alleges, rather illogically considering its previous contention, that such a concession is calculated to lead to the stopping of eighteen mills that have hitherto been turned by the waters of Az Zarkaa. The more reasonable section of the Arab press, finding that direct opposition and a hostile campaign are fruitless, is now seeking to preach a conciliatory policy.

The list of distinguished visitors includes Oskan Effendi, the Minister of Posts and Telegraphs, who has come on an unusual tour of inspection to Syria, as a result of which some improvements and reforms in the service are already manifesting themselves, although there is still room for many more.

Lord Bryce on the S.P.C.

Other distinguished visitors were Lord and Lady Bryce. The President of the Syrian Protestant College obtained for the public and the students of the College the privilege of attending an interesting and inspiring lecture by Lord Bryce. After paying a tribute to the East, and gracefully acknowledging the debt which the West owes to the former, he referred to the unfortunate concourse of historical events which led to the multiplication of races and religions in this land, and to the consequent dissensions and jealousies that led to its pitiful degradation. The Syrian Protestant College, he said, has the unique advantage of recruiting its host of students from many and distant parts of the Near East. Moslem and Jew, Christian and Druse, Bulgar and Armenian, Syrian and Egyptian, even men from distant India and Persia, all work side by side in the field of knowledge, imbibe the same principles of a higher humanity, and therefore constitute the leaders of a future army of peace and good fellowship, in whose hands lie the work of regeneration of this beautiful, inspiring, but neglected land. With generous enthusiasm he declared that his pride and joy would not have been any deeper if this great and noble institution had been founded and directed by his own countrymen.

NOTES FROM SALONIKA.

(From Our Own Correspondent.)

Salonika, May 14.

The Prime Minister's Tour.

The most interesting event of the last fortnight has been the tour of Mr. Venizelos, who, accompanied by the Ministers of the Interior and of Justice, arrived here by sea on the morning of the 1st inst. Before eight o'clock a large crowd collected at the landing place and along the road to the hotel; while a little later the Governor-General, the Prefect, the civil, military, and religious chiefs, and the notables of the town put in an appearance. As soon as the torpedo-boat destroyer bringing the visitors anchored, a salute was fired from a battery; whereupon the higher officials went off in boats to greet them. The landing took place almost immediately; and after the customary presentations had been made, all walked to the hotel amid the enthusiastic cheers of the people assembled.

On the afternoon of the 2nd, Messrs. Venizelos, Repoulis, and Ractivan, accompanied by the Governor-General, with a number of superior officers, left for Eastern Macedonia, making short halts at Serres and other towns on their way to Drama—at which place, by the way, we were told perfect order reigned, although the eighty Turks and thirteen Bulgarians who had recently been arrested confessed that they had been preparing a revolutionary movement, arms having been discovered in the neighbouring villages.

The party arrived at Kavalla on the afternoon of the 4th, where they had another great reception from the authorities, the Bishop, the Grand Rabbi, the Mufti, the Consular Corps, and different schools going out to meet them. Leaving Kavalla by motor car for Drama in the afternoon of the 5th, Salonika was reached by special train at eleven p.m. after a most satisfactory, if hurried, inspection of the eastern part of the new territories. Wednesday, the 6th, was again a busy day, Mr. Venizelos visiting several schools, and receiving deputations of members of the Chamber of Commerce and other public bodies. Mr. Ractivan, however, had to leave for Athens, his presence there being needed in the matter of the publication of the nominations of judges. On the 7th the Prime Minister and Mr. Repoulis left by special train for the western provinces, to visit Vodena, Florina, and Niaousta, returning here the following evening. Further visits and audiences, with a run out to Kilkitch, filled up Saturday the 9th, and the following morning Mr. Venizelos and Mr. Repoulis left Salonika on their return to Athens. On embarking, the Prime Minister remarked that he had gathered the best impressions from his journey in the interior of Macedonia, in which provinces an ideal condition of order and security prevailed. So came to a close this visit from which so much was hoped; but whether the hopes indulged in will be realised seems doubtful. Take, for instance, the raising of the moratorium, which Mr. Ractivan promised for to-day. That is again deferred, and will continue to weigh us down for at least another three or four months; the position being that merchants of the late Turkish provinces now under Greek, Servian, or Bulgarian rule, still owe to Salonika from a million to a million and a quarter pounds, and that every day's delay in the raising of the moratorium makes the situation worse, and the payment of these outstandings more doubtful. And if they are not eventually paid, merchants of this town will find themselves in an exceedingly difficult position as regards their foreign creditors.

The Free Zone Question.

As to a free zone, we are to have that, although many contend it will be of no great benefit to us. Servia, Austria, etc., will find it to their advantage, but not Salonika. Very few, however, seem to understand what a free zone really means, or how it is to be worked. Mr. Venizelos invites suggestions, which nobody seems capable of satisfactorily elaborating. Among other things for which the Chamber of Commerce asked was this raising of the moratorium; and for Salonika to be made a free town and port, a free zone being considered by them an insufficient palliative for the loss of its old economic hinterland. To this latter request, Mr. Venizelos replied that "the question of making Salonika a free town is quite inadmissible as, under no pretext in a State such as the Greek, would it be possible to allow the creation of a free town to be governed in a manner different from that of the rest of the kingdom. Consequently, not even a simple discussion could be allowed on this subject. The free zone has been studied and decided upon, and I beg of you to elaborate your views as to that zone." Further, the Prime Minister said, the project leaving Salonika out of the direct European line is definitive; and although he maintains his optimism as regards the future of this town, that feeling is certainly not now shared by the public here. It is no use blinking the fact that, although its statesmen may have the very best possible intentions as regards this town and the new provinces, Greece is a small and impecunious country, altogether unable to nurse and foster its new possessions. It cannot afford to be generous towards them; it needs money itself, particularly now that it is haunted by the nightmare of Turkish dreadnoughts and other terrors. Not even the enlightened statesmanship of Mr. Venizelos can work miracles; and so "Ichabod" may be writ large over the portals of Salonika.

Band Activities.

Among the minor events of the fortnight, we learn of a fight near Demir Hissar between Greek soldiers and a Bulgarian band, in which three of the latter were killed; and of another between Servian troops and *Komitajis*, in which thirty of the latter lost their lives. It is also said—and it has never been either confirmed or denied—that a Bulgarian band attacked a train near Okjilar and carried off eight passengers; while, according to the *Makedonia*, some seventy *Komitajis* tried to cross the frontier near Drama, but were dispersed by the Greek gendarmerie, who took fifty-eight prisoners. To-day's *Phos* tells us that the Greek military authorities are now supplying guns and cartridges to the inhabitants near the Bulgarian frontier, so that they may be in a position to defend themselves. And while all this is going on outside, houses are being continually searched in this town; but what the police find, or expect to find, is not divulged.

A "Terrible English Sister."

It is much to be deplored that the Greek papers are allowed such license in the way of attacking everybody all round at their own sweet will, and so recklessly creating unnecessary ill-feeling. The *Nea Alethea* has just been abusing the Roman Catholics, accusing them of being not only the friends of Bulgarian *komitajis*, but *Komitajis* at heart themselves; that "terrible English Sister Augustine" (one of whose crimes is that she reads and writes Bulgarian fluently) being the chief delinquent. It is true that she has worked hard in the matter of Bulgarian relief, in the prisons and in the town; but it is well-known to all whose judgment is not warped that the Roman Catholic sisters of St. Vincent de Paul, among them Sister Augustine, have been, and are, ever among the first to help and succour all who are in need and distress, whether Bulgarian, Servian, Greek, or Turk.

King Constantine's Visit.

We believe the King is to arrive in Salonika to-morrow, the 15th, and great preparations are being made to give him a right royal welcome. The object of this visit is a tour of military inspection through Macedonia, to last about a fortnight. Our municipality, we understand, has now bought the Villa Modiano, with its grounds, as a royal residence, of which it will make a present to the King on his arrival. It is presumed our high military and civil officials, together with the members of the municipality, are making this present out of their own pockets; it being very well known that the town itself most certainly cannot afford the £16,000 required for the purchase, much as the people would wish to contribute towards such an object in more prosperous times.

LETTER FROM SMYRNA.

(From Our Own Correspondent.)

Smyrna, May 11.

Arrival of German Army Organisers.

Smyrna and the Aidin Vilayet having become the headquarters of an army corps, special attention is being paid to the organisation and disposition of the troops stationed in different centres. The barracks at Kazamir have been completed for some time, and new barracks are being erected at Denizli, instead of at Aidin as originally intended. General Liman von Sanders has now come here to inspect the troops, accompanied by a number of German officers. Smyrna officialdom turned out in full force to greet him on his arrival.

Return of Expelled Greeks.

The protests made by the Greek Government against the expulsion of a number of the leading members of the Smyrna Greek Colony have proved effective, as an order was issued permitting the return of those affected. These constant expulsions do no good to the Turkish Government, and only help to inflame the already too heated feeling between the Greeks and Turks. Notwithstanding the Grand Vizirial order for its general cessation, the boycott movement has not abated much, and trade is almost at a standstill in many parts of the province. Efforts have been made by Turks to conduct various businesses, such as flour mills, grocery shops, etc., but little success has attended these efforts. It has taken the Greeks generations to master the intricacies of trading in Turkey, and it clearly is not possible to supplant them successfully at once.

RUSSIAN TROOPS IN PERSIA.

(From Our Own Correspondent.)

Odessa, May 17.

The 81st Apscheron Infantry Regiment and two batteries of the 21st Artillery Brigade, coming from Tabriz, returned to the Caucasus a few days ago. The Russian Press has given some prominence to the announcement of this withdrawal of troops from Azerbaijan, one leading organ hinting that it should allay the anxiety professed to have been felt in England by Russia's continued military occupation of northern Persia. It may be noted, however, that the announcement of this withdrawal does not mention the fact that the troops withdrawn last week were all time-served men. There have been previous withdrawals in comparatively small complements, but in every case they were replaced by fresh drafts from the Caucasus. The Press duly announced those withdrawals, but said nothing of the replacements. According to a semi-official Tiflis journal the strength of the Russian garrisons "now remaining" in northern Persia is 12,400.

The Ex-Shah.

The idle reports current a few weeks ago concerning Mohammed Ali's intention to make a last desperate essay for the recovery of his lost throne before the date fixed for the coronation of his son in July have subsided. There was never, so far as I can learn, any foundation whatever for those reports, first put into circulation by one or two Berlin journals. The ex-Shah remains, since his return three weeks ago, secluded in his suburban villa here.

The semi-official Bulgarian Telegraph Agency has received a message from Adrianople stating that several agents of a well-known Paris firm of cinematograph film manufacturers have arrived there with the authority of the Ottoman Government to take photographs, with a view to a cinematograph reproduction of the siege of Adrianople. Several detachments of soldiers have been placed at the disposal of the firm's representatives, and have been carrying out manœuvres at Serai, on the Taschtabia road, to furnish film records. The cinematograph artists, however, are not satisfied with these displays, and have suggested that several villages should be burned in the neighbourhood of Adrianople, undertaking to pay liberally for all damage done. The Ottoman authorities, the semi-official statement continues, have not yet replied to this proposal.

NOTES FROM MESHED.

(From Our Own Correspondent.)

Meshed, April 24.

Until recently the provinces of Khorassan and Seistan have been under one Governor-General, whose residence has been in Meshed. But a few months ago the territory was divided. Northern Khorassan remains under the Governor-Generalship of Prince Nayar-ed-Dowleh, who was so closely connected with the person of Nasir-ed-Din Shah during the reign of that monarch. The Kainat, which is the southern portion of Khorassan, and the province of Seistan, have been placed under the Governor-Generalship of Mohammed Ibrahim Khan, whose title is Shokat-el-Mulk, a man about thirty-two years of age, and the eighth in descent from the Arab family of Khuzaima.

After a business trip to Teheran and a visit to Europe, Shokat-el-Mulk recently passed through Meshed on his way to his residence in the city of Birjand, which has a population of from 15,000 to 20,000, and is a thriving business centre. Thus the eastern part of Persia becomes more than ever before divided between British and Russian spheres of influence. In the northern Governor-Generalship Russian influence is predominantly evident, while in the southern Governor-Generalship British influence is by far the stronger.

The following incident has been matter of common talk since Shokat-el-Mulk passed through Meshed, and I give it as I get it from common report.

When Shokat-el-Mulk passed through this city he brought with him an oil painting on light canvas, about seven by thirty feet, representing the battle of Kerbela, which had been purchased by an English lover of Persia to be put into its resting-place in the shrine. With due ceremony it was presented to the authorities of the shrine and hung in the place which the populace said was its former place of honour within the sacred precincts. It was viewed by thousands of people, and I was told that Persians recognised it as a picture which they had been accustomed to see formerly in that place. A few days later, however, an article appeared in both of the daily newspapers of the city, over the name of Murtaza Guli Tabatabai, who is the chief keeper of the shrine, in substance as follows:—

"A picture which an honourable Englishman who loves Persia sent through the Honourable Excellence Agha Ameer Shokat-el-Mulk, Governor-General of Kainat and Seistan, has been received and accepted at the Holy Shrine. Because the idea is current in the brains of the common people that this picture went out from the Holy Shrine and was returned, therefore investigation made in the records shows that in times past no such picture was in the Holy Shrine, and whoever thinks so is in error. Therefore, these few words are written to clear away the misunderstanding from the brains of the common people."

LETTERS TO THE EDITOR.

The columns of The Near East *are always open for the discussion of subjects of general interest to its readers. The publication of such letters must not be taken, however, as indicating that the views expressed by the writers are those of* The Near East.

ORIENTAL STUDIES IN LONDON.

To the Editor of The Near East.

Sir,—We believe that the case for the establishment of a School of Oriental Studies in London comparable to the schools in Berlin, Paris, Vienna, and St. Petersburg is by now so familiar to the public that it does not need re-statement in detail. It has been cogently urged by Lord Reay's Committee, which reported in 1908; it has been endorsed by his Majesty's Government and the Government of India; it was supported by a large and representative meeting of members of Parliament, City men, administrators, and scholars, held under the presidency of the Lord Mayor at the Mansion House on May 6 last. In this letter we desire briefly to summarise the exact position of affairs and to appeal to the public for the sum necessary to enable the school to be opened on an efficient working basis in 1915, when its buildings will be ready.

The site and buildings of the London Institution (valued at not less than £100,000) have been secured for the school by Act of Parliament, and the Government have promised the sum of from £20,000 to £25,000 necessary for alterations and repairs and a new block of classrooms. The plans have been approved, and the contracts will be settled as soon as the building strike is concluded. His Majesty the King has graciously consented to be patron of the school, which will be attached to the University of London under the terms of a Royal Charter now under consideration by the Privy Council. The annual income necessary to teach the principal languages of the East and Africa, spoken by over 800,000,000 people, including over 350,000,000 of his Majesty's subjects, will be £14,000 a year, as compared with £10,000 a year spent at Berlin and £8,000 spent at Paris. Towards this sum his Majesty's Government have promised £4,000 a year, and the Government of India £1,250 a year. The Education Committee of the London County Council have recommended the Council to vote £2,000 a year to the school under certain conditions, and we trust that they will agree to do so. There is thus a balance of at least £6,700 a year to be found. We hope that this sum may be secured, partly in the form of income from capital, and partly in the form of annual grants or subscriptions. We think it desirable that an Endowment Fund of not less than £100,000 should be raised.

Donations and subscriptions may be paid to Sir Montagu Turner (chairman of the Chartered Bank of India, Australia, and China), 38, Bishopsgate, who is acting as chairman of the City Executive Appeal Committee, which has been formed in connection with our appeal; they may also be paid to the head offices, or to any branch of the London County and Westminster Bank. We shall be grateful for such support as you may be able to give to this appeal for a purpose of national and Imperial importance, and trust that it may meet with a ready and generous response from the public.—Yours, etc.,

Cromer,
Curzon of Kedleston,
T. Vansittart Bowater (Lord Mayor),

Montagu C. Turner,
On behalf of the City Executive Appeal Committee.

May 16.

CHURCH AND STATE IN SOUTHERN ALBANIA.

To the Editor of The Near East.

Dear Sir,—One of the best points in your excellent paper is that your correspondents represent different points of view, and that in one and the same number you may be publishing contradictory letters from Athens, Belgrade, and Sofia. I have, therefore, nothing to complain of in the fact that your "Own Correspondent" at Koritza represents the Albanian view, which is at the present moment dominant in that town. It is another matter when you make his letter of April 26 the basis of your leading article in this week's issue on "Church and State in Southern Albania," and take at its face value the petition of the new pro-Albanian "Diocesan Council of Koritza." It is quite possible that when it was occupied by the Greek army Koritza seemed to the world to be more Greek than it really was. It is certain that after the fierce civil war of last month and the temporary triumph of the Albanian element it seems infinitely less Greek than it really is. You yourselves had an interesting article on this very subject in your "Current Comments" of April 17, when you quoted German statistics of a date prior to the war to the effect that about two-thirds of the Orthodox Christians of Koritza "were then disposed to consider themselves as Greeks." Whether the proportion has permanently changed since then, one way or the other, may be an arguable point. My impression is that up to the time of the evacuation of Koritza by the Greek army the Hellenists were in a huge majority, although it is true that some of the Albanian Nationalists had preferred for the time to retire to more congenial quarters further north, and possible that a certain number who remained in the town dissembled their views. It is possible, too, that some of those who up to the moment of the Greek evacuation were genuinely in favour of union with Greece were persuaded by the counsels of the Greek Government that this was impracticable, and that it was better to make friendly terms with Albania. Further, it is common knowledge that directly the Greek army left the town the Albanian element which had retired to Avlona returned, accompanied by large numbers of sympathisers from other parts of Albania. It is, therefore, probable that by the time the fighting took place last month there was a considerable Christian minority in Koritza, who were either Albanian in sympathy or at least not prepared to fight against incorporation. This minority is now able to voice its collective opinion because the *coup d'état* of the other side has failed, its leaders have been imprisoned or have fled the town, and its rank and file are disarmed. To make out, however, as your correspondent does, that this means that the real sentiments of the inhabitants of Koritza are now for the first time brought to light is a particularly absurd instance of the never-failing tendency of the Balkan nationalities (and, one may add, of many of their foreign supporters) to try to prove too much. I confess, Sir, that I am surprised that you have not discounted the exuberance of your correspondent's enthusiasm. His picture of the Metropolitan and the old Diocesan Council imposing Hellenism on a reluctant flock is comically untrue to all the conditions of Greek religious life of to-day. His statement that "there were very few Albanians concerned in the rising" except the Bishop, and that "300 regular troops" of the Greek army attempted to seize the town, is so remote from the facts that it throws doubt on the reliability of all his information. The attempted *coup d'état* was, from the Greek point of view, a miserable failure, and the Greek papers have for the last month been full of mutual recriminations on the part of many of those concerned. From sifting these various accounts it is possible to gauge what really happened. It is, in the first place, certain that the Greek Government not only had nothing to do with the attack, but were from first to last entirely opposed to it. This point, I imagine, you yourself, Sir, would grant, as *The Times* and other English papers have already done. Your correspondent, however, with all the information that he should have been able to secure on the spot, does not grant it. He takes the same line as the "Protestant Albanian Missionary," whose telegram from Koritza was published in *The Times* of April 14, and who affirmed that "after very careful investigation" he had found that "the rising was planned and supported by the Greek Government." The worthy missionary's judgment and knowledge can be estimated by the fact that his only evidence was that a band of eight surprised by "our men" consisted of two Cretans and six men who "came from Constantinople"! If we put out of court these suggestions as to the complicity of the Greek Government there next emerges the curious fact that even the Autonomous Government of Epirus, in whose interests the rising was planned, did not directly inspire it or superintend its execution. What seems to have happened is that the Greek party in Koritza, alarmed at threats of disarmament, sent urgent messages to some of their own fellow-citizens who had left the town that if Koritza was to be won back a blow must be struck at once. This message did not go to the Provisional Government at Argyrokastron, but to the bands of irregulars who were concentrating in the Greek interest on the north-east of the disputed zone. A certain ex-Deputy of the Ottoman Parliament named Bousios, who seems to have had more enthusiasm than military capacity, was put in command of these bands, and led a Jameson's Raid of the most amateur kind against the town. The Greek party inside Koritza began the fighting too soon, and the Albanian gendarmerie, led by their efficient Dutch officers, were able to isolate the Greek inhabitants in their own quarter of the town and hold them, while they repulsed Bousios and his men in the surrounding villages and suburbs. The *fiasco* of the whole affair has no doubt made it politic for many of the Greek party in the town who were not actually the leaders of the movement to plead compulsion. A side-light is thrown on this by a remark of the Protestant missionary that "the Greek officers" captured themselves "confessed" that "the few Albanians who took part were threatened with death if they refused to follow." It was no doubt good sportsmanship and good policy, in view of future possibilities, that such an excuse should be made and accepted, but the missionary and your correspondent (unless by any chance they are one and the same person) were indeed credulous to take it as literal truth!

It is important, Sir, to put the Koritza raid in its true light, not only because any attempt to free Balkan history from partisan prejudices is for the good, but also because your correspondent's account, if blindly accepted, might hinder what we all wish for—the settlement of the Epirus difficulty on peaceful lines. It would be a fatal mistake to imagine either that the Koritza *fiasco* throws any light on the strength of the armed and organised forces of the Autonomous Government, which were never engaged in it at all, or that the present dominance of the Albanian element at Koritza, which naturally followed that *fiasco*, bears any true relation to the strength of Greek feeling either in Koritza itself or in other parts of Epirus.—Yours,

Ronald M. Burrows.

ANTIQUITIES IN TURKEY.

To the Editor of THE NEAR EAST.

SIR,—On every side we are told that Turkey requires business-like methods, and attempts are made, with a great flourish, to show that the Government is alive to the necessity. Yet here is an instance of downright stupidity and unfairness which is affecting the trade in antiquities.

We know that in all countries modern Governments are founding museums, and are anxious to keep all antiquities found in the country for display in these museums.

The Turks are prohibiting the export of such antiquities, but surely they should either buy them from those who find them at great trouble and expense or allow them to be sold, so as to bring money into the country, which needs it so much. At present they do neither, and as they do no digging on their own account, they are simply on the look-out for any stray parcels that merchants may try to smuggle out of the country. These they seize, take to Constantinople, and put the antiquities in their already over-stocked vaults, and forget them until its guardians manage to sell them for their own benefit, and smuggle them out for some rich European who happens to be on the look-out for antiquities.

Allow me to suggest to them, through your influential columns, a wiser course to pursue.

There are similar regulations in Egypt. But there the Government only requires exporters of antiquities to give it the first chance of refusal, when it either buys the articles submitted at a fair price or allows them to be exported. The Turks should do the same without delay, and should, moreover, either pay for the antiquities they have confiscated so far or return them to their owners.

Robbery is not supposed to be a virtue even amongst plain Turks, but when the Government practises it, it has the double effect of impoverishing the subject and of making the rules despicable.—Yours,

A JURIST AND BANKER.

Constantinople, May 15.

THE THRACIAN "PERSECUTIONS."

To the Editor of THE NEAR EAST.

Sir,—A member of the Ottoman Association. writing in a recent issue of your valuable journal, hints that the Association, actuated by motives of moderation or delicacy, kept silence on the subject of the Balkan atrocities in the late war. Another correspondent, in a later issue, asks the awkward question whether the members of that association were or were not responsible for publishing a translation of M. Pierre Loti's denunciation of the atrocities, entitled "Turkey in Agony." This work was published for the Ottoman Committee. At the end of 1913 the Committee divided into two organisations, the Anglo-Ottoman Society and the Ottoman Association. The Association, therefore, did not exist at the time when it is stated to have preserved silence about the massacres and other outrages referred to. But, in the sense that some of its members were then members of the Ottoman Committee, it is certain that they did, *and very properly* bring forth the outrages to public condemnation.

As founder of the Ottoman Committee and secretary of the Anglo-Ottoman Society, I declare that it would be suicidal for any organisation, professing to espouse the cause of justice to the Ottoman Empire and peoples, to have preserved silence in the face of the testimony, not only of M. Pierre Loti, but of M. Maschkoff, correspondent of the *Novoé Vrémya*, and M. Verdier, of Adrianople (as to atrocities in Thrace), and of thirty European journalists (as to atrocities in Macedonia). Far from preserving silence, Professor Leon, and Mr. Adolphe Smith, F.C.S., members of both the late Ottoman Committee and the Anglo-Ottoman Society, have lectured continuously directly or indirectly on the Christian atrocities in the Balkans.

Your correspondent remarks on the diminution of public reference to and interest in these atrocities. That does not disprove the accuracy of the attested evidence; it is in the nature of things that even the most horrible events should become ancient history in their turn. Turkey's task is not to recount her sorrows, but to renew her strength. It is not to weep her lost children in Thrace and Macedonia, but to remove the menace of Greek mastery of the Ægean. If your correspondent thinks, however, that burning alive, rape, drownings, and desecrations are forgotten, or can be wiped out by an incredulous letter, he is gravely in error. Rather will they

> The multitudinous seas incarnadine,
> Making the green—one red.

Your correspondent jokes over the Turks accepting the testimony of Greeks against the Bulgarians, and afterwards accusing the Greeks of similar crimes. The Greeks in Thrace sent petitions to the Turks to return and save them from the barbarities of the Bulgarian invaders. On the return of the Turks they hooked out the bodies of drowned Greeks from wells and from the Maritza. It is to the credit of the Turks that, even knowing the evil done by Greek *komitadjis* in Macedonia, they regarded the Thracian Greeks as fellow martyrs and fellow victims with their own co-religionists, the Thracian Moslems.

Miss Edith Durham has, however, proved from her own personal experiences that there was little to choose among any of the titular Christian races of the Balkans (that interesting and original holiday corner of Europe) in bestial barbarity and criminal ignorance.—Yours, etc.,

ARTHUR FIELD.
Secretary of the late Ottoman Committee.
Secretary of the Anglo-Ottoman Society.

The Anglo-Ottoman Society, 158, Fleet St., London, E.C.

NEAR EAST IN PARLIAMENT.

HOUSE OF LORDS

The Epirus Negotiations. May 20.

Replying to Lord Lamington, Viscount Morley said he was glad to inform their Lordships that the discussions that had been going on with regard to the Epirote transaction had come to a satisfactory conclusion. Mr. Lamb, the British Agent on the International Commission, went to Corfu on the 8th inst. with the International Commission, and their mediation had been accepted as between the Albanian Government and the Provisional Government of Epirus. Repeated conferences were held with the Epirote leader, and on the 18th inst. Mr. Lamb telegraphed home that the discussions were at an end and that the difficulties had been settled. He was returning to Durazzo and would forward the terms of the settlement by mail, so that they would be received in the course of a few days. That, therefore, was entirely satisfactory. The news about the arrest of Essad was quite true. Mr. Lamb telegraphed that he had been arrested and taken on board an Austrian man-of-war. This action seemed to have been prompted by a suspicion that Essad was instigating an armed movement in the interior. At the request of the Prince of Albania a mixed Austrian and Italian force of about 200 men had been landed at Durazzo. They were guarding the Palace and the foreign Legations in case of disturbance arising. The news was a great surprise at the Foreign Office here.

HOUSE OF COMMONS.

Alleged Outrages in Albania. May 14.

Mr. Aubrey Herbert asked if the Secretary for Foreign Affairs had yet received the telegrams which the Christians of Southern Albania had sent to the Chancelleries of the Great Powers regarding ill-usage; and if the Government were unable to obtain accurate information on the subject if he would communicate with Mr. Tsilka, Protestant missionary at Koritza.

Sir E. Grey: I have received such a telegram purporting to be in the name of the Christian inhabitants of the Koritza district. I am in communication with the British delegate on the Commission of Control in regard to it, and he will doubtless make inquiries of Mr. Tsilka should occasion require.

Mr. Aubrey Herbert also asked whether the Secretary of State for Foreign Affairs had received any information regarding the burning by the Greeks of the villages in the district of Kolonia, Vrebsoka, Oseska, Radan, Radimislit, Poda, Barmash, Leshna, Gjone, Aripas, Tach, Kodras, Kamnik, Rajan, Starje, Psar, Qinan, Selenica, and whether the corpses of twenty-eight Greek soldiers and some evzones were found.

Sir E. Grey: The villages referred to are not mentioned in any reports received by me respecting recent events in Epirus, and I have no information with regard to them.

Greeks and Christians.

Mr. Herbert further asked if the Foreign Secretary had received any information as to whether the Greeks, in retiring, compelled Christians to accompany them, so as to give the impression that the Christians would not live in Albania.

Sir E. Grey: Such an allegation is made in a telegram, but I am at present unable to verify it.

Distress in Albania. May 18.

Mr. A. Herbert asked if the Under-Secretary for Foreign Affairs could give any information regarding the many thousands of refugees from the Kolonia district who were now arriving at Koritza, and whether any steps could be taken to relieve their sufferings.

Mr. Acland: I have received reports to the effect that large numbers of refugees have left the Kolonia district, but I have no details on the subject. The British Delegate on the International Commission of Control is now in Northern Epirus. I am not aware what funds remain to him out of the grant by his Majesty's Government for the relief of distress in Albania, but he will doubtless do what is possible to alleviate suffering.

Distress in Kolonia.

Sir J. D. Rees asked whether the Secretary of State for Foreign Affairs had received a memorial from the All-Indian Moslem Association with regard to the distress in the Kolonia district of Albania.

Mr. Acland (Under-Sec.)—Not to my knowledge. I will inquire and let the hon. member know.

Cotton Exports to Turkey and Egypt.

In answer to a long question by Mr. Croft with regard to the exports of cotton piece goods from this country, Mr. John Burns (President of the Board of Trade) gave the following figures showing the quantity exported to Turkey, Egypt and Africa. In 1893, 665,900,000 yards. being 14.3 per cent. of the total amount exported; in 1903, 851,500,000 yards, being 16.5 per cent. of the total amount exported; in 1913, 1,081,900,000, being 15.3 per cent. of the total export. Last year 18,800,000 lbs. of cotton yarn were exported to Turkey, Egypt and Africa.

Persian Financial Straits. May 19.

Sir G. Scott Robertson asked the Secretary for Foreign Affairs whether he was aware of the severe financial straits to which the Government was reduced; had he any information to the effect that the Government of Persia feared to ask for help from Russia and Great Britain from fear that Russia would exact harsh terms in the way of increasing the Persian Cossack force; and what did he propose to do in the circumstances.

Sir Edward Grey: I am aware of the chronic financial embarrassment of the Persian Government, but the important ques-

Digitized by Google

tion appears to be not whether the Persian Government is reluctant to ask for pecuniary assistance, but whether his Majesty's Government, if applied to, could give or facilitate that assistance on a substantial scale. The decision of his Majesty's Government would not in any case be dependent upon an increase of the Cossack Brigade.

Persian Railways.

Mr. Morrell asked whether any work was now proceeding in conjunction with the proposed Trans-Persian railway; whether the reserves and conditions expressed in the memorandum of October, 1912, as between his Majesty's Government and the Russian Government, still held good; and whether his Majesty's Government had agreed, or were about to agree, to any extension of the proposed railway beyond the Russian sphere.

Sir E. Grey: No work is proceeding at the moment, though I believe surveys have been made in the northern part of Persia. The answer to the second part of the question is in the affirmative. No surveys have been made beyond the sphere of Russian interest, but we are prepared to agree to the extension beyond this sphere on certain conditions, the general nature of which has already been stated to the House, for I may point out that were the scheme for a Trans-Persian railway to fall through, the result would be that railways would be made in the North of Persia and not in the South, a state of things which would be very prejudicial to British trade. Answering a supplementary question by Mr. Morrell, Sir E. Grey said he could not promise the House an opportunity for discussion before the work begun, but papers would be laid before there was any question of making a through connection to India by the trans-Persian line. With regard to the making of railways actually in Russian territory, it was really urgent that the Government should be in a position to proceed with the making of railways in Southern Persia, seeing that at any moment schemes may be proceeded with for making railways in Northern Persia.

Sir J. Rees: Is the Government of India a party to the extension of the railways beyond the Russian sphere?

Sir E. Grey: The Government of India has been consulted in all the negotiations regarding the conditions on which we should consent to an extension of the railway beyond the Russian sphere.

NEAR EAST BOOKSHELF.

PRESTER JOHN AND PARADISE.*

The authors of this entertaining work conduct their readers to that place on the map of Asia where Paradise may have been once but certainly is not now. The area between the Tigris and Tabriz is inhabited at present by as pleasing a diversity of unpleasing human types as one may find anywhere. Picturesque ruffians, fit to strut the stage amid the best creations of Sir Walter Scott, hereditary bishops, holy men, despotic sheikhs, adherents of heresies so old and faded that only Orthodoxy survives, and poor bewildered Ottoman officials—hedge kaimakams and tame mudirs, all live and rule and fight and pray amid the mountains over which once ruled the famous Prester John, who really seems to have existed in the flesh—a man that one might touch or see. Some of the customs of those parts are of an Edenic simplicity. Young men and maidens habitually take hot baths in public, and a bashful missionary was much perturbed when a damsel, anxious to kiss his hand, as custom demanded, leaped from her tub and pursued him in the altogether.

Before actually reaching the country of the Nestorians the authors visited the Yezidis, known as Devil Worshippers, who adore Sheitan in the shape of a brazen peacock, which they call Melek Taüs. Apparently diabolism in Mesopotamia is a scissors-and-paste sort of creed, as "planks" in its religious "platform" are borrowed from the Parsees, Ophiolaters, and Jews, in addition to which Mohammed is regarded with veneration and Our Lord accepted as Divine. On their way they passed amid perils of boils and poison winds, and lodged in the black tents of the desert Arabs. And, like the Canterbury Pilgrims, they wile away the reader's time during that journey with remarkable incidents from Persian history and little-known adventures of militant prelates in the past.

The brothers have written a delightful book, full of rich humour and diverting anecdote, tales of Turks, and valuable criticisms of political conditions. One is glad to find that there is still a corner of the earth where the unusual is normal and where Great Britain still enjoys a reputation for majesty and might, where the power of the Great Elchi is still remembered by those who benefited by its display. Not only is the book interesting as a story of travel, but it is a valuable contribution to the literature dealing with areas which within a lustre will be traversed by one of the highways of international commerce. It is worthy of note that the authors of this authoritative and most informative book consider that the Russians have occupied Azerbaijan, to which they extended their journey, "for keeps," and that the Shah's writ, or that of the Vali Ahd, will never run there more, excepting so far as it may be endorsed by the Russian Resident—who still seems to be called Consul. If the past is passing in Persia, so also it seems that the picturesque but devastating lawlessness of Eastern Kurdistan may be on the highway into history. Already, the brothers assure us, is the Committee hammering at the gate of time-honoured feudal privilege and immemorial exemptions, and they suggest that much of what they saw will have suffered reform ere long. At present, however, the true representatives of sovereignty in the realms of Prester John seem to be sheikhs, not Shahs or Sultans.

* "The Cradle of Mankind: Life in Eastern Kurdistan." By the Rev. W. A. and Edgar T. A. Wigram.

NEAR EAST BOOK NOTES.

Messrs. Methuen will shortly publish an account of harem life in Turkey from the pen of Miss Grace Ellison, who for some time resided in a Turkish house. The title of the book is announced as "An Englishwoman in a Turkish Harem."

Mr. John Lane has in preparation the autobiography of a Greek girl, Demetra Vaka, who in the pages of "A Child of the Orient" describes life in a Turkish home and displays the difference between Greek and Ottoman character.

Dr. Rebreyend has published *Les Français aux armées de Bulgarie* (16 mo. 304 pp.) with the Librairie A. Mame et Fils.

M. Georges Legrain, of the Egyptian Antiquities Department, has issued his book on legends and folk-songs of Upper Egypt, under the title *Longsor sans les Pharaons*. (Small octavo, 224 pp.)

MM. Jean Ebersolt and Adolphe Thiers have published a book on Byzantine ecclesiastical architecture, *Les Eglises de Constantnople* (quarto vii. and 296 pp.), under the auspices of the French Ministry of Public Instruction and Fine Arts to the benevolent activities of which department students and historians already owe such a deep debt of gratitude.

BOOKS RECEIVED.

The Cradle of Mankind. By W. A. and E. T. A. Wigram. (A. and C. Black. 12s. 6d. net.)

We have received a selection of the volumes in the Wayfarers' Library which have recently been issued. In every respect the publishers may be congratulated on the high level which this welcome series continues to maintain.

TANGIER TO TEHERAN.

Albania is delightfully true to type. That great feudal magnate of Shqipenia, Essad Pasha Toptan, who liked to pose as a king-maker, has been endeavouring to impress upon Prince and people alike that his little finger was thicker than his Sovereign's loins. It is quite likely that this was the case, but the budding Warwick forgot that his Sovereign was a European who had wisely pitched upon a palace under the guns of the Powers. Had the Mpret been in an inland capital he might well have been the ex-Prince, or even the late Prince of Albania by now, for during the last six weeks it has been a case of pull devil, pull baker between the Mpret and his over-powerful Minister. A few days ago I was told by a particularly well-informed authority on Albanian affairs that things were coming to a head, largely because the Mpret was too Western in his notions of government to give "coffee" to his Secretary of State for War, and that the latter was relying upon the fact that the Mpret was too civilized for the task he had taken up. Poor Essad, he forgot that if civilization frowns upon the use of poisoned coffee as a sedative in political crises, it at least has a high regard for ships' guns, and delights in the achievements of naval landing parties.

***

It may be too soon to crow, but if the Mpret is rid within a single week alike of the feudal tyranny of the House of Toptan and of the southern menace of the Epirote revolt, he may well be on the way to being master in his own house. It is possible, however, that the pride and power of the House of Toptan will not be broken by the removal of its redoubtable head, and it is quite on the cards that Mr. Zographos, having once cried havoc and let loose the dogs of war, will not be able immediately to whip them back into their kennels, no matter how loudly he may vociferate "Peace, peace!" Discipline among irregular bands is notoriously lax, and even in the palmiest days of the Provisional Government in Argyrokastro Mr. Zographos had no very great control over the more extreme partisans of Epirote autonomy. Consequently he may find some difficulty in persuading the professional patriots now in the field that their services are no longer required. Now that the question is theoretically settled, I hope both sides will loyally abide by the agreement. Neither Greece nor Albania is in a position to snap at the other for the sake of snapping. If the Greeks complain that Ghegs and Tosks are barbarians, let them set to and civilize them by means of the peaceful penetration of commerce—for if the Greeks do not take steps in this direction soon they will find themselves forestalled by Italians. Greece knows well that she has nothing to gain from having a sphere of Italian commercial influence pressing upon her north-western frontier, and her astute merchants will probably realise that national interests will better be served by advertizing Hellenic commerce than by pushing the propaganda of political Hellenism.

***

I learn, on the authority of the well-informed *Patris*, of Athens, that the Coronation of King Constantine will probably take place this summer. This event will be a novelty to modern Hellenes; for neither King Otto nor King George went through a coronation ceremony. Hitherto the Monarchy has maintained itself without the customary supports of royalty. But King Constantine, born and bred in Greece, and professing the creed of the National Church, ascended the throne with the prestige of a successful leader of the Hellenic army in the recent wars. To the patriotic Hellenes the new King is a national hero, and a revival of royalism may be expected. According to the *Patris*, preliminary arrangements have already been made for the Coronation, but owing to the anomalous political situation it cannot be decided when it will take place. If, however, the various unsettled foreign questions are arranged by next August, it is intended to hold the celebration, to which all the crowned monarchs of Europe will be invited, during that month. Therefore, I conclude, the Coronation will take place if the outlook in the Balkans brightens. The ceremony will, no doubt, be of more than ordinary interest. There is the interesting question whether the King's title shall be Constantine I. or XII. I have heard that the Imperial robe which belonged to one of the Constantines, and which is preserved in a monastery on Mount Athos, will be worn by the namesake of Constantine XI., the last of the Emperors in the East. From this it would appear that, in a left-handed way, the modern Hellene claims to be the heir not only to the glory that was Greece, but also to the grandeur that was Rome.

***

It is possible that the invitation to all crowned monarchs in Europe to attend in Athens will be so worded as to permit representatives to be sent, as kings and emperors are kittle cattle and very difficult to handle in the bulk. At the time of the Congress of Vienna and on other occasions when the *parterre de rois* has come into being the Court officials responsible for arranging for the comfort of innumerable Majesties became prematurely white. Besides, it has hitherto been etiquette for a king to be alone in his glory at the time of his coronation, and the only exceptions to this rule were the magnificent coronations of the Holy Roman Emperors at Frankfort, when the whole place was agog with German sovereigns, all of whom, however, were theoretically subject to the successor of the Cæsars. King Constantine, although his style *βάσιλευς τῶν Ἑλλήνων* contains the title used by the Byzantine emperors, does not claim imperial rank, and in the current edition the "Almanach de Gotha" accords his Majesty the regnal numeral I. The question whether there have already been thirteen or only eleven Imperial Constantines is due to the Byzantine habit of having co-emperors, of whom historians have not decided in all cases whether the princes in question were actual or only courtesy sovereigns.

***

I see that the Maronite Archbishop of Cyprus has arrived in that island on one of his archiepiscopal visitations. His Grace, who was born in 1855, has held his present position since 1910, before which he was titular Bishop of Nazareth. The Maronites in Cyprus are, unfortunately, not a large community—they have four monasteries, and number some thousand souls in all—consequently their Archbishop sees no harm in being a non-resident prelate, preferring to live in the Lebanon. When we first began to administer Cyprus for the Sultan thirty-five years ago there were only 177 Maronites in the island, but a considerable immigration took place during the first years of the present regime, though of late the numbers of this interesting community have remained almost stationary.

***

The Legislative Council in Cyprus is still debating on the estimates, owing to the violent opposition which is being offered by the non-Moslem elected members. It is typical of the temper of the Greek politicians in the island that they should passionately denounce the tardy act of justice by which Government proposes to raise its salaries in order to enable officials to meet the fall in the value of money which has naturally followed the increased prosperity of the island under British rule. The Greeks cry out, as against a monstrous wrong, that while the smaller salaries—up to £200 a year—which are mostly enjoyed by natives, are to be increased by 15 per cent., those above that figure, which are largely paid to Englishmen, are to have a rise of 10 per cent. The monstrous wrong apparently lies in the payment of a salary to British officials at all—when there are so many good Greeks in need of a job—to say nothing of their "sisters and their cousins and their aunts," together with the male appurtenances of the same. Like many folk, I am getting a little tired of what the Cypriotes are pleased to consider their innumerable wrongs—which, to me, seem strangely like those of the people who waxed fat and kicked. These gentlemen are anxious to bring Mother Hellas to Cyprus. May I politely suggest that as the difficulties in the way of this scheme are considerable they should copy Mohammed and go to the mountain as it cannot come to them. I am sure that the amount subscribed by other inhabitants of Cyprus to any properly conducted fund for Facilitating the Permanent Emigration of Cypriotes to Greece would surprise people.

***

The progress of events in Morocco has reached a definite milestone with the occupation of Taza by the French. This advance on the part of the protecting Power of the major portion of the Shereefian Empire enables direct overland communication to be made between the Armies of Occupation advancing, on the one hand, from Algeria through Ujda and, on the other, from Casablanca eastwards. It is curious that the fall of Taza, which may well be esteemed as the knell of that destructive and desolating disorder which passed for independence among the Moors, should have been coincident with the death of Bu Hamara, the picturesque pretender who did so much to further the disruption of his country. The position of Sultan of Morocco, if in future it will gain the sweets of security and sheltered pomp, will undoubtedly have lost the salt of an independent existence which might lead at any moment to an usurper's cage or an Imperial tomb.

***

According to the Roumanian Press, the arrangements for the construction of a Roumanian church in Jerusalem are progressing favourably. The special commission under the Archimandrite Dionysius has secured the consent of the Orthodox Patriarch of Jerusalem and his Synod, and nearly £1,000 have been collected towards expenses. Now that the possible danger of religious complications locally has been removed it is probable that subscriptions will be more readily forthcoming than when the proposals for building the church were still in the air.

PERSONAL & SOCIAL

CALENDAR OF THE WEEK.

Showing Concordance of the Gregorian, Julian, Moslem, and Jewish dates.

Gregorian. New style.	Julian. Old style.	—	Moslem.	Jewish.
1914.	1914.		1332. Jum'da	5674
May	May		II.	Iyar.
22	9	Friday	26	26
23	10	Saturday	27	27.
24	11	Sunday	28	28
25	12	Monday	29 Rejab	29 Sivan
26	13	Tuesday	1	1
27	14	Wednesday	2	2
28	15	Thursday	3	3

Tuesday is the birthday of her Majesty the Queen.

To-morrow, being 27 Jumada II., is the anniversary of the accession of his Imperial Majesty Sultan Ahmed Shah, who will attain his majority on 27 Shaban, which falls this year on July 21.

Sunday is the birthday of H.I.H. Prince Louis of Battenberg, brother of the late Prince of Bulgaria, father of Princess Andrew of Greece, and uncle of the Queen of Spain.

Sunday is also the birthday of Princess Elisabeth, the second daughter of Prince Nicholas of Greece, who was the Commandant de Place at Salonika during the wars.

Sunday, being 28 Jumada II., is the birthday of Princess Fehime Sultana, second surviving daughter of the late Sultan Murad Khan. Her Imperial Highness married Damad Mahmoud Bey in 1901.

Monday is the birthday of Princess Christian of Schleswig-Holstein, the King's aunt.

Monday, being 29 Jumada II., is the birthday of H.I.H. Vahid-ed-Din Effendi, who, although he is next brother to the reigning Sultan, is only second according to the order of succession in the House of Osman, his nephew, the heir apparent, Prince Yussuf Izz-ed-Din Effendi, being some years older than he.

Tuesday, being 1 Rejab, is the birthday of Prince Zia-ed-Din Effendi, the eldest son of the Sultan Mohammed Reshad Khan. His Imperial Highness is sixth in the order of succession to the throne.

Wednesday, 2 Rejab, is the birthday of Princess Fathieh Hanum, the third daughter of the Khedive.

Thursday is the birthday of Prince Emanuel, the third son of Prince Mirko of Montenegro.

According to a Reuter's message from Cairo, dated May 16, Viscount Kitchener will depart for England on his usual leave about June 18.

According to a Reuter's message from Khartoum, of the same date, the Sirdar, Sir Reginald Wingate, returned there on Friday from the hill station of Erkowit. Special messengers from Ali Dinar, the Sultan of Darfur, had arrived at Khartoum for an interview with the Sirdar. They travelled via El Obeid.

The King and Queen of the Hellenes, Prince Alexander, and Princess Helena left Athens on Thursday of last week for Salonika on board the Greek cruiser "Psara."

H.H. the Khedive sails from Alexandria this week to Dolmar, where he will remain on his estates till June 5. His Highness will spend the summer months in Europe, probably going to Constantinople on the 1st of Ramadan. He will probably stay in that capital during the sacred month or part of it, before returning to Egypt.

Writing on May 16, our Braila Correspondent says:—The King and Queen with the Crown Prince and Princess and their family arrived at Braila on Thursday afternoon on board the Royal yacht "Stefan cel Mare." Their Majesties landed at the quay and held a reception, which was attended by the local authorities, the Consular Corps, and representatives of society, commerce, and industry. All the quay front was thronged with people, and their Majesties were accorded a very hearty welcome. They subsequently embarked to continue their pleasure cruise on the Danube.

On Thursday last week Mr. Charles Des Graz was received in audience by the King, and kissed hands upon his appointment as his Majesty's Envoy Extraordinary and Minister Plenipotentiary at Belgrade.

Our Bucharest correspondent informs us that H.R.H. the Princess Elizabeth of Roumania will first visit her aunt, the Grand Duchess Cyril, in Paris, and after a week's stay will leave for Madrid. The princess will spend a month with her aunt, the Infanta Beatrice d'Orleans, at Madrid, and afterwards will go to Coburg, where she will meet her parents, and thence to Tegernsee. The King and Queen of the Hellenes, together with the Crown Prince, will also come to Tegernsee, and probably the young couple will then be formally betrothed. The Queen Dowager Olga of Greece, the brother of the King of Greece, and Prince Eitel Friedrich will also be present, the last to represent his father, who is to be one of the sponsors.

Baron Trotha, Chamberlain to Mpret William, left Durazzo for Scutari last week to make arrangements for the visit of the Mpret and Mpreteresha to that city.

Essad Pasha Toptan, formerly Minister of War and of the Interior in Turkhan Pasha's Cabinet, has left Brindisi for Naples on being exiled from Albania.

Prince Antoine Bibesco has been appointed Secretary to the Roumanian Legation in London.

Viscount Bryce will be the guest of the evening at the annual dinner of the Central Asian Society, to be held on next Wednesday evening.

Sir John Rogers returned to Cairo during the earlier part of this month.

In commemoration of the Roumanian national festival, M. Nicolas Mishu, the Roumanian Minister, and Mme. Mishu will receive the members of the colony at the Legation, 4, Cromwell Place, between the hours of 11 a.m. and 12 noon to-morrow.

Mrs. Charles Whitham has returned from Egypt to 3, Knightsbridge, and is giving an evening concert on Tuesday, June 23.

The Hellenic Minister and Mme. Gennadius and Lord and Lady Inchcape were present at the ball given by Mrs. Saxton Noble at Kent House, Knightsbridge, for Miss Marjorie Noble, last Friday night.

The King has been pleased, on the recommendation of the Secretary for Scotland, to whom the name was submitted by the Lord Justice General, to approve of the rank and dignity of King's Counsel to his Majesty in Scotland being conferred on Mr. Robert Dundonald Melville, advocate, presently Professor of Civil Law in the Khedivial College, Cairo.

As a mark of special favour, H.I.M. the Tsar has presented Kaimakam A. Pope Bey, of the Egyptian Prisons Department, with a massive silver punch-bowl and ladle of antique Russian workmanship, ornamented with gold and studded with various kinds of Siberian stones.

An engagement is announced between Dr. R. W. J. Pearson, Abbassia, Cairo, second son of the late Mr. Richard Pearson, J.P., of Church Place, Ennis, Clare, and Beatrice Rosalind, only daughter of Mr. W. Morrison Sever, of Nant-y-Coed, Conway.

A marriage has been arranged, and will shortly take place, between Percy, eldest son of Mr. and Mrs. Montagu Battye, of 29, Sloane Court, and Elsie Rodocanachi, second daughter of the late Mr. and Mrs. Michel Rodocanachi, of 58, Westbourne Terrace, Hyde Park.

H.M. the King of Roumania sent a wreath to be placed upon the coffin of the late Mr. Charles Pherekyde, formerly First President of the High Court of Bucharest, whose funeral took place last week.

Mr. H. Charles Woods entertained the Servian Minister and M. Rizo-Rhangabé (First Secretary of the Greek Legation) at dinner at the Royal Societies Club last Friday night. The other guests were the Hon. G. W. E. Russell, M. de Wesselitsky, Mr. Lyon Thomson, Colonel Picot, Captain Heaton Ellis, Dr. Scott Keltie, Mr. W. J. Evans, Mr. Emile Mond, Major Smith, Mr. Wilfrid Rhodes, and Colonel Woods.

Mrs. Mavrogordato and Miss Frances Mavrogordato, of Therapia House, Nicosia, Cyprus, are staying at the Casino Palace Hotel at Port Said, en route for Italy and Switzerland.

The Admiral and officers of the First French Squadron have subscribed for an episcopal ring, which was presented on their behalf to His Beatitude Mgr. Hwayek, the Maronite Patriarch of Antioch, by M. Couget, the French Consul-General at Beyrout.

Under the patronage of the Hellenic Minister, Miss Olga Papadachi and Mr. J. T. Grein will organise a special matinée for the Relief and Repatriation Fund of Greek Refugees (Princess Alice Fund) on July 2, at the Queen's Theatre, kindly promised by Mr. George Grossmith. On this occasion Mr. Raymond Duncan will bring over from Paris his famous company of Greek players, who will produce Sophocles' "Electra."

The following appointments are gazetted:—Mr. Arthur David Alban to be his Majesty's Consul for the Consular District of Cairo, to reside at Cairo; Mr. Frederick George Free-

WHERE TO STAY.

LAUSANNE-OUCHY (Switzerland).

SAVOY HOTEL.
Near the lake, with splendid park.

CECIL HOTEL.
In the town and 5 minutes from the station.

Two First-class Family Hotels. High-class Cuisine. French Chef.
J. SUMSER, Manager-Proprietor.

Sofia (Bulgaria).
GRAND HOTEL BULGARIE
(opposite the Royal Palace).
First-class Hotel. Entirely renovated and beautifully situated in the centre of the city, near Post Office, Theatre, Museums, Banks, etc. Electric Light. Central heating. Baths. Garage. Telephone. Garden. French Restaurant. Good wines. Café. Foreign newspapers. Most frequented by English and American Visitors. Interpreter meets all trains. Rooms from 4 frs.

Cyprus.
THE CYPRUS HOTEL CO.
Open all the Year round—
LIMASSOL (Olympus Hotel).
FAMAGUSTA (Savoy Hotel).
For Summer Seasons—
PLATRES (Platres Hotel). 4,000 ft. from the sea level. Opens from May till Oct.

man to be his Majesty's Consul to reside at Port Said; and Mr. Alfred Dickson to be his Majesty's Consul at Bengasi.

Si Haj Mohammed El Mokri, formerly Grand Vizier of Morocco, has left Tangier for Casablanca.

Sir Thomas Sutherland has returned to 7, Buckingham Gate from Paris.

The *Gazette* announces that the King has been pleased to grant unto Mr. Anthony John Joseph Francis Borg, superintendent of stores, Alexandria, authority to wear the insignia of the Fifth Class of the Order of the Mejidieh, which decoration has been conferred upon him by the Khedive, authorised by the Sultan.

The appointment is gazetted of Lieutenant Trenchard Craven William Fowle to be his Majesty's Vice-Consul at Kerman.

The Khedive has conferred the Third Class of the Order of the Mejidieh upon Mr. W. Lawrence Balls on the occasion of his retirement from the service of the Egyptian Government. This is, we believe, the first decoration given for agricultural work since the foundation of the Department of Agriculture in 1910.

Captain Flower left Egypt for the Sudan last week to collect animals for the Giza Zoological Gardens.

General Brulard, commander of the French troops in the Marakesh district of Morocco, has left Casablanca on leave for France.

The Italian Ambassador, H.E. the Marchese Garroni, has returned to Constantinople.

H.I.M. the Tsar has conferred the grand cross of the Order of St. Alexander Newsky on Talaat Bey, Ottoman Minister of the Interior, and the similar class of the Order of the White Eagle of Poland on Izzet Pasha.

Senator Izzet Pasha, the former Ottoman Minister for War, has been appointed Inspector-General of Reforms in Syria.

H.E. the Swedish Minister in Constantinople, Herr P. G. A. C. von Anckarsvärd, has been accredited also to the Court of King Ferdinand of Bulgaria.

General Krobatin, Austro-Hungarian Minister for War, and General Conrad von Hötzendorf, the Austro-Hungarian Chief of Staff, have been decorated with the grand cordon of the Imperial Ottoman Order of the Osmanieh.

The Russian Ambassador, M. de Giers, has returned to Constantinople from Livadia.

M. Nicolas Ionescu, a former Roumanian Deputy, has been appointed Prefect of Braila *vice* M. Matthew Sasso, resigned.

His Beatitude Mgr. Paul Awâd, the Maronite Archbishop of Cyprus, has recently arrived in that island from Syria, where, since the seventeenth century, he and his predecessors have been accustomed to live at Kornet-Shewân, in the Lebanon.

Talaat Bey, the Ottoman Minister of the Interior, is expected to arrive in Bucharest from Livadia on Sunday.

M. Stoyanoff, second secretary in the Foreign Office in Sofia, has been placed in charge of the Bulgarian Consulate-General at Buda-Pest, vacant by the retirement of M. S. Constantinovitch.

Sezai Bey, director of Police in Angora, has succeeded Nihad Bey as chief of the Pera Police on the election of the latter to the Ottoman Parliament.

Mr. Papadiamantopoulos, the retiring Hellenic Minister in Bucharest, has been appointed to The Hague.

Mr. D. Svilocositch, the First Secretary of the Servian Legation in Bucharest, has been appointed to the newly created Servian Consulate-General in that city.

Herr August Kral, formerly Austro-Hungarian Consul-General at Salonika, has been appointed to represent the Dual Monarchy on the International Commission of Control in Albania.

Hadjim Bey, formerly Kaimakam of Vourla, has been appointed Chief of the Smyrna Police.

Mr. Constantine Varatassis, formerly Prefect of Corfu, and lately *en mission speciale* in Durazzo, has been appointed Hellenic Minister to the Albanian Court.

Tewfik Hadi Bey, hitherto director of the legal section of the Police Administration in Constantinople, has been promoted Chief of Police of Angora, *vice* Sezai Bey, promoted to Constantinople.

A Royal Commission has been appointed by H.M. the King of the Hellenes to report upon the reform of ecclesiastical legislation. The following are members:—Chairman, the Primate, Mgr. Theoklitos, of Athens; Mgr. Gennadios, Metropolitan of Salonika; Mgr. Agathangelos, Metropolitan of Drama; Mgr. Germanos, Archbishop of Lacedemon and Monemvasia; Mgr. Meletios, Archbishop of Messenia, and Mgr. Titos, Bishop of Petras, in Crete. Mr. Dervos, Rector of the Universities, and four other laymen are also members, while Mr. Eutaxias, the Governor of the National Bank, is an honorary member.

Mr. K. P. Birley, President of the British Chamber of Commerce of Egypt, received a handsome present from the Government of the French Republic, in recognition of his courtesy to Admiral Boué de Lapeyrère and the officers and men of the French Fleet which visited Alexandria last October, and the leading part he took in organising the entertainment given to them by the British community. The souvenir, a beautiful Sèvres statuette, was accompanied by a cordial letter from M. Defrance, the French Minister Plenipotentiary.

A marriage has been arranged, and will take place shortly, between Mr. H. Clarke, of the Anglo-Egyptian Bank, and Beatrice, only daughter of the late Mrs. Moore, of Chesswoods, Worthing, and Leckhampton.

Our Odessa correspondent regrets to announce the death, on the 15th instant, of Mr. Percy Grey Barnett, who had been engaged in British shipping business in that city and port for the last thirty-five years. The deceased gentleman was a member of the family of Messrs. Barnett Brothers, of Great St. Helen's, E.C.

We regret to learn that the death took place, in London, on the 5th inst., of Miralai Maurice Patrick Macnaghten Bey, director of the Sudan Slavery Repression Department. He had undergone an operation at El Obeid, and had returned home in a state of convalescence. The death of this popular and hard-working official will be deeply lamented. After seeing active service in India and South Africa he was appointed to the Egyptian Army, and afterwards to the Slavery Repression Service in the Sudan.

The death has occurred at St. Leonard's of Major-General Thomas Scovell Bigge, of The Lye House, Bricket Wood, Hertfordshire. He served with the Royal Welsh Fusiliers throughout the siege of Sebastopol, and was twice wounded during the Crimea campaign. He possessed the medal and clasp for Sebastopol, the Turkish medal, and the Order of the Mejidieh.

FRIDAY, MAY 22, 1914.

LEARNING FROM THE EAST.

When it is remembered that our intimate connection with India is now in its second century, that almost a hundred years have passed since the first settlement was established in the Malay Peninsula and the route to the Far East opened, it will come as a surprise to many that little or no provision exists in England for teaching the languages of the Oriental countries whose fortunes are so closely linked with our own. It is true that for administrative and consular purposes a knowledge of native languages is required of civil servants, and arrangements are made to enable them to learn these languages in each country. But that the unofficial Briton whose lot is cast in the East should wish to equip himself with a knowledge of the language of the people among whom he is to live and trade has never entered the conception of the nation as a whole. Whether by temperament or by education, the average Briton is supposed to be fitted for the practical work of life in whatever circumstances he may be placed. Certainly for the most part his imagination, his judgment, and his powers of intelligent sympathy have been sufficiently developed to enable him to face with some degree of success any social or political problems with which he may be confronted. The need for special training, therefore, has been so slow in asserting itself that room was left for the idea that such training was almost derogatory to the genius of the British people. Times, however, have changed. Competition in trade is keener, and with the spread of education in Eastern countries intercourse with the people presents more difficult problems than it did in the days when foreign ideas and foreign methods were comparatively strange to them. In the commercial world it is no longer feasible to sit still and wait for orders to come in; business has to be sought out, and it will fall to those who can speak to the native consumer in his own language. Both for the merchant and for the administrator it is of advantage that he should know more than merely the language of the people with whom he has to deal. Knowledge of their history, their customs, and, it may be, of their religion becomes essential if the best results of the intercourse are to be obtained.

Other European nations starting later or in less favourable circumstances than Great Britain have already recognised the necessity of providing their workers in the Oriental field with special training, and schools for Oriental studies already exist in Berlin, Paris, Vienna, and St. Petersburg. The United Kingdom alone of the Great Powers primarily concerned has failed in its obligations in this respect. The reproach, however, is now about to be removed. Reference has already been made in THE NEAR EAST to the proposed School of Oriental Studies, and this week we publish a special appeal in connection with it. A few facts may be recapitulated. As the result of a memorial to the then Prime Minister in 1906 a Departmental Committee was appointed in the following year to report on the subject of provision being made for instruction in Oriental languages. This committee placed on record its conviction that there was urgent need for the provision of suitable teaching in London for persons about to take up administrative or commercial posts in the East and in Africa, and it recommended that a school of Oriental studies should be built up from the nucleus of Oriental teaching in existence at University and King's Colleges and should be incorporated in the University of London. A new committee was formed in 1910 to give practical effect to these recommendations by finding a site and buildings for the proposed school, by drafting a detailed scheme for its management and by finding the necessary income. A suitable habitat for the school has been secured in the London Institution, and it is hoped to open it next year with provision for the teaching of seventeen languages. The total expenses of the school are estimated at £14,000 a year. Towards this sum the committee has been promised grants from the British Government, the Indian Government, and the London County Council amounting to £7,250, apart from the amounts to be spent by the British Government in the necessary alterations and additions to the premises of the London Institution. A sum of £7,000 a year has, therefore, still to be found, and the committee is anxious that the school should be opened with an endowment fund amounting to not less than £100,000. To this end it issues the appeal which we publish on another page.

No one with a practical acquaintance of the East can fail to approve of the scheme for the establishment of a school of Oriental studies in London. Of the advisability of equipping those who are going out to pursue commercial or administrative or professional careers with a preliminary knowledge of the languages, the religions, and the customs of the East there can be no doubt. The aim of the school will be to give all those who apply to it practical assistance in acquiring a working knowledge of their subjects. With this end in view the staff will include native assistants, while the most modern methods of instruction will be adopted. The benefits to be derived from such a school will not be confined to the students who pass through its doors. Knowledge of one or more native languages will materially help those who have to do business in Eastern countries. At the same time a marked increase in the number of Britons speaking these languages will react for good on British trade as a whole. The appeal for funds to enable the School of Oriental Studies to start in a manner worthy of its mission may, therefore, be commended to all those who have commercial relations with the East, regardless of the fact whether they may wish to avail themselves directly, as far as their businesses are concerned, with the opportunities it offers. But the school has not merely a commercial aspect. Its support becomes an Imperial obligation, because it stands for the furtherance of the interests of the British Empire, the enhancement of British prestige among the nations of the East. Let us see to it, therefore, that this country does not fall behind where other countries are already in the field. The greater the response to the appeal for funds the more complete the equipment of the school and the wider the sphere of its usefulness. And the more widely it attracts students the greater the benefit to British trade and to the Empire at large.

THE NEAR EAST.

THE NEAR EAST is on sale at all Bookstalls and Newsagents in the United Kingdom. Should any difficulty be experienced in obtaining the paper, readers will oblige by notifying the Manager. Abroad THE NEAR EAST may be obtained in:

PARIS. Librairie Hachette, 79, Boulevard Saint-Germain; Librairie Galignani, 224, Rue de Rivoli, and at Railway Bookstalls.
VIENNA. Goldschmiedt Brothers, Zeitungsbureau, Wollzeile, 11.

LIFE IN MEDIÆVAL RHODES.

Some cities, like individuals, commence their existence in a dull way, live in a dull way, and reach an interminable old age in the same graceless dulness; others, again, like human beings, spring up with a halo of romance around them which lends poetic colour and glamour to their entire history. The Isle of Rhodes was, and is to-day, through the souvenirs clustered in it, a fragment of the best aspirations of mediæval Europe, the record of which still stands writ in stone and ornament that he who runs may read: the glorious Rhodes of the knights is a legacy left to Christianity by the Order of the Hospitallers, and it is a matter of rare congratulation that time and the Moslem domination have spared some little of the City of the Knights.

The knights who aided the sick and wounded during the Crusades by tending them in their hostels and by rescuing Christian prisoners from the Saracens soon became an object of universal admiration in Christendom, and received gifts from grateful pilgrims of such value that their head, Gérard de Martignes, applied to the Pope, who in 1113 issued a Bull approving the statutes and foundation of the Order of the Knights-Hospitallers of St. John of Jerusalem. The knights took the triple vow of chastity, poverty, and obedience, and as the "Servants of the Poor" the knights as a body, clad in their black mantel (worn over a scarlet justaucorps) with the White Cross on their breast, never disgraced during their seven centuries of existence the high objects of their foundation.

After the Crusaders were driven from Palestine the knights, who by this time had properties—hospices, priories, estates, fiefs—scattered throughout Europe, settled in Cyprus, but the inglorious ease and peace of their life in that island fitted ill with the martial tenets of their Order.

Rhodes at this time was the haunt of corsairs and pirates; nominally it still belonged to the waning Byzantine Empire, but it was in reality a no-man's land, to which, however, the advancing Turks were paying increasing attention. The Pope looked with favour on the proposal of Foulques de Villaret, the Grand Master of the Order, to seize Rhodes and hold it as a bulwark of Latin Christendom in the Levant. The flower of the young nobility of France, Italy, and Germany flocked to Villaret's banner at Brindisi, and as his fleet was too small to carry all he made a choice among the bravest and sailed for Cyprus. There at Limassol he collected the remaining knights and the heirloom treasures of the Order, and on August 15, 1309, the knights became masters of the City of Rhodes after a somewhat eventful siege. Tradition has it that, despairing of taking the town by assault, some of the knights conceived a curious stratagem. They covered themselves with sheepskins, and on a dark, wet evening mixed in among the flocks the shepherds were driving back from the pastures to within the walls. At the gates they suddenly rose up, massacred the guards, and thus held the entrance till their friends came and captured the city.

The conditions of life at Rhodes were peculiar. It may be said that during the two centuries the knights held it the island was in a permanent condition of martial law; the Knights' government existed primarily for the advancement and protection of Christendom, only secondarily for the greater glory of the knights themselves, and the administration of the island was subordinated to this purpose.

The knights belonged to seven "Langues," or nations —France, Italy, Germany, England, Auvergne, Aragon, and Provence, to which later was added Castile with Portugal. These had each their own chief elected to represent them on the Council, and the knights as a body elected the Grand Master by an exceedingly curious and complicated method. There was in this way friendly rivalry between the different Langues, and as the Pope was their acknowledged head in case of disputes arising there was remarkably little bad national feeling between the knights. Each Langue was given its own part of the walls to defend and repair in time of danger, and within the *enceinte* of the town on the north side between the east front of the harbour and the west wall was a strongly fortified enclosure called the Castle, where, apart from the Grand Master's Palace, the Church of the Order of St. John's, and the Hospital, there were the different inns, priories, or "Piliers de Langue" belonging specially to each Order—rather as Oxford or Cambridge have their particular colleges all subordinate members of a central University.

French knights were by far the most numerous, and if 500 be taken as an unusually high average of the knights to be found at any one time in this central Convent of Rhodes, as they called the city, of these more than half were French, and, naturally enough, a good number of the Grand Masters were elected from among the members of the three French Langues.

There were two kinds of knights—the Chevaliers de Justice or Chevaliers Profès (those who had taken vows), and the Chevaliers Donats, who were admitted to fight provisionally in time of war, but who were free to withdraw later. These, again, had their squires, and there was also a militia numbering some 1,500. Those aspiring to be knights had to show on their coat of arms proof of noble descent traced through several families, and the knight's life was a complex outcome of pride of birth with humility of purpose. Thus, while none unless of noble European birth could be knights, the knights themselves were the "Servants of the Poor." When the Templar's Order was crushed in 1312 and its goods confiscated largely for the benefit of the Hospitallers, luxury entered into the habits of the knights. This was repressed by the sumptuary enactments of the Grand Master Villeneuve, by which the knights were "to partake of but one dish and one quality of common wine; to use the cheapest cloth for their dress; and to put away concubines on forty days' notice."

The knights lived on excellent terms with the natives and merchants, who dwelt in that part of the city within the walls that was outside the Castle enclosure. These were in the main Greeks, Jews, and Genoese, Narbonne, Montpellier, and Venetian merchants, and though not allowed within the Castle precincts, they had considerable rights of citizenship. There was a commercial court called the Castellan's Court, and the Narbonnese and others each had their own Consular Courts, cases between Rhodians and foreigners being tried in the defendants' Court, with appeal to the Castellan's Court.

Though individual knights could not carry on commerce, the Order might indulge in it, and a thriving business was carried on by it in sugar and other products, but its most lucrative source of income was the seizure of pirate vessels, of Moslem cargoes, and at times, it must be admitted, even of Venetian and other Christian merchandise. Indeed, on one occasion it was practically proved that a knight was the captain of one of the corsairs' vessels; such excursions into the realm of piracy, however, were not countenanced by the Order as a body.

It was the Knights who in 1505 set up pawnbroking. With a capital of several thousand ducats they advanced on the security of pledges, which they sold if unredeemed when payment was due, and considerable sums were made in this way; their enterprise even extended so far as introducing a form of incubators from Egypt, by which eggs could be artificially hatched out!

Such were some of the peaceful occupations of the Knights of Rhodes—their military exploits are too well known to be detailed here. It was forty-two years before Villiers de l'Isle Adam led the defeated, but not dishonoured, knights out of their fallen stronghold, that Pierre d'Aubusson had so magnificently withstood the assaults of Mohammed II. It was in 1522 that de l'Isle Adam set forth from France to take command of that handful of knights whose resistance caused 100,000 Moslems to bite the dust before Suleiman the Great could enter the city that the Knights of Rhodes abandoned with all the honours of war before seeking their new and glorious home at Malta. Was it not an omen, that flash of lightning which split de l'Isle Adam's sword in pieces, but left the scabbard unscathed, the day he sailed from France for Rhodes? For the Knights' power to rain blows was broken, but their honour—their scabbard—remained unscathed.

THE PRESS ON THE NEAR EAST.

The Situation in the Balkans.

In *The Graphic* for May 16 Mr. Lucien Wolf discusses "Our Attitude to Austria-Hungary." He expresses the interesting opinion that there are "two main questions on which the interests of Britain and Austria coincide": first, "the *status quo* in the Mediterranean"; and, secondly, "the tranquillisation of the Balkans." With regard to the second question, Mr. Wolf writes:—

The Treaty of Bucharest has created a lamentable state of things in that region. The partition of Macedonia, the severance of Salonica from its economic hinterland and its subjection to an alien yoke, the ethnographic compromises in the delimitation of Albania, and the dismemberment of Bulgaria to the profit of Roumania, have created a series of new bondages far more galling and dangerous than any that existed under the Unspeakable Turk. It is, of course, hopeless to think of revising the new frontiers now, but they may be rendered tolerable, and eventually acceptable, if the natural rights of the racial and religious minorities affected by them can be protected. Sir Edward Grey has already recognised the need of international action in this direction, and it is noteworthy that the only public response the Continent has made to his efforts came the other day from Count Berchtold in his speech to the Delegations.

Neighbours of the Sudan.

In the "London Letter" of *The Bristol Times and Mirror* (May 18) there is an interesting comment on the rumour that Lord Kitchener will, on his return to London, consult with the Foreign Office and the Government on important administrative changes in Egypt and the Sudan:—

That some such development would become necessary before very long was generally recognised by all who have given attention to the rapid pacification which has been carried out by the scanty but extremely able band of French officers under Colonel Largeau in the debateable land lying to the west of Lake Tchad, with ill-defined limits on the north and west. Step by step the fierce tribes which for centuries have by frequent raiding terrorised the populations of Equatorial Africa have been driven back until now they are ringed in on every side by forces under European control. To the east the desert which is still open to them is bounded by the country owning some kind of allegiance to the Sultan of Darfur, who is more or less under the tutelage of Slatin Pasha, the able and experienced Inspector-General of the Soudan. England and France thus link hands in the region far south, to the west of Khartoum, and the problems to be solved by both Governments in this part of the world have much in common. It is, therefore, not very surprising to learn that our Foreign Office and the Quai d'Orsay may be in communication with each other on the subject.

The Party of Union and Progress.

The Daily Telegraph of May 14 has a well-informed article, by its Constantinople Correspondent, on "The Reopening of the Turkish Parliament." Reviewing the work of the Party of Union and Progress, the article states:—

It is no doubt true that the Party of Union and Progress committed many mistakes in the early days, of which not the least was the entrusting of power to Hakki Pasha, whom a quarter of a century of servility and officialdom in the Hamidian epoch had rendered almost devoid of consciousness. But even if these errors be granted, the party have since striven to raise the country from the depths to which the Hamidian *régime* had depressed it. Since the Union and Progress party took office the present Government have drawn up more than 400 highly important draft Bills, which Parliament will now have to consider. Parliament, by co-operating in the gigantic task undertaken by the Government, will have an arduous and laborious work before it, but if it should show itself recalcitrant the Government, with the support of the enlightened portion of the Deputies and of the army, will act energetically, in spite of the Parliament, to bring about the reforms from which a regenerated and civilised Turkey will arise.

Arabian Travel.

In *The Geographical Journal* for May there is a notable article by Captain G. Leachman on "A Journey Through Central Arabia." In the course of his journey the writer had many interesting experiences. We quote his description of the "Saleib" or "Slaib," who are "the gypsies of the desert," and who have an individuality of their own:—

There is no certain knowledge of the origin of these people, though various theories have been put forward, one of which is that they are descendants of the Crusaders, "salib" meaning a cross. The Saleib themselves are quite ignorant of their origin, but the Bedu are fond of saying they are related to the "Anglez." They are found all over the northern Arabian desert, on the slopes between the Persian gulf and Nejd, and also to the west of Nejd. They do not appear to visit the southern deserts. Their camps consist usually of about twenty tents of smaller size than those of Bedouin tribes, and they are generally pitched at a distance from some watering-place only known to the Saleib. They own few camels and move their belongings and themselves on donkeys, which apparently endure thirst in much the same way as a camel. They possess goats and sheep, and, though having an appearance of poverty, probably assumed in order not to excite the cupidity of the Bedouin, they generally have plenty to eat. The Bedouin do not usually make raids on them, but will extract large hospitality from them. The Saleib show a wonderful similarity of feature, while they speak with a high-pitched voice, and usually all at once; their women are spoken of among Bedouin for their beauty, and have a not too good reputation. The men usually wear a smock-like garment made of gazelle-skins with a hood to cover the head. In this they are said to be able to approach within a few yards of a herd of gazelle, and they seldom fail in a stalk; as their weapons are very ancient muzzle-loaders, often 6 feet long, the hunter would have little chance at any distance.

NOTES AND NEWS.

Devonshire Square,
London, E.C.

The note upon the subject of "Communications in Servia," sent us from Belgrade by our Special Correspondent, which will be found on page 87, ought certainly to be of much interest to engineering firms, motor manufacturers, and contractors in this country. The establishing of a service of motor-'buses for the carriage of mails, passengers, and goods between Veles and Monastir is, of course, primarily a matter of interest to Servians; and though the prospect of being able to make the journey from one point to the other for an outlay of only 17 frs., instead of 70, is one to gladden the heart of the local resident and traveller, it will not cause a thrill to the man who never expects to see either Veles or Monastir. But the fact that the cars for the service have not yet been bought is another matter. True, it may not interest the great majority of the inhabitants of these islands; but, unless we are much mistaken, it will interest the enterprising British builders of such vehicles, and it gives us much pleasure to direct their attention to the opening for business.

***

In the same way we would draw the attention of British contractors to the very clear hint given by our Special Correspondent as to the Servian Government's intention to put its existing roads in order and to construct new ones, and its willingness to consider any proposals that may be made to it in this connection by responsible British firms. It will be observed that our Correspondent reports that "a rather favourable offer has already been received from a German firm." But the offer has not yet been accepted, and for such undertakings it is rather more than probable that the Servians—who know the value of good work—would be inclined to give the preference to a British firm. Only they cannot be expected to have to look for the firm. It is up to us to make them an offer and to show why it will pay them to give the order to us rather than to our rivals. And it will, in all probability, be a case of "the early bird."

***

Attention is once more being drawn to the vast schemes which Lord Kitchener is hatching for the benefit of Egypt. The Sudan Loan Bill, as *The Daily Telegraph* reminds its readers, is shortly to be reintroduced, and upon it depends the money to pay for at least two dams. One of these, across the Blue Nile, may be only the first step to the construction of waterworks of the first magnitude; but, naturally, the volume of water to be stored must be taken into consideration. Unfortunately, the sources of the Blue Nile are beyond Anglo-Egyptian control in Abyssinia, and it is very greatly to be hoped that the Government will soon settle this question definitely, so as to avoid the possibility of adverse foreign pressure being exercised in the country of the Negus Negushti when the dam has already been built. If Napoleon annexed the Netherlands because they were composed of the silt from French rivers, surely the converse can be accepted as grounds for arriving at an amicable agreement with Ethiopia for the safeguarding of the river of Egypt.

***

The other dam is to be rock built in two senses. It is to be founded on rock in fact, and its political position is secure, inasmuch as the whole of the White Nile is under Anglo-Egyptian control. The former dam is expected to irrigate at least 500,000 acres, upon which cotton can be grown, but no figures have been published as to the extent of land which will come under cultivation in consequence of the building of the White Nile dam, which will not be begun for another two or three years. In the north drainage is expected to add no less than 1,000,000 acres to the agricultural area of Lower Egypt. This work—financed out of revenue—continues with much success, and its conclusion may be looked for in about two years' time from now. It is a somewhat ironic comment that in face of these immense preparations to enlarge the cotton-growing area—presumably for the benefit of Lancashire—an United States shipping line should have announced the opening of a direct service between Egyptian and New England ports.

***

The rumours which are current to the effect that His Majesty's Government is likely to guarantee a considerable sum for the development of Persian oilfields in return for a first call on the oil produced are, I believe, not entirely unfounded. It has been known for some time past that Mr. Churchill has been interested in all possible sources of supply of the oil-fuel so much needed for naval consumption, so that there is nothing surprising in an arrangement which would enable the Admiralty to make use of oil from the Persian fields in the south. These are, as THE NEAR EAST pointed out a few weeks ago, only the fringe of an immense oil-bearing area which extends throughout Mesopotamia and reaches from Baluchistan to Baku. I think I am right in stating that an important and far-reaching announcement on the subject will be made in the course of the next few days.

***

In view of the interest taken in the future of Cyprus as an oil-producing centre—a centre, moreover, which is under the British flag and within easy reach of the Mediterranean Fleet—it is worth noticing that the consumption of oil in the island has increased again after the sharp fall in 1912. According to *The Financier and Bullionist*, the figures for 1913 are 525,494 gals., for 1912 395,084 gals., and for 1911 596,540 gals. It is to be expected that the improvement and extension of the motor service in the island and the increase in the use of private cars will affect the demand for oil and oil products, and I may as well say that petrol-driven dynamos produce very satisfactory results for electric lighting, a form of civilisation which can be widely and beneficially extended in Cyprus.

***

The question of advertising British goods in the Levant has always been complicated by the linguistic difficulties which always face the advertiser. So numerous are these that many firms are content to use English only, and if purchasers do not flock to buy—well, that is their concern. There is, however, another system, and an example of an advertisement prepared to suit all tastes has been issued by an American firm. This document appeals to purchasers in five languages—not one of them being English! This energetic firm pushes its interests with the help of French, Greek, Armenian, Hebrew, and Arabic. This sort of thing can be done under the pressure of commercial competition. It is very greatly to be hoped that trade circulars for British goods are also to be obtained making an equally polyglot appeal to customers.

***

There seems to be a considerable difference of opinion as to the division of Turkish stock among the bondholders of various nationalities. Figures have been put forward in support of the German contention that a second German delegate should have a seat on the Council of Administration of the Ottoman Public Debt, and that Germany should enjoy rights to the Chairmanship of the Council together with France and England. According to these, Germany holds £T49,980,000, or 42.87 per cent. of the total indebtedness of the Porte previous to the recent French Loan. France held £T43,730,000, or 37.51 per cent., and Great Britain only £T5,260,000, or 4.51 per cent. The Chairman of the Council, M. de la Boulinière, however, maintains that his nationals hold £T55,420,000, or 53.83, against Germany's £T35,010,000, or 34.01 per cent.; but, as *The Financial Times* points out, he seems to have omitted to reckon the recent series of the Baghdad Railway Loan, amounting to £T7,130,000, which would bring up the German holding to £T42,140,000. But, even so, there is still a discrepancy of some £T7,000,000 between the rival versions. The one point upon which both agree is that the British holding is less than 5 per cent. of the total Debt administered by the Council. Certainly, in the circumstances, Germany appears to be justified in her demand, at least as far as the reversion to the Chairmanship is concerned; but it is hard to see why Germany should have more members than France

***

The prosperity of the Smyrna-Aidin Railway is such as to go far to justify Italian ambitions to share in the development of that vilayet. According to the company's figures, the receipts for the week ending May 16 were £1.989 in excess of those for the corresponding week of last year, and the aggregate receipts since January 1 amount to no less than £145.211, an increase of £34.156 over the figures for the same period in last year. The mileage now being worked by the company is 379, and the week's receipts amount to over £20 a mile, which, when everything is taken into consideration, is a highly satisfactory figure.

Constantinople Business Letter

(From Our Own Trade Correspondent.)

Constantinople, May 16.

Great Britain's Trade with Turkey.

According to the Board of Trade returns for the month of April, 1914, the total exchange of enumerated articles between the two countries amounted to £751,486 during April, 1914, as compared with £475,489 during the corresponding month in 1913 and £699,716 in 1912. This is an equally good showing as the previous month, although the increase is entirely in the exports to Turkey.

The total enumerated imports from Turkey into the United Kingdom during the month of April, 1914, amounted to £88,516, and while almost identical with those during the same month in 1913, £88,757, are less than during 1912, £136,963. The shipments of barley amounted to £33,102, as compared with £44,097 during April, 1913, and £46,637 during the corresponding month in 1912; those of other cereals—wheat, oats, and beans—were practically nil. On the other hand, the shipments of mohair amounted to £44,698 in April, 1914, as compared with £24,398 during the corresponding month in 1913 and £52,921 in 1912; those of wool amounted to only £3,202, as compared with £10,504 during 1913 and £14,429 in 1912. The shipments of raisins amounted to £6,814, as compared with £9,758 in April, 1913, and £839 in 1912.

As regards the enumerated exports to Turkey during the month of April, 1914, these were above the average, and were in excess of the preceding month. They amounted to £662,970, as compared with £386,732 during April, 1913, and £562,753 in 1912. Most of the enumerated articles show marked increases. The shipments of cotton piece goods amounted to £527,704, as compared with £311,804 during April, 1913, and £451,632 during the corresponding month in 1912; those of cotton yarns were £43,736, as compared with £31,098 in 1913 and £58,206 in 1912, when the Italian war kept Italian supplies off the market. The shipments of coal amounted to £35,897 during April, 1914, as compared with £11,375 during the same month of 1913, and practically nil in 1912; those of woollen tissues amounted to £22,749 during April, 1914, as compared with £13,766 during the corresponding month in 1913, and were almost identical with 1912—£22,921. The shipments of worsted tissues amounted to £17,456, as compared with £9,990 during April, 1913, and £15,844 during the same month in 1912. The shipments of wrought copper amounted to £6,066, as compared with £3,535 during April, 1913, and £6,725 in 1912; those of tin amounted to £6,213, as compared with £3,711 in 1913 and £3,903 in 1912. The shipments of bags and sacks amounted to £3,149, as compared with £1,453 in 1913 and £3,173 in 1912.

A survey of the total enumerated exchanges during the first four months of the present year gives the following satisfactory results:—1914, £2,774,761, as compared with £2,191,970 during the corresponding period of 1913 and £2,625,264 in 1912. During this period all of the enumerated exports to Turkey show increases as compared with 1913, and in most cases more than hold their own as compared with 1912, the totals being £2,216,304 for 1914, as compared with £1,579,279 during the corresponding period in 1913 and £1,856,886 in 1912. The total exports of cotton piece goods during the first four months of 1914, ended April, amounted to £1,655,976, as compared with £1,295,713 during the corresponding period in 1913 and £1,348,217 in 1912. The shipments of cotton yarns are slightly in excess of the previous year but less than during 1912, when this market was closed to Italy, the totals being £158,521 in 1914, £137,231 in 1913, and £195,857 in 1912. The shipments of coal amounted to £163,690, as compared with £39,657 in 1913 and £66,595 in 1912, when coal was contraband of war. The shipments of woollen and worsted tissues to date in 1914 amounted to £164,563, as compared with £74,924 in 1913 and £174,573 in 1912. The shipments of wrought copper to the same date amounted to £34,067, as compared with £9,774 in 1913 and £46,573 in 1912; those of tin to £23,161, as compared with £12,604 in 1913 and £13,303 in 1912. The shipments of bags and sacks amounted to £16,327, as compared with £9,377 in 1913 and £11,768 in 1912.

The total enumerated imports into Great Britain from Turkey during the first four months of 1914 were £558,457, as compared with £612,691 in 1913 and £768,378 in 1912. The shipments of barley amount to £181,183 to date, as compared with £254,026 in 1913 and £467,415 in 1912; the shipments of other cereals are insignificant, those of oats alone amounting to £16,214, as compared with £15,110 in 1912. The total shipments of raisins to date amount to £105,369, as compared with £61,233 in 1913 and £31,921 in 1912. The shipments of wool amount to £53,575, as compared with £78,060 in 1913 and £67,681 in 1912; and those of mohair to £198,388, as compared with £218,286 in 1913 and £133,880 in 1912.

The Boycott.

This is a question so closely related to politics that I have so far purposely avoided it, but when an important home Chamber of Commerce issues a circular in which, quoting from a correspondent, appears such statements as "the anti-Christian boycott which the Turks are carrying on against all Christians, and which boycott is encouraged by the Government," and "the Government is encouraging and fanaticising the Turkish population," it is time to say something on the subject. In the first place, I venture to make the statement that the Government is not encouraging a boycott—in fact, it would only be fair to state that the Government took firm action when, some months ago, pamphlets were issued and posted on the walls inviting Turks not to deal with a certain element of the population. The pamphlets were suppressed, and arrests were made in connection with the incident. There is not an anti-Christian boycott in the capital. In the interior abuses have been committed, but the fact must not be overlooked that the ill-feeling towards certain elements forming the population of this country as a result of the late war has not yet passed away. This ill-feeling is directed against one particular element of the mixed races of this country, and one cannot help thinking that to a very great extent they are now only reaping what they have sown.

The effects on the imports from the trade returns quoted above is not evident; in fact, to date there has been a steady increase in the imports. Trade is at present more directly affected by the rumours of a fresh war between Turkey and her neighbour rather than by any boycott, and if these relations improve, as it is to be hoped they will, British manufacturers will have little reason for complaint.

CONSTANTINOPLE CONCESSIONS.

Under date of May 15 the Brussels correspondent of *The Financial News* reports that Belgian financiers will form very shortly a company that "will undertake the exploitation in Constantinople of the tramways, electricity, gas, and, later on, of an underground railway. At first the company will have a stock capital of 18,000,000 frs. and a debenture capital of the same amount, as the first object is to exploit the tramways; but it is already foreseen that the execution of the whole programme will involve over 100,000,000 frs. The existing 25 kilometres of tramway lines have already been electrified, and the exploitation co-efficient, which formerly amounted to 90 per cent., has already dropped to 49 per cent. In 1916 the Belgian company will absorb the light and power undertaking, which is actually worked by a Hungarian company, controlled by the Budapest Aktien Gesellschaft für Elektrische und Verkehrs-Unternehmungen. The Hungarian company already sells over 2,000 kilowatts, and anticipates a yearly production of 250,000 kilowatts. The Belgian group has obtained the concession of an underground railway between Stambul, Galata, and Pera."

SERVIAN RAILWAY CONSTRUCTION.

Digitized by Google

Servian Railway Construction.

Official Proposals.

(BY OUR SPECIAL CORRESPONDENT.)

BELGRADE, May 10.

In the course of conversation yesterday with the Minister of Public Works a copy of the draft law which is shortly to be voted by the Servian Skupshtina was placed at my disposal. I shall roughly summarise the law, which is to authorise the Government to spend 223,800,000 francs on new and existing railways, and shall amplify it with further particulars obtained during the course of the interview.

British Participation.

In the first place, however, special mention must be made of the survey of a line granted by the Government to a British firm. Mr. Pashitch told me that when the programme was being drafted the Cabinet Council decided that one line at least should be reserved for British enterprise. In view of the fact that neither are we financially interested in Servia, nor did we participate in the Servian loan recently floated in Paris, this act on the part of the Government is an earnest of the country's admiration for Great Britain, and the desire that we should in future participate more fully in Servian development—a circumstance to which I shall have occasion to refer again.

The line, small, but not unimportant, which is to be surveyed by a British firm (The Railway and Works Company, of Old Jewry, London), is that connecting Shtip with Monastir, Skoplje (Uskub) and Salonika. It will leave the Monastir-Skoplje line at Prilip, and, after cutting across a small watershed, will run down a valley in a north-easterly direction to Kavadar, whence it will follow the course of the Tsrna Reka River to its junction with the Vardar near Gradska, a station on the Skoplje-Salonika line. A bridge will here be necessary across the Vardar River. The line will then continue in a north-easterly direction up the Bregalnitza Valley to Shtip and Kotchané, the latter being approximately 120 km. from the base at Prilip, and 50 km. from the Bulgarian frontier. The draft law provides only for the section to Shtip and the cost (survey, construction, and rolling stock) is estimated at 19,800,000 frs. I understand, however, that the agreement with the Railway and Works Company for the preliminary survey which was signed on Saturday includes the Shtip-Kotchané section; there is no intention of continuing the line at present to Tsarevo Selo, near the Bulgarian frontier.

It may here be mentioned, incidentally, with regard to all Servian lines, that the granting of the concession for the survey of a line does not formally imply its construction by the same firm. As a rule, however, it generally happens that one and the same firm eventually does both.

The Draft Law.

This law, constituting roughly the Government's railway programme for the next two years, consists of three parts: (I.) The broad gauge lines to be built immediately; (II.) repairs, provision of rolling stock, etc., of great urgency on the existing lines: and (III.) necessary lines, the construction of which can be delayed—nominally, their construction is to begin when parts I. and II. have been completed, but in the case of the Novi Bazar and Shtip lines I understand that no such fine distinction is likely to be made.

In the following estimates for the new lines are included: Survey, construction, and the necessary material. Regarding the latter, it has to be supplied by the firm constructing the line according to the general type adopted by the Servian Railways. The average inclusive cost per kilometre is estimated by the Ministry of Public Works at 175,000 frs.; the total length of the railways to be built, according to the draft law, is approximately 1,000 km.; railways already under construction in Old Servia total about 650 km.

PART I.

This part consists of four lines:—

	Frs.
(a) Mrdaré-Prishtina	6,000,000
(b) Rashka-Mitrovitza	15,000,000
(c) Skoplje - Tetovo - Gostivar - Kitchevo-Brod-Prilep-Monastir, or instead of this line the two following:— Skoplje-Treska Valley-Brod-Prilep-Monastir and	
Skoplje - Tetovo-Gostivar	60,000,000
	22,000,000
(d) Prishtina-Shtimlie-Prisrend	103,000,000

Lines (a) and (d) are sections of the Adriatic Railway, the biggest undertaking at present in Servia. The sections, and the state of the work interrupted during the war, are as follows: The line from Prahova (on the Danube) to Zaitchar is being built by a French firm, and is to be finished by the end of May; the Zaitchar-Kniazhevatz-Nish line is being built by the Servian State, and is to be completed in two years; the Nish-Mrdare section is being constructed by the Société Franco-Serbe; the Mrdaré-Prishtina line has been surveyed by the same company, and the whole section from Nish to Prishtina is to be completed at the same time as the Prahova-Nish section, and preliminary surveys for the Prishtina-Shtimlie-Prisrend-Albanian frontier line have been made by a Marseilles firm forming part of the Société Franco-Serbe. Regarding the trans-Albanian section, nothing is to be gleaned from the Law, the whole question having been shelved pending a satisfactory solution of the Albanian problem. But in the Ministry of Public Works the northern route from Prisrend—that is, along the Drin Valley to Alessio and then along the sea coast to Durazzo—rather than the southern route via Dibra, Struga, and Elbasan, is favoured, both for strategic and economic reasons. It is also worthy of comment that the proposed lines linking up Dibra with Struga, Prisrend, and Gostivar have been dropped for the present; at the most Dibra may eventually be connected by rail with Gostivar.

Regarding (c), or the Skoplje (Uskub)-Monastir line, with its two variants, the first variant is not favoured so much at present as the second, the reasons being the enormous cost of building the section between Gostivar and Kitchevo, including a twelve-kilometre tunnel, etc. It has been found that the cost of the first variant is equal to the cost of the second, plus the Skoplje-Gostivar railway, which can always be continued at a later date to Dibra. Moreover, the second variant, following the course of the Treska River to Brod, is the shorter of the two. Julius Berger, of Berlin, has surveyed the first variant, and is now completing that of the second. It is remarkable that, in linking up Skoplje with Monastir, the Government did not decide to build a line from Veles on the Skoplje-Salonika line, via Prilip, to Monastir. It would have been the shortest route. The only reason given me was that it was not intended to make Veles an important centre, and that the great commercial and distributing nucleus for New Servia was to be Skoplje.

PART II.

This part concerns repairs, rolling stock, etc., for the existing lines as follows:—

	Frs.
Reconstruction of the Belgrade station and onstruction of sheds	7,000,000
Rolling Stock for existing lines	10,000,000
Enlarging and improving existing stations	900,000
Ditto. Railway works at Nish	1,500,000
Workshops for narrow gauge railways	800,000
Iron bridge alterations	3,500,000
Relaying and Improvement of lines	8,000,000
Completions of railway construction already begun	10,000,000
Danube Bridge (Roumanian-Servian)	5,000,000
	46,700,000

The following are some of the lines which have been begun, and to which the above credit refers: — (1) Kragujevatz-Kraljevo-Rashka, normal gauge line, begun by the Société Franco-Serbe, but not yet completed. The section Rashka-Mitrovitza, referred to under (b), Part I., is also being constructed by the Franco-Serbe, and will link up the Skoplje-Mitrovitza line with Belgrade, forming a second alternative route to Salonika. (2) Belgrade-Pozharevatz, being built by the Servian State, was interrupted by the war, but work has now begun again, and it is anticipated that it will be completed by the end of next year. This stretch is a section of the Belgrade-Prahova line, which, when completed and linked up with the Roumanian system, will shorten the route between Bucharest and Trieste (or Fiume) by about 150 kilometres. The section between Prahova and Pozharevatz, via Kutshevo, is being surveyed by Lefebre, of Paris. The present law does not make any provision, however, for this section. (3) The sections of the Adriatic Railway alluded to in Part I., and (4) some narrow-gauge lines of minor importance.

The credit for the Danube bridge represents Servia's share in the cost, Roumania putting up an equal amount. The bridge is to be built as soon as possible, a commission of four engineers, of whom the principal one is a Roumanian, being already engaged in studying plans. The exact situation of the bridge has not been decided, but it will be somewhere between Prahova and Brza Palanka. Prahova is bound to be an important Servian town on the Danube, the Government planning the construction of a port there. No credit has, however, been opened up to the present.

As practically all the items included in this part are under the control of the railway direction—that is to say, they do not depend on concessions granted to foreign firms—there is every chance for British firms to participate successfully. No time must, however, be lost. An agent or representative here is necessary, but business, and *good business*, can be done at prices comparing favourably with those of competing firms.

PART III.

The necessary lines, the construction of which can be delayed, are three in number:—

	Frs.
(a) Rashka-Novi Bazar-Sienitza-Priepolje-Uvatz	45,000,000
(b) Prilip-Gradska-Shtip	19,800,000
(c) Narrow gauge from Uzhitza to Vardishte, or else from Uzhitza to Uvatz	8,500,000
	73,300,000

The first of the above lines will link up the Bosnian system, via Novi Bazar and Rashka, with Mitrovitza and Skoplje. I may mention here that, contrary to the opinion generally held, the Skoplje-Mitrovitza line is not narrow, but standard gauge. The Société Franco-Serbe has surveyed the line as far as Uvatz. It will thus be seen that this company is interested in two of the most important railway systems in Servia—namely, the Adriatic from Nish to Albania, and the linking-up of Rashka with Belgrade, Bosnia, and Skoplje. The second line has been fully dealt with.

The survey of the two variants of the Uzhitza line has been entrusted to the Darmstadter Bank, and most likely the second variant will be chosen in order to facilitate communication between Uzhitza and Uvatz without having to enter Bosnian territory. This would leave the Bosnian Vardishte line without direct communication with any Servian line, but ultimately it is hoped to link it up directly with the Kraljevo-Uzhitza line.

The following lines have not been included in the draft law, and it can therefore be assumed that they will not be begun within the next two years:—

Monastir-Resra-Ochrida-Struga.—This line, which, when completed, will be one of the most picturesque in Servia, is being surveyed by the firm of Lenz, of Berlin.

Krushevatz-Tulari.—This line in Old Servia will link up with the Adriatic line near Prokuplje. It is being surveyed by the Société Franco-Serbe.

Valjevo-Osichena-Loshnitza. — A narrow gauge railway in Old Servia, being the continuation to the Bosnian frontier of the Belgrade-Valjevo line.

The importation of cotton goods into Samsoun (Asiatic Turkey) in 1912 reached 1,305,708 kilog, representing a value of 4,000,000 frs. Coloured cottons, flannels, Indian and cotton shawls are mostly bought.

OUTFIT THAT BEAT THE WORLD.

KINGDON & CO.,
13, King Street,
Cheapside, London, E.C.

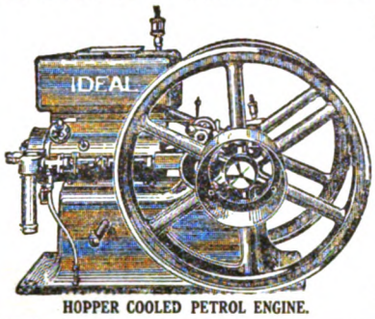
WINDMILLS.
IMPERIAL:
(1st Prize R.A.S.E.)
Giant & Double Gear,
for Pumping.

NEW IDEAL POWER MILL:
For Pumping and Driving Machinery.

PUMPS of all kinds.

OIL ENGINES.
From 1 to 20 b.h.p. High-class English Engines, Stationary and Portable.

HOPPER COOLED PETROL ENGINE



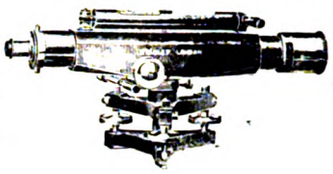
HOPPER COOLED PETROL ENGINE.

From 1 to 16 h.p.
ALSO
1½ and 2½ h.p.
Vertical Engines.
No tank required.
Highest class material and workmanship.

TRADE **STANLEY.** MARK.

The Largest Manufacturers of Surveying and Drawing Instruments in the World.

Stanley's Engineer's Level:
The strongest and most compact Level yet made.



With ordinary care will keep in adjustment a lifetime.

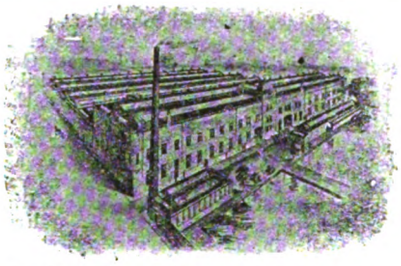
Stanley Drawing Instruments are acknowledged to be THE BEST.

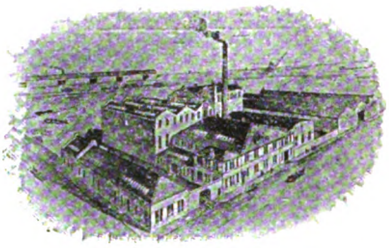
Please send for a copy of our "K. 152" Catalogue. and compare our prices with those of any other FIRST-CLASS Makers.

W. F. STANLEY & CO., LTD.,
Export Dept.:
GREAT TURNSTILE, HIGH HOLBORN, W.C.
Head Offices and Showrooms: 286, HIGH HOLBORN, LONDON, W.C.

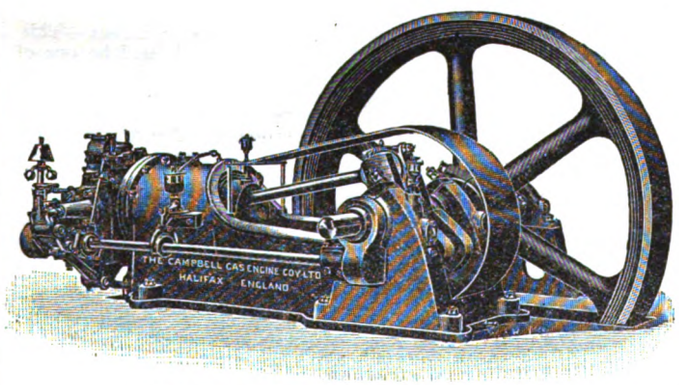
Cable Address: "*Lobo, Dundee.*" **LOW & BONAR, Ltd., Dundee, Scotland.** *Codes used: A.B.C., 4th & 5th edns. A 1., Lieber, and Bentley's.*

Manufacturers of SACKS and BAGS of LINEN, COTTON and JUTE, for all purposes.
Also of WATERPROOF CANVAS and TARPAULINS, Specially prepared for tropical climates.





Speciality: **ELASTIC FIBRE-LINED JUTE BAGS,** **Securing Absolute Purity of Contents**
DAMP-PROOF BAGS, WATERPROOF BAGS, FIREPROOF BAGS, Etc.
Shippers of all classes of JUTE, LINEN and COTTON FABRICS.



HORIZONTAL GAS ENGINE, 40 B.H.P.

"CAMPBELL"
GAS ENGINES
Vertical and Horizontal, up to 850 B.H.P.

SUCTION GAS PLANTS
To use Anthracite, Coke, Charcoal, Bituminous Coal, Lignite, Peat, Wood Refuse, and other Waste Material.

Engineering Notes.

Craiova Tramways.

We are informed by our Bucharest correspondent that the representatives of a French group have arrived in Craiova in order to secure a concession for electric tramways in that city, and that the Mayor has had several long discussions with them. This opening for foreign enterprise was mentioned in THE NEAR EAST many months ago.

A White Portland Cement.

Portland cement has always been acknowledged as one of the most useful and indispensable materials for a great variety of building purposes. Its convenience, durability, strength, and moderate cost are special characteristics to which is owed its steadily increasing use. In some instances, however, its unattractive colour has proved to be an insurmountable obstacle to its employment in the higher class of ornamental work, and though various forms of plaster and slag cement have been used for a covering, none of them give satisfaction because of their inferior strength and inability to stand exposure to the weather. Architects, builders, and contractors will, therefore, be glad to hear that after a long series of experiments the production of a true Portland cement, perfectly white in colour, has been achieved. It is claimed to be equal in strength and other qualities to the best gray Portland cement. Some ornamental concrete terraces, large fountains, and other ornamental works made with this pure white cement, have been much admired and found, it is said, to be excellent in every respect.

The New Greek Dockyard.

It is reported from Athens that, subsequent to an arrangement with the Greek Government, Mr. Colson, at the head of four other English engineers, arrived in Athens from England last week. Mr. Colson with his assistants will join the other English mission now in Athens, under Col. Raban, R.E., to work out and prepare the plans, etc., for the construction of the new Greek dockyard at Scaramanga and Eleusis.

Egyptian Oil Fields.

The current number of *The Petroleum World* contains an article entitled "The Coming of Egypt," the writer of which says that although only a small percentage of Egypt's oilfields has yet been developed, they are entitled to rank amongst the most prolific and remarkable in the world; and he is of opinion that the country has a great future before it as an oil producing country.

"Egypt," he points out, "is practically the centre of the great East and West highway, whose main thoroughfare lies through the Suez Canal. The oil does not require to be marketed—the market is brought to one's doors. The refinery at Suez which the Royal Dutch and Shell group are erecting to treat Egyptian oil can find parties at its own gates ready to buy its various products for use in the Far East of Asia or the West of Europe. As a matter of fact, the owning corporation does not need to seek for such parties. It is itself, besides being, next to the Standard Oil group, the largest and most complex oil organisation in the world, its own producer, refiner, shipper, and marketer; and all it has to do is to find production, the rest following as a matter of course."

A little later he remarks, with great truth, that the importance of this development in Egypt "is immense to the prestige and the practical usefulness of the British Navy. Hitherto, with the exception of Trinidad, we have no large young field within our dominions which is worth mentioning. We wish expressly to say that we refer to producing oil fields, as prospective fields are many. Egypt has come as a surprise to many people who did not know its possibilities; but it must have come as a great relief both to the business world of the British Empire and to the authorities who have been so anxiously looking round for an immediate oil supply within the Empire. We have again and again expressed the opinion that there is abundance of oil within our dominions if it is sought for in the right places, and Egypt is one of the cases in point which have already come to verify that opinion."

Railway Motors for Cyprus.

A fine specimen of the well-known Drewry railway motor-cars has just been completed for the Cyprus Railway to the order of the Crown Agents for the Colonies. It is fitted with a 25 h.p. engine, running on paraffin (starting on petrol), 3-speed gear, and full reverse, giving all three speeds in both directions. The body has a seating capacity of nine, and the two back seats are removable in order to accommodate one ton of goods or luggage. It is also equipped with dynamo electric lighting and a self-starter. Altogether it is one of the finest rail cars ever built. The makers are the Drewry Car Co., Limited, River Plate House, 13, South Place, London, E.C.

COMMUNICATIONS IN SERVIA

An Opening for Enterprise.

(FROM OUR SPECIAL CORRESPONDENT.)

BELGRADE, May 14.

From the beginning of June a motor-bus service for post, passengers, and freight will run between Veles and Monastir. The concession has been granted to a Servian, and to the best of my knowledge the cars have not yet been bought. The concession is for five years, and the cost of the journey from Veles to Monastir will be fixed at 17 frs., at the rate of 80 centimes per 5 km. The cost of the journey by rail, viâ Salonika, is about 70 frs., so that the motor service ought to pay well.

At present the state of the roads in Servia is not too good, but it is the Government's intention to devote the next ten years to a thorough overhauling of existing roads, and the construction of new ones. If a British firm were to approach the Government with a scheme for roadmaking, which would imply the supply of cars, lorries, etc., I can assure it that it would be well received. A rather favourable offer has already been received from a German firm but no decision has yet been taken.

TENDERS INVITED.

[*The London agent of the Egyptian Government is Sir A. L. Webb, K.C.M.G., Queen Anne's Chambers, Westminster, S.W., at whose office particulars of tenders marked* (L) *are to be obtained*]

EGYPT.

Army Clothing, etc.—The Egyptian War Office invites tenders for the supply of kip and sole butt ends, tarbosh lining, puggaree khaki, jerseys and socks, cotton handkerchiefs, feather hackles, woollen cummerbands, web braces, brushes, and flannel cholera belts. June 8. (L).

Bags and Cases.—The Egyptian War Office invites tenders for the supply of fifty Gladstone bags and 116 tin uniform cases. June 22. (L).

Bolts, Hooks, etc.—The Egyptian War Office invites tenders for the supply of 16,000 slide bolts, hooks, etc. June 24. (L).

Steel Frame Buildings.—The Egyptian War Office invites tenders for the supply of five steel frame buildings. June 9. (L).

Screw Piles.—The Survey Department, Gêza (Mudiria), invites tenders for an initial supply of screw piles, etc., required for the levelling work during 1914-1915. June 30.

Papers, Envelopes, etc.—The Economat Central of the Ministry of Finance, Cairo, invites tenders for the supply of papers, envelopes, cards, guides, and file covers for Government administrations for 1915, 1916, and 1917. June 4.

Sundries.—The Ministry of War, Cairo, invites tenders for the supply of the following articles:—Shoes, red; sponges, pipeclay; tarboushes, maghraby; tassels, G.S.; tassels, maghraby; tins, empty, for polishing powder; irons, laundry, with stands, and stands, spare; tarboushes, cadets, special, with tassels. June 2.

Sole Leather.—The Ministry of War, Cairo, invites tenders for the supply of 1,400 okes of sole leather. June 9.

Rope.—The Ministry of War, Cairo, invites tenders for the supply of 800 okes of half-inch fine Damascine rope. June 9.

CYPRUS GOVERNMENT RAILWAY.

Evrychou Extension.

(FROM A CYPRUS CORRESPONDENT.)

The Cyprus Government had for a long time had under consideration what steps could be taken to render the Cyprus Government Railway a paying concern. For years there had been correspondence on the subject, and considerable pressure had been brought to bear on the Government, by interests at Larnaca, to construct a Larnaca-Nicosia Railway. This would, of course, have been bad policy for the island, in view of the capital already sunk in the Famagusta-Nicosia-Morphou Railway and Famagusta harbour, since a Larnaca-Nicosia railway would naturally prove detrimental to the existing line.

In 1912 the Colonial Office sent out an expert, in the person of Mr. F. Bedford Glasier, C.M.G., late general manager of the Southern Nigeria Railway, to examine into the whole question, and to advise whether the existing line should be continued or other lines constructed. He recommended an extension of the present line from its west terminus, Morphou, to Evrychou, fifteen miles in a south-easterly direction, in the hills on the north slope of the Troödos Mountains, the extension serving to carry along the railway to Famagusta the rich produce of the Solea, Marathasa, and other valleys of this region.

In June, 1913, sanction was given for the construction, at a cost of £23,000, to be spread over two years, of the extension recommended by Mr. Glasier. Material for this work was at once put on order from England, and a start was made with the survey. In the autumn of 1913 a reconnaisance of the Solea valley was made, and the laying of the rails began in November. At the end of March, 1914, about seven miles of earthwork and three miles of ballasting were completed. The precise route of the last few miles of the extension has not yet been finally settled owing to the great difficulty in purchasing the necessary land from the villagers, for the land along the river beds in these valleys is particularly valuable owing to water rights. It is hoped, however, that a portion of the new line will be open for traffic by the end of this year.

At a meeting of the Swansea Harbour Trust held on May 11 Mr. Beck remarked that it was very satisfactory to see in the return of the tinplate industry that Roumania was returning to herself. This was very encouraging.

On the Greek Chamber resuming its deliberations on Monday, the Minister of the Interior submitted a Bill for supplying Athens and the Piræus with water from Lake Stymphalos, a project which has been dealt with at some length in our Engineering Notes.

The Engineering Editor of "The Near East" will always be pleased to answer inquiries from readers respecting any machinery or appliances described in these pages.

THE CAIRO MOTOR CO., Ltd.
The Largest Motor Depot in the Near East.
SUPPLIERS OF
Motor Cars, Cycles, Launches, Marine Sets, Evinrude Motor Attachments, Dunlop Tyres & all Motor Accessories.
Head Office: RUE SOLIMAN PASHA, CAIRO, EGYPT.
Also at ALEXANDRIA and LONDON.

Egyptian Engineering Co., Ltd.
CAIRO and MANSOURAH.
Egyptian Engineering Stores, Alexandria.
Government Contractors, Engineers, Importers of Machinery of every description, Diesel, Steam, Gas and Oil Engines, Pumps Windmills, Agricultural Machinery, &c. Large stocks kept at all depots.
Sole Agents for over 40 first-class firms.

Near East Markets.

SPECIAL REPORTS.

(From Our Own Correspondents.)

Smyrna. May 11.

The authorities, rather late in the day, have taken up the task of the extermination of locusts thoroughly; and such primitive and worse than useless methods as ordering the entire male population to cease work on a given day and march *en masse* to kill locusts have been abandoned in favour of organised bands from different quarters proceeding to infested districts in charge of qualified officials. Private efforts have also been fairly successful, and it is estimated that on the whole the future of the crops has been assured. In certain districts great harm has already been done, but this fortunately is expected to be the exception. This is particularly the case in the Tourbali District, where serious damage has been caused to the crops.

Braila. May 16.

Rain fell all over Roumania this week, but not in sufficient quantity, except in Moldavia, where crop prospects are reported to be excellent. In Eastern Wallachia rain is still urgently needed, especially in the districts of Braila, Yalomitsa, Buzeu, and Rimnie-Sarat.

Odessa. May 17.

The crop outlook is not so encouraging as it was a fortnight ago. For the last ten days the weather has been abnormally cold for the season. A few days ago 3 degrees of frost (Réaumur) were registered in parts of Poltava and Bessarabia, doing enormous damage to the maize seedlings. The sturdy winter wheat and rye have not been seriously affected. Warm weather and fructifying rains are now absolutely necessary, but for the moment the dual dispensation is withheld.

Meshed. April 24.

The general conditions of trade in Meshed and the surrounding district at present are prosperous. The cotton industry this year is not so good as usual, owing to the fall in the price of cotton in Russia. But wool and dried fruits are both a good product this year, and much opium is sent to London by parcels post. The carpet industry perhaps never was better. There must be more than 2,000 looms in Eastern Persia, and they are able to sell all they can produce. There are some twelve or fifteen carpet buyers in Meshed who do a large business, besides a host of smaller dealers.

The following information is compiled from the weekly bulletins received at the London offices of the Imperial Ottoman Bank from its correspondents in the Near East :—

Busreh. April 24.

Merchants have so far abstained from making advances on the cereal crop. This abstention, which is due to the poor demand abroad, perpetuates the monetary stringency, and prevents the market from recovering its animation.

The sugar market still suffers from the glut which was produced by the arrival of consignments intended for Baghdad, but stopped on the way in the hope that they would be more easily disposed of here than in Baghdad, which had stocks of sugar for a long time ahead.

The presence here of two ships bound for Jeddah has produced an agreement among shipowners on the question of freight, which has been lowered to 10 sh. for cereals. This favourable opportunity, it is thought, will lead to the exportation to Jeddah of all available stocks of grain here, estimated at some 4,500 tons.

Stamboul. May 2.

The industrial market remains calm. This torpor is due largely to the political situation, both in the provinces and in the capital.

On the other hand, the emigration of the Greek element in the different localities does considerable harm to the merchants of this town. Among the emigrants, some honest individuals not being able to remit cash, have returned the merchandise to the former owner.

The boycott has not yet ceased, but it is not so severe as formerly.

The conclusion of the great war, we hope, will tend to improve the situation of our market.

PRODUCE REPORT.

Sugar.

London, May 21.

The beet market has been very quiet and slightly easier, although Continental and American advices were not justifying such a condition. There is no doubt that the only thing wanted is a better demand from the trade, which, now that the Budget is declared, will be forthcoming, for it is well known that, pending this declaration, the demand was seriously interrupted and held up. The refined sugar market has been firm throughout the week, with good business passing on English at generally 1½d. to 2d. advance, and on foreign first marks at ¾d. to 1½d. per cwt. higher rates.

The general supplies of sugar in stock and afloat in the Continent of Europe and in America up to May 12 are 3,822,790 tons, against 3,648,100 tons last year.

Coffee.

The export trade has been buying freely during the last two weeks, and more confidence is shown as it becomes evident that the end of the different crops is near. At auctions Costa Rica, low mid. to good mid., went at 69s. to 83s., and East India small 65s. to 72s. 6d. The quality of the East India, however, has materially fallen off, and what is coming now is considered quite useless for the home trade. There has been a strong market for Mocha, with prices mostly dearer owing to a reported small crop both of long and short berries.

Currants.

The market is steady, good business passing at unchanged rates. Medium qualities and smalls have been in the heaviest demand, while fine smalls are in a very limited compass. In Liverpool the principal inquiry is for small confectionery of all grades and for fine grocery fruit. Supplies of these descriptions are limited, and consequently full prices are asked.

Sultanas.

In spite of an apparently restricted inquiry for sultanas, the position with regard to this fruit remains unaltered. There is no quotable change in price, whilst holders show no inclination to force sales. The s.s. "Rosetti" is due this week, but with only a very small supply for this market, the knowledge of which has created a distinctly firmer tone. Greek fruit continues in good demand, and stocks are being steadily reduced.

Figs and Dates.

Figs: Bag naturals are cleared from first hands, and no further supplies are available at present. Dates are unchanged; the tendency, however, appears to be upwards, as holders of cheap parcels have disposed of practically all their stocks. Figs: Bags naturals are quoted 28s. to 38s.; and dates, new, Sair, 8s. 6d. to 9s. 6d.; Khadrawi, 8s. to 10s. 6d.; and Hallowi, 13s. to 15s.

Seeds.

Linseed is rather steadier for near positions. Rapeseed is unchanged. Cottonseed is inactive: London-Egyptian, May, offered at £7 17s. 6d., and June £8. Canaryseed is quiet.

Oilcakes, etc.

Cotton cakes: Only a limited quantity is available in store, and, with curtailed shipments of Egyptian, there is a distinctly better feeling in the trade. Best brands find a ready sale at £4 7s. 6d. ex ship, whilst landed parcels are quoted £4 11s. 3d. to £4 12s. 6d., with English £4 12s. 6d. and Bombay £3 15s.

Linseed cakes: Owing to the abundance of natural foodstuffs there is practically no consumptive demand, but at the same time a premium is asked for autumn and winter delivery beyond buyers' views. Quotations are unchanged.

Various.

Onions: There is no change in the position of onions, which is one of the most remarkable in the experience of the trade. They continue scarce and very dear. Egyptian finest are quoted 1/s. 6d. per bag.

Jaffa oranges: Owing to a sharp rise in oranges, Jaffas command better prices, 144 fine selling 11s. 6d., 144 finest selected 12s. 6d., 250 fine 13s., 250 choice 15s.

OPIUM MARKET.

Messrs. Barker Brothers, Smyrna, report as follows for the week ending May 8:—The sales this week on our market amount to 131 cases druggists' manufacturing qualities at 13s. to 15s. 6d., but although the interior reports favourably about the crop, our holders are not disposed to make concessions, and thus the price for mixed parcels of 11 per cent. is still maintained at 14s. to 14s. 3d. The present estimate of the whole Turkey crop is reckoned to be 7,000 to 7,500 cases, but the weather conditions during this month will either reduce or augment the yield. We expect the first arrivals of new opium will come down on our market about the first week in June. The arrivals are 4,595 cases against 2,384 at same date last year.

BUSINESS CARDS.

SULZER BROTHERS, WINTERTHUR, SWITZERLAND
Steam Engines of all sizes, especially Uniflow Engines, Boilers and Superheaters. Sulzer Diesel Oil Engines from 20 to 6,000 B.H.P. EGYPTIAN COTTON MARKET.

(From Our Own Correspondent.)

Alexandria, May 15.

Prices are stationary, and speculators are holding off for a fall. Meanwhile, operations are confined to small and short-term transactions.

Reports of the forthcoming crop are very satisfactory, and it is certain that the acreage will constitute a record. Although water is actually plentiful everywhere, there is some uneasiness regarding the future. The level at the Assuan Reservoir is lower than last year, and it is feared that the cotton may suffer from water shortage in case of a late flood.

Some sales of the new crop have taken place for export, which indicates a big demand for our cotton. The export sales during the week have been considerable, and the United States are buying Egyptian cotton on a larger scale. It is practically certain that the stock on hand at the end of the season will be little, if any, larger than that of last year.

Messrs. Davies, Benachi and Co., of Liverpool, have received the following telegram from Alexandria, dated Wednesday :—

Market steady. July, 18 3/32, November, 18 1/32. Exchange, three months' date, 96¼.

	This week.	Same time. 1912-13.	Same time. 1911-12.

LIVERPOOL REPORT.

Messrs. Reynolds and Gibson telegraph :—There has been a quite fair inquiry for Egyptian spot cotton, sales since last report totalling 2,700 bales, as against 2,100 previous week. Medium grades of Afifi, Sakellarides, and Nubari have been in good demand and at hardening rates. Desirable lots of best qualities are becoming very scarce. Higher grades of all have been in little demand, but sellers were inclined to trade on slightly easier basis. Quotations for all descriptions are unchanged, with the exception of good and below Sakellarides, which are advanced 10 points.

MANCHESTER MARKET.

Manchester, May 20.

The strong tone in the market has been well maintained during the past week, prices in the raw material being on a higher level than any time this year. Spinners and manufacturers have experienced much difficulty in securing advances from buyers, and the general effect of the stiffening in quotations has been to restrict operations. Undoubtedly, sellers are passing through a most awkward time, and it looks as though no real relief from a producer's point of view will be experienced until the new cotton season begins in September. Engagements in both yarn and cloth are most irregular, and prices taken depend upon the position of individual sellers. Some of the weather reports from the American cotton belt have not been very favourable, and there is much uncertainty as to the outlook for the Egyptian crop. In piece goods the Near Eastern outlets have not been at all active, and in addition to fresh business being slow, cases are again mentioned of deliveries being stopped and remittances from the other side being poor. Perhaps during the last day or two a shade more inquiry has come through for Egypt, but most of the offers have been quite unworkable. The chief support continues to be given by India, but progress all along the line has been most difficult, as the limits of shippers remain on a low basis. China seems to be in a hopeless position, and some manufacturers who usually make for that market are now seeking orders for other outlets. A dragging demand continues to be met with in printing cloths, and in spite of organised short time the position in Burnley does not improve. Ordinary qualities in T-cloths and Mexicans can be delivered fairly quickly. Distribution in home trade fabrics seems to be a little better. American yarns for home use have tended to harden in quotation, but buyers have refused to follow the upward movement, and where sales have been arranged the margin of profit has suffered, especially in the lower numbers of the commoner qualities. A slower demand is now being experienced in shipping counts. Bolton spinnings have been stiff in quotation, but operations have been of a limited nature.

COTTON MILLS IN GREECE.

A return recently published by the Government of Greece gives the number of cloth and cotton mills in the Piræus as nine operating 55,000 spindles and 955 looms. The annual production of cotton yarns is estimated at about 900,000 packages, valued at £440,000; 11,250,000 yards of drill and chequered cloth, valued at £260,000, and 130,000 rolls of white cloth, valued at £60,000. Some 3,000 hands are employed, earning about £240,000 annually. Only a small quantity of the produce of these mills is exported, the remaining quantities being consumed locally.

COTTON IN ROUMANIA.

The demand for cotton goods of all kinds is at present very brisk in Roumania, and above all in the new Roumanian territories. The principal houses at Constanza and Galatz which supply the New-Dobruja (says the *Oesterreichisch-ungarische Konsular-Korrespondenz*) have exhausted their stocks. On the other hand, the native manufactories of knitted vests and hosiery are busily occupied, and will be obliged to import large quantities of cotton thread. Worsteds of inferior quality are indeed manufactured in Roumania.

BULGARIAN REQUIREMENTS.

According to the *Oesterreichisch-ungarische Konsular-Korrespondenz* of Vienna, the following products find a good outlet in Bulgaria :—Bicarbonate of soda (supplied mainly by Belgium in sacks of 100 kilos at the rate of 9.20 frs. per 100 kilos for 98 and 100 degrees); sulphate of copper (above all of British origin) delivered c.i.f. at the rate of £23 15s. per ton; yeasts for cheeses (supplied principally by Italy and sold in bottles of 1 litre at the rate of 1.75 frs. per litre, free Varna); candles, delivered in cases of average quality at the rate of 82.25 frs. per 100 kilos.

NEWS FROM ALL SOURCES.

According to a return lately issued by the Home Office, amongst the aliens to whom certificates of naturalisation were granted in 1913 there were 40 Roumanians, 26 Turks, 13 Greeks, 3 Persians, 2 Montenegrins, and 2 Servians.

M. Ch. El. Vamvacas, whose name will be familiar to many of our readers, has recommenced at Salonika the publication of *La Tribune*, which for the present will appear twice a week. M. Vamvacas, it will be remembered, was formerly a deputy in the Ottoman Parliament.

A Vienna contemporary states that cooking utensils in aluminium find a certain sale in the Balkans. In Servia, the principal countries supplying these articles are Germany, which alone covers three-fourths of the imports, Italy and Austria. France does a fair business in this line, but she has great competition with the three countries mentioned.

All kinds of paper find an interesting outlet in the region of Smyrna (Asiatic Turkey). The importation of printing paper rose in 1912 to 665,420 kilog. The average value of imports of writing paper is about £10,000. Cigarette paper and paper used for posters have a fairly important consumption.

During the month of March the receipts of the Ottoman Post Office were £T29,000 in the postal department and £T40,000 in the telegraphic, being increases of £T7,000 and £T12,000 respectively over the corresponding figures for last year.

The cultivation of rice was recently prohibited in different parts of the Egyptian Delta owing to the necessity of economising water. The Ministry of Public Works has, however, now given permission to cultivators in the neighbourhood of Damietta and Rosetta to grow rice on condition that they use pumps.

The *Quarterly Journal* of the British Chamber of Commerce of Smyrna estimates that the sowings of beans this season are about 10 per cent. in excess of last year's.

With regard to the Smyrna valonea market the *Quarterly Journal* of the British Chamber of Commerce of Smyrna reports that no serious change in values is anticipated for another three or four months, after which period the trend of prices will depend in a great measure on the prospects of the new crop.

During the first quarter of this year, 19,000 okes of tobacco from local stock were exported to Cavalla and Egypt from Chios.

A recent report of the British Vice-Consul at Skoplyé, quoted by the *Board of Trade Journal*, states that owing to the cold weather last winter the opium crop of the Tikvesh district will be a total failure, and there will be no opium for export except stocks on hand. Owing to the emigration of the Mahomedans and the possibility of hampering effects caused by Servian Government regulations, the future of opium cultivation is very uncertain.

Shipping Intelligence.

RUSSIAN TRADE WITH THE PERSIAN GULF.

(From Our Own Correspondent.)

Odessa, May 17.

The Minister of Trade and Industry has requested the Russian Steam Navigation and Trading Company to put steamers of a better class and greater speed on the Odessa-Gulf line. They have hitherto made four and five trips during the year; in future they must make at least six, and the company must be prepared, if necessary, to increase that number. A local merchant interested in the Gulf trade tells me, however, that he sees no present possibility of augmenting the limited overseas trade between Odessa and the Gulf ports. British-Indian competition is too strong to permit, he believes, of any appreciable expansion of Russia's export business with the ports of southern Persia and Busreh, even though Russian merchandise is carried from this port at privileged low-freight rates.

BLACK SEA SHIPPING.

(From Our Own Correspondent.)

Odessa, May 17.

Influenced by the temporary scarcity of prompt tonnage, our freight rates have during the last few days been a trifle firmer, but the inquiry remains very restricted. From 6d. to 9d. has been the all-round advance on the previous week's quotations, but as a considerable amount of new tonnage is expected, the rates will probably again collapse to the dead level of last week. These slight fluctuations will continue desultorily for the next two months, but there is no prospect whatever of any really appreciable improvement before the eve of the new harvest, and what that may be it is too early to hazard a forecast. Practically speaking, the Odessa granaries are empty

To-day the quotations for very prompt are 6s. 3d. Rotterdam and 6s. 6d. for Hamburg, Weser, and Antwerp. At Nicolaieff the position is, if anything, worse. A steamer left that port a few days ago empty, after waiting in vain fourteen days for cargo! That boat was, perhaps, peculiarly unfortunate, but her case explains the difficulty in general of obtaining cargo even at ruinously low rates. For such little business as is doing in the Bug port 6s. nominally is the rate for all destinations. The position at Kherson is not a whit better, but there is more inquiry for later loading in the Dnieper port. At Novorossisk there is a small but steady inquiry for first half June loading at 6s. 3d., Rotterdam 6s. 6d. Hamburg, Weser, and Antwerp, and 6s. 9d. Liverpool. But the general lack of interest manifested by shippers is altogether unusual, although by no means inexplicable, and the banks which support the shippers must be growing weary of the utterly sluggish situation.

KHEDIVIAL MAIL LINE.

Writing from Port Tewfik, under date of May 8, our own correspondent informs us that Messrs. Graham and Co.'s small steamer "Battle Isle," which, for the last four years has been running from Suez to the Red Sea oilfields and Sufaga, has been sold to Constantinople owners. It is understood that the buyer is Mr. Silley, the Constantinople agent for the Khedivial Mail Co.

The Bulgarian Navigation Co. has arranged a regular service touching at Porte Lagos on the Ægean.

BRAILA NOTES.

(From Our Own Correspondent.)

Braila, May 16.

The s.s. "Baharistan" has been bought by the Roumanian Steamship Company for £41,000. The steamer was built in 1912, and carries 6,600 tons on 22 ft. 7 ins.

Our freight market was dull and lifeless during the whole week, rates of freight being practically unchanged at 7s. Rotterdam, 7s. 3d. Antwerp, 7s. 6d. Hamburg, and 8 frs. 50 c. Mediterranean from the Danube, whilst from Sulina 6s. Rotterdam and 6s. 3d. Antwerp is the utmost obtainable.

There has been some inquiry for U.K. ports, and some parcels have been booked from Sulina at 7s. to 7s. 3d.

The bank on Sulina bar has now been cleared and vessels can pass drawing 23 ft., and can load at up-river ports down to 22 ft.

ROUMANIAN OIL NOTES.

(From Our Own Correspondent.)

Bucharest May 7.

Oil Prices.

The agreement arrived at between the Government and the petroleum companies as regards the price of oil for burning purposes, which I reported last week, is not received with satisfaction by the factory and mill owners, who intend to present a petition to the Ministry of Finance praying for the following facilities in order to combat the high prices reigning for petroleum burning material :—1. Permission to import coal free of duty and communal taxes. 2. Equal rates of transport on the railway for coal and petroleum. 3. Methylated petroleum to be permitted to be put to the same uses as benzine.

State Petroleum Territories.

The Ministry of Commerce denies that there is any truth in the report with regard to a probable exploitation of the State petroleum territories by the formation of a National Petroleum Society. A local paper, in referring to the *communiqué*, states that it is nevertheless a fact that subscription lists lie at the Bank of Roumania, Limited, and that the present Liberal party is taking this course in order to raise substantial sums for the purpose of making a profit from the exploitation of the State petroleum lands, and that the promoters of the new society have specially chosen a non-national bank in order that it shall not appear that the Liberal party is pulling the wires behind the scenes. The journal in question, stating that its information is undeniable, declares that large sums for the new undertaking have already been subscribed.

Petroleum Refinery.

It is announced here that a new company has been formed in London during the last few days, with a capital of over a million pounds, for the construction and working of a petroleum refinery either at Ploesti or Czernavoda.

NEW ROUMANIAN TUNNEL.

The Engineer states that a tunnel under the Danube is under consideration by the Roumanian Government to form a connection with its newly acquired territory. A bridge was first considered, but as no protected site was to be found military precautions forced the abandonment of the project. The proposed tunnel will have heavily fortified terminals.

Stock and Share Markets.

Bank Rate 3 per cent. (Jan. 29, 1914.)

SETTLING DAYS.

CONSOLS.
Tuesday, June 2.
STOCKS AND SHARES.
In Mining Shares the next carry-over is May 25.

Continuation Day.	Ticket Day.	Pay Day.
Tues., May 26.	Wed., May 27.	Thurs., May 28
Tues., June 9.	Wed., June 10.	Thurs., June 11

LONDON, May 21.

At the beginning of the week the tone improved considerably, but as the public refused to come in, prices soon sagged away, and business was reduced to a minimum. Even in the American market the bears have now obtained the upper hand, and as the Continent is depressed it seems hopeless to look for any rise in quotations. Money is hard, but it is believed that the Bank of England will now obtain its fair share of the gold offering, and this should relieve the situation. No rise in the Bank rate is expected, but we are unlikely to get a reduction.

Egyptian Unified in Request.

In the Foreign market the main feature has been the heavy fall in Peru prefs. Russians have been a shade harder, and Japanese have also been bought, probably on account of the Japanese Government. Bulgarians remain at 85. The business in Egyptian Unified still remains brisk, and there have been some good dealings round 99, whilst both the 3 per cent. and the inscribed stock have also been purchased. Greek Fours are harder at 52. Hungarian Rentes are 82½. Turkish Unified remain at 82. The position in Paris is not good, and further troubles may be expected from this quarter.

Home and Foreign Rails.

The Home Railway market has been very depressed on labour troubles. The bull account in the deferred stocks has made these securities weak, and the chance of a strike on the London General Omnibus Co. has also affected Underground Electrics. The American market opened the week in fine fashion. We were promised a 4 per cent. rise in railway rates, magnificent crop estimates were cabled over, and the bears became scared. Steels were very good, and Unions and Canadas were also marked up. It was said that the Mexican position was as good as settled. The little boom did not last long. The bad news about the crops may be disregarded. Although no rise is likely, a fall seems equally improbable.

Rubber and Oil.

In the Rubber market, the Merliman report was excellent. But sheet and crepe have fallen, and holders of shares are therefore getting out. The tone has been depressed. Oil shares keep firm, the only exception being Egyptians. Anglo-Egyptian B are now quoted under 1, Oil Trust A are only 3½, Red Seas 1 1-16, and all the other Egyptian Oil ventures have had a dull week. It is a pity that the Shell people do not let us have some further information with regard to well No. 13. Shells are hard at 5½, but nearly all Russians are weak, mainly on selling from St. Petersburg.

Mines Depressed.

Mining shares generally have followed the example given by the rest of the Stock Exchange, and have been continuously depressed. There has been a little buying of Broken Hill, and the group that are running the Kirkland Lake propositions have screwed up prices.

London Buying Egyptians.

The Egyptian market has been in a curious position all the week. On the one hand, we have had steady liquidation from Paris with some small selling from Alexandria, and, on the other hand, London has been picking up stock in small lots. Considering the general liquidation, the market has held its own quite well. Everything is in favour of Egypt, and if Paris could only get over her difficulties we might see quite a small boom arise. National Banks have been dealt in as high as 14¾, and as low as under 14½. Agricultural Banks have been weak. Evidently some account has been liquidated. They are now round 4¾. Land Banks, in which the principal market is Paris, have been sold at 6½, and the deferred are quoted 40, at which price they look very cheap. Delta Light Railway pref. are 8½, and Delta Lands are 38s. 6d. There has been a fair amount of business in Beheras, some hundreds of shares having changed hands at 9⅛. Union Foncière remain at 1¼. Alexandria Water are steady at 12⅝. Aboukir Land are weak at 21s. 6d., but there has been some buying of United, and business has been done at 1s. 9d. Sidi Salem are nominally 5s. Trusts remain at 5s. 3d. There is a demand for Salts, which look cheap at 14s. 9d. New Egyptians are kept hard at 10s. 3d. There are always buying orders in the market at this price. Markets are nominally 23s. 6d. Khedivial Mail prefs. are still 3⅜, and the ordinary 10s. There has been a little business in Daira Sanieh at 3s. It would not take much to put prices better in the Egyptian division of the Stock Exchange. On the whole, in a week of depression there has been considerable improvement in business done, if not in the quotations.

Miscellaneous.

The Miscellaneous market remains idle, but Van den Berghs have been bid for, as a good report is expected. It seems quite safe to sell Iron and Steel and Shipping shares to-day.

NATIONAL BANK OF SERVIA.

(FROM OUR SPECIAL CORRESPONDENT.)

BELGRADE, May 10.

A Commission having been appointed by the Government to draft a new law regulating the status of the National Bank of Servia, I am able to give you the following exclusive information concerning the Bill which is shortly to be laid before the Skuptshina, and which is practically certain to become law.

The essential features of the new law, which, it is hoped, will be effective by July, concern the issue of bank notes, for which the National Bank has the monopoly. According to the law of 1909 the bank was empowered to issue notes up to five times its capital of ten million francs, plus fifteen million francs, representing the value of discounted Treasury bills, or a total of 65 million francs. These notes were of two kinds, some payable in gold, and others in silver. It is now proposed to alter these conditions by enabling the bank to issue notes up to 2½ times its cash in hand and at banks, and to issue even beyond this limit by paying the Government ½ per cent. tax over and above the limit.

According to the bank's statement on April 21 (O.S.) there was cash in hand and at banks: 73,501,581 frs. in gold, 6,898,581 frs. in silver, 4,257,952 frs. in gold abroad; 84,657,972 frs., so that when the Bill becomes law the bank will now be able to issue, without Government surtax, up to about 200,000,000 frs. Further, there will in future be only one kind of bank note, payable in either gold or silver, according to the bank's discretion.

A stipulation in connection with the above privileges is that the bank has to open branch offices in all important towns throughout Old and New Servia. This is vital to the economic interests of the country and should have been done years ago. Branches have already been opened in Uskub and Monastir, and are to be followed in a month's time by others in Old Servia, and later in the new territories.

The reforms thus proposed will give the National Bank of Servia a new significance as a bonâ-fide State bank, not only able, but practically obliged to help to regenerate the country and open up new fields of activity.

ALEXANDRIA NOTES.

(FROM OUR OWN CORRESPONDENT.)

ALEXANDRIA, May 15.

The Share Market.

The market has been quite calm and prices have remained stationary. We may, however, note a revival in the Société du Behera and New Egyptian shares, and the bonds of the Credit Foncier Egyptien. The New Egyptian is one of the most prosperous land companies in the country, and it is announced that the board will declare a dividend of ninepence. As to the Behera Company, a group of financiers is interested in its securities, which may rise yet higher, the intrinsic value of the shares being at least £12. The rise in the bonds of the Credit Foncier Egyptien is due to the constant demand on the part of the Egyptian small capitalist, who is attracted by the chances of the drawings.

Comptoir Financier et Commercial v. Banque de Salonique.

The Mixed Court of Appeal of Alexandria has condemned the Banque de Salonique to pay to the Comptoir the balance of the price of issue of the shares of the Comptoir underwritten by it on behalf of its clients. The amount, of which the recovery is thus assured to the Comptoir, is approximately £E10,000, for other banks here will come to an amicable arrangement with the Comptoir for the sums underwritten by them for their clients in regard to the Comptoir's shares.

Eastern Telegraph Company.

This company has just bought the house belonging to Mr. Smith at Moharem Bey, at the price of £9,000, for the purposes of accommodating its staff. The house and grounds occupy 10,000 square pics.

Egyptian State Railways.

A sum of £E232,000 has been set aside for the construction of the Zifta-Zagazig and Menufia lines; and a sum of £E175,000 for the reconstruction of bridges.

Banque d'Orient.

Owing to various items having been written off and the increase of stamp duties, the net profits for 1913 fell to 1,244,467 francs, as compared with 1,422,199 francs in 1912. The dividend remains unchanged, at 5 francs per share. The Balkan wars interfered with the Bank's operations, but this fact notwithstanding the various heads of the balance-sheet show progress. Thus deposits have risen from 47,556,782 francs in 1912 to 58,016,758 francs in 1913. Discounts rose from 4,915,045 francs to 8,761,997 francs; advances on securities from 18,284,278 francs to 19,802,542; and advances on goods from 9,402,977 francs to 15,823,752 francs. Amortisations amount to 1,012,295 francs, which sum includes the exceptional loss sustained at Serres, where the Bank's agency was burned. Now, with peace re-established, the Bank expects to develop its business in the Orient.

THE MANSOUR ADES FAILURE.

The Egyptian Mail, of the 14th inst., states that Mr. Bonham Carter and M. Anis Doss, the syndics in this failure, have sent to the *juge-commis*, Judge Halton, for approval by the creditors the proposal for the sale to Mr. Frances of the building where the new premises of the company are being located. The case was postponed for a fortnight for the approval of the creditors to be received.

FINANCIAL ITEMS.

By Royal decree the moratorium has been prolonged until the end of August in the new territories of Greece, and till the end of the year in Old Greece.

Mr. F. N. Walton has been appointed manager of the Anglo-Egyptian Bank, Cairo, in succession to Mr. S. R. Cookson, who has retired. Mr. W. B. Delany, the chief accountant, becomes sub-manager.

Our Bucharest correspondent informs us that the rumour as to a new Roumanian loan to be placed with French capitalists is officially denied.

A new British company is being formed to secure gas from various oilfields in Roumania and pipe it to Ploeshti for power and heating purposes. In the latter respect the domestic consumer will be provided for.

"SU-TALL" Cabinets

NEW COMPANIES

Kazan Carpet Co., Ltd.

A "private" company with the above title was registered on May 14, by Herbert Smith, Goss, King and Gregory, 62, London Wall, E.C., with a capital of £125,000 in £1 shares. The objects are said to be to carry on the business of buyers, exporters, and importers of and dealers in Turkish, Persian, and other carpets, rugs, mats, linoleum, oilcloths, matting and floor coverings of every description, bleachers and dyers of goods and materials, etc. The first directors (to number not less than three nor more than seven) are to be appointed by the signatories, and the remuneration to be fixed by the company. The registered office is at 155, Salisbury House, London Wall, E.C.

The Cotton Export Co.

The Egyptian *Journal Officiel* contains a Khedivial decree ratifying the formation of a company, with the above title, which has been formed in Egypt by Messrs. Wilhelm Anninger, Otto Anninger, Gustav Arens, and Max Perlmann (all of the firm of Messrs. Wm. Abeles, of Vienna, and represented in Egypt by Maitre Alfred Guidotti), Messrs. Ernest Seeger, Fritz Seeger, and Richard Seeger, the last-named representing Messrs. Ernest and Fritz Seeger. The company is established for a period of eighteen years dating from the Khedivial decree, and has a capital of £E25,000, divided into 250 ordinary shares of £E100 each. These have been subscribed as follows:—Messrs. Wilhelm Anninger, Otto Anninger, Gustav Arens, Ernest Seeger, and Fritz Seeger, 40 shares each; Mr. Max Perlmann, 30 shares; and Mr. Richard Seeger, 20 shares. A quarter of the capital has already been subscribed, £E6,250 having been paid into the Alexandria branch of the Deutsche Orientbank. The object of the company is to conduct a general business in Egyptian cotton at Alexandria and other places in and out of Egypt, and especially to continue the business of Messrs. Seeger Brothers and Co., without, however, assuming either their assets or liabilities.

Johnston Line, Ltd.

A "private" company with the above title was registered on May 5, with a capital of £800,000 in £10 shares (40,000 preference and 40,000 ordinary). The object of the company is to enter into an agreement between the Johnston Steamship Co., Limited, of the first part, Wm. Johnston and Co., Limited, of the second part, and the company of the third part, and to carry on the business of builders, owners, repairers, loaders, letters to hire and charterers of ships, barges, tugs, and vessels, or holders of shares or interests therein, shipbrokers, managers of shipping and other property, freight contractors, etc. The signatories are:—Wm. Johnston, 18, Water Street, Liverpool; Sir Stephen W. Furness, Furness House, Billiter Street, E.C. (one share each). Wm. Johnston and Co., Limited, are the first managers. The first directors are Wm. Johnston, Edmund Johnston, Hy. G. Johnston, and Wm. S. Johnston, all of 18, Water Street, Liverpool, and Sir Stephen W. Furness, Frederick W. Lewis, Robert E. Burnett, and Walter H. Furness, all of Furness House, Billiter Street, E.C. Secretary, John Milroy. The registered office is at 18, Water Street, Liverpool.

Excelsior Romana Oil Co., Ltd.

A company with the above title was registered on May 13 by G. C. Bingham, 54, New Broad Street, E.C., with a capital of £15,000 in 2s. shares. The objects are: To acquire mines, mining rights, concessions, lands, forests, and other property and rights in Roumania and elsewhere, and to carry on the business of distillers and refiners of and dealers in oils and products thereof. Minimum cash subscription, 10,000 shares. The first directors (to number not less than two nor more than six) are to be appointed by the subscribers. The registered office is at 6, Broad Street Place, E.C.

THE EASTERN BANK, LIMITED.

Head Office: 4, CROSBY SQUARE, LONDON, E.C.

Subscribed Capital, £1,000,000. Paid up, £400,000. Reserved Liability of Shareholders, £600,000.

Branches:

BAGDAD. BOMBAY. CALCUTTA.

Board of Directors.

The Right Hon. LORD BALFOUR OF BURLEIGH, K.T. (*Chairman*).

Sir JACOB E. SASSOON, Bart. — EMILE FRANCQUI, Esq.

Company Notes and Reports.

Danube Steamship.

The report of the Danube Steamship Company for 1913 states that the Danube traffic was still suffering during last year from the effect of the crisis resulting from the Balkan War. The prohibition of exports, the long cessation of railway traffic in Servia, Bulgaria and Roumania, and particularly the long stoppage of Danube traffic owing to the passing of the Roumanian army across the river, together with the measures which it was necessary to adopt in connection with the outbreak of cholera, led to a serious shrinkage of the company's revenue. The opening of shipping traffic on the river was relatively late owing to the long winter, but the conditions were favourable. Shipments of general cargo were very small until the autumn owing to the Balkan disturbances, but afterwards the exports from Germany and Austria-Hungary to the Balkan countries showed a considerable development. Passenger traffic both on the Upper and Central Danube was numerous, but in Hungary and in the Balkan countries it was badly affected by military events as well as by the sanitary measures which were adopted in connection with the outbreak of cholera. The decline in the total revenue from the shipping services amounted to 6.24 per cent., and the increase in the total expenditure was 1.63 per cent. The results of the Mohacs-Funfkirchen Railway, which belong to the Danube Company, were, it is stated, less favourable than those of last year. The net profit of the Funfkirchen Coal Mines was 1,267,892 kronen, as compared with 1,340,075 kronen in the previous year, the production of 1913 being 7,013,502 metric cwts., as compared with 7,114,253 metric cwts. The accounts show that, including 1,372,895 kronen brought forward, the net profit amounted to 4,154,907 kronen, a decline of 846,319 kronen. A dividend of 50 kronen per share is declared. At the forthcoming annual meeting the shareholders will be asked to increase the capital by 12,600.000 kronen, thus bringing it up to 63,000,000 kronen.

Bibi Eibat Oil.

The report states that the gross income for the period under review amounted to £40,916, of which £26,315 represents profits remitted by the Russian Company, and £14,600, the return upon investments, temporary loans, etc. Office and administration charges amounted to £4,139, and the gross profit to £36,776. After providing £3,625 for debenture interest and redemption and £386 for other charges, there remains to be dealt with a net profit of £32,764. The directors propose to write off £11,218, being the whole of the preliminary expenses of the company (including £10,000 underwriting commission), and recommend the payment of a dividend of 9d. per share, or 7½ per cent. (equal to £17,813), leaving a balance of £3,733 to be carried forward. Meeting 26th inst.

Premier Oil and Pipe Line.

At a meeting of the board held recently in Berlin, matters relating to a possible readjustment of the capital of the company were discussed and adjourned for further consideration.

Land Bank of Egypt.

The ordinary general meeting of the shareholders took place on the 17th inst. under the chairmanship of Mr. Richard Abdy, and 54,704 shares were represented. In his speech the chairman touched upon Egyptian affairs and the general business situation, and referred to the new French law on foreign values, which will increase the taxes payable by the company by £2,700. The meeting voted the payment of 8s. per share. An interim dividend of 4s. having already been paid, 4s. remain to be paid. An extraordinary meeting was called to modify the statutes, but failing a quorum the meeting could not take place, and was postponed.

Sidi Salem Co. of Egypt.

An extraordinary general meeting was held at the offices of the Sidi Salem Company of Egypt on the 11th inst., Mr. Abdy in the chair. Thirty-two thousand shares were represented. No quorum having been obtainable, a second meeting will take place on the 30th inst.

Anglo-General Exploration.

In his speech at the first general meeting, held May 18, at 6, Queen Street Place, the chairman, Mr. V. Herbert Smith, referred to the Attallah mine, in Upper Egypt, in which the company holds 2,000 shares. All the information they had regarding that mine is favourable, and they were informed that it is hoped milling operations will commence during the coming month. Another company in which they had taken an interest is the Anatolia-Serdjiller Syndicate, Limited. They were particularly interested in this business, the syndicate having been formed to explore a very ancient goldfield in Asia Minor, from which, according to history, large quantities of gold were taken in the past. The property has been examined by one of Messrs. John Taylor and Sons' engineers, and the auriferous formation, which can be traced for a distance of over 4,000 ft. within the concession, may quite conceivably prove to be of immense value.

Land and Mortgage of Egypt.

The report of the Land and Mortgage Company of Egypt, Limited, to be presented at the meeting on the 29th instant, covers the year ended March 31, 1914, and states that the directors have every hope of being able to recommend, for the tenth year in succession, a dividend of 10 per cent., otherwise they would not have paid an interim dividend of 5 per cent. last November. Had credit been taken for the total amount of the year's earnings this hope could have been fulfilled. But as, unfortunately, owing to threatened scarcity of water, rice growing has been prohibited this season throughout Egypt, the directors deem it more in consonance with prudence and sound finance to make additional provision from the profits of the year for certain sums amounting to £1,874—representing interest due by farmer clients whose rice crops failed last season and who will not be able this year to recoup their loss by rice growing. Under the circumstances, therefore, the directors consider that they are acting in the best interests of the shareholders in not recommending a dividend of more than 9 per cent. for the year. The gross earnings for the year, after deduction of the above-mentioned sum of £1,874, which is held in abeyance, amount to £38,519. Deducting total expenditure, including interest on debenture bonds and debenture stock, £26,107, the net earnings for the year are £12,412. To this must be added balance brought forward, £1,382, and back interest accrued to March 31, 1913, £792, making together £14.587. The directors recommend that a dividend of 4 per cent. for the past six months be declared, making 9 per cent. for the year, leaving a sum of £1,087 to be carried forward.

Windsor Hotels (Egypt).

An extraordinary general meeting of the shareholders is to be held on the 27th inst. for the purpose of passing an extraordinary resolution accepting the resignation of Mr. S. C. Wyatt and appointing Mr. F. H. Russell and Mr. J. H. Swainson, joint liquidators, in place of Messrs. Russell, Harris, Wyatt and Gardiner. This meeting is to be followed immediately by the ordinary general meeting, to receive the liquidators' reports and statement of accounts for the year ended September 8, 1913.

Anglo-Persian Oil.

There is little room to doubt (says *The Financial Times*) that the British Government has given a guarantee running into a very large sum to the Anglo-Persian Oil Company in return for a first call on the part of the Admiralty over this company's production. It is rumoured that the sum involved runs up to £2,000,000, and this figure is probably correct, although it lacks official confirmation. The point is, however, that Mr. Winston Churchill, having matured his scheme for creating reserve supplies of oil in this country sufficient to meet all probable contingencies, is now devoting his attention to foreign centres where the British Fleet is in the habit of congregating. The intention is, apparently, to obtain supplies of crude oil up to an almost unlimited extent and to proceed with the necessary refining arrangements, after which the spirit will be stored at such points as will be most serviceable in times of emergency. So far as concerns the shareholders of the Anglo-Persian Oil Company, they may congratulate themselves that their undertaking has been singled out first of all by the British Admiralty for attention in this connection. The company has from the outset enjoyed very friendly relations with the Imperial authorities, and these will no doubt be rendered still more intimate. The last accounts of this undertaking were made up to March 31, 1913, and it was stated in the report for that period that "owing to the refinery being incomplete no profit and loss account is submitted." Great progress has since been made towards the rectification of this state of affairs.

BULGARIAN FINANCE.

According to *The Times*, the following statement has been issued in Sofia:—

The financial situation of the Treasury continues very satisfactory, and, although the General Liquidation Loan intended to consolidate the floating debt arising from the Balkan War has not yet been realised, public payments are being effected punctually, both at home and abroad. A good portion of the Treasury bonds in circulation was paid off on the dates when they became due, and for the account of the next half-year the administration of the public debt has already remitted in advance out of the ordinary revenue of the current Budget the funds assigned to meet the following half-year payments due on consolidated State loans and loans guaranteed by the State:—

2,902,398 francs, the whole of the amount due in September, 1914, on the loan of 1902; 720,671 francs, due in November, 1914, on the 1904 loan; 2,463,500 francs, due in August next on the 1907 loan; 2,516,900 francs, the whole of the amount due next month on the 1909 loan; 1,170,662 francs, for the half-yearly payments due on May 14, 1914, on the five per cent. loans of the Cities of Sofia and Varna of the years 1906 and 1907, being a total of 9,774,131 francs.

Provision for all these payments is made entirely out of the ordinary revenues of the Treasury, which show a marked increase as a result of redoubled trade activity. The proceeds of the taxes at the end of the third month of the current financial year amount to 46,641,915 francs, as compared with 34,868,718 francs and 28,094,430 francs collected during the corresponding quarters of the normal years 1912 and 1911.

GHARBIEH LAND COMPANY.

Messieurs les Actionnaires sont convoqués en Assemblée Générale Ordinaire pour le Samedi 30 Mai 1914, à 11 heures du matin, au Siège Social, au Caire, Rue Gameh Charkass, No. 7.

COMPANY MEETING.

ANGLO-PORTUGUESE TELEPHONE.

The twenty-seventh ordinary general meeting of the Anglo-Portuguese Telephone Co., Limited, was held at the London Chamber of Commerce, Oxford Court, E.C., on the 19th inst., Mr. Herbert Allen (chairman of the company) presiding.

The Secretary (Mr. G. M. O'B. Horsford, F.C.I.S.) read the notice convening the meeting and the auditor's report.

The Chairman said: Gentlemen:—This is supposed to be a time-saving age, and the telephone of all things—except perhaps in this country under Post Office auspices—is one of the greatest time-savers of all. Therefore, it is only appropriate that a telephone company's meeting should be selected for an innovation such as I have prepared you for, with the object of saving your time to-day, and that is, that the Chairman's opening address—of which you have all received in advance a copy—should be taken as read. I am not aware of any precedent for this course, but I see no objection to it, and if it is agreeable to you we will take the speech as read. (Hear, hear.) The address was as follows:—The report now before you contains one or two features of such exceptional interest that I will make only brief allusion to the operations of the past year. We once more break all previous records in the gross income, which amounted to £67,893, an increase of £4,974 on the previous year. Expenses are proportionately rather heavier, mainly in consequence of our having to take on a large number of new employees in preparation for the opening of our new Lisbon Exchange, and to a lesser degree owing to an all-round increase of salaries and wages. I am happy to say we have of late been practically free from labour troubles, and a better spirit seems now to prevail among the workng classes in Lisbon and Oporto than for some years past. Let us hope for their sakes it will last. I might here mention that the general situation in Portugal at the present moment is more satisfactory than during any time last year, when we were constantly having political unrest, movements for the restoration of the Monarchy, and agitations of one sort and another. Our profits, at £26,535, show an increase for the year of £1,010. The number of subscribers increased during the year by 790, after allowing for withdrawals, and is now 7,810. The total number of calls was 22,056,074, against 17,993,503 in the previous year, and the average public cost per message about ¾d., being less even than in the previous year. The Portuguese public could have no better evidence than this of the splendid service they get from this company and the splendid value they get for their money.

For the benefit of such of you as are of a statistical turn of mine I may mention that it is now twenty-seven years since this company started business, with a gross income of £4,934 and a profit of £1,695, derived from 1,423 subscribers. Besides this I have prepared a little table which will show you how our operations of the past year compare with those of ten and twenty years ago:—

	Gross income. £	Net profit. £	No. of subscribers.	No. of calls.	Average cost per message.
1893....	15,048	4,572	2,271	1,360,771	.90d.
1903....	24,232	7,075	2,556	2,471,978	.85d.
1913....	67,894	27,369	7,810	22,056,074	.73d.

Our business, as you know, extends throughout Lisbon and Oporto—covering a radius of thirty kilometres in the former case and twenty kilometres in the latter—and we serve a population of about 750,000 people. In both cities we experience from year to year an almost continually uninterrupted expansion of business. Our concession runs until 1937, and contains satisfactory provisions for compensating us in the event of the undertaking ever being taken over by the Portuguese nation. Our relations with the national and local authorities are quite satisfactory, and on the occasions of Mr. Kerr's frequent visits to Portugal—they average, I think, about three per annum—he finds the Ministers most courteous and obliging, and ever ready to give the company every possible assistance. From the profit and loss account you will see that after paying royalties to the Government amounting to £1,977, £3,834 for debenture interest and redemption, and £940 for income-tax, and bringing forward £5,609 from the previous year, we have at our disposal a sum of £27,369. It follows, therefore, that with an encroachment of only £631 on our reserve fund or other resources we could pay the dividend and bonus of 28 per cent. which we recommend in our reoprt. This, however, is not the course we propose to adopt. During the past year an independent valuation has been made by Messrs. Gill and Cook, our consulting engineers, of all the company's property, with the result that the reserves which we have built up are found to be considerably in excess of the depreciation which it was designed to meet. The board, therefore, feel that there is no need on this occasion to make the usual contribution to the reserve, but, on the contrary, that they are justified in returning a little of it to the shareholders. They, therefore, with your approval, propose to take a sum of £7,500 from the reserve, add it to the disposable profit balance of £27,369, pay a dividend and bonus of 28 per cent., amounting to £23,000—of which you have already received 4 per cent., or £4,000, by way of interim dividend—and carry forward a sum of £6,869.

It might be as well perhaps if I were to say a little more on the subject of the reserve. This fund has, as you know, been built up out of undivided profits during the last seven years or so. It is not, in the strictest sense of the word, a reserve fund at all, inasmuch as it is not invested outside the company's business or existent in any tangible shape. It largely represents revenue moneys spent on capital account, and to that extent is a set-off against any depreciation which may have been taking place on the capital work of earlier years. The reserve fund is primarily a reserve against depreciation. I do not say we should not be justified in dipping into it—pretty freely, if need be—for general purposes, but primarily it is a depreciation fund. The practice with many telephone companies is to utilise the surplus, after payment of dividends, in writing down capital expenditure by a sum which they consider equal to the depreciation of the year, and placing a small balance to reserve for general purposes. In our case we generally leave the capital expenditure untouched and build up a nominal reserve fund which at any moment may be applied, either wholly or in part, in writing down capital expenditure to its depreciated value. It is not unlikely that in future we may adopt the more general practice, and, instead of building up a so-called reserve which is merely a book entry and liable to mislead the unthinking, create a small reserve for contingencies and write off depreciation year by year. It is probably all the same in the long run, but at times the appearance of a large nominal reserve gives the balance-sheet a somewhat misleading appearance. On one occasion a few years ago we did write down the capital expenditure by a transfer of £20,000 from the reserve, and possibly we may do something of the kind again next year. At the present moment the fund is £62,500; we are now, as our report tells you, appropriating £7,500 toward the 20 per cent. bonus, and a year hence we shall have the balance of £55,000 to deal with, besides the surplus profits of the year. In the meantime I may tell you that the valuation made during the past year by Messrs. Gill and Cook satisfies the board that the reserve fund is well in excess of the actual depreciation in the physical assets as a whole.

We now come to another interesting subject mentioned in the report, and that is the proposed issue of 50,000 new shares. If you will glance at the balance-sheet for a moment you will see that the capital expenditure in 1913 amounted to £25,493, and was higher than in any previous year. That, of course, is accounted for by the heavy expenditure in connection with our new exchange in the north of Lisbon, which it is reasonable to expect will enable us to cope with our constantly expanding business for some years to come. Not that we are at all averse to continual capital expenditure so long as it brings us a reasonable return. In the last eight years we have spent on capital account altogether about £105,000, although in the same period we have incurred no fresh capital liability, either on share or debenture account; on the contrary, we have simultaneously reduced our debenture debt by over £10,000. You may ask where we have obtained the money. Well, the greater part, of course, is represented by surplus profits which have been put back into the business; next, there is our increased indebtedness to manufacturers and others; and the balance has been met by temporary loans. I need scarcely say that we none of us care for temporary loans, which have a bad habit of falling due at inconvenient moments, and we cannot go on indefinitely building up liabilities to manufacturers and others; the directors, therefore, feel that the time has come for making a further issue of shares, and this we propose to do forthwith, as stated in the report. The issue will consist of 50,000 shares, which will be made at par and offered in the first instance to the existing members of the company. We have not thought it necessary to incur the expense of underwriting the issue, as it is tolerably certain that the majority of the shareholders will take up their quota, but such shares as may be left over will be taken up or placed by the directors under the discretionary powers with which they are invested. When this issue has been made our subscribed capital will be £150,000, and whether measured by the magnitude of our business or by comparison with that of other similar companies, I do not fear that it can be regarded as excessive. Our plant is all well up-to-date and in good condition, and most of our wires are now underground.

I have been asked whether we are likely to be able to maintain the present rate of dividend on the enlarged capital, and I see no reason for misgiving on this score, or why the new capital should be less remunerative than the old. It is true our new exchange in Lisbon—with its capacity for 6,000 subscribers—is not yet finished, and in that respect the business of the current year may not get much help, but in other directions our business is continually expanding. Possibly our next interim dividend may be only 3 or 3½ per cent., but it need not necessarily follow from that that for the present year as a whole we shall pay less than 7½ or 8 per cent., and once our new exchange is in full swing the 8 per cent. dividend which we have almost come to regard as a settled thing should be tolerably safe.

At the close of his introductory remarks the Chairman moved: "That the directors' report and accounts to December 31, 1913, be received and adopted."

Mr. Charles Woolley seconded the motion, which was carried unanimously without discussion.

On the proposition of the chairman, seconded by Mr. J. E. Kingsbury, it was resolved: "That a final dividend of 4 per cent. and an extra dividend or bonus of 20 per cent. making a total distribution of 28 per cent. on the subscribed capital of the company for the year ended December 31, 1913, be paid to the members of the company on the register on May 10, 1914, and that a sum of £7,500 be appropriated from the reserve fund and applied towards the payment of the aforesaid dividend."

After some formal business had been transacted, the proceedings terminated with a vote of thanks to the chairman and the other directors, and to the staff.

(*For Company Results, see page 96.*)

BANKING IN TURKEY.

Referring to the movement for the constitution of native banks in Turkey, *The Financier* states:—All the new native banks have a scarcity of capital. The rich Turks have no confidence in these Turkish banks, but prefer to invest their money in European institutions, and they also purchase few Turkish securities as these do not appear to them to be safe. For these reasons an internal loan in Turkey is impossible, except when the papers are pressed upon the Turks with force, as in the case of the Navy Committee with Treasury Bills. No native savings banks also are possible as the Turks would not entrust their money to them. Apart from the small Mohammedan banks, a Belgian mortgage bank—the Banque Hypothécaire Ottomane—is in course of formation, with a provisional capital of 2,000,000 frs., of which one-fifth is to be paid. The bank proposes to advance money on land and buildings up to the amount of one-half of the actual value, and to carry on other banking operations. At present a large amount of building work is being undertaken in Constantinople, and site values differ but little from those prevailing in large European cities.

ATTEMPTED BULLION ROBBERY.

According to a telegram from Brindisi, published in *The Tribuna*, a daring bullion robbery was attempted there on the arrival of the "Helouan." The steamer had landed 100 packages containing a sum of £1,500,000, consigned from Alexandria to London, and these had been removed to the Customs House. The robbers actually succeeded in entering the building, but their presence was discovered, with the result that one of them was arrested. The others escaped.

THE IMPERIAL BANK OF PERSIA

(Incorporated by Royal Charter, 1889).

CAPITAL (fully paid) - - - £850,000
RESERVE - - - - - £210,000
Reserve Liability of Shareholders - £1,000,000

London Office: 25, Abchurch Lane, E.C.
Chief Office in Persia: Teheran.

Branches at Ahwaz, Birjand, Bushire, Hamadan, Isfahan, Kazvin, Kerman, Kermanshah, Meshed, Mohammerah, Nasratabad, Resht, Shiraz, Sultanabad, Tabriz and Yezd.

The Bank is prepared to transact Banking business of every description in and connected with Persia; and in London grants Drafts, Telegraphic Transfers, and Letters of Credit, and negotiates or collects Bills on Persia.

Digitized by Google

COMPANY RESULTS, &c.

ANGLO-EGYPTIAN OIL.—Weekly output is reported as 1,843 tons.

ANGLO-ROUMANIAN PETROLEUM. — Weekly output is reported as 345 tons.

ANGLO-PERSIAN OIL.—Telegraphic advice from Persia states that the specific gravity of the crude obtained from the large well, which has recently been shut in to 1,500 tons daily, is .838, which indicates a high quality of oil.

BANK OF ABYSSINIA.—The ordinary general meeting will be held on May 30 at the offices of the National Bank of Egypt, Cairo.

BANQUE ROUMAINE POUR LE COMMERCE ET L'INDUSTRIE.—The profits for 1913 amount to 166,135 frs., and a dividend of 6 per cent. is to be distributed.

BIBI EIBAT OIL.—The directors recommend a dividend of 7½ per cent., or 9d. per share, for the financial period ended March 31 last.

BULGARIAN GOVERNMENT 4½ PER CENT. GOLD LOAN.—Messrs. J. Henry Schröder and Co. publish the numbers of bonds of the Royal Bulgarian Government 4½ per cent. Gold Loan of 1909 which have been drawn for payment, as well as the coupons due, on and after 2nd prox. in London at their counting house.

DEUTSCHE ORIENTBANK.—Net profits amount to 1,372,766 m., as compared with 1,303,742 m. in 1912. A dividend of 5 per cent. is to be paid; 267,470 m. are placed to statutory reserve, which is thus brought up to 10 per cent. of the paid-up capital; and 73,235 m. are carried forward.

EGYPTIAN DELTA LIGHT RAILWAYS.—Receipts for the ten days ended April 30 amounted to £E7,656, an increase of £E483 over the corresponding period of last year.

IMPERIAL OTTOMAN BANK.—The directors of the Imperial Ottoman Bank recommend a dividend of 14s. per share, being equal to 7 per cent. per annum.

IMPERIAL BANK OF PERSIA.—The directors of the Imperial Bank of Persia announce an interim dividend for the half-year ended March 20 last of 4s. per share, free of income-tax.

LAND AND MORTGAGE OF EGYPT.—The directors recommend a further dividend of 4 per cent., making 9 per cent. for the year to March 31.

MESSAGERIES MARITIMES.—The dividend proposed is at the rate of 12.50 francs per preference share; and on ordinary shares, on which no dividend has been paid since 1907, a dividend of 6 francs will be paid.

OTTOMAN RAILWAY FROM SMYRNA TO AIDIN.—Receipts for the week ended May 16 amounted to £7,637, an increase of £1,989 over the corresponding period of last year. Aggregate receipts from January 1 amount to £145,211, an increase of £34,156.

ROUMANIAN CONSOLIDATED.—A cablegram from Ploesti, dated 18th inst., states:—"Moreni, Well No. 30, have completed precautionary measures required by mining authorities; expect to restart well to-morrow. Well No. 15 has struck oil at depth of 1,328 ft.; now testing." Weekly output, 1,005 tons.

SMYRNA BANK.—At a meeting of shareholders it was resolved that the company be wound up. Mr. W. Mackenzie, 28, Djoya Han, Smyrna, the representative there of Messrs. Russell, Harris and Co., was appointed liquidator. A meeting of creditors will be held at the firm's offices in Smyrna on May 25, at 3.30 p.m.

TRAMWAYS DE SOFIA.—The receipts for April amounted to 103,246 levas, as compared with 57,000 levas for the corresponding month of 1913. Total receipts since beginning of the year amount to 331,830 levas, as compared with 165,735 for the corresponding period of 1913.

COOK'S NILE STEAMERS AND DAHABEAHS.

THOS. COOK & SON have unequalled facilities for Travellers visiting Egypt, now the premier Winter Resort of the World. Their fleet of **Fourteen Large Passenger Steamers** consists of the finest vessels on the Nile, specially built, luxuriously appointed throughout, and fitted with every modern convenience.

TOURIST SERVICE.—These large and handsomely-fitted Steel Steamers sail once a week from **Cairo** to **Assuan**, and twice a week from **Assiut** to **Assuan**, the sailings from **Cairo** beginning in November, and from **Assiut** in January.

EXPRESS SERVICE.—The Express Steamers also leave **Cairo** twice a week, the Friday departures commencing in November, and the Monday departures in December.

There is thus a Service of **Five Cook's Steamers per week** ascending the Nile to the **First Cataract** during the Season—three from **Cairo** and two from **Assiut**—calling at all points of interest on the Nile, in connection with which complete arrangements for sightseeing and excursions are made, enabling Travellers to visit, to the best advantage, all the famous

PYRAMIDS, TEMPLES, TOMBS, RUINED CITIES, etc.

SECOND CATARACT SERVICE.—In connection with the above Services there is also a Service twice weekly by First-class Steamer from the **First** to the **Second Cataract**, with through bookings to **Khartoum, the Sudan, and Uganda.**

PRIVATE STEAMERS AND DAHABEAHS. — **Thos. Cook & Son** have several small Steamers for charter at moderate rates, specially adapted to the requirements of Families, Private Parties, Sporting Parties, etc., accommodating from eight to sixteen passengers, with competent crews, and thoroughly equipped. Also a large Fleet of First-class Sailing Dahabeahs, the best on the Nile.

Illustrated Nile Pamphlet free from:

Khedivial Mail Line.

FIRST-CLASS BRITISH MAIL STEAMERS.

GREECE-TURKEY MAIL SERVICE.

Shortest and most picturesque sea passage between Europe and Egypt. Fast steamers in connection with the Orient express train-de-luxe from Paris, Ostend, Vienna, Berlin, and Budapest leave Constantinople every Tuesday afternoon for Smyrna, Piræus and Alexandria. Return from Alexandria every Wednesday afternoon via same ports.

Service between TURKEY, SYRIA & EGYPT.

Fast steamers leave Constantinople fortnightly on Saturdays for Gallipoli, Dardenelles, Mitylene, Smyrna, Chios, Rhodes, Mersina, Alexandretta, Tripoli, Beyrouth, Caiffa, Jaffa (for Jerusalem), Port Said and Alexandria. The voyage takes ten days.

Departure from Alexandria fortnightly on Saturdays for above ports, and WEEKLY on Saturdays from Alexandria, and on Sundays from Port Said, for all Holy Land and Syrian Ports to Mersina.

CYPRUS SERVICE.

Fast steamers weekly from Alexandria on Tuesday afternoons, and from Port Said on Wednesday mornings, for Famagusta, Larnaca, Limassol and Paphos.

SUDAN MAIL SERVICE.

Steamers leave Suez Docks on Wednesdays, at 5 p.m., for Port Sudan, connecting there with express train to Khartoum, at 1 p.m., on Saturdays. Calls made at Suakim as required.

RED SEA COASTING MAIL SERVICE.

Steamers from Suez Docks every Monday evening, at 5 p.m., for Jeddah, calling one week at Tor, El-Wedj, Yambo and Jeddah; and in the following week at Jeddah, Suakim, Massowah, Hodeidah, and Aden.

For information apply to the Company's London Office, 37, Bishopsgate, or at Alexandria, Constantinople and Suez. Passages may be booked at Company's Agencies at all ports called at, or from the principal Tourist Agencies.

P & O Passenger Services

EGYPT, INDIA, CEYLON, STRAITS, CHINA, JAPAN, AUSTRALASIA, and All Eastern Ports.
(Carrying Mails under Contract with H.M. Govt.

NOTES OF THE WEEK.

Prince William of Albania has not had to wait long for the "interesting experience" which Bismarck anticipated for foreign rulers of Balkan States. To have made peace with the Epirotes on Sunday, to have deported Essad Pasha on Tuesday, and to be himself a refugee on an Italian man-of-war on Saturday must have provided a week sufficiently full of incident for the most ambitious sovereign. But it is doubtful whether Prince William is as ambitious as the records of the Albanian Court *Gazette*—if there has been time to issue one—will have represented him. From the deck of the "Misurata" he will have been able to contemplate the roofs of his capital, and may possibly have fallen to wondering whether he employed to the best advantage those early weeks of his reign when he remained shut up in his palace trying to master the mysteries of Albania by the interpretation of others, instead of seeking for knowledge at first hand. In the multitude of counsellors there is safety, when they all urge flight to a neighbouring man-of-war; but there is less opportunity, it would seem, of playing a kingly *rôle*. We hope that the Mpret has not let slip for good the time for allowing scope for his own personality in the affairs of Albania. Up to the present, it is to be feared, Prince William has done little on his own initiative. It was the International Commission of Control that struck the bargain with the Epirotes; it was a Dutch gendarmerie officer or somebody else who brought Essad Pasha to book, and it seems to have been a whole corps of agitated diplomatists who bundled the Prince and his family out of the Palace into a boat. By such methods the Albanians will never be successfully governed, and it would be well to substitute direct rule for the vicarious administration that has done duty in the past.

Although the outstanding features of Albania's busy week are known, it is difficult to find satisfactory explanations of the several incidents. The inwardness of the insurgent advance that created such a panic in Durazzo is still obscure. Essad Pasha was held to be implicated, but the insurgents destroyed some of his property, and, when they finally reached the capital, appear to have been at first quite indifferent to the late Minister of the Interior's fate. That they were Mussulmans is admitted, and to some extent they represented Moslem dissatisfaction in Albania with the alleged favouritism shown to Albanian Christians. What their advance did make abundantly clear was that neither in the gendarmerie nor in his Malissor bodyguard has the Mpret any force which he can rely upon to ensure his personal safety or the stability of his kingdom. This is a very serious matter, as it raises at once the question whether Prince William can carry on the government of Albania without armed international support. If he proposes to remain shut up in his palace at Durazzo it is certain that his waning prestige will need very efficient bolstering up by foreign troops. If, on the other hand, he will display more interest in matters outside Durazzo, and will show himself as a soldier and leader of men to the Albanians, there is little reason why he should not quickly pick up the reins of government to some purpose.

As far as the sequence of events is known, it is to be inferred that the strength of the insurgent force was considerably underestimated in the capital. The despatch of a gendarmerie force had no more effect on the advance than the arrival of a single messenger had on Jehu's furious driving. The whole company was ignominiously taken prisoners, and the Dutch officers were used to convey the terms of the insurgents to the Albanian Government, or, rather, to the Mpret in person. Prince William was by this time a refugee on an Italian man-of-war in the harbour. When it was found that the rebels were merely bent on talking with their Mpret and not on sacking Durazzo, the panic-stricken inhabitants of the town plucked up courage. The Mpret returned on shore, acceded to the demands of the insurgents, and spent the night in the Palace. The next day he is said to have ridden out to the insurgents' outposts in order to confer with their leaders. This sound step, it is to be hoped, will have satisfactory results. Reports do not flatter the insurgents, who are described as "merely a mob of undisciplined peasants, with no man of any authority among them." If this be so, the inglorious action of the gendarmerie is still more significant of the inherent weakness of the Albanian Government's position.

If Durazzo is able to return to a normal existence, there will no doubt be a flood of explanations and incriminations regarding Prince William's flight and the events leading up to it. Already the Austro-Hungarian Government has announced that its Minister at Durazzo was not responsible for the Prince's hurried

Digitized by Google

departure, which was made "on the advice of the Italian Minister." The gendarmerie will come in for a fair share of blame, and possibly the only person to be exonerated will be the exiled Essad Pasha. Very careful handling of the situation is still required if it is to be prevented from leading to an outbreak of a religious feud in Albania. The Moslems appear to have convinced themselves that the Christians were receiving the plums of the new régime, and for a time they may have been under the impression that Essad Pasha was conniving at their exclusion from the Prince's favour. Essad Pasha also represented the feudal system, against which the peasantry had grievances. It is probable, therefore, that the peasants' revolt started without the assistance of the Minister of War and the Interior, although he would be shrewd enough to know how to turn it to his own purposes. But when the insurgents reached Durazzo and found that a Christian force was sent out to give battle to them, and that Essad Pasha, the Moslem, had been deported, they decided that the religious boycott was more serious than they had realised, and they began to feel sympathetic towards Essad Pasha. Such at least is one explanation advanced of the present position in Albania, but the whole situation is so complicated that it may be some time before we are able to unravel the true inwardness of it.

Italian perseverance has been rewarded by an agreement between an Italian syndicate and the British Smyrna-Aidin Railway Company on the subject of the construction of a railway from Adalia to connect with the Smyrna-Aidin system. The British company held a prior claim in regard to railway construction in this region, and it was hoped that it would maintain its rights with a view to reserving the whole district for British capital. But the difficulty of effecting practical co-operation between Government policy and commercial enterprise has in the present instance let in the thin end of the Italian wedge. The details of the agreement have not yet been made public. From the statement made by the Italian Minister for Foreign Affairs, it has to be inferred that Italy is bent upon following up her initial success with a clearly defined policy. The Adalia concessions were only the first step on what would probably be a long and laborious path. Reference was made to Italian enterprises of the same nature in Asia Minor and the Dodekanesos. The delay in the return of the islands to Turkey thus hinges not only on the successful termination of the Adalia negotiations, but also upon Italy receiving other concessions in the islands themselves and elsewhere.

There was a very lengthy debate in the Sobranje before the decision was taken to institute an inquiry into the policy of the Gueshoff and Daneff Cabinets and into the question of the responsibility for Bulgaria's disasters. The various speakers left little ground uncovered. With the advantage of accumulated wisdom after the event, M. Gennadieff was able to deliver a telling indictment of opportunities lost or mishandled. M. Todoroff, formerly Minister of Finance, spoke for more than seven hours in defence of the impeached Cabinets. He said that he would welcome an impartial inquiry, as Bulgaria had lessons to learn from her experiences, and he feared that the present Government was only preparing the ground for fresh misfortunes. Yet a third raking up of the past has been added to the impeachment of ex-Ministers, and the Parliamentary inquiry and prosecution has been instituted against the Nationalist journal *Mir* for stating that the order to begin the war last June was issued by King Ferdinand and not by the Government. General Savoff, it will be remembered, made a very similar insinuation in the course of his defence at the impeachment trial.

The visit of the Turkish Minister of the Interior, Talaat Bey, to Bucharest has followed close upon a visit to Roumania by a number of students of the University of Constantinople. The latter have met with a most cordial welcome from the Roumanians, and it is noticeable that the two visits have stimulated the Turkish Press to emphasise the community of interests between Turkey and Roumania. One writer recalls the charge committed to his heir by the famous Roumanian Prince, Stephen the Great, who warned Bogdan to place no confidence in the promises or the alliance of other nations, but to endeavour to secure the friendship and good will of the Ottoman Empire. Anything that has happened in the five centuries since this advice was given has now to be overlooked, according to the Turkish writer, for he is satisfied that the policy of the Roumanian Government is entirely favourable to close and cordial relations with Turkey. Close co-operation between the two countries is eminently to be desired, inasmuch as the soundness of Roumanian statesmanship is assured, and its influence on the Turkish Government can only be for good.

The event of the week in connection with Persia is the decision of the British Government to purchase two million shares and £200,000 debentures in the Anglo-Persian Oil Company Elsewhere we publish an article dealing fully with the company's affairs and the whole subject of oil in Persia, and here we need only touch upon the political aspect of the Government's action. For reasons set forth in our leading article, the time seems ripe for a reconsideration of the Anglo-Russian Convention of 1907. The direction in which we should like to see this Agreement modified is in respect of the neutral zone. Its terms do scant justice to the predominance of British interests in that zone, and now that railway construction has come within the region of practical politics it is essential that our interests should receive adequate recognition. In other words, we must have as free a hand in the neutral zone as Russia has in the North.

The extension of British interests by the purchase of these shares in the Anglo-Persian Oil Company makes revision of the Convention even more imperative. Persia is intended to be one of the chief sources of supply of oil-fuel for the British Navy. It is essential, therefore, that the output of Persian oil, which will be drawn for the most part from the neutral zone, should not be subjected to constant interruption from chronic lawlessness or occasional unrest. We will hope that the danger of such an eventuality will be removed as the country gradually settles down to ordered government, but it will remain a possible danger to be guarded against. Great Britain, therefore, must place her faith in the non-occurrence of interference with her oil interests upon a surer footing than a pious hope that things in Persia will eventually improve. A preliminary step will be the revision of the Anglo-Russian Convention, with a view to enabling Great Britain to supervise more directly the efforts made by the Persian Government to restore order in its dominions.

The annual Reports of the British Agent and Consul-General "on the finances, administration, and condition of Egypt and the Sudan" provide a striking testimony to the thoroughness with which Great Britain has faced her responsibilities in these countries. In his new Report Lord Kitchener sounds a note of sober optimism, based not so much on the contemplation of past achievements as on the security of the prospect that the vast amount of work still remaining to be done will be overtaken at a steady and satisfactory rate of progress. Not the least striking feature of the Report, which is analysed elsewhere, is the matter-of-fact insistence upon just those aspects of national affairs which, though commonplace to Western ideas, are entirely novel to the Oriental conception. Among these may be enumerated considerations of public health and the various questions associated with the work of local governments, which have been in the past entirely ignored in the East. In administrative affairs the pace will be forced as much as the finances of the country will allow; the only brake to be applied is in the political sphere. Unfortunately it is only in the latter that the native genius lends itself to hustling and being hustled, and for this reason Lord Kitchener utters a word of warning to the more ardent among the Egyptian politicians.

CONSTANTINOPLE LETTER.

(From Our Own Correspondent.)

Constantinople, May 23.

Thrace: A Fortress.

There is not much change in the Turco-Greek situation. The Œcumenical Patriarch has made fresh complaints concerning the treatment of the Greeks in Thrace, and steps have been taken by the Turks to oust certain villagers of Greek, and in one case of Slav origin, from the neighbourhood of the Chatalja lines. It is now becoming clear that the main object of the Turkish Government in effecting these transfers of population is a military one. Thrace is now regarded as a great frontier fortress, which should be held as far as possible by Moslems, and the policy of the military is to encourage the Turk and to discourage the Greek element in all regions near the main military roads and railways, the principal bridges, such as the important bridge near Kuleli Burgas, by which the Maritza is spanned, and the environs of the fortresses of Adrianople, Kirk Kilisse and Chatalja. The policy has the economic disadvantages to which reference has been made, not once but many times in the columns of The Near East, but it has certain attractive features for the Turkish soldier and for the politicians.

Halil Bey on the Army.

Meanwhile the tone of the Press is still Chauvinistic, and so, unfortunately, is that of Parliament. Halil Bey, till recently President of the Council of State, and seemingly one of the most moderate of the members of the Government, had no sooner been elected Speaker of the Chamber of Deputies than he delivered an inaugural speech which was calculated, if taken seriously, to arouse the utmost distrust, not only in Greece and Servia, but also in Bulgaria. The Turkish Army, he said, had succumbed in the last war to a fatality, one of those regrettable accidents that overtake all armies. An army which in two and a half centuries had developed Ottoman power from the dominance of a little tribe in the Seyudlu valley to an Empire which humbled kings, emperors, princes and beys, which had marched from Vienna to the Indian Ocean, which had successfully defended Widdin and Silistria, which had checked the armies of Napoleon at Acre, and had emerged materially conquered but morally victorious from the Russo-Turkish war, could not be accused of lacking military ideals or the spirit that gives victory. So far one need not cavil at Halil's speech—although the historian might casually remark that one, Sir Sidney Smith, had something to do with the successful defence of Acre, and that British blue-jackets drove back Napoleon's last assault. But when Halil exhorted Turkish poets, teachers and publicists never to forget Salonika, the cradle of the Constitution, green Monastir, Janina, Scutari, Kossovo and Uskub, and to teach the young generation not only to remember, but to work for the recovery of these lost provinces of the fatherland; then one felt that here was dangerous advice from so high a quarter, and was inclined to ask if such things are said by the "moderate" what will be done by the extremist?

Alfred Rustem Bey's Career.

Alfred Rustem Bey de Bilinski, formerly Councillor to the Ottoman Embassy at Washington, a member of the Embassy at London, and more recently Minister at Cettinje, has been appointed Ambassador at Washington and has embraced the Moslem faith. He has taken the name of Ahmed. The Turkish Press expresses its delight at Rustem Bey's conversion, and the neophyte has been received in special audience by the Sultan, who is said to have presented him with a watch ornamented with brilliants, and his own chaplet. Rustem Bey will shortly leave for his new post. His career in the Ottoman diplomatic service has been adventurous and exciting. When a secretary at Athens he fought a duel with a Greek officer who had insulted his chief, and wounded him severely. He afterwards volunteered for service in the Greek war and was wounded at Domokos in 1897. At a later date he organized a sort of strike of secretaries of Embassy, who were weary of going without their pay in the "good old days" of Abdul Hamid, and was compelled to leave the diplomatic service. He has Polish blood on his mother's side, she, *née* a Miss Sandison, having been a member of a well-known British family long settled in Constantinople. He has written several most interesting contributions to *The Nineteenth Century* and other British reviews.

Fire at Tashkishla Barracks.

A fire which broke out at the Tashkishla Barracks yesterday afternoon gave the sailors of the "Goeben," which is now visiting Constantinople, and of the Russian *stationnaire* an opportunity of rendering most valuable assistance to the Turkish fire-brigade. The "Goeben" was coaling at the time, but within a quarter of an hour fifteen officers and at least 250 men were at Tashkishla, some of them black with coal dust, others a trifle summarily clad, but all ready and willing to do their best, and to incur not a little risk from the explosion of 200 boxes full of ball cartridge which were stored in a quarter of the barracks that was threatened by the flames. The Turks of the naval and military fire brigades worked well, as they always do. The "Goeben's" men showed pluck, initiative, and energy; Turkish reinforcements arrived, and after a hard hour and a-half's work the fire was got under. Unfortunately, nine Turkish soldiers, five of the "Goeben's" contingent, and two Russian sailors were injured mostly by an explosion of a box of ball cartridge. The affair might have had serious consequences had the conflagration reached the main store of ammunition, for though the Tashkishla Barracks are isolated, an explosion of so much ammunition might easily have thrown burning fragments on to the roofs of the houses in the Pancaldi quarter. Enver Pasha warmly thanked the German Admiral for the prompt and ready assistance which he gave, and the wounded German sailors were conveyed to the German Hospital in the automobile of Mehmed Ali Pasha, the Commander of the 1st Army Corps. The injured men are all doing well.

Parliamentary Work.

The *Tanin* states that after voting the modifications of the Constitution which give the Sultan the power of dissolving the Chamber of Deputies, under certain conditions, Parliament will have to deal with no less than 540 new laws which have been provisionally decreed and set in operation during the last twenty months. It is naturally unthinkable that the Chamber and Senate will be able to deal with this "avalanche" of legislation in a two months' session, and the Cabinet is therefore preparing a list of Bills which are to be discussed under an urgency motion.

Central Turkey College at Aintab has received from the Turkish Government official recognition as *école superieure*. It is the first of the American colleges in Turkey to secure such authorisation for any part of its regular curriculum.

LETTER FROM CAIRO.

(From Our Own Correspondent.)

Cairo, May 21.

The Khedive Leaves for Doloman.

H.H. the Khedive leaves this morning for Doloman on board his yacht "Mahrussa." He is being attended by several officials of the Survey Department, whose services and advice are required in connection with his estates. His Highness will subsequently proceed on his usual summer trip to Europe, and will, it is understood, visit Constantinople on his way north. It is not definitely decided whether he will spend the month of Ramadan in Alexandria or not.

There has been much movement in Alexandria during the past few days owing to the farewell reception, which took place on Monday, and the various luncheon and dinner parties which the Khedive has given in honour of those of whose hospitality he partook during his recent provincial tour. At the Council of Ministers held yesterday afternoon, the decree appointing Hussein Rushdi Pasha as Regent during the Khedive's absence was signed. The health of the Premier has given rise to some anxiety during the past week. He has just been operated upon for an abscess in the leg, but it is hoped that he will soon be able to attend to business again. Should he have to take a prolonged rest, it is understood that Ismail Sirri Pasha, Minister for Public Works, will become Regent.

Lord Kitchener's Movements.

Lord Kitchener, accompanied by Major Fitzgerald and Mr. Ronald Storrs, went down to Alexandria on Monday and had a farewell and private audience with the Khedive on Tuesday, returning the next day to Cairo. The British Agent is proceeding to England on June 18th on his usual leave. This is somewhat earlier than usual, and it appears that this has given rise to various conjectures both here and at home, As a matter of fact there is nothing at the back of it. There are no important schemes which require immediate attention, and the annual report, to which great interest is attached, is due to appear on the 27th inst. There is, therefore, no reason why the British Agent should remain on in Cairo, as he did during the past two years, when the lateness of his departure was due entirely to the importance of the business that was pending.

The Assembly and the Wakfs.

On Saturday the Legislative Assembly held its twenty-eighth sitting, when the Wakfs Budget came up for discussion. Moheb Pasha, the Minister of Wakfs, asked for time to study the report of the Committee of the Assembly, and it was decided to postpone the debate until this afternoon.

The report referred to is a most businesslike document. It deals most thoroughly with the question, and the committee deserves every congratulation on the able manner in which it has carried out its work. (It is interesting and at the same time curious to note that the delegates, when they sit in committee, bring to bear upon their labours businesslike qualities, a keen intelligence, and a reasonable frame of mind, which for some reason or another disappear as soon as they are gathered together in full and public conclave.)

It appears that the Ministry controls 45,716 feddans, with a revenue of £E298,800, which the committee considers is less than it should be. An area of 3,324 feddans is in addition cultivated by the Ministry itself; but it is pointed out that whereas the expenses amount to £E23,862, the revenue from this area is put down at £E23,000 only. Another criticism which the committee very rightly makes is in connection with the post of Legal Adviser, which was recently created at a salary of £E1,200 per annum. Attention is drawn to the fact that the duties of this official cannot very well be heavier than those of the presidents of the native courts, whose maximum pay is £E800, especially seeing that he is allowed to do private practice. Consequently it is recommended that his pay be reduced to £E800, and that the post of Assistant Legal Adviser be suppressed. Many other commendable changes are advocated, and the committee records its opinion that if attention were paid to raising the revenues and keeping down the arrears of rent—which amounted last year to £E207,812—and if expenses were maintained within reasonable limits, the number of educational and charitable institutions could be increased, the mosques could be kept in better repair, the poor and needy could be more liberally assisted, and lastly, the disgracefully low salaries of the ulema and of the preachers and staff attached to the mosques could be placed upon a more satisfactory basis.

The question of the responsibility of the Ministry of Wakfs has again cropped up. Certain members, including Saad Pasha Zaghlul, are of opinion that as the work of this ministry is of a nature quite different to that of the other ministries, the Minister of Wakfs should be directly responsible to the Assembly for his budgets, and for the administration thereof. They point out that the funds of the Wakfs are kept quite separate from the general budget of the State, that the ministry is also treated as distinct from the other ministries, and that the administration of the Wakfs is a purely Moslem and national matter, wherefore the Assembly should be accorded full power in regard to it, and the Minister of Wakfs should be directly responsible to the nation through the Assembly. Whether the point of view taken up by these members be correct or not, there is little doubt that the raising of the question is premature. No doubt the direct responsibility of the Minister of Wakfs to the Assembly would finally and conclusively set a check on the evil influences which a certain element may still be able to exert on the administration; but these are as yet early days, and before its request can be granted the Assembly must first show its capacity and fitness worthily to assume such a responsibility.

The Question of Public Entertainments.

The British community is often heard to complain of the lack of enterprise shown by those who make it their business to cater for the public amusement, and at the absence of any healthy form of entertainment. In the light of recent events one is almost inclined to think that this oft-voiced plaint is merely hypocritical. During the past two months we have been visited by Mme Loie Fuller with her troupe of children, whose reputation as exponents of the art of dancing is world-famed, and by the West End Comedy Co., who performed some of the best known of the latest London successes in a refined and talented manner, such as has not been witnessed in Cairo for many a long day. Yet neither of them attracted the attention which their performances deserved, and which the sighs of the British community for clean entertainments would have led one to expect. This attitude is sincerely to be regretted, and unless British residents show a little more solidarity and are prepared to support the efforts made by their fellow-countrymen and women to provide them with a healthy form of amusement, they must not expect any raising of the standard, nor must they complain if they still have, in future, to put up with the third-rate performances that have been placed before them up to now.

The Antiquities Service.

It is announced that Sir Gaston Maspero will retire from the Director-Generalship of the Antiquities Service in October next on the expiration of his leave. His successor, according to the understanding with France, has to be a Frenchman, and it is understood that the choice has fallen on M. Pierre Lacau, who is the director of the French Institute of Archæology in Cairo, and who for over eleven years worked under the retiring Director-General. Sir Gaston Maspero, who is 68 years of age, succeeded Mariette Pasha as Director of the Museum in 1881, and held that position until 1886, returning to it in 1899, ever since when he has been responsible for the Antiquities Service. He is retiring owing to ill-health, due to over-work. During the very long period he has been connected with this work he has rendered signal services to the cause of Egyptology, with which his name will always be intimately associated.

EGYPTIAN MILESTONES:

Lord Kitchener's Report.

Lord Kitchener's Report on the Finances, Administration, and Condition of Egypt and the Sudan in 1913, which has just been published, does not fall short of its predecessors in the matter of the interest that its perusal awakens. Ever since he became British Agent at Cairo progress and activity have been the watchwords of the Egyptian Administration, and the year under review shows a marked continuity in that direction. It is true that the Statute Book has not received many additions. This reduction in legislative output has been due to special causes; but, on the other hand, whatever changes have been made have been more drastic and more far-reaching than any previously introduced. In fact, we may say that 1913 has been an epoch-making year in Egypt's modern history; for it has witnessed, amongst other things, the establishment of two new Ministries—Wakfs and Agriculture—and the revision of the Organic Law, bringing about the creation of a new Legislative Assembly, which has been established on a fresh electoral basis and has received certain extensions of power. Without exception, these reforms were received with the deepest satisfaction by the Egyptians, and their introduction must certainly have strengthened the general confidence in the sense of justice, good intentions, and disinterestedness of the British Government.

The transfer of the Moslem religious endowments from the control of an independent Director-General to that of a Minister responsible to the Cabinet and aided by a Superior Council was, after all, but a return to a system that had been in vogue years before, and it responded to the oft-expressed desire of the Moslem community for the introduction of some drastic reform into the administration of the Wakfs, which had long given real cause for much anxiety, discontent, and reasonable complaint. The formation of a Ministry of Agriculture assumed even more vital importance; for it consummated the action which had been taken in 1910, when a department of the same name had been tentatively created, and gave to agriculture the officially recognised position which it should by rights have held long before in the country. It is surely but one more instance of the atmosphere of paradox that reigns on the banks of the Nile that amid all the reforming work carried out by the Occupation the least importance should have been assigned to the one question that in reality alone counted, and on which everything else depended so utterly; and that the development of modern Egypt should have actually dethroned agriculture from the executive position it originally held. Few people know that a score or so of years back a Ministry of Agriculture existed in Egypt. How it came to disappear none seem able to tell. The agitation which was made some seven years ago in favour of the formation of a Government administration to look after agriculture was, therefore, but a demand for a reversion to the old condition of things. It did not take Lord Kitchener long to recognise that if it was seriously intended to consolidate Egypt's economic position the agricultural requirements of the country would have to be made the first concern of the State, and that consequently the administration dealing with these requirements must be accorded adequate prestige. It is thanks to him that Egypt boasts to-day a Ministry of Agriculture which enjoys as much influence as any of the more senior Ministries, and is thus able to fill the all-important rôle that it is being called upon to take, not only in the preservation and amelioration of the crops, but also in the contemplated introduction and administration of the system of agricultural co-operation that is so urgently required as a corner-stone in the policy of economic reform embarked upon during the past few years.

Despite the efforts made by some to decry it, the change in the Organic Law constitutes an important step along the path of representative government. The system previously in force had been introduced as far back as 1883, but it was found, after thirty years' trial, that it had many organic defects that militated against its success, and so it was very wisely decided "to do what was possible to remove those defects, and thus give the Egyptians a fresh chance of working out their own future representative institutions by proving that they are worthy of the confidence reposed in them." The extension, which conduced to more equable representation, simplified the elections, and conferred further powers on the representative institutions of the country, is frankly admitted to be an experiment, the success of which, as Lord Kitchener says, depends on one factor only—"the spirit in which it is carried out." As we have stated before in this connection, any further extension lies entirely in the hands of the delegates themselves, who owe a solemn duty towards their electors "to assist the Government in working for their good," and who as a body are literally on probation. Until they show their utility and fitness, they can expect no further concessions; for "no Government would be insane enough to consider that because an advisory Council had proved itself unable to carry out its functions in a reasonable and satisfactory manner, it should therefore be given a larger measure of power and control." Lord Kitchener is of opinion that the Electoral Law has worked well, and that the composition of the new Chamber is satisfactory, and he repeatedly expresses his confidence in the common sense of the Egyptians. At the same time, he utters a timely rebuke to the delegates and declares that if the Assembly, instead of giving its loyal co-operation, "by unjustified hostility to the Government, unseemly bickering, unreasonable obstruction, and futile attempts to extend its own personal importance, outweighs the advantages derived from such institutions, retarding the progress of reform and acting against the true interests of the Egyptian people, not only will it inevitably destroy itself, but it will convince all reasonable men that this country for the present is not fitted for these representative institutions, which are now on their trial in Egypt." We can only hope that the element that has tried to force the pace and has shown a mistaken tendency to undue independence will read, mark, learn, and inwardly digest the words of warning and advice contained in this Report, and that the British Agent's optimism and confidence in the Egyptians will attain full justification.

It is satisfactory to note that the various reforms that had been introduced during the previous year have made good progress. The Five Feddan Law is producing the salutary effects which were anticipated, and its benefits will be further extended by the establishment of a system of agricultural co-operation, a law in connection with which is being closely studied by the Legislative Assembly. The Cantonal Courts, which were created for the purpose of introducing the principle of village justice under local administration, have been a success, which is "the most striking feature of the year's work." The Provincial Councils have continued on the excellent lines already followed by them in connection with elementary education and works of public utility, especially in regard to the introduction of the many hygienic and sanitary reforms with which the public health authorities have been occupied of late, and which should certainly result in a great improvement in the conditions reigning in the provinces. The Report notes, however, that in certain councils a change of Presidents is apt to be followed by a change of policy. Useful

projects, initiated with considerable expense and trouble, come to be neglected with the advent of a new President, and all interest is centred in some new scheme, no doubt equally beneficial, but totally different in character. The Councils and their Presidents should realise that a consistent policy is likely to yield the best results.

In other respects the past year has also been satisfactory. Despite the abnormally low Nile, the country is far more prosperous than might have been expected. Whilst this is in part due to the irrigation works that have been carried out, the complete tranquillity enjoyed by the country has also contributed thereto, and although Lord Kitchener expresses his complete agreement with the Financial Adviser's remarks on the Budget, and his opinion that if further capital expenditure is to be incurred additional sources of revenue will have to be found, we dare hope that the adverse conditions referred to will, thanks to the careful husbandry of resources that is now being practised, the works of development that are being carried out, and the close attention that is being paid to agricultural conditions, exercise but a temporary influence over the prosperity of the country, and that Egypt will once again justify her reputation for recuperative force.

EXTRACTS FROM THE REPORT.

The Capitulations.

Very brief reference is made to the Mixed Tribunals and the Capitulations. In the concluding paragraphs of the Introduction we read:—

I have little to add to the remarks which I made last year on the subject of the Mixed Tribunals, though, so far as procedure is concerned, I am glad to be able to note that some little progress has been made of late. In my immediately preceding report I was able to record the introduction of certain reforms in the procedure for the recovery of mortgage debts, and for the seizure and sale of land in execution proceedings. Some further improvements in procedure, of a more general character, were effected in the past year. A new law has abolished certain dilatory proceedings, by means of which unscrupulous debtors were enabled to delay their creditors and retard the payment of their debts. The same law has also restricted third-party claims in execution proceedings, reduced delays in the service of writs, amended the regulations as to costs, and introduced some other minor reforms in the existing system.

But the main question of organisation remains unsolved. Nor am I able to foresee the possibility of effecting any radical improvement in a situation the faults of which are inherent in the existing system of the "Capitulations." The fundamental modification of this system has been urged in the annual reports emanating from this Agency for many years past, and it may be hoped that a settlement of the question will not now be much longer delayed.

Public Health Department.

The Public Health Department receives much attention in the Introduction. It is noted that the Lunacy Section has been made into a separate Department, and that the Veterinary Section has been handed over to the Ministry of Agriculture, which will give the P.H.D. a "freer hand and more time to deal with problems appertaining to the health of the people."

The Ophthalmic Division has been strengthened by the addition of two inspecting surgeons, so that, in addition to the director, there is now a staff of four inspecting surgeons and thirty hospital surgeons.

So far as the central organisation is concerned, a Board of Health, composed of five members with the Director-General of the Public Health Department as president, is being formed. It is to be a consultative and advisory body without executive duties. The opinion of this Board will be taken on all important subjects. . . .

These additions and changes will enable the Public Health Department to take up the investigation of the more prevalent diseases, such as ankylostomiasis and bilharziasis, which are so widely disseminated through the Delta, and cripple so large a percentage of the population, thus seriously affecting the economic condition of an agricultural country like Egypt. The ova of bilharziasis have been recently discovered in the tissues of mummies of the Twentieth Dynasty, and it is therefore high time that serious steps should be taken to prevent the continuity of infection that has been going on so long in this country. Pellagra, infectious eye diseases generally such as acute opthalmia and trachoma, typhus fever, and other kindred diseases, and the causes of the abnormally high rate of infantile mortality, will all be subjected to a most careful examination.

Health in the Villages.

The remarks upon the sanitary—or insanitary—condition of the average Egyptian village are full of interest:—

In the villages throughout the country we find conditions favourable to the life history of the parasites giving rise to such diseases as ankylostomiasis and bilharziasis, which depend for their spread on conditions of soil and water and insanitary surroundings such as are usually found in this country. It is only within comparatively recent years that sanitary reforms have been applied to Egypt, and these mainly in the large towns and health resorts. The results of these returns have been sufficiently encouraging to warrant their extension in a modified manner to the villages. . . .

The construction of the villages and their surroundings are generally such that a standard of sanitary excellence in accordance with Western notions can only be very slowly achieved. The houses are overcrowded congeries of mud walls, badly built and badly ventilated. There is generally an entire lack of conservancy arrangements, and man and domestic animals live in close relations. The water supply is mainly from canals which are open to all sorts of contamination, and as the subsoil water is near the surface, pools abound almost everywhere, and a condition of things exists which we find suitable to the development of ankylostomiasis and bilharziasis. Further, to build a village mud bricks have to be made, and the consequent removal of soil causes depressions round each village. These are subsequently filled with stagnant subsoil water polluted with organic matter of all sorts, thus creating a fruitful source of disease. These so-called "birkas" are gradually being filled up, with evident advantage to the health of the inhabitants. The land thus reclaimed is useful for relieving the congestion in the village and to provide open spaces for the inhabitants.

Within the last few years much has been done to improve the sanitary conditions of the country; and it is gratifying to note that the people themselves "have to some extent overcome their dislike of sanitary measures":—

The notification of infectious diseases is now general, and concealment is the exception and not the rule, as formerly. The people no longer object to be isolated for infectious diseases. They come willingly for medical help, and increased facilities are being afforded them to obtain first aid, especially in cases of infantile diseases. It is a very striking fact that a few years ago it was a matter of the greatest difficulty to account for and medically examine pilgrims who return to their homes from the Hedjaz. This now proceeds quite smoothly, and instead of being run to earth with difficulty in their villages, they come of their own accord to be examined.

In this connection a remark elsewhere (p. 11) of the Report is of interest:—

Hospital accommodation in Egypt has been slightly increased, and a satisfactory feature is that a larger number of patients now come voluntarily into the hospitals. The prejudice which has existed for so many years in Egypt against hospitals of all kinds is gradually disappearing. This is chiefly due to the fact that the Egyptian medical officers who staff these hospitals are better educated and more efficient in their work than in years gone by. The standard of nursing has also been raised, and more attention is given to the training of the attendants.

As one of the means for improving the sanitary conditions of the villages the Report suggests:—

The organisation of a system of village sanitary inspection, consisting of about one inspector for ten villages, who would report to the Markaz doctor all that happened in regard to health questions and sanitary matters in the villages under his charge. A soldier who had served his time and become a non-commissioned officer in the Egyptian Army, with a little training in this kind of work, would probably make a very suitable sanitary inspector. The improvement in the villages themselves would then proceed on lines of proper conservancy (which would do much to prevent ankylostoma and bilharzia infections), the filling up of "birkas," the erection of decent, ventilated houses, and the arrangement of a purer water supply.

The measures already taken to combat ankylostomiasis and bilharziasis by means of a travelling ankylostoma hospital have met with marked success. An active campaign is also being carried on against ophthalmia and trachoma; and the establishment of maternity schools and children's dispensaries in the provincial towns are amongst the steps already taken to check the high rate of infantile mortality.

The Five-Feddan Law.

Regarding the Five-Feddan Law, the Report remarks that "the prediction that the diminution of credit caused by the law would force sales of land and lead to evasion of the law has not been borne out by events. Sales of the land of the category affected by the law show, on the contrary, a decrease, while the number of cases of contracting out of the law have been so few as

"PEARLS OF EGYPT" CIGARETTES.

to be entirely negligible." A table shows that the number of properties of 5 feddans and less under debt is 619,107; their total area, 619,214 feddans; the total indebtedness of their owners, £E15,990,660—which gives an average of £25.828 per debtor. And the Report observes:—

It will be seen from the above table that the appalling weight of approximately £E16,000,000 of debt has to be borne by the poorest class of cultivators of the soil in this country, and is distributed amongst only 5 per cent. of the population. The fact that an average of over £E25 per feddan of debt exists on a very large number of properties, constitutes, when the high rate of interest is considered, a dangerous financial situation for a considerable number of their owners.

The Financial Situation.

The bulk of the section of the Report dealing with the financial situation of the country consists of extracts from the Financial Adviser's Note on the Budget (which was fully dealt with in THE NEAR EAST of April 3). Lord Kitchener expresses his concurrence with that Note generally, and his opinion that the changes introduced this year "represent a very important improvement in the administration of the finances of the country," and that "great credit attaches to the officials who are responsible for their inception and elaboration." Regarding the Egyptian debt we read:—

On December 31, 1912, the total outstanding capital of the Debt was £94,349,680, and the charge on account of interest and sinking fund £E3,552,000. Debt to the amount of £147,140 was paid off during the year. The total capital therefore amounted to £94,202,540 on December 31, 1913, and the annual charge for interest and sinking fund to £E3,552,000.

It has, however, to be borne in mind that stock to the extent of £5,459,920 is held either by the Government or by the Commissioners of the Debt. The interest on this amount is £E200,000.

The total amount of Debt in the hands of the public was therefore, at the end of last year, £88,742,620, involving an annual charge of £E3,352,000.

Railways.

The railways estimates provide for the completion of the Zifta-Zagazig line and the continuation of the Zayat-Menûf line. The new bridge over the Ibrahîmia Canal at Assiût will be completed, and that over the Nile at Embaba will be continued. Work will be begun on the new station at Alexandria and on the new Pont-Limoun station in Cairo. Provision is also made for relaying of track, improvements to stations and signalling, construction of staff quarters, additional rolling stock, and improvements of the Upper Egypt auxiliary lines.

1913 has not been such a good year for the railways as 1912. There has been a decrease in traffic and a corresponding reduction in receipts, which are £E3,819,000, as compared with £E3,916,000 in 1912. The decrease is mainly in cotton and cotton seed, but also to a small extent in building material, sugar, and onions. The number of passengers travelling has decreased somewhat, mainly owing to the new Cantonal Courts, which have enabled people to get their minor cases settled without travelling to the towns.

The auxiliary railways of Upper Egypt show a slight increase in earnings compared with 1912. Passengers have increased. This is mainly due to the opening of the Beni Suef-Lahun line. The Luxor-Aswân line has done well. There is a slight decrease in receipts, as in the other branches, but the reduction in expenditure more than counterbalances the loss in receipts.

The total length of the light railways of Egypt (viz., the Egyptian Delta Light Railways, the Chemins de Fer de la Basse-Egypte, and the Fayûm Light Railway) now open amounts to 1,280 kilom., an increase of 32 kilom. as compared with 1912. The increase is due to a new line from Salahib to Baltim, which has been constructed by the Delta Light Railway Company.

Agriculture.

A table (page 28) gives the total areas under the chief crops in 1913 as being:—Cotton, 1,723,094 feddans; wheat, 1,305,578 feddans; barley, 369,158 feddans; rice, 242,367 feddans; maize, 1,632,556 feddans; millet, 220,204 feddans; and sugar, 48,468 feddans.

There is a growing demand for Government cotton-seed, 90,096 ardebs having been distributed to cultivators in 1912, as compared with 42,273 ardebs the previous year.

Cotton-seed breeding at Giza and Qorashîa has resulted in the production of four new strains of cotton. These have been submitted to a committee of experts in Alexandria, who recommended one variety for propagation on an increased scale. By subsequent experiments it is hoped to obtain an earlier maturing cotton which can be harvested before the boll-worm has time to hatch.

By means of thirty-eight demonstration farms, during the past year endeavours have been made to show the small farmer how to improve the cultivation of the soil by employing the means and labour at his disposal in a more intelligent and economical manner than formerly

The unduly large discharge outlets from the canals have been replaced by pipes of varying dimensions, according to the size of the area to be served. It is hoped that this change will tend to check the over-watering of the soil, an irresistible temptation to a peasantry who have for centuries had to contend with summer drought, and thus minimise the risk of over-saturation, which is as bad for the cotton crop as insufficient moisture. Experiments in the application of water on the soil have been continued, but with varying results in different localities, due, perhaps, to the low flood.

The measures taken against the cotton-worm, the common boll-worm, and the pink boll-worm are described in detail.

As to cotton markets (halaqas) we read:—

Experience in 1912 has shown that certain of these halaqas were badly situated. These have been suppressed and others opened to replace them in more suitable localities. There has been a remarkable discrepancy in the results obtained by the halaqas in different districts. In certain places they have met with great success and evidently respond to a long-felt need; in others they have failed to meet with much support. On the whole there has been an increase of approximately 50,000 kantars entering the halaqas in 1913, as compared with the previous season.

An arrangement for the sale in the halaqas (by the Provincial Councils on behalf of the Khedivial Agricultural Society) of manure "has been an unqualified success, and is being extended."

(Further extracts from the Report will be given in next week's issue.)

PORT SAID NOTES.

(FROM OUR OWN CORRESPONDENT.)

PORT SAID, May 20.

Credit Foncier "Gros Lot."

The first prize of Fcs. 50,000 in the drawing of the Crédit Foncier Lottery has been won this month by a workman named Bianchi, employed in Port Said by the Suez Canal Company at their waterworks.

A Mother's Crime.

A horrible deed was committed on Monday night by a native woman, the wife of an employee of the Egyptian State Railways. On returning in the evening from his day's work, the husband seated himself at the table and was about to commence his evening meal, when he discovered a human hand in his soup. Nearly mad with horror and fright, he asked his wife what had become of their little daughter, a baby of nine months, and the poor creature, who had evidently gone out of her mind, answered that she had cut the baby into pieces and boiled her in the soup. The distracted father rushed out of the house, and with the aid of the police conducted his wife to the native hospital, where she has been placed under control pending an investigation by the police.

Fatal Accident in the Port.

While the North-German Lloyd steamer "Roon" was discharging her cargo yesterday a number of timber logs in the hold were displaced, and rolling into the square of the hatch, fell on the native stevedores engaged in sorting cargo, killing one of them outright, and wounding three others. The latter were taken to the Government Hospital, where their injuries were attended to. An inquiry into the accident is being held by the Port police.

The Ottoman Association have arranged with Mr. Francis Griffiths for the publication of a second edition of Pierre Loti's book, "Turkey in Agony." The edition will be ready next week.

"MILKMAID" BRAND

Sterilised Fresh Milk

Obtainable from all leading Grocers and Druggists in Egypt and the Levant.

LETTER FROM ATHENS.

(From Our Own Correspondent.)

Athens, May 20.

The Epirote Settlement.

The concessions obtained by Mr. Zographos for the Greeks in Southern Albania certainly do not correspond with the ambitions of the Epirotes, but it must be remembered both here and in the districts affected that it is the maximum of concession which could be accorded in the circumstances. What the Epirotes have gained is enough to enable them to preserve their Hellenic racial and linguistic characteristics, and that should satisfy both them and Greece itself. The Powers could have gone no further in the direction of autonomy without impairing the integral unity of Albania which was established by the Treaty of London. In connection with the arrangements made about the liability of the Epirote gendarmerie to serve outside the prescribed areas only when such service is sanctioned by the International Commission of Control, it is pointed out that disturbances in other parts of Albania are likely to be so constant and so serious as to render that "special sanction" almost permanently operative. I understand that the question of guaranteeing the concessions gave rise to a heated scene between Mr. Zographos, who insisted upon the Powers being the guarantors, and the Italian Member, who was of opinion that the guarantee of the Commission of Control would be adequate. The claims of the Chimariots to a special treatment, apart from that accorded to the Epirotes, will probably be reserved for the consideration of the Powers, and Mr. Spiromilio threatens that they will remain under arms until their demands have been granted.

Parliamentary Progress.

Since the Chamber reassembled on May 18 it has been debating the question of the Athens water supply. The Bill empowering the Government to grant a contract to a foreign company, after considering tenders, for bringing water either from Lake Stymphalia, in the Peloponnese, across the isthmus of Corinth, or from the river Melas (Mavropotamos), in Bœotia, has now been read the first time. The Prime Minister is most anxious to see this very necessary work accomplished, as on it depend the improvements in the capital which, by Her Majesty's directions, are being elaborated by the British architect, Mr. Mawson.

The Opposition is preparing a concerted attack on the Government's policy in Epirus, and this will be delivered during the debate on the Bill for the cession of Sasseno to Albania which has been introduced by Dr. Streit, the Minister for Foreign Affairs. This Bill is necessary, as, according to the Constitution, Parliamentary sanction must be obtained for the cession of territory, and Sasseno, before it was attributed to Albania by the Powers, was one of the Ionian Islands.

Should the necessary preparations for the holding of elections in the new territories have been completed by then, it is possible that the general election may take place in November, but it is not unlikely that the general election may take place immediately after the dissolution, which is expected in September.

The Treatment of Greeks in Turkey.

The persecution of Greeks in Turkish Thrace steadily continues in spite of the constant intervention of the Œcumenical Patriarch, who has demanded the appointment of a Mixed Commission to make an impartial inquiry and take the necessary steps to put an end to the outrages, to punish those responsible for them, and to stop the emigration of Greeks. Fresh representations have been made by the Foreign Office to the Powers both in Athens and in the European capitals with a view to securing their support in alleviating the condition of the oppressed Greeks in Thrace.

The Ottoman Speech from the Throne has heightened the impression held in diplomatic circles here that in spite of the efforts of certain Powers, particularly Germany, to persuade the Porte to cut its losses, Turkey is only proposing negotiations about the islands in order to gain time for naval preparations.

ARMISTICE IN ALBANIA.

(From Our Own Correspondent.)

Koritza, May 10.

[Delayed in Transmission].

Last Days of Strife.

The last few days before the establishment of the armistice between the Albanians and the Greeks in arms against them were filled with sanguinary incidents. The efforts which the Greeks had been making for the past seven weeks to recover possession of Koritza culminated—after a period of repose lasting for twenty days—in a series of attacks from the direction of Liaskovik, which the Greeks had occupied with artillery since the Albanian gendarmes retired a fortnight ago from the Kolonia district. The first of these attacks began just a week ago when the Greeks moved northward, but were repulsed by the Albanians, who reoccupied several villages in the Kolonia district. In one of these, Stari, the partially burned corpses of a number of men and women were found, and those of three others who had been murdered. In all twenty-three villages have been burned by the Greeks, either totally or in part, and I have myself visited several of these monuments to the vaunted superiority of Hellenic civilization and culture! Three days after this defeat a Greek force, estimated at some 3,000 men, attacked the Albanian positions at Nikolitza to the south-east of Koritza, and after ten hours' fighting was repulsed, leaving more than sixty dead on the field. Next day the armistice came into force.

The Orthodox in Albania.

It is very greatly to be hoped that in any agreement come to as to the future status of the Epirotes no loophole will be afforded for the Greek Government to pose as the "protector" of Orthodox Christians in Albania. The attempt to give colour to such a pretension would lead to perpetual friction, and would permanently impair the national unity of this country and be a hardship to those Christian inhabitants who wish to remain Orthodox without becoming Greek.

Military Preparations.

To-day orders have been received from Durazzo to call all the men fit for duty between the ages of twenty-five and thirty-five to the colours, and a good many have already presented themselves. The authorities have already sent a supply of the latest pattern Mauser rifles, and consignments of these are arriving daily from the capital. Advices have been received to the effect that two batteries of mountain guns are on their way. This will give the Albanians a chance of dealing with the insurgents on something like an equality in the matter of armament should recourse to fighting again become necessary.

A New Map.

"The Balkan Peninsula." Scale 31½ miles to an inch. Size 28 by 22 inches. Price in sheet, 3s. Mounted to fold in case with complete index, 5s. (Bacon and Co.)

This is a praiseworthy attempt to wrestle with the difficulties of Balkan political geography as altered by the recent treaties and conventions, and with the intricacies of nomenclature, which has become worse confounded than ever since the transfer of territories has rendered Keupruli, Perlepe, Vodena, Eskeje, and Mustafa Pasha obsolete equivalents of Veles, Prilip, Edessa, Sketcha or Xanthi, and Svilengrad. In this connection we note that Messrs. Bacon have in many cases adopted the Croatian spelling of the Austrian staff maps, which gives values to certain consonants wholly different from those accepted in English. In the matter of frontiers the Serbo-Montenegrin is not quite right, and that given to Southern Albania is not in conformity with the most recent readjustments. We can appreciate the accuracy of leaving Mount Athos uncoloured, but why should Chios and the other Asiatic islands held by Greece be left white if Mitylene be coloured as Greek territory? In Europe railways appear to be thoroughly up to date, but the Asiatic Soma-Panderma line opened in December, 1912, has been omitted. From a technical point of view the execution of the map is admirable.

SERVIAN LETTER.

(From Our Own Correspondent.)

Belgrade, May 24.

Political Manœuvres.

Far from terminating the Parliamentary crisis, the vote of confidence accorded to the Government, as recorded in my last letter, seems rather to have accentuated it. At the sitting on the 20th inst., the Samostalnia deputy, Mr. Jasha Prodanovitch, criticised the Government in unmeasured terms, and launched accusations against the Minister of Justice, which the latter declared to be libellous and to affect the whole Radical party. A turbulent scene ensued, in the course of which the deputies almost came to blows; and the President was compelled to suspend the sitting. The next sitting was likewise suspended as the result of a second outbreak. On the next day the Opposition parties, having declared the conduct of the Government to be unconstitutional, quitted the House in a body, and as there were not sufficient supporters of the Government to form a quorum the sitting had to be adjourned. The Government telegraphed to its absent supporters, and yesterday the contest was resumed; but again, after a vigorous assault on the Government, which was accused of acting in an illegal and unconstitutional fashion, and pressed to resign, the Opposition withdrew.

The course of systematic obstruction upon which the Opposition has thus embarked is an unfortunate thing for the country at the present juncture. For there are many pressing questions of foreign policy to be discussed—such as the Orient Railways, the Concordat with the Vatican, the ratification of the Agreement with the Phanar, and the Capitulations in the new territories—to say nothing of questions of internal policy which require prompt settlement. The Opposition, it may be observed, is not really lacking in patriotism; only Oriental ideas have not yet been entirely supplanted by Western European principles in such matters as this.

The Government, having now sufficient members in Belgrade to form a quorum, has decided to continue its labours, even if the Opposition parties persist in absenting themselves from the sittings. The Prime Minister stated at the last sitting that the Skupshtina and the whole country would witness that the Government was acting in accordance with Parliamentary usage. "We are," said he, "inclined for new elections, but the time is not yet ripe for them. First, there are important questions to be settled by the Skupshtina. Let the deputies do their duty, and when there is a new General Election the country will decide who is in the right."

Albanian Developments.

The development of events in Albania is followed with close interest by politicians here. It is generally held that the revolt against the Albanian Government, and especially the steps taken against Essad Pasha, must be attributed to a sinister influence from outside; and it is feared that Austria-Hungary and Italy will soon seize on some pretext for military intervention and, eventually, the establishment of a joint protectorate over the country.

Roumanian Engineers' Visit.

Belgrade is expecting shortly a visit from a number of Roumanian engineers and students of the Bucharest Technical Faculty, who will be the guests of the Servian Society of Engineers and Architects. The visit will be returned later on by the students of the Belgrade Technical Faculty, who will utilise the opportunity of visiting the famous oilfields in Roumania.

Mr. Edward Arnold to-day publishes "The Struggle for Scutari," by Miss Durham, the well-known writer on Albania and Servia, who was in Montenegro during the recent wars. The book is illustrated from drawings and photographs, and is issued at 14s. net.

THE GUESHOFF-DANEFF ENQUIRY.

(From Our Own Correspondent.)

Sofia, May 23.

The Sobranje has been occupied the whole week in debating the proposal for a commission of inquiry concerning the responsibility of the Gueshoff and Daneff Cabinets for the late wars. The sittings attracted a large number of the public, and the diplomatic gallery was always well filled, the Russian and Turkish Ministers being conspicuous visitors. A whole sitting of four hours was taken up by a speech from Dr. Daneff, whose most interesting points were that Mr. Gueshoff's Cabinet twice endeavoured to induce Roumania to join the Balkan Alliance; and that their policy had succeeded in obtaining the best terms possible at the St. Petersburg Conference. He declared that he knew nothing about the fatal order for a general attack on the Allies, which was given by General Savoff, who, however, had told the foreign correspondents that he was acting on the King's instructions.

Mr. Todor Todoroff, the former Minister of Finance, who was the next speaker, claimed credit for his party for its financial provisions for the war with Turkey, and declared that the Serbo-Bulgarian Treaty was not directed against Austria-Hungary. The latter was not mentioned in the Treaty, nor was Albania, and nothing was said in it of access to the Adriatic for Servia.

Dr. Gennadieff, the leader of the Stambolovists, spoke for three whole days. In a masterly way he set forth his party's view of the course of events which led up to the catastrophe. The 29th of June, he said, witnessed an irrational act, the result of Mr. Gueshoff's policy, which Dr. Daneff could not change. In his peroration, which aroused tremendous enthusiasm, Dr. Gennadieff appealed to his hearers to rise superior to the country's misfortunes, and, relying on the strength of the nation itself, to fufil the desire and purpose of those who had fallen for the aggrandisement of Bulgaria. The Sobranje listened to this appeal in tense silence for the greater part, but on its conclusion the majority accorded their best orator a great ovation. It was also proposed that his speech should be published. The debate was then closed, and to-day the Sobranje is occupied in electing the committee to conduct the inquiry.

NOTES FROM ROUMANIA.

(From Our Own Correspondent.)

Bucharest, May 23.

King Carol's Jubilee.

Next year King Carol will celebrate the jubilee of his accession, and his subjects are determined that the event shall be observed in fitting style. Great festivities will take place, and a group of influential business and professional men has been formed to make suitable arrangements. The erection of a statue in the centre of the city, an exhibition in the Carol Park, the arrangement of a series of national fêtes, and the striking of a commemorative medal are amongst the proposals advanced and likely to be adopted. The chief festivities will take place on May 23, 24, and 25.

Turkish Visitors.

A large party of Turkish professors and students is now visiting this country, and everywhere the visitors have met with a most cordial reception. In conjunction with their confrères here the professors have laid the foundation of a Turco-Roumanian Society, with the object of drawing the two countries more closely together; and arrangements for an exchange of professors are under discussion, if not actually completed.

The King and the New Territories.

King Carol and the Royal party have returned to Bucharest from their river excursion. The King is stated to have been exceedingly pleased by his reception in the newly acquired territories, at Silistria, Turtukaia, etc., where he and the Queen certainly won all hearts by their simple and unassuming manner.

RUSSIFICATION OF PERSIA.

(From Our Own Correspondent.)

Odessa, May 24.

Wholesale Russian Immigration.

From a private but well-informed source I am informed that the Russian authorities in Turkestan are, pursuant to instructions from St. Petersburg, giving their earnest attention to the scheme of peasant emigration from that region into Persia. Some half-score officials have been appointed as emigration agents to control the movement and choose the most promising class of emigrants, chiefly agriculturists and wine and fruit growers. The whole of these emigrants are, of course, substantially assisted by the Russian Government. Besides free land grants in the valleys of the Atrek and the Gurgen they will be gratuitously furnished with draught cattle, agricultural implements, and other necessary appurtenances. Under such conditions there is no lack of attraction for settlers both from Turkestan and European Russia. Applications from Russian agriculturists in the Caucasus are not entertained by the emigration authorities, as that province is considered to be still too sparsely populated with Russian settlers. From information in his possession my informant believed that from forty to fifty thousand Russian emigrants would be transplanted to Northern Persia in the course of the current year. Whether this estimate be correct or not, it is an abundantly evident fact that Russia is taking the most effective of all means for the complete Russianizing of the Persian territory overtly understood to be in her temporary military occupation. That is the view of the situation which it is desired should for some time longer obtain in England; but there is nothing of a temporary nature in Russia's consolidation of her foothold in Azerbaijan, and that province by no means delimits her future expansion of what she euphemistically describes as a protectorate imposed upon her by the hopelessly chaotic state of the Shah's nominal dominions. Persia is bankrupt, and she can only regain her solvency with the financial aid of her powerful neighbour and "protector," and, as The Near East last week observed, Russia always demands a sufficient *quid pro quo* for favours, financial or otherwise, she extends to Persia.

All the reports reaching Odessa from Tabriz go to show conclusively that Azerbaijan is already *de facto* a Russian province, and it is an easy transition from the *de facto* to the *de jure* where this country's future supremacy is concerned. M. Orloff, the Russian Consul-General, and Shuja-ed-Dowleh, the nominal Governor-General at Tabriz, are, as a matter of unquestionable fact, Russia's co-viceroys of Azerbaijan, and the civil administration of the province is wholly and solely controlled by M. Orloff and his staff of Russian subordinates.

Russian readers of the London Press, as I happen to know, marvel at the delicacy and reticence of Sir Edward Grey when he is pressed, in the House, for more particular and explicit information concerning the Russian occupation and administration of Northern Persia; and they are no less surprised at the want of pertinacity shown by the Parliamentary questioners, who cannot be ignorant of the actual situation in Azerbaijan. The Russian Press in no way attempts to veil Russia's policy in Northern Persia, but, unfortunately, the Russian Government is not yet prepared to make a full and candid statement, and, apparently, her reason therefor is a certain inexplicable deference to British public opinion. A completely frank declaration of her present and future Persian policy by Russia would clear the air of a cloud of misleading reports and British delusions.

To the representative of a local paper a member of the ex-Shah's suite the other day gave an emphatic contradiction to the report that his Majesty was endeavouring to dispose of property belonging to his wife in Azerbaijan in order to provide himself with funds for a further attempt to regain the Persian throne before the Coronation of the young Shah in July. The ex-Shah, said this informant, had not the remotest idea of any such futile adventure, and he was now reconciled to the inevitable. It was true that Mohammed Ali had sent a mission to Tabriz for the purpose, if possible, of disposing of certain property in Azerbaijan pertaining to his consort, but simply in order to relieve the financial straits in which he now finds himself. The local paper presumes that the pension granted to the ex-Shah by the Teheran Government is very much in arrear, owing to the extreme exigencies of the Persian Exchequer. I give you this under reserve. I doubt whether any member of the ex-Shah's suite is permitted to make a statement of the kind to a local journalist, although there is nothing inherently improbable in the nature of the alleged communication. The one thing patent to his Russian neighbours here is that Mohammed Ali is leading a very economical life in his modest villa. The Persian Consul-General, who has no official or private intercourse with the Royal exile, knows nothing of the intended journey of the ex-Shah's consort to Teheran for her son's Coronation beyond the announcement made from St. Petersburg to that effect some two months ago.

GREAT BRITAIN AND PERSIA.

The annual meeting of the Central Asian Society was held on Tuesday, at 22, Albermarle Street, Lieut.-Colonel Sir Francis Younghusband presiding. Sir Mortimer Durand was elected chairman for the year, and Sir West Ridgeway, Sir Frederick Fryer, and Lieut.-Colonel A. C. Yate were re-elected members of the council.

Sir Mortimer Durand read a paper on "Sir Alfred Lyall and the Anglo-Russian *Entente*." It was, he said, the irony of history that Sir Alfred, who for more than thirty years had advocated an agreement with Russia as to Central Asia, should be Foreign Secretary for India during the time when Lord Beaconsfield and Lord Lytton were engaged in efforts to checkmate the Russian advance in Asia and restore our prestige in Afghanistan. As to the present position, Sir Mortimer said that the Convention with Russia does not materially affect our military interests in India. Looking at the actual terms of the Convention, he would say that we had made a bad bargain. In a speech in the House of Lords, Lord Crewe had made him personally responsible for the decision arrived at by the Government as to Persia, but he must believe that that was an unintentional misrepresentation. He (Sir Mortimer) had drawn a line on the map which included Hamadan, Kermanshah, Ispahan, and Yezd as an area in which we had absolute control of the trade, while beyond that the Russians were competing successfully to some extent with us. Lord Crewe had given all the latter portion to Russia as a sphere of influence, had made the country below that into neutral zone, and had limited our sphere of interest to a small portion from Gazik to Bunder Abbas. Lord Kitchener believed this part was strategically sound. The situation in Persia was very disquieting. We had many ties with Persia, but we must remember that the Indian Empire was our first Asiatic interest. The occupation of Southern Persia might lead to great military developments, for it would require a large force and would probably be permanent. The Government should not enter lightly on a military occupation, for the supply of British bayonets was limited.

THE NEAR EAST.

The Near East is on sale at all Bookstalls and Newsagents in the United Kingdom. Should any difficulty be experienced in obtaining the paper, readers will oblige by notifying the Manager. Abroad The Near East may be obtained in:

PARIS. Librairie Hachette, 79, Boulevard Saint-Germain; Librairie Galignani, 224, Rue de Rivoli, and at Railway Bookstalls.
VIENNA. Goldschmiedt Brothers, Zeitungsbureau, Wollzeile, 11.
CONSTANTINOPLE. Economic Co-operative Society, Pera; Benjamin Rawe, British Oriental Bazaar; D. Marianopoulo, 280, Grande Rue de Pera.
SALONIKA. Librairie Francaise, Rue Sabri Pasha.
SMYRNA. Dem. Tzannou, Petite Rue de Rose.
BEYROUT. Sarrafian Brothers.
JERUSALEM. Palestine Educational Store, Jaffa Road.
CYPRUS. Cababe and Wilson, Nicosia.
CAIRO. Diemer and Company, Shepheard's Buildings; The British Library, Sharia Kasr-el-Nil, and at Railway Bookstalls.
ALEXANDRIA. Librairie Schuler, Rue Cherif Pasha; Nacamulli and Company, 12, Rue Sesostris; Librairie Calebotta, Rue Cherif Pasha Librairie Cauro, Rue Cherif Pasha; The Eclectic Bookstall; F. Diemer, Cairo Station.
PORT SAID. Charles Evans, and on board vessels in the harbour
KHARTOUM. Sudan Stationery and Bookstore, and Victoria Bookstall
ATHENS. Eleftheroudakis and Barth, Place de la Constitution.
SOFIA. Librairie de la Cour.
BUCHAREST. Socec and Company, Calea Victoria.
NEW YORK. The International Bibliopole, 118, East 28th Street.

Readers in France who desire to secure The Near East regularly are informed that any Newsagent in that country can obtain the paper for them through Messrs. Hachette, in Paris. In the same way any Newsagent in Belgium can readily obtain the paper from the Agence Dechenne, Bruxelles.

NEAR EAST BOOKSHELF.

DEVELOPMENT IN ISLAM.*

The name of the author of this volume is, of course, sufficient warrant of its interest and value, but for readers of THE NEAR EAST it will have a quite special value. The future of Islam is at the same time a matter of the gravest import politically and a subject of reflective speculation which occupies the minds of theological and philosophical students in a continually increasing degree. The notion that Islam is a decaying cult has been current throughout Christendom for several centuries; the imminence of its fall and disappearance has been announced times out of number, but wherever one looks one sees only expansion and growth, whether in Europe, Asia, or Africa. The spread of Islam in Africa is nothing less than phenomenal, and has naturally excited the apprehensions of the Christion Churches. The number of conversions to Islam throughout China, India, and the East Indian Islands is equally remarkable. This growth is real and, as far as can be judged, permanent; for Islam takes a firmer hold of its converts than does Christianity or any other religion. Once a Moslem, a Moslem for ever. "Backsliders" among converts is a thing unknown in Islam. Being therefore real and permanent, this wonderful world-effort on the part of a reputedly dying religion attracts the deepest attention and requires explanation. It is from this point of view that Professor Margoliouth's study of the early development of Mohammedanism merits special study. Taking the Koran as the essential basis of the religion, the author examines its origin and genesis in the light of the most recent researches. In this respect Professor Margoliouth does not add much to the sum of our existing knowledge, but he shows how, on the nucleus constituted by the Koran, the various accretive elements came into being and now, in their logical developments and as a whole, constitute the great religious-secular system of Mohammedanism. During the lifetime of the Prophet the revelations conveyed to men through him as intermediary were the main source of the Divine wisdom, and failing any such revelations, the word of the Prophet, as the Apostle of God, had the force of law throughout the whole of Arabia. After Mohammed's death, the revelations, which until then had been stored only in the memories of certain of those closely in contact with the Prophet's daily existence, were gradually collected and reduced to writing. Even then it, of course, soon became apparent that although the Koran was supposed to contain *all* knowledge and wisdom, it was impossible that it should provide directions for every contingency that might arise in the life of every follower of Islam. As a natural consequence there arose a vast mass of tradition relative to the actions of the Prophet in the most varied and particular circumstances. These traditions were in course of time critically examined by contemporary biographers, and if found to pass certain tests of authenticity they became binding on the community with the force of law—and, moreover, of almost immutable law. Thus the Koran and the Traditions have come to form practically the sole sources of guidance for the faithful. Owing to the particularly sacred character of the Koran in the eyes of the Moslem world, and the fixed, unchangeable nature of the Traditions, it is easily conceivable that almost insurmountable difficulties arise whenever it is proposed, by any of the forward spirits of Islam, to introduce even the smallest particle of the leaven of progress. A great struggle seems thus always to be waging between the enormous inherent vitality of the faith and the clogging weight of its original charters. What will be the outcome? A glimpse of possibilities may be gained by following Professor Margoliouth's study of the influences of philosophy, history, and mysticism on the development of Islam. All these and other factors have by slow and minute degrees brought about changes that would certainly have been prophesied impossible by early adherents of Islam. Their influence has been accumulating force within recent years, and aided by the study of scientific subjects, in which the modern Turk is so readily proficient, it seems certain that progress will not be longer excluded from Islam. What direction this change will take is hardly to be anticipated at present, but once such change is admitted in Islam, the already rapid expansion in these days will be infinitely surpassed.

Friends of Islam in England—and they are a large and growing company—will find in Professor Margoliouth's work a useful and impartial study of some of the factors which have moulded Islam in the past, and may thus be assisted to a very absorbing speculation as to the future of the Faith. *And the future will not seem dark.*

* "The Early Development of Mohammedanism." By D. S. Margoliouth, D.Litt. (Williams and Norgate. 6s. net.)

NEAR EAST BOOK NOTES.

Messrs. Hurst and Blackett have issued "The Women of Egypt," by Miss Elizabeth Cooper. The authoress has visited the homes of the various classes of Egyptians and Bedouin, and has gained first-hand knowledge of their customs and habits. Particular attention is drawn to the need of teaching the womenkind of these peoples something about sanitary laws, and an attempt has been made to give some inkling of the problems in the lives of the Egyptian women which the rapid changes of to-day have created.

Mr. Edward Arnold issues Mr. H. F. Prevost Battersby's "Richard Corfield of Somaliland," with maps and illustrations, at half a guinea net. The author was war correspondent for *The Morning Post* during the Somali campaign.

The Oxford University Press will shortly publish a monograph upon Babylonian religion and theology entitled, "Tammuz and Ishtar," by S. Langdon, Shillito Reader of Assyriology at Oxford. The book has been written chiefly for philological purposes, and as "a reaction against the trend of Assyriological interpretation of Sumero-Babylonian religion, which has hitherto emphasised the magical side of this religion out of proportion to its purer ceremonies and deeper theology."

BOOKS RECEIVED.

The Inner History of the Balkan War. By Lieut.-Colonel Reginald Rankin, F.R.G.S. (Constable and Co. 15s. net.)

The Language of the Nawar or Zutt, the Nomad Smiths of Palestine. By R. A. Stewart Macalister. (Bernard Quaritch. For the Gypsy Lore Society. 5s.)

THE BITLIS RISING.

The Orient of May 20 reproduces some portions of a letter from Bitlis, which gives some details of the Kurdish rising. The writer says:—The events of the uprising created a diversion in some ways. We had a decidedly exciting moving picture show all day the second of April. This morning my barber used double time in cutting my hair while he related what happened within the "enemies'" lines where his house is located. He says that he gave ten batmans of bread to the "invaders." This shows that the Kourds were not prepared for anything. A general uprising requiring marching from place to place would be quite impossible. I have supposed that two hundred or three hundred outsiders came in. He says 4,000. He says the mountain side was covered with them lying down, so that not a "finger's space of earth remained uncovered." All these men were *unarmed*, waiting for their armed friends to take the arsenal that they might be armed. Another sign of weakness. The mountain on whose side they were lying divides one valley in the city from the main part of the city. The Kourds were on the back side of this mountain. Mollah Selim had said that he could stop the bullets by holding up his hands. He came among the fighters about noon. Not until his arrival was a Kourd killed. But just after he came two were killed, which rather made the Kourds doubt his miraculous powers.

LETTERS TO THE EDITOR.

The columns of THE NEAR EAST *are always open for the discussion of subjects of general interest to its readers. The publication of such letters must not be taken, however, as indicating that the views expressed by the writers are those of* THE NEAR EAST.

Letters intended for publication MUST be accompanied by the writer's full name and address, not necessarily for publication, but as an evidence of good faith. They should be worded as briefly as possible and must be written on one side of the paper only.

ANTIQUITIES IN TURKEY.

To the Editor of THE NEAR EAST.

SIR,—Your correspondent "Jurist and Banker," who writes on "Antiquities in Turkey" in your issue of May 22, writes under a misapprehension. "Merchants" of antiquities are fortunately not allowed to dig for that which is the historical evidence of their country with the object of selling this for their own profit.

The scientific societies who seek historical evidence receive a written licence to do so, in which the conditions are made perfectly clear. The locality is defined and limited; all objects found are the property of the Government unless or until such right be waived, as it may sometimes be in the case of duplicates. The result of this law is the magnificent museum at Constantinople, to which many contributions of value have been made by my society, who have, on their part, acquired and published much valuable historical evidence. It is the surreptitious digger for profit who is the greatest enemy of the knowledge derived from antiquities when found.—Yours,

J. D. CRACE, Hon. Secretary.

Palestine Exploration Fund,
2, Hinde Street, Manchester Square, London, W.,
May 25, 1914.

To the Editor of THE NEAR EAST.

SIR,—I quite endorse the interesting letter of your correspondent "A Jurist and Banker," regarding antiquities in Turkey, and having travelled in that country allow me to add that the harm and injustice are, strange to say, done to natives only, while foreigners are never interfered with. Here is an instance I witnessed only a few months ago when passing through Syria. A German gentleman at Aleppo was able to ship to his country some thirty cases of antiquities excavated in Turkey, and all shipped in one day; while on the same day a native had two small boxes of the very same nature, which he was shipping as presents to his friends in Europe, confiscated and kept by the Ottoman authorities, simply because he was one of their own subjects. And this is the Government of so-called "Union, Liberty, and Progress."—Yours truly,

"X."

London, E.C.
May 27, 1914.

TURCOPHIL SOCIETIES IN LONDON.

To the Editor of THE NEAR EAST.

SIR,—The association of which I have the honour to be secretary would deplore any dispute between the friends of Turkey in this country, but letters such as the one signed by Mr. Field, in your last issue, being typical of many other pronouncements from the same quarter, prompt me to make a statement from our side as to the reason why there are two Turcophil societies in London. I note with interest Mr. Field's claim that he founded the Ottoman Committee. I am far from wishing to dispute his claim, but I understood Mr. Duse Mohamed also considered himself its founder, and the same claim is made by a lady who is a member of the Ottoman Association. Perhaps the honours are divided, as they generally are in such cases.

However that may be, the Ottoman Committee was founded in the summer of 1913, and subsequently the executive included myself, Mr. E. N. Bennett, Mr. Marmaduke Pickthall, Mr. George Raffalovich, Mr. Arthur Diosy, and Captain Dixon-Johnson, all of whom are now members of the Ottoman Association. Differences of opinion arose as to policy and methods, which were thrashed out at several meetings. I presume due notice was given to all concerned of each meeting, as Mr. Field himself was acting secretary, and therefore he summoned them. Eventually a meeting was held at 158, Fleet Street, to which all members were invited. To the best of my recollection the meeting was large and representative, but perhaps Mr. Field could tell us exactly how many were present. A resolution was passed reconstituting the organization and appointing a new executive, and a further resolution was also carried changing the name to "The Ottoman Association." No one voted against either resolution, although Mr. Field and one or two others abstained from voting in favour. It is, therefore, an indisputable fact that the Ottoman Association is a continuation of the Ottoman Committee, and Mr. Field himself recognized that fact in so many words in letters to me, and also by handing over the Press cuttings and furniture which were the property of the Ottoman Committee. As Mr. Field declined to continue as secretary, Mr. Bennett and myself were appointed joint secretaries at the same meeting. Immediately afterwards Mr. Field, Mr. Duse Mohamed, and one or two others, withdrew from the organization, and started the Anglo-Ottoman Society, but of the thirty-eight members of the Ottoman Committee on the list supplied to us by Mr. Field, twenty-five still remain as members of the original body in its reconstituted form, although some of them—I do not know how many—have joined Mr. Field's society in addition.

The difference between the two societies, as I understand it, is simply that, whereas we aim at forming an organisation of people who have special knowledge of Turkey, or who are connected by trade, or in other ways, with matters Turkish, the Anglo-Ottoman Society endeavours to create a popular movement and welcomes anybody as members. The Ottoman Association is restricted to British subjects of European descent, as we believe that we can, by forming a more select and influential body, command more respect in quarters where British policy regarding Turkey is largely decided. For good or for evil, we fear the man-in-the-street does not decide these matters at the present day.

In conclusion, please permit me to point out that in the letter signed by "A Member of the Ottoman Association," to which he refers, there is no statement to the effect that the association kept silence on the subject of the Balkan atrocities. As a fact, we existed under the name of the Ottoman Committee, and we certainly did not keep silent. Mr. Field also refers to "the awkward question" of whether the members of our association were responsible for publishing the English edition of Pierre Loti's "Turkey in Agony." I see nothing awkward in the question. The book was published by the Ottoman Committee, at the expense of Captain Dixon-Johnson, the translation being undertaken gratuitously by Mr. George Raffalovich. It is now being reissued with the imprint of the Ottoman Association. Captain Dixon-Johnson and Mr. Raffalovich are both members of our executive, and not of Mr. Field's society.—Yours faithfully,

WILLIAM H. SEED,
Secretary Ottoman Association.

44, Dover Street, London, W.,
May 26, 1914.

THE THRACIAN PERSECUTIONS.

To the Editor of THE NEAR EAST.

SIR,—In replying to my letter, your correspondent Mr. Arthur Field is good enough to support my remarks that the pro-Turk Party did bring forth the outrages they alleged had been perpetrated by various Christian races. Indeed, in view of the Press evidence that exists, it was ridiculous for your other correspondent, "A Member of the Ottoman Association," to assert that the pro-Turk Party kept silent about the atrocities they alleged.

Mr. Arthur Field states that the pro-Turk Party *very properly* brought forth the outrages. He appears to regret that the public have got heartily sick and tired both of the atrocities and atrocity-mongerers, and he quotes poetry which implies his desire that the rancour and venom created by the pro-Turk Party may cause yet more ill-feeling than it has already produced.

Your correspondent must realise that no possible good can come by expressing such sentiments, and I can hardly believe that English people, except, perhaps, a few fanatics, endorse your correspondent's views. Were it not for the fact that your valuable paper is widely read in the countries concerned, and that your correspondent's letter might create an erroneous impression of Englishmen's views in these countries, I could safely leave the puerile sentiments expressed by your correspondent to be appraised at their proper value by your English readers.

With all diffidence, I suggest to your correspondent that if he will study the past history of the Balkans and gain information in this way (and it is only by studying the past that we may hope to anticipate the future) he will be in a far better position to aid his cause than by quoting superficial observers and trying to influence the public with fictions and sentimentality of a very sordid type.

Your correspondent refers to the Balkans as "that interesting and original holiday corner of Europe." If he takes such a flippant view of the matter this, perhaps, accounts for (though it by no means excuses) the light-hearted manner in which he deals with the political situation and matters pertaining thereto. I hold the view that the Balkan Peninsula and what takes place there is of the utmost importance to our Empire.

I should advise your correspondent to read the excellent series of articles on the political situation in the Balkans which were published in *The Review of Reviews* in the autumn of 1912. These may impress on him the need for England to act in a firm and level-headed manner as regards Balkan affairs.

I do not care to criticise the second-hand statements your correspondent makes as regards what Miss Durham may have proved, and more especially as Miss Durham's philanthropic work in certain parts of the Balkans is well known. But if anybody states—notwithstanding your correspondent—"that there was little to choose among any of the titular Christian races of the Balkans in bestial barbarity and criminal ignorance," all I can say is that whoever uses these words must have a very slight knowledge either of the Balkans or of Balkan history. I should advise your correspondent to spend a little time in living amongst the various peoples of the Balkans—even if it be only during a "holiday"—before he again commits himself to paper on this subject.

With regard to your correspondent's reference to the Bulgarians, I think it best to adopt their own dignified policy of silence and reticence (conspicuous during the last few months) as regards other people's statements concerning them.

Yours, etc.

G. W. C. HOLLIST, M.R.C.S., etc.

Riseley Lodge, Maidenhead,
May 23, 1914.

TANGIER TO TEHERAN.

Events in Albania have been somewhat spectacular of late. There was first the dramatic arrest of the local Warwick and the heroic devotion of his wife. Then he was mysteriously deported, and was shortly followed from the beach of Durazzo by the Mpret and all his family, together with ladies-in-waiting, diplomatists, valets, flunkeys, and electricians. A Royal Family of Naples could not have taken to the boats more expeditiously. Meanwhile Mr. Nogga continued to give advice which was not taken, Dr. Dillon to write telegrams which were not dispatched, and the rebels to insurge without knowing what to do next. Guns were fired by the Royalists, and a Royalist was their first victim—indeed, according to present reports, much damage might have been done in this way had not the gun been captured by the feudal levies. Then everybody went back again, the advice began to be accepted, the telegrams to be dispatched by "indirect route," and the feudalists to insurge to better purpose. It is considered, however, that the Mpret made a "bad break" in leaving his konak, even for warships a bare mile distant; but so far as I can gather there seems to be no reason why his reign should be considered as being at an end. People talk about an international occupation being necessary for the restoration of order in Durazzo, and it is very probable that some such step will have to be taken, although for the moment none of the Powers of the Triple Entente are anxious to undertake the burthen and responsibility of such action.

***

It is, from the Hellenic standpoint, tragic that the Jubilee festivities at Corfu for the annexation of the Ionian Islands to Greece in 1864 should have to coincide with the Parliamentary debates in Athens on the Bill for ceding Sasseno, one of those islands, to Albania. I believe there are in normal times no perennial inhabitants of Sasseno, shepherds visiting the island with their sheep only during certain months. A lighthouse built by the Turks, by permission of the Greek Government, was in working order for some time, but was, I believe, after a while abandoned. This tiny islet, which commands Valona Bay, has within quite recent times had innumerable political vicissitudes. Until 1797 it was Venetian; after that, with the other islands, it passed to France, who lost it in 1799 to the Russians and Turks, but recovered it in 1807. In 1814 Great Britain became its Protector, and in 1864 it was given to Greece, and now it is to be ceded to Albania.

***

Numbers of foreign observers report that the Greeks are having trouble in Macedonia. This is hardly to be wondered at. Macedonia needs very careful administration indeed by highly competent and trained officials, and the number of gentlemen having the necessary qualifications at present at the disposal of the Hellenic authorities is not nearly large enough to cope with the work which is waiting to be done. In these circumstances I suggest that it would be a graceful act if the Cyprus Government were to offer Mr. Venizelos the services of some of its Greek officials—men who have had careful training in the islands administration, and are, moreover, many of them, bilingual and capable of dealing with Turkish peasants from old experience.

***

Progress has seen fit to attire itself in trousers, and its advocates insist that in a progressive state all men should seek to dress themselves in the products of unimaginative Western tailors. The members of the Albanian deputation, which offered Prince William of Wied an uneasy crown, had abandoned their magnificent national dress for the daylight absurdities of the *frac*. The Greeks in their zeal for progress dethroned the only king who wore their costume, and everywhere misguided men have sought to show the superiority of their civilization by putting off the distinctive garments of their race or district in favour of imported slops. In view of this levelling tendency, I note with pleasure that Mr. Nicholas Iorga has organized in Bucharest a festival at which all kinds of Roumanian national dresses were worn. This event took place at Valeni de Munte on Sunday, and, as the holiday garb of the Roumanian peasant is wonderfully rich and variegated, the sight should have been most brilliant and effective.

I see that the Italians, while successfully prohibiting cinematographic representations of the Trojan war in Rhodes, have turned their attention to the antiquities of that island and have found numerous and interesting remains dating from the Hellenic period. Excavations have been in progress in various parts of the island, particularly at Filiorimon, Daphni, and Yalissos, where the tomb of Aristomenes has been discovered by a gang of 200 excavators working under military supervision. I am glad that the Italians should be putting their occupation of Rhodes to good uses. Archæologists at least will be prepared to condone their presence in the Dodekanese for months to come if only they will undertake a series of systematic "digs" and publish proper reports of their labours. An invitation to a member of the British School in Athens to be present during the excavations would be esteemed a delicate attention and would go far to reassure the world at large, and Greece in particular, that gun-pits were not being dug under the cloak of archæological research.

***

In spite of all political considerations and immemorial tradition, those few who backed Durbar II. for this year's Derby are fully persuaded that at last something good has come out of Armenia.

***

I have received from two correspondents in the Balkans two different versions of a rather dramatic little scene which took place either at Baltchik or near that town (according as the one or the other of my informants is right). The chief actors were Mr. Savinsky, the Russian Minister at Sofia, and a Roumanian gendarme. Mr. Savinsky, it would appear, had undertaken a motor tour in the Dobruja with the object (avowed or unavowed) of making inquiries into the ill-treatment of Bulgarians in that district by the Roumanian authorities. One account states that two Roumanian sentries fired at his car as it crossed the frontier at full speed. Mr. Savinsky held out his papers, but, if there is any truth in the story, it looks as if he suspected that he might be held up, and therefore decided to make a dash for it. Near Baltchik, however, he was met by a detachment of soldiers and gendarmes. The car was stopped, and an explanation demanded. Mr. Savinsky made himself known, but as he was entering his car in order to proceed an officious (or vigilant) gendarme attempted to detain him. Thereupon Mr. Savinsky lost his temper and struck the gendarme. My other correspondent does not mention the frontier incident, but he adds other details. He states that the Russian Minister was received at Dobritch by the Roumanian Prefect, with whom he spent some little time, and that afterwards he left for Baltchik without informing the Roumanian authorities. Indeed, it is alleged that he gave it out that he did not intend to go to Baltchik at all, but proposed to visit some Bulgarian villages in the neighbourhood of Dobritch. If these were the circumstances of Mr. Savinsky's departure, the agitation of the Roumanian authorities was not unreasonable. According to this version, Mr. Savinsky was stopped in Baltchik by a solitary gendarme, who received from the Minister's own hand two smart boxes on the ear. My correspondent adds that the infuriated Russian telegraphed to his colleague at Bucharest and to his Government at St. Petersburg. Whether anything more will be heard of the incident, I do not know. Mr. Savinsky seems to have acted in a high-handed and perhaps "Consular" fashion, but it also seems that the Roumanian authorities are sensitive to any criticism of their behaviour in New Roumania, and strongly resent inquiries.

***

The Westminster Gazette had a curious misprint in its announcement of the publication of the book on Armenia by Mr. Noel Buxton and the Rev. Harold Buxton. The title of the book appears as "Travel and Politics in America." But the confusion is worse confounded by the statement which follows. After mentioning that the introduction is by Lord Bryce, the writer of the note adds: "The subject of this work will naturally make a strong appeal to Lord Bryce, who has himself, in one of his earlier books, dealt with the same district." The slip is all the more amusing because Lord Bryce is the author of a learned and authoritative work on "The American Commonwealth." The hasty reader might assume that a deliberate insult is intended to the American continent. And this is the year of the Anglo-American Peace Centenary!

June.				
1	19	Monday	7	7
2	20	Tuesday	8	8
3	21	Wednesday	9	9
4	22	Thursday	10	10

Wednesday will be the birthday of His Majesty the King.

To-morrow will be the birthday of Princess Theodora, the second daughter of Prince Andrew of Greece.

Monday, 7 Rejab, is the anniversary of the wedding of the Princess Nemika Sultana, daughter of H.I.H. Mehmed Selim Effendi, the eldest son of the ex-Sultan, to Damad Kenan Bey.

The Archduke Franz Ferdinand is expected to attend the Austro-Hungarian Army manœuvres, which are to be held in Bosnia from June 24 to 27.

Queen Alexandra has given her patronage to a matinée which is to take place on July 2 at the Queen's Theatre in aid of the fund under the immediate patronage of Princess Alice of Greece for assisting the Greek refugees.

According to our Athens correspondent, the King of the Hellenes will visit Corfu in order to attend the jubilee celebrations of the annexation of the Ionian Islands to Greece. The festivities will begin on June 3 (May 21 O.S.), that being His Majesty's name-day.

The St. Petersburg correspondent of *The Times* reported, under date May 24, that the meeting between H.I.M. the Tsar and H.M. King Carol of Roumania would take place within a fortnight from that date.

Princess Elizabeth of Roumania, attended by her governess, Miss Milne, left Bucharest (writes our correspondent) for Paris on Sunday, May 17, by the Orient Express. After a fortnight's stay in Paris, as the guest of her aunt, the Grand Duchess Cyril, the Princess will go to Madrid on a two months' visit to the Infanta Beatrice d'Orleans; and about the middle of August she will join her parents at Coburg.

An Imperial Dynastic Council was held at the Dolma Bagche Palace last Saturday, over which H.I.H. the Heir Apparent, Prince Yussuf Izz-ed-Din Effendi, presided. Their Highnesses the Grand Vizier and the Sheikh-ul-Islam were present, as was also Damad Enver Pasha, Minister of War.

Our Bucharest correspondent informs us that Count Frederick of Waldeck and Pyrmont will go to Bucharest in order to visit King Carol very shortly.

Our Bucharest correspondent reports that H.E. the Marquis Pallavicini, the Austro-Hungarian Ambassador at the Sublime Porte, was received in audience by His Majesty the King of Roumania when in Bucharest en route for Vienna.

H.E. the Hellenic Minister and Mme. Gennadius were present at the dance given by Lady Waldstein at Claridge's Hotel on Tuesday night for her two daughters, the Misses Seligmann.

The following were amongst the members of the Diplomatic Corps in attendance at His Majesty's Levée, held on Monday, at St. James's Palace:—H.H. the Turkish Ambassador and Mehmed Ali Schevky Bey, the Hellenic Minister, and Mr. Rizo-Rhangabé, the Persian Minister, the Bulgarian Minister and Mr. N. G. Yankoloff, the Roumanian Minister and Mr. M. B. Boerescu, the Servian Minister and Mr. W. M. Petrovitch.

The Turkish Ambassador and the Hellenic Minister were present at the Duke of Devonshire's Derby Day ball at Devonshire House on Wednesday night.

H. E. Alfred Rustem Bey Bilinski, Ottoman Ambassador to Washington, became a Moslem before leaving Constantinople for his appointment, and has assumed the name Ahmed in lieu of Alfred.

The Roumanian Minister and Mme. Mishu were among the guests of Mr. Pretyman Newman, M.P., and Mrs. Pretyman Newman at a dinner given on Sunday night at 79, Eaton Square.

The Roumanian Minister and Mme. Mishu on Saturday entertained at luncheon at the Legation in Cromwell Place the principal members of the colony in celebration of the Roumanian Festival—a national holiday in Bucharest. A congratulatory message was sent to the King of Roumania from the colony through the Minister.

The daughters of the French and German Ambassadors at Constantinople have each received the second class of the Order of the Shefakat in recognition of their services to the Red Crescent Society.

Dr. von Miguel, the German Diplomatic Agent in Cairo, has left Alexandria for Germany.

Ibrahim Bey, formerly attached to the Ottoman Legation in Bucharest, has been appointed Secretary of Legation in Belgrade.

Suleiman Kemal-ed-Din Bey, formerly archivist in the Ottoman Embassy in Vienna, has been promoted Second Secretary in the Berlin Embassy.

Hakki Bey, of the department of political affairs in Constantinople, has been appointed Second Secretary in the Ottoman Embassy in Teheran.

Our Athens correspondent announces that Mr. D. Kaklamanos, formerly Secretary of Legation in Paris and Chargé d'Affaires in Rome, has been appointed Director of Political Affairs at the Greek Foreign Office, with the rank of Minister in the Diplomatic Service.

Serkis Bey, of the Turkish Embassy, has left London for Paris on leave.

Mr. N. Rossos having resigned his post as Vice-Consul for Austria-Hungary in Cyprus, Mr. Rudolph Troester, late of the Imperial Ottoman Bank, Larnaca, has been provisionally appointed in his place, and has taken over the duties of that office. The selection of Mr. Troester, whose provisional appointment it is hoped will be confirmed, has given much pleasure to his numerous friends in Cyprus.

Senator his Highness Musa Kiazim Effendi, formerly Sheikh-ul-Islam, has been elected chairman of the Unionist Party in the Turkish Senate.

The appointment of Daniel Reshad Bey as First Secretary to the Ottoman Embassy in Washington is announced from Constantinople.

Ahmed Shafik Pasha, director of the private Khedivial Wakfs, has been appointed a member of the governing body of El Azhar University in Cairo.

Ahmed Zekki Pasha has been appointed Secretary to the Egyptian Cabinet, in succession to Ismail Sidky Pasha, now Minister of Agriculture.

A *Berat* has been issued for the election of Mgr. Joachim as Orthodox Metropolitan of Metrai (Chataldja).

The Sultan has conferred on the German Admiral Suchon the Grand Cordon of the Medjidieh, and on the Commander of the "Goeben" the decoration of Grand Officer of the Medjidieh.

Talaat Bey, Turkish Minister of the Interior, left Constantinople on Saturday for Bucharest to return the recent visits of M. Take Jonescu and General Coanda.

Mr. Hallett Johnson, who has been appointed secretary to the United States Embassy in Constantinople, will spend the Whitsuntide holidays with Princess Hatzfeldt at Draycot Manor, Chippenham.

Among the passengers by the Messagerie s.s. "Lotus," which arrived at Marseilles on the 20th inst., were the following:—Count La Combe, retiring French Vice-Consul at Larnaca, Mr. C. Harrison, Major Dove, and Mr. G. Hardy.

Sir William and Lady Ramsay arrived in Constantinople from England ten days ago, and will continue excavations at Yalovatch (Antioch in Pisidia).

Mr. E. J. L. Berkeley, C.B., H.B.M., Consul-General in Tunis, celebrates his birthday on Sunday.

WHERE TO STAY.

LAUSANNE-OUCHY (Switzerland).

Admiral Limpus, in charge of the British Naval Mission in Turkey, is now in London. Reouf Bey, formerly in command of the "Hamidieh," has gone to Newcastle to inspect the "Sultan Osman."

Sir Edgar and Lady Helen Vincent have arrived at Esher Place, where they entertained a house party for last week-end.

Lord and Lady Lamington and Lord and Lady Oranmore and Browne were among the guests at a dance given by the Marchioness of Bute on Tuesday night at St. John's Lodge, Regent's Park, for Miss Cecilia Crichton-Stuart and Miss Peggy Hastings.

The annual meeting of the Persia Society was held last week on Wednesday, Lord Lamington presiding. The reports, showing an increased membership, satisfactory finances, and a record of activity, were presented. A lecture was delivered by Professor E. G. Browne on "The Influence of Persia on Religious Thought."

The Bishop in Jerusalem has for the present combined the Archdeaconry of Syria, recently vacated by Archdeacon Dowling, D.D., with the Archdeaconry of Cyprus, for so long held by Archdeacon Beresford Potter.

Vice-Admiral Sir Douglas A. Gamble, K.C.V.O., has been appointed to succeed Vice-Admiral Sir Charles J. Briggs, K.C.B., as Vice-Admiral Commanding the Fourth Battle Squadron, the appointment to date July 1.

Our Athens correspondent announces that Mr. Zographos, the former President of the Autonomous Government in Epirus, is to be accorded Ministerial support at the forthcoming by-election in Athens, out of which at one time the Opposition had hoped to make political capital.

According to a Reuter's telegram from Khartoum, the Sirdar, Sir Reginald Wingate, left Khartoum for Cairo on Monday.

Sir Gerard and Lady Lowther were among the guests of Viscount and Viscountess Allendale at a dinner given at their residence, 144, Piccadilly, on Monday night.

M. André Mazon, secretary of the School of Living Oriental Languages in Paris, has been appointed by the French Ministry of Public Instruction to undertake a philological mission in Bulgaria.

Sir Mortimer Durand presided at the dinner of the Central Asian Society, held at the Savoy Hotel on Wednesday night. Amongst those present were Viscount Bryce, the Earl of Ronaldshay, Lord Lamington, Sir Francis Younghusband, Sir Valentine Chirol, Sir West Ridgeway, Sir E. Barrow, Sir T. Holdich, and Sir Evan James.

General Tanaka (in command) and a Japanese Military Mission (consisting of Colonel Senjur Hayashi, Lieut.-Colonel Hanza Kanaya, Lieutenant the Marquis Maeda, and Captain Shiraně, of the Imperial Japanese Navy) have arrived in Sofia, where they were welcomed by Colonel Jostoff, Chief of Staff in the Thracian campaign and Military Adviser to the Bulgarian delegates during the negotiations for the Treaty of London.

Colonel Yate, M.P., and Mrs. Yate are spending the Whitsun recess in Norway.

Our Port Said Correspondent reports that Dr. MacCarthy Morrough, Director of the Port Said Sanitary Office for some years past, has been transferred to Cairo, where he has received the appointment of President of the Central Medical Commission. His successor is Dr. Herron, who, on taking up his new duties, vacates the post of Director of the Sanitary Office at Mansourah.

The Director-General of the Ottoman Regie, Izzet Melyh Bey, has left Constantinople for European leave.

The Cairo correspondent of *The Times* announced, under date May 20, that Sir Gaston Maspero, Director-General of the Egyptian Department of Antiquities since 1899, will retire, owing to ill-health, on his return from leave in October. He will be succeeded by M. Lacau, Director of the French Institute of Archæology in Cairo, who was for many years Sir Gaston's assistant.

A marriage has been arranged, and will take place in London on June 8, between Herbert St. George Peacock, Judge of Sudan Courts, son of the late Right Hon. Sir Barnes Peacock and Lady Peacock, of 3, Buckingham Gate, and Marguerite Olive, daughter of Mr. and Mrs. Cecil Palmer, of 40, Hauteville, Guernsey.

The death is announced at Colchester of Lieutenant-Colonel T. S. Holroyd. He served in the Crimea, and received the Crimean medal and clasp for Sevastopol and the Turkish medal.

The death occurred at Khartoum on Sunday morning of Captain A. D. Law, of the Hampshire Regiment, who was attached to the Egyptian Army Stores Department. Born in 1877, he served in the ranks for upwards of four years. He saw much of the fighting in the South African War, 1899-1902, when he received the Queen's medal and four clasps. He had been employed with the Egyptian Army since 1906.

Mr. E. R. Ayrton, the Archæological Commissioner for Ceylon, whose death from drowning was recently announced from Ceylon, was a valued officer of the Egypt Exploration Fund before he went to Ceylon. He worked first with Professor Petrie at Abydos, then with M. Naville and Mr. H. R. Hall at Dêr-el-Bahri, and then with Mr. Thomas Davis at the Tombs of the Kings. He afterwards resumed explorations at Abydos and elsewhere for the Egyptian Exploration Fund, by the members of which his work was held in great respect.

Vice-Admiral Frederick St. George Rich, of Woodlands, Chiddingfold, Surrey, who died suddenly at his residence on Friday last at the age of 61, served at Suakin in 1884, when he received the Egyptian medal and bronze star.

Sir Francis Laking, Physician-in-Ordinary to the King, who died last week on Thursday night, received from ex-Sultan Abdul Hamid II. the decoration of the First Class Order of Merit of the Turkish Empire.

It is asserted in the Italian Press that Essad Pasha Toptan, formerly Minister of War in Albania, will shortly leave Naples for Constantinople.

The personal estate of the late Lord Strathcona amounts to £4,651,402, of which £4,232,849 is abroad and £418,553 in the United Kingdom. The duty paid totals £837,838.

It is intended next year to raise the value of the Alexandria Grand Prize to £1,000. It will be remembered that this year the Grand Prize, valued at £500, the chief race in April, was won by Hillal, ridden by Major Tudor, R.H.A.

Colonel R. U. H. Buckland, from chief engineer in Egypt, has been transferred to the similar post in the London district.

DOMESTIC ANNOUNCEMENTS

BIRTHS.

BOLLAND.—On the 19th inst., at The Hermitage, Holmes Chapel, the wife of Godfrey Bolland, Maadi, Cairo, of a son.

BARTON.—On May 25, at Broome Lodge, Bungay, the wife of Claud Barton, Egyptian Civil Service—a daughter.

DEATH.

MORGAN.—On Monday, May 11, at Port Sudan, as the result of a gun accident, Harington Morgan, Judge of Civil Courts, Anglo-Egyptian Sudan, fifth son of the late Sir Walter Morgan. R.I.P.

FRIDAY, MAY 29, 1914.

A NEW POLICY IN PERSIA.

On the last day of August, 1907, the Governments of Great Britain and Russia signed a Convention "having mutually engaged to respect the integrity and independence of Persia, and sincerely desiring the preservation of order throughout that country and its peaceful development." In order to give effect to these engagements, it was agreed that Great Britain should not seek for herself nor support in favour of British subjects any concessions of a political or commercial nature, in a region comprising about three-eighths of Persia. Russia on her part is under similar obligations in respect of a region occupying about three-sixteenths of the total territory of Persia, in the south-eastern corner. In regard to the middle or neutral region, each Power undertook not to oppose, without previous arrangement with the other, the grant of any concessions to the subjects of the other Power. Seven years have now passed since this Convention was signed, and the moment is opportune to take stock of the situation in Persia, as it has been evolved under the working of the Anglo-Russian Agreement. The order which the two Governments were sincerely desirous of preserving was very quickly disturbed by a protracted struggle between Persian Constitutionalists and Monarchists. To this turmoil ensued anarchy throughout the country. In the northern zone, where by the terms of the Convention the British Government allows Russia a free hand, order has been restored by a Russian military occupation. Russia's interests, actual or potential, are a factor that cannot be ignored in North Persia. She is at all times ready to spend large sums of money in that region, and she has seen to it that those interests shall not be jeopardised by the indefinite continuation of a state of disorder. In the two zones lying to the south of the Russian zone a very different condition of affairs prevails. Owing to inherent weakness and lack of means the Persian Government has been unable of its own accord to restore order. In its own zone the relative unimportance of commercial interests has freed the British Government from over anxiety regarding the state of the country, but in the neutral region where Great Britain's interests, though paramount, are only partially recognized by the Anglo-Russian Convention, these interests have had to bear the full effect of the general lawlessness. The only attempt made to cope with the situation has been the formation of a gendarmerie under Swedish officers, and supported by British monetary advances. In spite of the gallant efforts of the Swedes the attempt has so far failed, and an impartial review of the whole position holds out no hope that under existing conditions the gendarmerie will at any time in the near future be equal to their task.

It is inconceivable that the present state of disorder should be allowed to continue indefinitely. If British interests are to be maintained in the south of Persia, it becomes necessary that Great Britain should herself lend a more effective hand in counteracting the inertia of the Persian Government. Hitherto her punctilious interpretation of the spirit of the Convention has interposed an obstacle. The position of Great Britain in the neutral region received wholly inadequate recognition in the terms of that Agreement. British interests in the south-eastern corner of Persia are for the most part geographical and dormant. The region where those interests correspond with Russia's interests in the north —allowance being made for difference in the respective policies of the two countries—is in the neutral zone. The first object, therefore, of British statesmanship in Persia must be to secure a reconsideration of the Agreement with Russia. Occasion offers in the revival of the scheme for a Trans-Persian railway. As an indispensable preliminary to negotiations on this subject Great Britain should be given as free a hand in the south and east of Persia as Russia has in the north or rest of the country. With the lapse of time the proposal for a trunk line across Persia has been shorn of much of the glaring inappropriateness of a mere linking up of Russian and Indian railway systems. Bunder Abbas is now likely to be considered as the most suitable destination of the line, having regard to the exigencies of Persian trade and the strategic requirements of the railway, if at any future date it should be extended in the direction of India. Opposition to the Trans-Persian railway scheme in its original form did not imply hostility to railway construction in Persia, and we have never wished to see the country starved in respect of communications. Moreover, it is clear that railway development can best be brought about by co-operation between Russia and Great Britain. But this co-operation must rest on the principle that in regard to railway construction there can be no "neutral zone" as far as British interests are concerned. In other words, just as all lines in the northern region will be built and controlled by Russia, so all lines in the remainder of Persia—the present "neutral" region and the British region combined—must be built and controlled under the auspices of Great Britain. In this way only can the legitimate interests of all three countries be safeguarded, for there are three countries to be considered, although the working of the Anglo-Russian Convention of 1907 has tended to obscure this fact.

A very strong case for the revision of the Anglo-Russian Convention is provided by the decision of the British Government to purchase a large interest in the Anglo-Persian Oil Company. But quite apart from this and other considerations a revision might be welcomed, if only for the opportunity given to Russia and Great Britain to take Persia into their confidence. Such a course will at least encourage the Persians to do their best, instead of seeming to predicate for them failure before a start has been made, and Great Britain would do well to insist upon it. Russia in the north with her military occupation may be indifferent to Persia's views or Persian susceptibilities. Great Britain in the south has never adopted the Russian attitude. She refrained from a military occupation, and the few troops despatched from India for guard duty have been almost entirely withdrawn. Any further military expedition is viewed with disfavour, and we do not urge it at this stage, although we realize what it might have achieved at one time in the south, if other considerations had not weighed against it. But Great Britain's responsibility for the rehabilitation of Southern Persia is no less pressing on account of her reluctance to use troops for the purpose. Railway construction will, in the natural order of events, make for the pacification and development of the country, but before this influence can be exercised it is essential that peace and order should be restored. To this end the gendarmerie must be used and must be largely strengthened. The anomaly of committing to Swedes the defence of British interests in Persia, for which British money has to be advanced, should be removed, and the place of the Swedish officers should be taken by British officers with Indian experience. In addition to the gendarmerie there could be a small but efficient striking force also recruited in Persia and under British officers. Its task would be by decisive action to restore the order which the activities of the gendarmerie would subsequently maintain. The two forces would have their counterparts in the northern zone, and as their efforts came to be crowned with success they would supply conclusive evidence of the superfluous character of a Russian military occupation, over and above a gendarmerie under Russian officers and a Cossack brigade. The policy which we have outlined is probably open to less objections than any other, while offering at the same time an opportunity of promoting the real interests of Persia, and enabling Great Britain to occupy towards Southern Persia a position corresponding to the great interests which she has at stake.

GREAT BRITAIN AND PERSIA.

THE NEW OIL CONTRACT.

The decision of the British Government to embark once more upon a commercial venture having for its object the preparation and supply of oil-fuel for the Navy is remarkable in many ways, not the least satisfactory of which is the blow which has been given to the grossly inflated monopoly prices of oil. We understand that oil-fuel which ten days ago would have been charged to the taxpayer at £3 15s. per ton is now being offered to the Admiralty at £2, and if this latter figure represents a fair commercial profit, the saving to the revenue should be still greater when his Majesty's Government becomes a producer as well as a consumer. It is indeed something for which to be thankful that the Treasury is now free to buy oil-fuel in an open market, and is no longer in peril of having to pay monopoly prices to semi-British or wholly alien concerns for that vast supply of oil which will be required for naval purposes in the near future—a supply the magnitude of which can be calculated on the rough-and-ready estimate that a warship will have to burn one pound of oil per hour for for every unit of her horse-power. There are other points upon which the new agreement calls for comment.

The First Lord of the Admiralty has acted obviously in the best interests of the Navy and of economy in the estimates, but it is to the Foreign Office that will fall the task of readjusting the political balance in Persia, which cannot but be profoundly affected by so pronounced an increase of British interests—and official interests at that—in an area outside the sphere delimited at the time of the Anglo-Russian Agreement. That the Persian Government will stand to gain is obvious in view of the terms of the original concession, and doubtless its benevolent attitude in the matter is assured, but it is not from the Ministers of Sultan Ahmed Shah that the Foreign Office will have to expect objections and difficulties. The presence of official British interests from Arabistan to Baluchistan will make it increasingly imperative that order be restored and kept in the south, such order, indeed, as the Russians maintain in Azerbaijan and the north—and it is for that pacification in all its multitudinous aspects, internal, military, and international, that the Foreign Office will have to arrange—no light task to be sprung upon a Government department at a moment's notice.

Typical Section of the Anglo-Persian Company's Pipeline.

The advent of so powerful a financial combination as the reconstituted Anglo-Persian Oil Company will be upon the scenes in Arabistan must materially affect the economic future not only of that area, but of the whole of that part of Asia. Arabistan is already crossed by a pipeline, which may now have to be doubled in order to cope not only with the existing supply, but also with the potential demand; it is shortly to be traversed by the Khorremabad Railway. The long-disputed frontier between the dominions of the Shah and the Padishah has at length been settled and actually delimited. Consequently, there is no political reason, other than the local unrest, why Mohammerah should not become the capital of a properly organised and peaceful province with modern communications, which will themselves vastly increase the facilities for maintaining order. We may even look forward to the possibility of reclamation works being initiated in those considerable areas which lie between the Karun and the newly delimited frontier, a possibility which is not outside the calculations of those who are planning a new service of steamers to tap the future productiveness of the Arabian Irak and its eastern borderlands.

Apart from the commercial and Continental aspects of the new Agreement and its consequences, the action of the Admiralty more than ever emphasises the position of Great Britain in the Persian Gulf. For a century and more we have policed those waters, and have successfully headed off all manner of foreign land-hunting ventures. Our vastly enhanced interests at the head of the Gulf, coupled with our long and honourable record of disinterested public service on and near the Gulf, give us every right to maintain that in the future, as in the past, no foreign Power is to acquire territory or exclusive privileges of any kind, political or commercial, on the Bahr el Fars, its coasts, its affluents, or its neighbouring waters. Up to the present our attitude towards all the countries south of Iran has been inspired by a spirit of negative sovereignty—we have maintained an immemorial *status quo*, and have faced the scarcely veiled territorial aspirations of European and Ottoman alike with the veto: "Ye shall not conquer," while conjugating that verb "We shall not conquer" so far as our own interests were concerned. Nor can we see that any new factors have appeared during the last few days of such a nature as to cause the Foreign Office or the Delhi Government to depart from the policy which has been sanctioned by a century of custom.

Our illustrations are from photographs kindly lent by the Anglo-Persian Oil Company, Limited, to which we are also indebted for much of the information in the article describing the field.

The map showing the position of the oil wells with regard to the territorial arrangements made by the Anglo-Russian Convention, is reproduced by courtesy of *The Times*.

DESCRIPTION OF THE OILFIELDS.

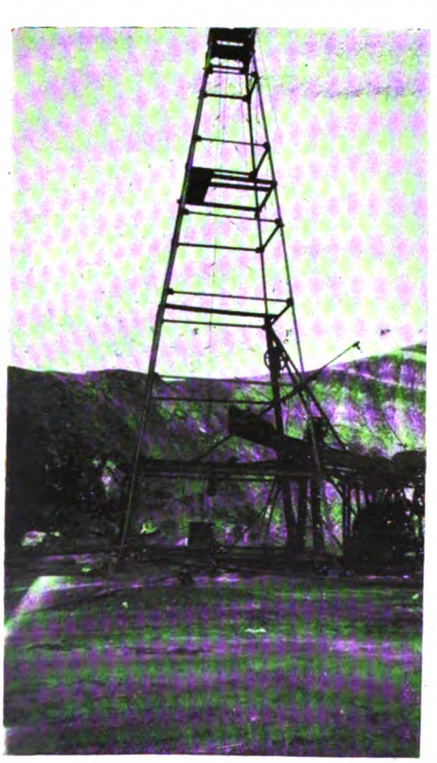
The Anglo-Persian Oil Company, Ltd., was formed in 1909 to work a concession, obtained from the Persian Government in 1901 by Mr. W. K. D'Arcy, granting an exclusive right to exploit petroliferous areas and to sell petroleum throughout the Persian Empire, with the exception of five provinces in the north. The company is essentially a British organisation, created by British energy and enterprise, controlled and managed by men of British nationality. The first chairman of the company was Lord Strathcona, who retained that position until his death. It may be said truly that his interests ranged from the Pacific Ocean to the Persian Gulf, and from Canadian railways to the oilfields of the Middle East.

Offices of the Company at Mohammerah.

All the directors are British, and the Burmah Oil Company, a British company, holds practically all the ordinary shares. In return for the privileges granted to the company, the Persian Government receives 16 per cent. of the net profits of working. The local tribes also hold shares in the producing companies. It is a tribute to the tact and good sense of those responsible for making the necessary arrangements with these tribes and their chiefs that the relations of the company with them have always been remarkably friendly.

Extent and Nature of Concession.

The company's concession covers some 500,000 square miles of Persian territory. As yet only a very small portion of this vast area has been geologically examined, but there are some thirty to forty known oilfields in it, from some of which oil and bitumen have been obtained from Biblical times. This country was, moreover, the original home of the Zoroastrians, and fire worship (with locally produced naphtha) is even now secretly carried on by some of the tribes—*e.g.*, in remote Kurdistan, near the company's Kasr-i-Shirim field. The line of the oil-bearing zone runs from Kasr-i-Shirim, in the north, parallel to the Persian Gulf, down to the Baluchistan frontier, and it is probably connected on the one hand with the extensive Mesopotamian field and the famous Baku field on the Caspian in the north, and on the other with the Burmah fields in the south.



Well Derrick on the Maidan-i-Naphtun Field.

The Maidan-i-Naphtun Field.

At present the bulk of the production is derived from the Maidan-i-Naphtun area. Maidan-i-Naphtun (the Valley or Plain of Naphtha) is situated about 150 miles north-north-east from the company's refinery at Abadan, and is connected with it by a pipe line. On this field some thirty to forty wells have been drilled, but only a few have been carried down to the petroliferous strata, and the production from them is more than sufficient for the present pipe line. All the wells are "flowing" wells, and some of them have been flowing for upwards of six years. The big well on this field, which recently drilled itself through (see THE NEAR EAST of May 1) has alone a capacity of about 1,500 tons a day, even when throttled down as much as possible, and there are many other wells, not yet drilled through to the oil horizon, which probably could be made to give an equally large output. The proved area in this field and the adjoining one of Maidan-i-Naphtek is about six square miles, on which it will be practicable to drill from 400 to 500 wells. Therefore, from these two fields alone enormous supplies of oil are likely to be obtained. The big well referred to above was opened about two and a-half years ago, but was not fully "drilled in," as the production from the few wells in which the oil sand has accidentally been pierced has always been more than ample. Recently, however, it drilled itself in, and its production exceeded 2,000 tons a day. Only with the greatest difficulty has this output been reduced to 1,500 tons a day.

The oil flows from the wells to large storage tanks on the field, from which it is pumped into the pipe line. The pumping station is situated at Tembi, about four miles from the field. The pipe line is six inches in diameter as far as Wais (fifty miles from the field), and from there on eight inches. The capacity of the line is about 350,000 tons per annum.

Transport of Material.

It will be understood that in a country like Persia, possessing practically no transport facilities beyond the few rivers, the conveyance of heavy machinery and material a long distance from the coast is a very difficult undertaking. The large amount of heavy machinery and material needed for the well-sinking operations had to be transported from the coast to the field, a distance of 150 miles inland—a labour which afforded opportunities for the greatest engineering skill and resource. Naturally, as much use as possible was made of the Karun River and of Messrs. Lynch's steamer service, which, however, had to be supplemented by the company's own service of tugs and barges. At Wais transhipment was necessary from the Lower to the Upper River, and a light railway was constructed for the purpose. The material for the fields was landed at the company's depôt at Dar-i-Khazineh, and from there was carried by mule transport to its destination. This final stage of the journey is over very hilly country, and although the distance as the crow flies is about twenty miles, the road is thirty-two miles, and even then the gradients are very severe. Furthermore, at certain seasons of the year transport on the backs of mules is the only practicable method. But, in spite of all these difficulties, the pipe line was successfully completed before the refinery.

Mr. C. Greenway's Lur Guard at Kasr-i-Shirin.

Refinery at Abadan.

On the island of Abadan the company has built a large and up-to-date refinery, designed to manufacture petrol, benzine, kerosene, and fuel oil of the best quality. Facilities for loading large tank steamers are provided at Abadan. This refinery is able to deal with about 1,000 tons of crude oil daily. Besides the refinery proper, there is at Abadan a complete installation for the manufacture of tins and cans necessary for packing kerosene and benzine. Special drums are also made for the transport of oil by mules for use in the interior. The plant is electrically driven, and a large power station has been erected for this purpose.

Personnel.

At Mohammerah are the chief offices of the company in Persia, with a British staff. There is also a large refinery staff of British nationality—chemists, engineers, etc. Of the other employees, the skilled workmen are British Indians and the unskilled labourers are Persians.

Digitized by Google

A "Jim" loaded with pipes. Derrick in distance.

Kasr-i-Shirin Field.

There is also a proved field at Kasr-i-Shirin, where drilling operations were first conducted, the first well being sunk in 1902-3. Some five wells in all have been drilled here, and all have remained producers from the time of drilling to present date without any attention. But when the Maidan-i-Napthun field was proved, it was adopted as the company's source of supply because it was so much nearer the coast. The entire production at Kasr-i-Shirin is disposed of locally. There is also a small refinery attached to this field for local requirements, the bulk of the oil manufactured here being sold in Turkey. The Turco-Persian Frontier Delimitation Commission is understood to have awarded Kasr-i-Shirin to Turkey, but the rights of the company have been specifically safeguarded.

Proposed Extensions.

Wells are now being sunk at Ahwaz and White Oil Springs, near Wais and Maidan-i-Naphtek, and if oil is found there the production could be evidently increased with the present pipe line. The potentialities of the present field, however, are much in excess of the capacity of the existing pipe, and the company therefore have been making arrangements for the construction of a second pipe line which will increase the capacity of production by about 1,000,000 tons a year.

[*By courtesy of "The Times."*

Position of the Oil Concess on in respect to the British and Russian Spheres.

Markets.

Storage tanks for fuel oil are being erected at Busreh and Baghdad, and there will be a good demand for fuel oil from the various steamship companies whose steamers ply on the Gulf and the Tigris. Many of these steamers are being adapted to the use of oil fuel. The Baghdad Railway and the projected Mohammerah-Khorremabad and Trans-Persian Railways should also be large consumers. There is also a growing demand for fuel oil and kerosene in Mesopotamia, where oil engines are being very largely used for irrigation purposes.

A large quantity of the company's products is also exported to India and elsewhere.

The Mohammerah-Khorremabad Railway.

The projected railway from Mohammerah to Khorremabad will have the effect of opening up the country, and will doubtless bring the company a large amount of trade from the interior. At present the local markets are confined to the coast and river ports, and very little is taken inland owing to transport difficulties.

From this brief account of the Anglo-Persian Oil Company's activities the reader can judge of the importance of the pioneer work that has been done. But the developments which may be expected owing to the co-operation of the British Government are far-reaching. The oil potentialities of the company's concession are enormous, and the preservation of this source of supply for the needs of the British Fleet will be one of the primary concerns of Imperial policy.

THE AGREEMENT WITH THE GOVERNMENT.

It was announced last Friday that a contract was being arranged between the British Government and the Anglo-Persian Oil Company for the supply of a large quantity of fuel oil for delivery over a term of years. An agreement has been concluded whereby the Government is to subscribe for 2,000,000 Ordinary shares and £200,000 Debentures, as soon as the necessary Parliamentary sanction has been obtained. This additional capital is required for the considerable extensions of the company's existing pipe-lines, refineries, tankers, etc., which will be necessary to enable the company to carry out this large contract.

A meeting of the shareholders is called for to-day for the purpose of authorising the increase of capital, and for making certain alterations in the articles of association.

In the House of Commons on the 22nd inst., on the motion of Mr. Churchill (First Lord of the Admiralty), the following motion was agreed to:—

That this House will on Monday resolve itself into Committee to consider the authorising of the issue out of the Consolidated Fund of such sums not exceeding in the whole £2,200,000, as may be required under any Act of the present Session to provide for the acquisition of capital of the Anglo-Persian Oil Company, Limited.

On Monday, however, discussion of the subject was postponed until June 9—probably because the House was in no mood to discuss any important topic at the time. The motion standing in the name of Mr. Churchill was as follows:—

That it is expedient to authorise the issue, out of the Consolidated Fund, of such sums, not exceeding in the whole two million two hundred thousand pounds, as are required for the acquisition of share or loan capital of the Anglo-Persian Oil Company.

On Monday a Blue-book (Cd. 7,419) was published giving particulars of the agreement between the Government and the company, and the report of the Admiralty Commission, which, under the presidency of Vice-Admiral Sir Edmond J. W. Slade, K.C.I.E., K.C.V.O., investigated the oilfields comprised in the Company's concession.

An explanatory memorandum states:—The agreement

Abadan at an early Stage.

Digitized by Google

provides that His Majesty's Government shall subscribe to the capital of the company as follows:—

	£
Ordinary shares	2,000,000
Preference shares	1,000
Total shares to be held by Government	2,001,000
First debentures ranking *pari passu* with existing debentures	199,000
Total Government subscription	2,200,000

The total share capital (the memorandum proceeds) will be as follows:—

	£
Existing ordinary shares	1,000,000
Existing preference shares	999,000
Share capital held other than by Government	1,999,000
Share capital held by Government	2,001,000
Proposed share capital	4,000,000
Existing debentures	600,000
Debentures held by Government	199,000
Aggregate	4,799,000

The preference shares (6 per cent., participating to the extent of 2 per cent. in dividends after payment of 6 per cent. on ordinary shares) have the same voting power as ordinary shares. The Government will thus hold a majority of 2,000 share votes. An option has been secured to take over existing debentures when redeemable, viz., December 31, 1920. The agreement has been signed and sealed. The necessary Financial Resolution and Money Bill will be presented in order that the Government may be able to authorise immediate steps to be taken by the company to proceed with development.

Provision is made for the appointment of two *ex officio* directors by the Treasury, one of whom will be chosen to represent the Admiralty directly. A power of veto over all acts of the company and its subsidiaries is conferred upon the two *ex officio* directors, with right secured to the other directors to appeal to his Majesty's Government as represented by the Treasury and the Admiralty. The Government has given the company an assurance that this veto will be exercised with due regard to the financial and commercial interests of the company, and only in respect of matters of general policy.

The capital furnished by the Government will be issued in instalments as required, and is intended to provide for such development of resources as may be necessary to secure an abundant quantity of oil for naval purposes over a term of upwards of twenty years. Purchases of oil for the Admiralty will continue to be a charge to naval votes.

The report of Admiral Slade's Commission indicates that the company's concession may be expected to produce abundant supplies of oil over a long period of years. The concession is a very large one, with good indications of oil in many places other than those at present being worked, and existing wells have proved productive and of good durability.

In the public interests, the supply contract will be regarded as confidential. It may be stated, however, that provision is made therein for the supply for a term of years on a favourable scale of price of a reasonable proportion of the total estimated annual requirements of the Admiralty on the present basis of policy of oil consumption

Jetty at Abadan with godowns in distance.

and with due allowance for expansion. The contract is for oil only, and the Admiralty will make its own arrangements for transport. The Admiralty has been taking moderate supplies from Persia for some time past, and is satisfied that the oil will prove to be of good quality for naval purposes. Experiments are being carried out to arrive at the most economical method of extracting oil from shale and coal. It is hoped that when the use of oil in the Service shall be so extended that it will form the major part of the fuel used, the production and commercial utilisation of oil and other products of coal and shale will have reached such a position that the oil fuel so obtained will supplement natural petroleum to a greater extent than is at present the case.

The memorandum observes that the policy of the Admiralty with regard to the provision of oil is to spread its contracts as much as possible over widely separated fields. Thus, in time of war, if some areas should be closed others will remain open. But while it is not desirable to

The Refinery at Abadan.

draw all our supplies from one source, it is essential that the fields over which the Government will have control shall be so developed that in times of emergency they will be able to supply at short notice any deficiencies that may arise through failure of deliveries elsewhere. By taking over such control the Admiralty is only extending the policy which has been adopted with regard to other articles of prime necessity to the State in time of war, and it is only by assuming such control that the State can effectively ensure that supplies shall always be forthcoming in times of emergency, and that the prices in such cases shall not be artificially inflated by interested producers and marketing agencies. It must also be borne in mind that foreign navies are on the road to become large consumers of oil, and that in the course of time they will be entering the market for increased quantities, and competing still more keenly with the Government for prompt supplies.

At the present time the production and distribution of petroleum oil is fairly well distributed among a number of companies. There is, however, an evident tendency for the oilfields of the world and the marketing of their products to fall more and more under the control of a comparatively few large concerns. To a great extent this is probably unavoidable. The policy of amalgamation is founded on considerations of expediency similar to those which induce a large oil consumer to distribute orders as widely as possible, viz., greater security of supply, in order that a possible shortage in one direction may be counterbalanced by abundance elsewhere.

A large consumer like the Admiralty, with the national interest of naval defence in its keeping, cannot, however, place itself in a position of dependence for vital supplies upon a few companies whose interests are necessarily cosmopolitan and financial, although the Admiralty may properly place a reasonable portion of its contracts in the hands of such organisations, admittedly efficient, and possessing great resources. It is important and essential in naval interests to secure that at least one large British oil company shall be maintained, having independent control of considerable supplies of natural petroleum, and bound to the Government by financial and contractual obligations. Such an arrangement can hardly fail to have its effect not merely on the supplies directly so obtained, but on the terms and conditions on which the whole of the Admiralty's requirements will be met, owing to the greater independence and bargaining power thus obtained.

The grounds on which the Government arrived at their decision to enter into the agreement with the Anglo-Persian Oil Company, it is stated, are purely naval, viz., the imperative need of direct control of a reasonable proportion of the supply of oil fuel required for naval purposes. There is ground for confident anticipation that the step which has been taken will be of great benefit to the navy, and that the exercise of foresight in this matter will ultimately prove to have contributed greatly to the security of important naval supplies, and to a very large economy of expenditure in providing for a fuel which will, without doubt, become an absolute necessity in order to secure the full efficiency of his Majesty's naval service.

Digitized by Google

Some "Extracts from Speeches of the First Lord of the Admiralty in Regard to Oil Fuel" follow the memorandum from which the above extracts are taken; then comes the agreement between the Government and the company; finally, we have the report of the Admiralty Commission, already referred to, which was composed as follows:—Rear-Admiral Sir Edmond J. W. Slade (Chairman); Professor John Cadman (Professor of Mining, Birmingham) E. R. Blundstone, Esq. (Geologist); J. C. Clarke, Esq., Admiralty (Secretary); and E. H. Pascoe, Esq., of the Geological Survey of India.

This Commission, which arrived at Mohammerah in October of last year and returned to England in January, reports as to the Anglo-Persian Oil Company's properties:—

We are satisfied that the Company's Concession is a most valuable one, and, providing no unforeseen factor intervenes, the existing field is capable, with proper development, of supplying a large proportion of the requirements of the Admiralty for a considerable period, while the whole Concession, judiciously worked, would probably safeguard the fuel supply of his Majesty's Navy.

After an examination of certain districts in Persia adjacent to the Persian Gulf, we consider that the southern parts of the Concession offer reasonable prospects as petroliferous regions, and that the company should be urged to test these localities without delay. Obvious advantages would accrue from the discovery of a productive field in the south, but we are none the less of opinion that even should these regions prove disappointing, ample supplies would be forthcoming from the northern fields, provided proper steps are taken to prevent their undue depletion.

The company cannot adequately develop this very extensive Concession without additional capital, and we understand that the question of his Majesy's Government affording it financial support is under consideration. Should such a course be decided on, we are of opinion that it should be made a condition that Government should have a voice in the direction of the company's general policy. We would, indeed, strongly recommend that such a measure of control should be obtained as to ensure:

1. The efficient supervision of the expenditure of the new capital.
2. The proper conservation of the oilfields in order that the rate of output may be carefully proportioned to the resources of the fields, so that the delivery of oil under contract to the Admiralty can be adequately safeguarded.
3. General supervision of the future development of the Concession.

NEAR EAST IN PARLIAMENT.

HOUSE OF LORDS.

The Trans-Persian Railway. May 25.

Lord Lamington asked whether negotiations in connection with the Trans-Persian Railway scheme were taking place, and whether papers would be laid showing what were the views of the Government of India in regard to the scheme.

Lord Sydenham said the large oil developments which were taking place in Persia, and the action of the Government in assuming a controlling share in the Anglo-Persian Oil Company, must create something of a new situation, because it involved us in a direct stake in the neutral zone. If any information could be given without prejudicing any negotiations which might be taking place it would be welcomed by all who were following events in Persia with growing anxiety.

The Marquess of Crewe said the question could not be said to have moved very materially since the last discussion on the subject, in July, 1912. The Société d'Etudes had not been able to proceed very far. The leave given by us was not to construct, but only to survey. So far as the other spheres were concerned, outside our own limit, for instance, in the Russian sphere, our leave to construct was not necessary. The picturesque idea of a railway running direct from Russia to India appealed to the imagination of many men in Russia and some in India. That, however, was a question entirely for the British and Indian Governments, who had made it quite clear that, whatever railways were constructed in Persia, any question of the continuation of them to India was absolutely reserved for the decision of the two Governments. Until they agreed the construction could not and would not be allowed. Certain discussions had taken place, but no definite conclusion had yet been reached. From the point of view of Persian development local lines would be more effective than a great through line. He had no doubt that Russia would construct from Teheran southwards a railway with which British lines would ultimately be able to make a connection. At the same time amicable feeling on both sides did not entitle either to neglect the ordinary precautions of national defence. That fact was, he believed, frankly and generously recognised by the Russian statesmen.

In reply to a further question by Lord Lamington respecting Indian military opinion on the proposed railway from Persia to India, the Marquess of Crewe replied that the only kind of line which the Indian military authorities regarded as admissible would be one running along the coast, so that there would be a possibility of using our naval superiority for its defence. It had been suggested that a railway from Persia to India would make an increase of the Indian forces necessary, but in his opinion it was impossible to think of either the Government of India or the Government at home agreeing to the construction of a line which would involve any large increase of the Indian Army.

HOUSE OF COMMONS.

A Consul's Speech. May 21.

Sir J. D. Rees asked the Secretary for Foreign Affairs whether Mr. Eyres was to return to Constantinople in a month, notwithstanding the speech made by him which had given offence to the Turks; whether the Grand Vizier had complained of Mr. Eyres's speech to the Foreign Office; and, seeing that in these circumstances Mr. Eyres could not be a useful and acceptable Consul-General at Constantinople, whether he would now inform the House what action was to be taken in regard to this matter, which touched the discipline of our Consular Service and the feelings of a friendly nation.

Sir E. Grey: It is obvious that the report of the speech in question is a matter that has not been disregarded as appears from the answer given last month. The matter is still under consideration.

Mr. Ponsonby: Is not Consul-General Eyres an exceedingly able and capable official?

Sir E. Grey: Yes, it is quite true that he has had a long period of good service, but the report of the speech in question is a matter that cannot be disregarded in the special circumstances of the case.

Mr. Aubrey Herbert: Was not the speech a purely private one, and not intended to be reported at all?

Sir E. Grey: I believe it was not intended to be reported, but, having been reported, it became public property.

Sir J. D. Rees: If I had known that the speech was not intended to be reported I should not have asked the question again.

Sir E. Grey: That was the case, but the misfortune arises from the fact that his remarks were reported, although they were not intended to be so. Once reported, the speech became public property, and we received representations from the Turkish Government on the subject.

Mr. Aubrey Herbert: Would not an expression of regret on the part of Mr. Eyres go some way towards soothing Turkish feeling?

Sir E. Grey: The hon. member will see from my statement that the matter is still under consideration. I meant to imply that the matter is of some importance and delicacy. The fact that it is still under consideration of course means that a definite solution has not yet been arrived at.

Affairs at Busreh.

Sir J. D. Rees asked the Secretary for Foreign Affairs what protection was afforded to the resident and other Europeans in Busreh, and whether any special precautions were being taken in view of the rebellion at Muskat, the presence of a camp of Arabs near Busreh, and the general condition of unrest in the Tigris district.

Sir E. Grey: I am not aware that there is any need for the special protection of his Majesty's Consul and other Europeans at Busreh. The master of a British steam-lighter was murdered on board his vessel in Busreh Harbour on February 8, and strong representations have been made to the Ottoman Government by his Majesty's Ambassador to spare no efforts to bring the guilty parties to justice. Those efforts have not so far been successful. I have received no information as to a state of general unrest in the Tigris region or as to affairs at Busreh being affected by events at Muskat.

Treatment of Moslems.

Sir J. D. Rees asked the Foreign Secretary if he had received a representation from the London All-India Moslem League regarding the treatment of Macedonian Moslems at the hands of the Greeks in the Balkans, and asking that steps should be taken to give effect to the Treaty of Berlin in affording Moslems in ceded territories protection and civil and religious freedom, and compensation for being driven from their homes; and, if so, what action would be taken by the Government in the directions so indicated.

Sir E. Grey: Such a representation has reached me, as have also communications in which precisely similar charges are brought by the Greeks against the Turkish authorities in Thrace. His Majesty's Government have brought under the consideration of the Powers the question of a reaffirmation of the civil and religious rights of minorities provided for under the Treaty of Berlin. Complaints of ill-treatment of Greeks by Turks were brought unofficially to the notice of the Turkish Government, and I have already brought the complaints of the ill-treatment of Mussulmans by Greeks in the same way to the notice of the Greek Government.

The Trans-Persian Railway. May 25.

Colonel Yate asked the Secretary for Foreign Affairs whether in the event of Great Britain agreeing to the extension of the proposed Trans-Persian Railway beyond the sphere of Russian interests, the stipulation would be made that all extensions south of the sphere of Russian interests should be constructed on the Indian gauge and not on the Russian gauge, so that British and Indian goods would have the same facilities for entering Persia in the south, without a break of gauge, as Russian goods would have in the north.

Mr. Acland: The question of gauge has been considered by His Majesty's Government, who are fully alive to the desiderata of British commerce. I am unable, however, at this juncture to make a definite statement on the point.

THE PRESS ON THE NEAR EAST.

A Sudanese Story.

Mr. Rudyard Kipling is contributing to *Nash's Magazine* a series of letters on "Egypt of the Egyptians." The first of the series, which appears in the current number, has several delightfully characteristic stories. One is about a Sudanese Sheikh who shot his son for bringing a "devil in a box" (a gramophone to wit) into the village and letting the devil sing against orders to the contrary. So the Sheikh was brought before an English judge, and it was hard work for the latter to make the prisoner understand what all the pother was about. And, therefore:—

They explained to him at last that, under British rule, fathers must hand over devil-dealing children to be shot by the white men (the first step, you see, on the downward path of State-aid), and that he must go to prison for several months for interfering with a Government shoot.

The Character of Essad Pasha.

The Nation for May 23 contains a vigorous article on "The Making of Albania," from which we quote the following onslaught on the exiled Essad Pasha:—

The sinister figure that Essad Toptani is, is not, indeed, a purely Albanian growth. He is the Albanian noble with a nasty Hamidian veneer. Conceive a totally uneducated feudal magnate, bred up in the atmosphere of the blood-feud, armed with the prestige and patriarchial power that belong to the hereditary chief of a big clan, and having for morality the traditions of armed blackmail and predatory warfare. Take him away from all that mitigates these brutalities among simple Albanians—the ideal of honour, the notion of loyalty, and the chivalrous respect for women—and subject him to the semi-Oriental, semi-Levantine influences of Abdul Hamid's court, and you will form some notion of the brutality, the perfidy, and the corruption of this disastrous personage. By turns a Hamidian courtier, a Young Turkish tool, and an Albanian patriot, the capable defender and the treacherous seller of Scutari, a man who had wallowed in murders and debaucheries, and mixed the dream of being Prince of Albania with the sale of Albania's chief town to its ancient enemy, Essad is, with all his primitive vigour and aristocratic birth, an essentially low type.

We hold no brief for Essad, but whatever else he may have on his conscience, he is not a debauchee.

Ruins in Syria.

An article on the "Ruins of Syria and Asia Minor," by Richard Curle, in *The New Age* (May 21), contains the following suggestive sketch of the ruins of Ephesus:—

The forty-five miles through the tilled valleys and fair plains of Anatolia is a three hours' journey by train. When we arrived there we took a carriage and drove to the heap of fallen stones that mark the site of the Temple of Diana of the Ephesians. They lie in a depression of the ground and not one stone remains upon another. In their glistening and fragmentary whiteness they represent the utmost degradation of a ruin. About a mile farther on across the plain are the vast and unbared remnants of the circus, the stadium, the libraries, the courts, the gymnasium of Ephesus. Here, too, are the signs of complete decay. Sacked over and over again these buildings were at last left to the corroding desolation of the wilderness. Thence, once more, came man to wrest a victory from the earth. There is something fascinating about Ephesus. The broken colonnades, the paved walks, the huge inscribed stones, the carvings, the steps and arches, lying there all solitary in the secluded plain impress the imagination. Again, as at Ba'albek, one could imagine that the venerable past had taken a step nearer. Yes, but a silent step. For where are all the voices which "for about the space of two hours cried out,' Great is Diana of the Ephesians'"?

A "Perilous Project."

The Nation (May 23) has the following note on the proposed Trans-Persian Railway:—

The perilous project of a Trans-Persian railway to the Indian frontier is still very much alive, and it seems to have acquired, by lapse of time and public inattention, the support which our Government was at first chary of giving. Sir Edward Grey's answers to Mr. Morrell's questions on Tuesday were far from explicit, but he stated that the Government is prepared to agree to the extension of the projected Northern railway to the South of Persia, and to its construction there by a syndicate which will be, not British, but international. He justified this decision on the ground that our trade would suffer if Russia built railways from the North, while we built none from the South. The real bearing of this argument is, however, to justify the construction of one or more railways from the Gulf ports into the interior. These would certainly benefit our trade, and strategically they would not be dangerous. A Trans-Persian line across the desert to India is a wholly different project, for which Sir Edward Grey's argument gives no justification.

An Aspect of Teheran.

A correspondent of *The Times*, in its issue of May 14, gives a delightful impression of the Persian capital in an article under the heading "A Pilgrimage Through Teheran." We quote the following passage:—

To the casual visitor Teheran is a city of mud walls, untidy streets, and the mouldering remains of a once pretentious magnificence. The beautiful gardens behind those mud walls are never revealed to him, and the picturesque spots are few and far between, only discovered by degrees and after much seeking. But in a side street, in a corner of the bazaars, or in some blind alley hitherto unexplored will suddenly unfold itself a scene straight from the pages of "Hajji Baba," strikingly picturesque, unconsciously humorous, simply and eminently human. All ages are represented in the life of Teheran and all types of civilisation, from the patriarchal and early Biblical to the era of the wheezy motor and of the train which carries the pilgrims to the neighbouring shrine of Shahabdulazim, the engine of which has been known, on encountering a tolerably stiff headwind, to give up the struggle on its way downhill to its destination. But the leisurely and appreciative eye will discover beneath the mud-coloured monotony of the Teheran thoroughfares those fleeting glimpses of real Persia which are being so fast overlaid by the shoddy cosmopolitanism which seems invariably to result from the mingling of the East and the West. Teheran, it has often been said, is not typical of the East, and I am inclined to think that its picturesqueness is due less to the Oriental in its "make-up" than to its haunting spirit of medievalism. And here again the medievalism is cosmopolitan. The troubadours of France are here, in the quiet gardens, playing serenades to the night. The Canterbury pilgrim finds his counterpart in the country *mullah* ambling along on his donkey, his spectacled nose buried deep in the sacred book of the Koran, which he reads aloud in a nasal sing-song. Here also, faithfully portrayed, are the proud *hidalgos* and trusty muleteers of Spain, with their air of preoccupation in the traditions of the past. Hajji Baba is surely no Oriental, but a Gil Blas in Persian garb. A few miles from Teheran, too, may be found Robin Hood and Little John and Dick Turpin, as rascally as any of the highway heroes of medieval legend.

The Nile.

In *The Southampton Times* for May 9 there appears a picturesque article by Sir H. Rider Haggard on the "Romance of the Modern Nile." We quote the following passage:—

The Pharaohs are no more; their court and mighty empire are now confined to a glass case beneath a museum dome. Though their blood and that of their subjects survives, doubtless, in the boys who drive the tourists' donkeys, or in the fellaheen who labour in the fields, the proud race of the ancient Egyptians at whose history the world will never cease to wonder has gone the way of the Romans and the Greeks, of Assyria, Phœnicia, and Carthage, and perhaps of many another nation of which we have now lost count. But the river, the immemorial Nile, that made them great, still flows on as it flowed doubtless hundreds of thousands of years before the god-king Osiris, if such a man there were, drank of its waters. Still at the appointed time it rises and refreshes the land of Egypt, making it, perhaps, in proportion to its size, the most wealthy country in the world. It is a strange thing, indeed a very strange thing, to watch, as this writer has done, an Egyptian farmer labouring at his land, or perhaps with the assistance of a son or servant at the "shadoof," where, by the help of a simple counterbalance of clay, he lifts water in buckets from the river and pours it into his irrigation trench, and then to reflect upon the history of that individual plot, or that individual "shadoof." For whole millenniums, almost, one might say, for tens of thousands of years, this same little field has been the object of the earnest care of generation after generation of husbandmen. Sometimes a Pharaoh owned it, sometimes a temple, sometimes a Mussulman sheik, but more often, probably, a little freeholder and his family, whose patrimony it was.

Sofia.....	May 25 ..	27·10—27·24 leva.
Teheran	May 27 ..	55 krans

Devonshire Square,
London, E.C.

Two important announcements were made last Friday, which were of quite unusual interest to those who follow the development of events in the Near East: one regarding an agreement concluded between the Government and the Anglo-Persian Oil Company, and the other concerning the amalgamation of the P. and O. and British India Companies. Both indicate that Britannia is not quite so somnolent as some of her critics would have us suppose, and that she has no intention of letting the trident slip from her grasp just yet.

***

The first item of news referred to, which was made public on Friday evening, can hardly have come as a great surprise to any regular reader of these notes. The subject is dealt with fully elsewhere, so all I need say about it here is that the arrangement entered into strikes me as one in which both the Government and the company may be congratulated. The former gains a measure of security regarding its supply of oil-fuel, which is certainly a great point scored; it does so by co-operating in a concern which is as purely British as any such concern can well be; and it makes an investment that may safely be described as first-class, from whatever point it is viewed. The company, as the other party to the bargain, besides an increase of capital that will enable it to develop its property to the best advantage, secures a very desirable customer, and at the same time is assured of that official backing the lack of which has so often proved a hopeless bar to success to British enterprise in the Near East. And, incidentally, it is pleasant to believe that the increased activity of the company will certainly benefit Arabistan, by offering settled employment to a larger number of natives and putting a good deal more money into circulation. As the increased purchasing power of the district should also mean a gain to British trade—notably for Manchester—we may all feel uncommonly well pleased by the news. The whole transaction bears the impress of imagination and foresight which is somewhat unusual in our national action, and it has been described by more than one critic as "the biggest thing since the purchase of our Suez Canal shares." May it turn out as successful a deal as that has done for the nation!

Factory at Choubra, Cairo.

In one way the amalgamation of the P. and O. and the British India is almost as good news for this country as the Persian oil deal. A fortnight ago, in commenting upon the statistics of the Suez Canal traffic, I remarked that they were "melancholy reading for any man who is interested in the commercial supremacy of the British flag." The amalgamation, in all probability, will go far to lend these statistics a more edifying appearance in the future. The directors of the two great lines concerned have doubtless been studying the figures for some time past; and I take it the combine is one of the results of these observations. Just as the British companies are prepared to hold their own against all rivals on the Atlantic, so will the P. and O. and the B.I. hold *their* own in Eastern waters. They will no doubt have a stiff fight before them. Has not "the Napoleon of shipping" (an odd title surely for a good German to assume!) set himself to drive the Union Jack off the high seas? But I for one have confidence in our own shipowners' capability to hold their own. And once the British travellers and shippers begin to realise that it is better policy in the long run to support their own flag than that of any other country I fancy that the other parties to the contest that has been begun will begin to regret having embarked upon it. Subsidies (direct and "indirect") can do a good deal, but not all the subsidies that were ever granted or are ever likely to be granted will suffice to sweep the Union Jack—whether in the corner of the Red or the White Ensign—off the seas.

***

The Persian Gulf is very much in the public eye this week—that is, if people have realised that it is the nearest sea to the Anglo-Persian Company's pipe-line through which cheap oil is to pour into British warships. But apart from Admiralty futures there are commercial actualities. A line of motor-ships has now been organised by the Flower Motor Ship Company, which will serve Aden, Muskat, and the Gulf ports, thus bringing a welcome addition to British tonnage in those waters. The tranquillisation of Arabistan, which will have to be effected if millions of official money are to be sunk in it, will greatly improve trade, and I am very glad to see that our flag is in a position to be in at the beginning of any boom which may come along. Indeed, the importance of the Gulf traffic will of necessity be very greatly increased when Busreh and Mohammerah shall both have become railway termini, the Euphrates and Tigris service greatly increased, and the oilfields of South Persia and Mesopotamia properly exploited and their products exported.

***

According to the figures published by the Anglo-Persian Oil Company in its report issued in October, 1913, the figures for the monthly production from its refinery were showing a steady increase. The monthly average for the last quarter of 1912 was 1.344,000 gals.; for the first quarter of 1913, 1.400,000 gals.; second quarter, 2,354,000; third quarter. 2.890,000 gals—that for September, 1913. being 3.640,000 gals. By now that figure has probably been largely increased.

***

The news which our Bucharest Correspondent sends that the Joint Commission has decided upon the site of a bridge across the Danube to connect the Roumanian and Bulgarian railway systems is most welcome. Corabia is the point selected, partly in deference to the susceptibilities of the Roumanian General Staff for the strategic necessities of the defence of the capital and partly because engineers have pointed out that the gradients on the Bulgarian side are highly favourable at this point. The latter is certainly an important consideration and will greatly affect the weight of trains and the power of engines using the new bridge, which is to be built at the joint expense of the two governments.

***

Those who remember the isolation from the rest of the world in which Bulgaria found herself during the second Balkan War and the use made of her enforced silence by her enemies will not be surprised to learn that arrangements have been made to put Sofia in wireless communication with Buda Pest. This will render the Bulgarian capital independent of the amity or hostility of its immediate neighbours, and, like Adrianople, which conversed daily during the siege by wireless with the Seraskierate in Stamboul, Sofia will be able to talk over the heads of the Servians and Roumanians with the rest of the world. At the same time an agreement has been concluded whereby the Danube Steamship Company and the railways to Orsova in Hungary and Lom Palanka in Bulgaria will co-operate to form a direct through service from Hungary to Sofia, and with the opening of the Haskovo-Portolagos line, ultimately to the Ægean. In this way a new route to Europe will be opened for Bulgaria by which her trade will be able to avoid Servian and Roumanian territory.

***

The Bulgarians hope to have finished the construction of the Plovdiv (Philippopolis)-Xanthi road by the end of this month. A service of motor-cars will carry the mails by this route from Old into New Bulgaria, and probably a great deal of time will be saved in sending letters directly by road instead of by train past Adrianople and across two frontiers. In any case, the motor road to Xanthi will undoubtedly be the best means of communication between the Upper Maritza valley and the Bulgarian littoral for some time to come, as the actual work of building the Haskovo-Portolagos railway has not yet begun, although a commission of military engineers has for months past been working hard at the surveying of the proposed line and the preparation of plans and elevations.

***

According to the Green Book for Bosnia and the Hertzegovina issued by the Austro-Hungarian Joint Ministry of Finance, considerable extensions of railway are proposed in that area, some of which appear to be of a strategic rather than a purely commercial nature. The standard gauge line is to be prolonged from Banja Luka to Mostar, and from Shamatz up the Bosna Valley to Serajevo. In course of time a branch is to be built from Doboj to Ratcha, on the Drina, and Brtchko, on the Save. A narrow-gauge line is proposed between Bugojno, on the new Banja Luka-Mostar standard line, and at present terminus of the narrow gauge, which runs from Serajevo through Lashva and Travnik, and Arzhano, in Dalmatia, across a very mountainous region.

Constantinople Business Letter

(From Our Own Trade Correspondent.)

Constantinople, May 23.

The Lighterage Corporation.

A memorandum on the subject of a proposed law practically creating a monopoly for the Lighterage Corporation, or Esnaf, at this port has been drawn up and signed by all the British shipping agents established here and handed to H.M.'s Consul. The memorandum states that the acceptance of the proposal of the Government in respect to lighterage in the port of Constantinople would be a death-blow to the liberty of transport in this harbour, and the acquiescence by the Foreign Missions in the proposed régime for lighters would make the position even worse than it is to-day.

In the past, foreigners have possessed their own lighters for their requirements, and the shipping lines have been permitted to hold lighters of their own for the discharge of their steamers. The agents of the Liverpool lines have always possessed a certain number of lighters, and the Port Authorities have respected this right of possession. In the same way, coal merchants own their own lighters, specially built to meet their requirements, and the foreign lines also, such as the Austrian Lloyd, the Russian Company, the Italian lines, etc., all possess lighters for the purpose of discharging cargo from their respective steamers. A few years ago, the corporation obliged the Austrian Lloyd and some other lines to give up most of their lighters, and unfortunately this pressure was not resisted by the foreign Missions. By the acceptance of the present proposal the possession of lighters by foreigners would be entirely abolished, shipping would be absolutely at the mercy of the corporation, and an absolute monopoly would be the result. With the creation of this monopoly any prices could be charged, and any other prejudicial conditions could also be imposed upon the shipping trade of this port and upon commerce in general. It is a well-known fact that the lightermen at this port are an intractable class of men. They are irresponsible; they assume no responsibility for the goods confided to them, frequently delivering the same to the consignees without the permission of the shipping agents; in fact, there is no effective control over them, and they are an exceedingly difficult body to deal with. Shipping and commerce in general has suffered enormously during the past two years from a scarcity of lighters, and the lightermen have become so independent that they choose their own hours, and the unloading of steamers is consequently delayed. Most of the lighters are in very bad condition, and as a result goods are often damaged. The whole trade of Constantinople is clamouring for the abolition of the Lightermen's Guild, which is considered to be the only solution of a very troublesome question; but under no circumstances should the right which foreigners now have of holding lighters be rescinded. The Liverpool lines would protest most strongly against the suppression of the privileges which they have enjoyed for a great number of years, and the withdrawal of the same privileges from the coal merchants would ruin the bunkering trade. In contracting for the supply of coal to the regular liners, a stated number of lighters has to be kept at the disposal of each company, who have them measured and their tonnage registered by marks affixed fore and aft; and this is a condition that could not be guaranteed if Guild lighters had to be employed. In the coal trade, the discharging of steamers is fixed at 4,500 tons minimum per day, and in order to guarantee this, it is indispensable that coal merchants should own sufficient tonnage of their own to discharge one or more steamers at a time. If they have to depend upon Esnaf lighters, steamers would inevitably come on demurrage, as the plea of insufficiency of Guild lighters would not be admitted, and heavy losses would have to be faced by coal importers, thus making the coal business impossible.

The life or death of the coal trade at this port depends upon the handling expenses, and if the slightest increase in the already heavy items were imposed, which would be the case if Esnaf lighters had to be employed, the business would then be gradually lost to other ports. The idea that if the Corporation lighters are brought under proper control, and that if there are sufficient of them the requirements of shipping would be met, is considered to be a fallacy; for, as stated above, shipping would be entirely at the mercy of the Corporation, who could then impose any conditions they chose and dictate their own terms.

The shipping agents are of opinion that the foreign Missions would be making a grave mistake if they were to accept any arrangement whereby the loading and discharging and bunkering of foreign shipping at this port is to be effected absolutely and entirely by the Lightermen's Guild. It would be quite impossible to have any proper control over these lightermen, and it is hopeless to expect any improvement in their methods. Promises of this nature are considered to be worthless, as they have been proved to be in the past.

The acceptance of an arrangement such as that indicated would practically preclude the introduction of a more efficient means of dealing with cargoes at this port. No one will deny that the present system of lighters for discharging and loading steamers, and for transhipping goods from one steamer to another, leaves much to be desired. The accumulation of loaded lighters and their constant movements in the harbour already constitute a serious problem, which, with an increase of trade, will become more acute.

The traffic in the harbour is becoming so great that accidents are more frequent, and insurance companies have to bear this additional risk, a risk which is already sufficiently heavy, owing to goods remaining afloat here in unsafe lighters often for longer than it takes to convey the goods from their loading ports to Constantinople. The port requires not only more accommodation for storing goods, but also a better system of landing and transhipping them, such as motor-barges. The introduction of motor or steam barges would not only accelerate the transit of goods, but would relieve the harbour of the present large traffic of sailing lighters, which constitutes a serious danger, and often leads to accidents. If, therefore, the Corporation is to be further strengthened by legislation, as proposed by the Government, the introduction of any improvement in this sense will be impossible. The Corporation would not introduce a system of motor or steam barges, and anybody else would be debarred from doing so.

This lighterage question is a very serious one for the trade and commerce of Constantinople, for it not only affects merchants and shipowners, but also underwriters, who do not contemplate, when insuring goods coming to Constantinople, that they will remain afloat here for weeks in unsound lighters. It is felt that the foreign missions should insist upon more liberty of transport here, rather than acquiesce in any arrangements that would diminish, if not abolish, the few privileges foreigners have at present in this question. Any foreign line should be at liberty to possess as many lighters as it requires, and in times of insufficiency of Corporation lighters it should be permissible for these foreign-owned lighters to be employed by anybody wishing to hire them.

The strengthening of the power of the Corporation would render the trade of the port even more difficult and expensive than it is at present. This Corporation is an obstacle to trade, and every effort should be made to abolish it or reduce its power. The proposal of the Government would be distinctly a retrograde measure so far as the trade of Constantinople is concerned, rather than likely to lead to any improvement in the present unsatisfactory state of affairs. The impression here in shipping circles is that the Lightermen's Guild has the support of a political party in return for the services it has rendered both during the war and in connection with various boycotts against foreign shipping at different times.

Adjudications.

The Chirket-i-Hairié S.S. Company invites tenders for the supply of 75 tons of machine oil, 6 tons of cylinder oil, and 4 tons of dynamo oil. The closing date for the receipt of tenders is June 13. Amongst other supplies required are also 3 tons of tallow, 5 tons of carbide of calcium, 2½ tons of white lead, 150 acetylene lamps, and 250 tins of paint.

Bosphorus Electric Railway.

The date for the commencement of work upon the Galata-Roumeli Fener Electric Railway, granted to the Lenz Group, which had already been extended for one year, until April 15, 1914, has again been prolonged for a further period of one year to April, 1915. This prolongation, which is made by an Imperial Decree published in *The Official Gazette*, is stated to be the last that will be accorded.

Autobus Company.

An Imperial Decree just promulgated sanctions the foundation of a new autobus company, under the title of Société Anonyme Ottomane de Transport, with a capital of £T25,000. It is not stated where this company intends to establish a service.

Servian Banks.

(From Our Special Correspondent.)

Belgrade, May 18.

Banque Franco-Serbe.

This bank is one of the most important operating in Belgrade, and is the centre, if not the nucleus, of French financial interests in Servia. The fact that, as I was able to report to you exclusively during the week, this concern is to take over the Imperial Ottoman Bank's branches at Skoplje and Monastir, should only add to its importance. It was formed in 1910 by a group composed of the Imperial Ottoman Bank, the Banque de l'Union Parisienne, the Société Générale, the Banque Française pour le Commerce et l'Industrie, the Société Financière d'Orient, and the firm of N. Bardac in Paris with a capital of twelve million francs fully paid up. Last year it formed with L. Dreyfus et Cie and the Société d'Entreprises des Dragages et des Travaux Publics, a new company, with a capital of 4,000,000 francs, called the Société franco-serbe d'Entreprises Industrielles et de Travaux Publics. The capital was increased towards the beginning of this year, and is now 10,000,000 francs fully paid up. This firm is the so-called Franco-Serbe to which I referred in connection with railway concessions in New Servia.

New German Bank.

A new German bank is to be created in Belgrade with a capital, it is said, of twenty million francs. The Berliner Handellgesellschaft is the principal promoter, the Diskonto Gesellschaft being likewise interested. The object of the bank will be to promote trade between the two countries, and also to participate in concessions, etc. Previous to this German capital was invested in several of the Austrian banks in Belgrade, but when the feeling against the Dual Monarchy became pronounced these banks were severely handicapped—boycotted would be a more precise way of putting it—and German capital was withdrawn, with disastrous results to the Austrian concerns, such as Andrevitch and Co., etc., which are now leading a contemplative existence. I have gathered from a most reliable source that Austrian capital in disguise will participate in the new German bank. When this becomes generally known in Belgrade it will seriously affect the future of the bank.

Industrial and Commercial Bank.

This is one of the most important banks in Belgrade, and is directly interested in some of the big industries, such as the slaughter houses, etc. M. Marinkovitch, one of the most progressive business men of modern Servia, is a director of the bank, which has also the powerful support of M. Pavlovitch, the leading wholesale importer of cotton goods, who carries on a big business with Manchester. One of the most recent operations of this bank was its acquisition from the Government of a concession for the erection of hotels in New Servia and the formation of a Franco-Serb company for the exploitation of the concession for a period of twenty-five years. Twelve hotels have to be built in the various towns of New Servia by 1917; most of these will be smaller establishments, but that to be erected at Skoplje is to have 150 beds. The name of the new company is La Société Hôtelière Franco-Serbe, of a nominal capital of 2,500,000 francs, of which one-fifth is Servian (the Industrial and Commercial Bank and its group) and the remainder French. From the British point of view the interesting feature of this company is that the Servian group has explicitly obtained from the French group the right to acquire the furniture, hotel fittings, etc., under the best possible conditions, regardless of nationality. This clause, which, by the way is a good indication of the way the wind is blowing in Servia, gave umbrage to the original Franco-Swiss group, which had specialised in selling furniture, etc., at a good profit to the concessionnaires, and consequently it had to be remodelled. The attitude of the Servians in this respect must be highly approved of. British firms now stand an excellent chance of doing business in connection with these twelve hotels.

Export Bank.

One of the strongest banks in Belgrade, with a capital of 5,000,000 francs, this concern is now increasing its capital to 7,000,000 francs. The operation is proving most satisfactory—a proof that, if money is extraordinarily tight at the present moment, it is not due so much to stringency as to precaution.

New Banks.

The following banks have been allowed to open in New Servia:—At Skoplje: The National Bank, the Banque Franco-Serbe, Benzion Bully and the Banque du Pays (Servian). At Monastir: The National Bank and the Banque Franco-Serbe.

The constitution of the following banks, with a capital varying from one-half to a million francs, has been approved (these banks will be essentially commercial banks):—The Bank of Kossovo at Mitrovitza, the Servian Commercial Bank, and the Bank of Skoplje. At Skoplje: The Bank of Uroshevaz at Ferizovich, the Bank of Tikvesh at Kavadar, further banks bearing the names of their respective towns at Novi Bazar, Prizrend, Tetovo, and Kumanovo; also sadrugas co-operative associations) bearing the names of their respective towns at Prizrend, Gilane, and Prishtina.

Proposed, but not yet approved, is the Commercial Bank of Monastir, at Monastir.

Southern Slav Bank.

Under the above title a commercial bank is shortly to be established in Belgrade with an initial capital of 300,000 frs., with agencies in New Servia. This bank, it is stated, will make a feature of introducing British engineering goods on the Servian market.

LOCUSTS IN SMYRNA.

According to the *Quarterly Journal* of the British Chamber of Commerce of Smyrna, one of the blots on the horizon is the presence of enormous quantities of locusts. Efforts—but very tardy ones—are now being made by the authorities to grapple earnestly with the pest. A French expert, M. d'Hérelle, was invited to come and use his serum for the self-destruction of the locusts: he came, but said the insects were too far developed for him to attempt their extermination this year. So the authorities are rounding up all the villagers and resorting to the good old methods of destruction. "Such measures, however, as pouring petroleum and boiling water over the locusts can be only local, whilst the old-fashioned remedy of digging trenches may do no good, as the swarm may swerve from its path and go in another direction to that in which the trenches have been dug. The casual observer, seeing so many thousands of soldiers apparently with plenty of time on their hands, could readily be forgiven for asking why they were not turned out in their thousands to assist the villagers in the latters' compulsory service. The Aidin Railway Company has wisely offered to transport any workers free to the various infested spots, and it also carries different appliances free to assist in the task of destroying the locusts. The weather has been propitious until now for the crops, and if the locusts are kept down successfully we should see a bountiful season."

THE HAIFA BRITISH VICE-CONSULATE.

(From Our Own Correspondent.)

Haifa, May 3.

It has long been felt that a thorough investigation into the present state of the British Consular offices situated in this district is necessary, and I learn that it is with this object that H.M. Consul-General at Beyrout has been commissioned by the Foreign Office to undertake a tour of inspection within his Consular district and to submit a report thereon. With this end in view, the Consul-General, Mr. Cumberbatch, C.M.G., arrived at Haifa from Tiberias on April 25, after having made a prolonged camping trip in Palestine for the purpose of studying the commercial as well as the agricultural developments of the country.

Several years ago the majority of the foreign Consuls in Haifa, as well as in other places, belonged to the non-salaried type. In face of the rapid and steady development of the country as time advanced, some of the leading foreign countries realised the necessity of the improvement of their Consular offices and the substitution of non-salaried representatives by Consuls *de carrière*. This course was gradually adopted by Germany, France, Russia, and Austria-Hungary. On the other hand, as a sequel to the failure of the British Haifa-Damascus Railway, the British salaried Consular post of Haifa, which had been created a short time before, was abolished and a non-salaried post substituted—an event which aroused great misgivings in the minds of the onlookers. Now, the efficiency of the Consular service of other foreign governments in Haifa has grown until they possess a body of Consular officers who are most competent and zealous, and who have largely contributed towards the advancement of the interests of their respective countries, commercially and otherwise.

A country such as this, though still in its infancy as regards commercial development, is capable of great and speedy advancement. Germany, Austria, and France, through the instrumentality of their shrewd, competent, and energetic Consular officers—who, by the way, are *de carrière*—have been sedulously attentive to the promotion of their respective interests here, and are ever on the alert to grasp any eligible opportunity that may tend to strengthen their commercial relations with this country. Great Britain, on the other hand, has but feebly supported her trading interests in this locality—a state of things which is due, in great part, to the existence of a non-salaried post in this district.

In view of this activity of other foreign Governments, it is surprising that the British Government has not concentrated on this vital point, and has hitherto refrained from following the example of other foreign countries in this matter. The same efficiency cannot be expected from a non-salaried officer, most of whose time is perforce taken up with other than Consular business, as is demanded from a regular official whose whole time is devoted to his Consular duties. Moreover, the one is an amateur, while the other is a specialist, with the chance of promotion in the service to stimulate his energies. Many complaints have been made in Haifa that inconvenience and difficulties have arisen from the fact that the British Vice-Consul is not always available. Naturally, British prestige and British trade interests suffer.

In the circumstances it may confidently be anticipated that Mr. Cumberbatch's tour will lead to desirable changes, and it is to be hoped that as a result of the steady commercial advancement of the country which the Consul-General himself has had occasion to witness on his trip in Palestine, the question of the creation of a salaried Consular post at Haifa will ere long be favourably settled.

Egyptian trade in 1913 was characterized by large increases in the imports of grain and flour, coal, timber, petroleum, manufactures of iron and steel, and cotton goods, says *Commercial Intelligence*. There were decreases in sugar, coffee, vegetable oils, soap, cotton yarns, copper and brass, and railway trucks. The only notable increase in exports was in skins; there were large decreases in the exports of raw cotton and of cotton-seed.

THE FINANCES OF THE LEBANON.

Shoucair Pasha's Report.—III.

(By Our Cairo Correspondent.)

The fixed system at present in force in the Lebanon is most unsatisfactory and highly inequitable. The most important items of revenue are the land tax (£T25,660) and the capitation tax (£T8,750). Both are levied under the Organic Law of 1861, and on a basis which, having been laid down half a century ago, is quite out of keeping with to-day's circumstances. A request has been submitted to the Porte for the execution of a new cadastral survey, which will have for result not only an increase in the net revenue derived from the land tax, but also a fairer distribution of the burden and a diminution in the number of law-suits in the understaffed courts of the Lebanon. These law-suits are due to appeals made against the unjust proportion of the tax payable on certain lands as compared with the original area, which is no longer traceable in the cadastral survey list, owing to the transfers resulting from the sale of portions of that area.

The capitation tax, which is about P.T. 9 per male adult, will also have to undergo revision; for, apart from any consideration as to whether this is a good or a bad tax in the Lebanon, it is no longer levied per head, but per village. No doubt, when the assessment per village was first fixed, it was an equitable one; but since that time the population has moved about, and in many instances the inhabitants of a village have either increased or become considerably reduced in number, owing to emigration, and yet have to pay the same lump sum as of yore.

Shoucair Pasha is of opinion that, even should the negotiations in Constantinople fail as regards the Customs dues and the restitution of the "Moaissarat," the additional revenue anticipated from the direct importation of salt, from tobacco, tombac, and alcoholic liquors, and from a revision of the cadastral survey will be sufficient to cover the deficit of the Budget and provide for various administrative reforms of which the province stands in need, without increasing in any way the fiscal burden of the population. Should further revenue be needed, he suggests that the Lebanese Government might gradually increase its income by the imposition of some new taxes which would fall proportionately on all classes of the population, and would have for effect the contribution to the exchequer by many of those who at present enjoy all the benefits of government but pay little towards its cost.

The new taxes he proposes—and he lays great stress on their slow and gradual imposition—are: a house and shop tax; a patent, or trader's, tax; a tax on the sale of intoxicating liquors; a system of land transfer fees; a building land tax; a system of succession dues; receipts and promissory note stamps, etc. All these imposts, he considers, whilst they may give rise to some opposition at the outset, will result in a substantial increase in the revenues, and will enable the Lebanon Government to carry out more reforms and execute the numerous irrigation and public works projects that are so necessary.

The manner in which the Budget is drawn up and the accounts are rendered also requires drastic reform. As a result of the working of Article 15 of the Organic Law, two Budgets are framed and two sets of accounts are presented. The first Budget contains merely the revenues and the expenditure authorised by that article, and shows a deficit; this is the Budget that is always sent to Constantinople. The other Budget contains the entire revenue of the country, derived from the taxation authorised by the above Article 150 from the "Mohmeret" taxes, which the Administrative Council has from time to time imposed to meet certain special purposes not recognised by the Organic Law, and it contains on the other side the country's entire expenditure. This Budget, since it shows no deficit, does not go to Constantinople. The accounts are similarly treated.

This duplication has never attained its object—that of getting the Porte to make good the deficit—and there is consequently no reason why the practice should be continued. But until Article 15 is abolished and the Lebanon comes to a more sensible financial understanding with the Porte, it is to be feared that little can be done to improve the situation. Indeed, the abolition of Article 15 and the financial independence of the Lebanon, subject, perhaps, to the payment of a moderate annual tribute, appear to be the sole panacea. Whilst the present relations exist, the Lebanon can raise no extra revenue, and can found no reserve fund with any surpluses it may from time to time amass, for the simple reason that the Porte would certainly proceed to acquire these surpluses in virtue of the afore-mentioned Article 15. If the latter can only be abolished, the Lebanon will be able to set its own house in order; it will be able to stop the irregularities to which the present condition of affairs gives rise and which it favours, and it will be able to carry out all the necessary reforms and develop to the fullest and most profitable extent its rich resources, becoming as a result one of the finest summer resorts of the Near East and a most valuable vilayet of the Turkish Empire.

The foregoing represent briefly the proposals made by Said Shoucair Pasha for the financial and economic reform of the interesting little vilayet that has always aroused the sympathy and appealed to the imagination of Europe. His report ably demonstrates the defects and unjust operation of the present system, which are solely due to the antiquated nature of the Organic Law of 1861 and 1864, and to the non-observance by Turkey of her obligations towards the Lebanon. Certainly the situation of the "Mountain" and the valiant efforts that the Lebanese, guided by the present enlightened Christian Governor-General, are making to extricate themselves in dignity from their present plight merit the serious and sympathetic attention of the European signatories of the Organic Law, who, as already pointed out, acted at that time solely in the interests of the Lebanon, and who cannot in justice remain unconcerned at the unfortunate situation which has grown up to-day as the result of their efforts of fifty years ago.

GRECO-AUSTRIAN COMMERCIAL TREATY.

A Reuter's message from Athens reports that the work of the joint Greek and Austro-Hungarian Commission for the drafting of a commercial treaty terminated last Saturday afternoon, when the negotiations were brought to a successful conclusion. The text of the Treaty of Commerce was agreed upon. It includes two tables of tariffs providing for the reduction of Customs duties on imports from all places. Similarly the text of a Navigation Treaty was settled, as well as the text of an arrangement governing the tobacco trade.

NEWS FROM ALL SOURCES.

A Treaty of Commerce between Greece and Servia was signed at Athens on Saturday evening. The text of a Treaty of Commerce between Greece and Austria-Hungary was also agreed upon, as well as the text of a Navigation Treaty and an arrangement governing the tobacco trade.

The Turkish Government is stated to have ordered twelve torpedo-boat destroyers from a ship-building firm at Havre.

At a meeting of the board of the Deutsche Bank, held yesterday, it was decided to open a branch at Baghdad.

The Servian Government has submitted to the Skupshtina a Bill authorizing an expenditure of £4,912,000 for armaments.

Mr. Hoffmann, of London, has been spending a few days in Belgrade. He is interested in the formation of Anglo-Servian companies to be called, respectively, the Anglo-Servian Mining Concessions and the Anglo-Servian Gold Dredging Concessions. Mr. Hoffmann has been negotiating with the Government for concessions near a small village about half-way between Nish and Vranja.

The Servian Minister of War has asked for a special credit for the appointment of military engineers to the divisional headquarters in Old and New Servia. Failing reliable Servian engineers, foreigners are to be appointed, and applications from British engineers would be welcomed.

To the list published on another page of new banks to be opened in New Servia must now be added the Bank of Bregalnitz, with a capital of 500,000 frs.

The Servian agricultural Zadrugas (Co-operative Societies) will hold their annual meeting in Uskub this year, the co-operatives of New Servia taking part in the gathering.

A severe fire at Tokat recently destroyed eighty-five shops, forty-five houses, three hans, and an Armenian school. A loss of ten lives is also reported.

The Board of Trade *Journal* quotes the British Consul for the Piræus as stating, in his report on the trade of that district in 1913, that earthenware is imported into the Piræus chiefly from France, but the lower classes prefer German and Italian products, owing to their cheapness. Coffee cups are almost entirely imported from the Netherlands; the United Kingdom is represented in toilet sets.

According to a forthcoming report of the British Vice-Consul at Tripoli-in-Syria, quoted by the Board of Trade *Journal*, paper for wrapping round oranges and lemons is now supplied by Austria-Hungary, done up in reams of 480 sheets, and packed in bales of 40 reams. This kind of paper, of which Tripoli imports annually some £2,500 worth, might, according to the Vice-Consul, quite well be imported from the United Kingdom if manufacturers were to take the matter up seriously.

The British Consul for the Piræus reports (quoted by the Board of Trade *Journal*) that commercial travellers are not required to go through any formalities in order to be able legally to exercise their calling in Greece, nor are they required to take out a licence, provided they come and go merely as bearers and receivers of orders. Agents of British firms resident and trading in Greece are, however, required to take out trade licences.

The port dues at Dedeagatch, on the Bulgarian Ægean littoral, for April amounted to 4,000 frs.

The Ottoman Mint is preparing an issue of nickel coins to supersede the silver 1-piastre pieces, the metaliks, and the various minor coins which are shortly to be demonetised.

SPECIAL REPORTS.

(From Our Own Correspondents.)

Bucharest. May 22.

Rain is much needed throughout Roumania, but not so badly as on the other side of the Pruth. The general rain of Monday and Tuesday has, however, helped much. The business in maize, on account of the low lighter freights just now prevailing on the up-river and the stronger demand from the Continent, is lively. Little wheat remains to be shipped. All grain prices are on the upward move. A large business is doing in contracts in wheat for the new crop.

Braila. May 23.

Rain fell abundantly all over Roumania during the early part of this week, and was very beneficial to all sowings. Crop prospects have in consequence improved considerably. In four or five districts the rain was not one day too early; yet it was not too late.

Odessa. May 24.

The general rains of the last few days have saved the situation. They came, so to say, at the eleventh hour. Another ten days of the drought would have had disastrous consequences. The rains have been general over the whole of the southern provinces, and they are followed by what looks like a settled spell of hot weather. For the time being the crops are safe, but more rain is absolutely necessary to carry them over the critical Junetide.

Our market has been a trifle firmer during the past week owing to a slightly better demand from the Western marts. The chief inquiry is for barley, which throughout the season has, in quantity, held the premier place among cereal exports. From July 1, 1913, to May 1 this year the amount of barley exported was 216 million poods, as compared with 153 million poods during the same period of 1912-13. To-day's quotation for barley of good middling quality, with 3 per cent. admixture, is 79½ c. to 80½ c. per pood of 16.38 kilos f.o.b. Rye is also firm at 88½c. to 92c. f.o.b. according to quality. For the finest quality wheat there is little or no call from abroad, but for good middling quality there is a fair demand at from 1r. 13c. to 1r. 18c. per pood, and for lower qualities at 1r. 3c. to 1r. 11c. Maize, too, is in better demand at 73c. per pood f.o.b. for perfectly dry grain of good quality.

The grain stocks here are still very low. They are to-day: Wheat, 430,000 poods; rye, 70,000 poods; barley, 200,000 poods; oats, 30,000 poods; and maize, 130,000 poods.

The following information is compiled from the weekly bulletin received at the London offices of the Imperial Ottoman Bank from its correspondents in the Near East:—

Beyrout. May 14.

The market grows quieter every day. Traders complain bitterly of the stagnation. An improvement, however, is looked for towards the end of the month.

Little business passes, and orders continue to be restricted, especially for colonial produce. Buyers delay placing orders in the hope that prices will become more stable, when they will be able to transact business with greater confidence.

In the cereal market there is no change. The crop is expected to be much more abundant than that of last year.

Serres. May 10.

The following are extracts from the monthly report for April:—

The favourable progress of the crops up to the beginning of the month has been delayed by the drought which has prevailed during the month. This is the critical period for the crops, as they depend for success on the rains during this month. However, the situation is not hopeless, and if abundant rains fall during the first fortnight of May the crops will be safe. The tobacco plantations appear also to have been damaged.

Little business has been transacted in our district, and exports have been almost nil. A few purchases of tobacco have been negotiated in the villages.

Aleppo. May 14.

The following are extracts from the monthly report for April:—

The hoped-for rains have fallen during the month, and unless an unforeseen misfortune befalls the crops they will be satisfactory.

The arrivals of sheep continue to come in steadily. The total sales of sheep on our market during April amounted to about 200,000 head.

In consequence of the rains and the prospect of a good harvest, the price of cereals has tended to drop. Butter has begun to come on the market, but sales are few owing to the high prices.

Salonika. April 30.

The following are extracts from the report for March-April:—

The persistent drought has begun to inspire fears for the crops, which were expected to be abundant owing to the excellent weather conditions under which the sowings were undertaken. Some good rains are eagerly looked for just now.

Rodosto. May 11.

The state of the growing crops is satisfactory. The recent rains have done good, but unfortunately the area under crops is much less than in previous years.

The commercial outlook is particularly gloomy owing to the uncertainty of the political situation. Several merchants have countermanded orders which they had placed abroad.

OPIUM MARKET.

Messrs. Barker Brothers, Smyrna, report as follows for the week ending May 15:—The sales this week on our market amount to 104 cases at 13s. to 15s. 6d. per lb. as to quality. Owing to this continual large demand, our sellers still maintain the position, and very likely will do so until the new crop is all harvested. The arrivals are 4,604 cases, as against 2,393 at the same date last year.

SENNA IN THE SUDAN.

Although senna does not figure as a product of Egypt, and is neither noted in the agricultural publications nor specified in the Egyptian Customs statistics, exports from the Sudan to the value of over £9,400 were recorded in 1912, while for the first half of 1913 the value of exported senna reached £6,078, says *The Egyptian Gazette*. Senna is gathered once a year, in the month of October, from shrubs which grow wild in the Anglo-Egyptian Sudan and in the Red Sea districts of Arabia. The size and quality of the crop depends on the abundance of the rainfall. Suez is the collecting point both for the Arabian or Mecca senna and for the Sudan variety, which is known as Alexandrian senna.

COMMERCIAL SITUATION OF CONSTANTINOPLE.

According to a report of the German Consul-General at Constantinople no important or lasting improvement has taken place there in the industrial situation. At times there seems to be a brisker buying activity and more enterprise shown, but the old state of commercial lethargy, so characteristic of Constantinople during the war, soon creeps in again. The boycotting of certain of the native merchants by the Mussulman population has acted most disadvantageously against the interests of trade. Although the boycotting may lately have relaxed to some extent in the capital, the policy, according to the latest reports, is still being vigorously pursued in the provinces. Often Greek buyers, afraid of being compelled to leave their property, have tried to protect their goods by having them transferred to foreign firms in Constantinople. Native notaries are, however, forbidden to undertake such transfers. All business between the Capital and European territories is interrupted, payments are completely suspended, and a return to normal conditions cannot yet be expected.

PRODUCE REPORT.

London, May 28.

Sugar.

Beet opened quiet, but owing to higher Continental advices and the reduced Cuban estimate, it became dearer; the improvement, however, was not maintained, and the market is now closing quiet and lower. For Aug., 9s. 9½d.; Sept., 9s. 9¾d.; Oct.-Dec., 9s. 8½d. f.o.b. Hamburg. Refined English has been steady, good business passing at late rates to an advance of 1¾d. Foreign first marks granulated was sold, ready, at 11s. 9¾d. to 11s. 10½d.; July-Aug., 12s.; Oct.-Dec., 11s 10½d. f.o.b. Hamburg, German, and Austrian crushed, prompt, 13s. 7½d.; cubes, 13s. 8½d. f.o.b. Hamburg. French cubes, May-July, 14s. 10½d.; loaves, 14s., f.o.b. Paris.

Coffee.

The supplies offered at auction this week met with a good demand at steady prices. Costa Rica low mid. to mid. sold at 69s. to 78s., and bold 76s. to 83s. East India smalls went at 64s. to 67s., and low mid. to mid., 68s. to 72s. Columbian low, 67s., and Nicaragua fine ordinary foxy greenish, 57s. The speculative market is steady at about late rates.

Seeds.

The market has been quiet, with more or less restricted business. Linseed is steady, with fair dealings. London-Calcutta spot and due, 48s. 6d. to 49s. 3d.; May and June, 49s. 3d. to 49s. 9d.; and June-July, 49s. 9d. to 50s. Rape seed is rather quiet but firmly held, brown Cawnpore, May-June, 50s. 9d. Cotton seed is fully steady, London-Egyptian, May. being quoted at £7 18s. 9d., June £7 18s. 9d., and Nov.-Jan. £8 7s. 6d. per ton. Canary seed is inactive, but prices are maintained, as the quantity on offer is very small. Haricot beans remain steady, stocks both here and on the Continent being limited, but the demand is slow; the same applies to white runners. Rangoon beans on the spot are quoted 36s.

Oils.

The market has been irregular. Linseed oil spot pipes landed offered 24s. 7½d., and barrels 25s. 1½d. Rape oil ordinary brown naked 30s., and refined casks 31s. 9d. Cotton oil is steady; crude spot quoted 29s., refined sweet 32s. 9d. to 34s., as to make, and ordinary pale 29s. Petroleum, Roumanian, and Russian very quiet at 7d. per gallon.

Oilcakes, etc.

The market is decidedly better, with a general improvement in prices all round, especially in forward positions. Linseed cakes, best London made, find a more ready sale at £7 10s. to £7 12s. 6d. East India seed pures have changed hands at £7 12s. 6d. to £7 15s. for arrival. Fine quality Russian remain at £7 8s. 9d. to £7 10s. per ton. Cotton cakes are steady, with fair business passing in Egyptians, which remain by far the best value on the market, best brands in warehouse finding a ready sale at £4 11s. 3d. to £4 12s. 6d., whilst for May-June shipment £4 7s. 6d. has been freely paid. English makes are also dearer, £4 13s. 9d. to £4 15s., and Bombay £4 per ton. Decorticated cotton cake and meal are offered sparingly at £7 13s. 9d. to £7 15s. per ton ex docks.

Corn, etc.

Wheat.—The cargo market has been dull this week, and prices displayed an easier tendency.

Barley is steady and sparingly offered; all options June, 21s. 9d., and June-July 21s. 7½d.

Maize is quiet, Varna-Bourgas May (old style) offered 25s., and La Plata May-June 23s. 6d.

EGYPTIAN COTTON MARKET.

(From Our Own Correspondent.)

Alexandria, May 23.

Prices have been more steady, but the market is somewhat undecided, and speculators are inclined to be cautious, although a rise is generally expected.

The prospects of the crop may be regarded as amongst the most satisfactory in recent years. The plants are making splendid progress under favourable temperature conditions. Water is plentiful everywhere, but it is feared that the rise will be late, and that there may be a shortage of water in August.

The industrial demand is considerable, and exports are in excess of those of last year. Exports to England and the Continent have increased, but the United States have taken 200,000 cantars less than in the previous year.

Buyings of new crop for export are increasing daily, but spinners show a marked tendency to buy in the spot market after examination of the goods, and not in anticipation.

Cotton seed is falling, owing to the lack of demand from abroad.

Messrs. Davies, Benachi and Co., of Liverpool, have received the following telegram from Alexandria, dated Wednesday :—

Market quiet. July, 17¾, November, 18⅓. Exchange, three months' date, 96¼.

	This week.	Same time. 1912-13.	Same time. 1911-12.

Steamers Sailed.

May 16.—"Norman Prince," Manchester. May 18.—"Castilian."

LIVERPOOL REPORT.

Messrs. Reynolds and Gibson telegraph :—Spot cotton has again been in fair request. The estimated sales amounted to 2,100 bales, as against 2,700 last week. As in the previous week, the demand has been chiefly for medium grade Nubari, Assili, and Afifi; and a fair business has been done in Sudan and Tokar cotton. Outside these qualities only a small business has been done. Long-stapled inferior grades have been more sought after than for some time past, and a few small lots changed hands, and as the outside growths which have been in competition with this cotton are becoming scarce, the demand may be expected to continue. Quotations for all grades and qualities are advanced 10 points.

MANCHESTER MARKET.

(From Our Own Correspondent.)

Manchester, May 27.

The market during the past week has been a most difficult one for buyers to operate in, prices having again hardened in sympathy with the higher rates in the raw material. In practically all directions progress has been blocked, as operators have failed to respond to the fuller rates demanded by sellers. The raw cotton outlook is very uncertain, and although favourable advices are being received as to the growth in Egypt, the weather recently experienced in the American belt has not been favourable. It is generally believed, however, in Manchester trade circles that the action of the bulls has been overdone, there being no justification for so rapid a rise. A very limited business has been done in piece goods for all outlets. Shippers to Egypt seem quite indifferent as to the course of prices, and the recent appreciation in values appears to have had very little effect in the way of forcing out more offers. The smaller markets of the Near East have also given retail support in all kinds of fabrics. A slow demand has again come through for China, and we do not seem to be any nearer freer operations. For India miscellaneous transactions have been arranged, but most of the bids have been altogether too low. Exporters are now showing a considerable satisfaction at the heavy purchasing of last month. Printing cloths have again been dull of sale. No freer movement can be mentioned in heavy goods. The prospects in the home trade are fairly healthy, there being recently some improvement in the way of distribution. American yarns for home use have been dearer to buy than for a long time back. In some quarters a little more inquiry has been met with in wefts. Complaints from spinners have increased in number, the margin in most counts and qualities being narrowed. There has been very little doing in shipping bundles. Egyptian spinnings have been well held with a fair inquiry.

TEXTILES IN GREECE.

The following information is derived from the report by H.M. Consul for the Piræus (which will shortly be issued) as quoted by the Board of Trade *Journal* :—The statistics of the textile trade in 1913 will probably show that there was a considerable falling-off during the year in the value of imports as compared with previous years. This is due more to the very natural curtailing of credits by exporters than to the reduction in the amount of trade during the period of the war, because, strange as it may appear, the total trade in textiles was brisk during this period. The great number of people who crowded into Greece during the war, chiefly into the capital, from Turkey and Egypt, seems to have more than replaced the trade which was lost owing to the war, and the retail stores did a brisk business during the whole period, obtaining their supplies from the local wholesale merchants. This has had a very good effect on the local textile market, as the heavy stocks which were held by the wholesale merchants were much reduced and in many cases almost exhausted, the imports during this period being correspondingly smaller than usual; consequently it is safe to say that the textile market at the Piræus is now in a stronger and healthier condition than previous to the war. The outlook is good. Trade is already getting brisk, and when the political situation is definitely cleared up there can be little doubt that there will be a boom in the textile trade in Greece. In fact, better times are expected from trade all round, and the Greek market is worth much more attention than it gets from United Kingdom manufacturers, and it would be well worth their while to study the requirements and to cater for them more fully than they do at present. An opportunity also now occurs to meet Italian and Austro-Hungarian competition in textiles, which was getting serious, as merchants at the Piræus are more than ever inclined to prefer the goods of United Kingdom manufacture. A closer study of the designs and colouring required, and a better attempt to meet the requirements of the market rather than to induce the market to accept designs and colourings manufactured for other markets, are necessary.

Shipping Intelligence.

THE NEW CONSTANTZA SERVICE.

(From Our Own Correspondent.)

Bucharest, May 23.

The Hamburg-Amerika line has taken the initiative in introducing a direct line of steamers between Constantza and the United States. The first steamer of the line arrived at Constantza on 16th inst., suitable festivities accompanying the event.

Hitherto the large amount of goods coming from the United States for Roumania, and indirectly for Bulgaria, etc., had to be transhipped at various European ports, which made the cost of freight much more heavy than by the present direct line, apart from having a bad effect on the merchandise. The steamers will also touch at Odessa.

BRAILA NOTES.

(From Our Own Correspondent.)

Braila, May 23.

There was a good inquiry this week for handy-sized steamers on charter terms, and a number of fixtures are reported from London at rates averaging 8s. 3d. to 8s. 9d., from Sulina, according to size. A few berth size steamers have also been fixed from Sulina at 7s. 6d. L.H.A.R., with options of other U.K. ports. The demand is due to the sales of maize from the Danube to the United Kingdom, and is consequent on the considerable decrease in supplies from the River Plate.

All our other markets were slow, yet rates of freight show a slight advance, which is due to the firmer tone of the London market. Current rates to-day from the Danube are: Rotterdam, 7s. to 7s. 3d.; Antwerp, 7s. 9d.; Hamburg, 8s.; U.K. ports, 8s. 6d.; Sulina, 1s. less all round.

The Mediterranean berth has been particularly inactive, and several steamers have experienced considerable difficulty in securing cargo. Rates stand nominally at 8.50 frs. from the Danube to Genoa, Marseilles, or Venice.

Steamers in the Danube can load down to 22 ft., and can cross Sulina bar drawing 23 ft.

BLACK SEA FREIGHTS.

(From Our Own Correspondent.)

Odessa, May 24.

A shortage of tonnage during the past week has had the effect of hardening and improving freight-rates all round, but the amount of business doing is still very restricted. For the moment the outlook is more favourable, but should the supply of tonnage again increase a reaction is inevitable. Such demand as there is is all for spot and prompt loading. For Rotterdam 7s. and for Hamburg and Weser 7s. 3d. was paid yesterday. The quotation for Hull and Antwerp is 7s. Marseilles remains unchanged at 8 frs. To-day there are only three boats loading in this port. At Nicolaieff there is extremely little business doing, and 6s. 6d. is the standard but nominal rate for all destinations. Usually the grain stocks in the Bug port are abundant, but just now they are comparatively very small. At Kherson a fair amount of business has been done during the week; the demand is steady but restricted. Yesterday a prompt steamer was berthed for Rotterdam at 7s., and another for Antwerp at the same rate, while a limited amount of tonnage is booking for Hamburg at 7s. 3d. At Novorossisk the demand for prompt tonnage has for the time being practically ceased in consequence of the very small arrivals of grain from the interior, and shippers are confining their attention to mid-June loading. Nominally, rates are 6s. 6d. Rotterdam; 6s. 9d. Weser and Antwerp; and 7s. Hamburg; for Mediterranean there is nothing doing. Khorli and Skadovsk are doing a small business for Rotterdam at 7s.

MOTOR SHIP FOR PERSIAN GULF.

According to *The Times*, apart from the interest the British Government is acquiring in the Anglo-Persian Oil Company, there are reasons why important developments may be expected before long in the Persian Gulf trade. One is that the irrigation schemes in Mesopotamia will bring vast areas of land into cultivation for grain. British shipping companies have at present a large share of the trade, but it is understood that in one of the developments which may be expected shortly not only English, but also German and French financiers will participate. The interests of the British India Steam Navigation Company are well represented throughout the ports of the Persian Gulf, and in well-informed circles the name of Lord Inchcape, the chairman, has been associated with the new scheme. No doubt an official announcement will be forthcoming in due course. It is interesting to note that the Hamburg-Amerika has already a service from Hamburg and Antwerp to the Persian Gulf, and in France the possibility of a subsidised steamship service has long been discussed.

The newly formed Flower Motor Ship Company, Limited, is a sign of the interest which is taken in the commercial future of this part of the East. It is a private company with a registered capital of £1,000,000, and among the directors are Sir Marcus Samuel, Mr. F. Lane, and Mr. Rickmers. We understand that Messrs. Strick and Co. and Messrs. Ellerman and Co. are interested in this new venture

A motor-ship named the "Arum" has been built for the Flower Company, and has just left London on her maiden voyage to the Persian Gulf. She left the Tyne recently for Antwerp, where she loaded a cargo for the East. Some interesting particulars concerning this vessel are given in the current number of *Internal Combustion Engineering*. To the engineer she is interesting as the first British-built motor-ship having engines that are British-built throughout. She is not entirely a British achievement, however, as the design of her engines is based upon the experience of a Continental firm. The builders are Messrs. Swan, Hunter, and Wigham Richardson, who are answerable for the construction of both ship and machinery. The design of engines, though reflecting the Polar-Diesel practice, is original in many respects, the special features tending towards simplification and greater accessibility. The "Arum" is designed to carry somewhat less than 6,000 tons deadweight, measures 350 ft. between perpendiculars, and is 47 ft. in extreme breadth and 27 ft. in moulded depth, with a load draught of 21 ft. 6 ins. She is driven by twin sets of Neptune-Diesel engines, aggregating 1,200 b.h.p., and attains a speed of 10½ knots in ballast. The daily fuel consumption amounts to 4½ tons.

Great credit is due to the firm of Swan, Hunter, and Wigham Richardson, Limited, for, though they had the results of Polar experience to guide them, they have departed from the principal features of previous designs, with the exception of the main cylinders and the disposition of the scavenging-air and starting-air arrangements. They made themselves responsible for every part, even the fuel pumps and fuel valves being produced in their own works.

According to *The Times*, two sister ships to the "Arum," which are now building, are to be put into the trade. These three ships are designed for carrying general cargo, but it is thought that large tank vessels are likely to be ordered soon in connection with the oil developments.

Presiding at a meeting of the members of the "Flower" Motor Ship Company yesterday afternoon, Sir Marcus Samuel criticised the action of the Admiralty in choosing this moment to subsidise an oil company operating in a foreign country liable to disturbances on the part of the natives. He had no doubt, he said, that the matter would be closely investigated in Parliament, when some explanation of the Admiralty's action would be forthcoming.

Engineering Notes.

Rolling Stock Works in Roumania

We are informed by our Bucharest correspondent that a contract has been concluded between the Vulkan Company and the Roumanian State Railways Administration, by which the former guarantees to repair at least 2,000 trucks annually. The contract is for five years. This company is about to erect works for the construction of goods wagons, which will turn out the first specimens of rolling stock manufactured in Roumania.

Roumanian Railway Contract.

The British Vice-Consul at Bucharest reports, on the authority of the local Press, that the Roumanian State Railways Authorities are studying projects and plans for the purchase of forty-two railway passenger coaches of the large type, as well as 100 open and 200 closed goods wagons. Tenders will shortly be invited for the above, but only from firms who have permission to tender. The Vice-Consul suggests that United Kingdom manufacturers desirous of tendering should make immediate application to the "Direction Générale des Chemins de Fer," Bucharest, for permission, and, on securing it, send a representative to Bucharest armed with full power to make offers on the day of adjudication.

Motor Lifeboats.

The "Titanic" disaster, followed so soon by other similar catastrophes, involving loss of life at sea, every one of which revealed an appalling deficiency in life-saving equipment on board the great liners, stimulated motor-boat designers and builders in their efforts to construct thoroughly efficient lifeboats and life-saving devices. A variety of such boats of recent construction is the result, and if the efficiency claimed for some of them is practically demonstrated, the facilities available for life-saving have greatly increased. For example, we have heard of the "Aquitania's" two motor craft, each fitted with wireless apparatus, the range being 300 miles for receiving and twenty-five miles for sending messages. The apparatus is run from a dynamo connected with the paraffin motor of the boat, but if the motor should break down the apparatus may still be worked by hand gear. In the "Titanic" disaster, as well as in the recent case of the "Columbian," the different boats, after leaving the ship, became very scattered, with tragic results. But the "Aquitania's" two motor craft, in the event of this leviathan's 5,000 passengers and crew being compelled to take to the lifeboats, will collect all the lifeboats, fasten them together, and tow them to safety at a speed up to nine miles per hour. The German leviathan, the "Vaterland," has eighty-three lifeboats, of which two are motor launches. The latter will, in case of need, perform the same function as the "Aquitania's" two craft.

The Newest Motor Lifeboats.

A very striking design is that of a lifeboat cruiser of American construction. It is a craft which includes every factor of safety, a vessel which could live through any sea, and which is said to be fireproof, leak-proof, self-righting, and unsinkable. This boat bears the apt name "S. O. S.," the signal sent out by the wireless apparatus from ships in need of help. No matter how much water may come over this boat, there is no danger of her foundering or capsizing. The construction is extremely strong and rigid. A four-cycle heavy-duty motor supplies the motive power, and the engine-room is as nearly fireproof as is possible.

Another Type.

Another motor lifeboat, designed for use on board ocean vessels, is 30 ft. in length, with 10 ft. beam, built of steel on the double hull system, and the design is far from conventional. She resembles very much the ancient viking ships. It is said that she can accommodate sixty-five people with perfect safety. An interesting feature of this boat is that upon each side there are heavy sponsons, or fenders. These are made of the famous balsa or raft wood, which is lighter than cork, fairly strong in texture, and when coated with pitch impervious to water or damp. By many tests it has been proved that this lifeboat cannot be smashed when it is launched from the deck of a vessel. For instance, a boat of this type was lowered over the side of a vessel until it swung just clear of the water. A powerful tug, attached to the lifeboat by heavy lines, pulled her as far as possible from the side of the vessel. Then the lines were cut and the boat allowed to crash against the steel hull of the big ship. It was found that the lifeboat suffered no damage of any kind. This boat is equipped with a 25-h.p. motor, a wireless outfit, and ample space for storage of food and water.

Agricultural Implements in Syria.

The following extract from a forthcoming report of the British Vice-Consul at Tripoli-in-Syria is published by *The Board of Trade Journal*:—"There is a good demand for ploughs in Tripoli-in-Syria, and United Kingdom manufacturers should send travellers to that market to push the sale of their machines. The establishment of shops for the repair of agricultural machinery would meet a much-felt want."

Greece as a Market for Machinery.

The Board of Trade Journal for May quotes from a valuable report by H.M. Consul for the Piræus, which will shortly be issued. The following is an extract:—"The agricultural districts in Macedonia, Epirus, and the Islands offer openings for a good trade in machinery, flour mills, oil mills, and gas motors for working small plants, as well as in electric tramways and motor omnibuses for carrying mails and passengers in districts where there are no railways, etc. The business that can be done in Greece is very important and of great value, and United Kingdom engineers and firms should do their utmost to secure at least part of these orders. Goods should be brought direct to the buyers' notice by advertisements, and by efficient representatives, who could explain the working of the machines and help buyers to obtain what is suited to their needs. Credit may be given against security to bonâ fide agriculturists or proprietors of industrial establishments. United Kingdom machinery, implements of all kinds of goods and articles have always received a marked preference in Greece, but the better methods adopted by foreign competitors, who have a thorough knowledge of trade conditions in Greece, tend to diminish the opportunities of United Kingdom firms."

E. S. R. Rolling Stock.

It is understood that the Egyptian State Railways are experiencing considerable difficulty in obtaining delivery of the new locomotives and passenger rolling stock for which orders have been placed in Germany and Belgium, says *The Egyptian Mail*. The new tank locomotives, similar to those on the Mataria line, which were ordered from Henschet's for the Heluan Railway, and which were required by October, will not, it is reported, be delivered before the end of December next. Similarly the delivery of two large orders, of the respective values of £E10,000 and £E90,000, which were placed in Belgium for passenger coaches, and which included those destined for use on the Heluan Railway when it is taken over by the State, will not, it is said, be given before March, 1915. In the meantime, it is presumed, the present coaches will perforce be kept in running, and their transfer to the Tanta-Mansura-Damietta line will be delayed. Commenting on these facts *The Egyptian Mail* remarks, very rightly: "It seems to us very probable that British manufacturers would have been far more prompt in the delivery had these orders been placed in their hands."

Our Bucharest correspondent informs us that a group of French capitalists in Roubaix are acquiring the petroleum works and grounds belonging to the Negulescu and Minculescu families in the Bushtenari, Bordeni, and Scaioshi districts. A new company has also been formed at Bucharest under the title of the Union Company for Boring and General Petroleum Work, with a capital of 450,000 francs.

The Engineering Editor of "The Near East" will always be pleased to answer inquiries from readers respecting any machinery or appliances described in these pages.

TENDERS INVITED.

EGYPT.

[*The London agent of the Egyptian Government is Sir A. L. Webb, K.C.M.G., Queen Anne's Chambers, Westminster, S.W., at whose office particulars of tenders marked (L) are to be obtained.*]

Grease.—Tenders are invited by the Egyptian State Railways and Telegraphs Administration for the supply and delivery of 55 or 110 metric tons of best yellow infusible grease for wagon axle-boxes, for one or two years respectively. July 10. (L.)

Buckets, Pails, Chairs.—The Egyptian War Office invites tenders for the supply of 1,475 mild steel galvanised soil buckets, 1,405 four-gallon mild steel galvanised pails, and 650 office or Windsor chairs, with spare seats and sticks. June 30. (L.)

Sacks for Cotton Seed.—The Administration of State Domains, Cairo, invites tenders for the supply of 4,000 sacks for cotton seed, to be delivered by August 14. June 14.

Forage.—Tenders are invited by the Coast Guard Administration, Alexandria, for one year's supply of forage. June 15.

Candles.—The Egyptian War Office invites tenders for the supply of half a ton of candles into Abbassia Supply Nuzl. June 13.

Bottles and Corks.—Tenders are invited at the Central Administration, Department of Public Health, Cairo, for the supply of bottles and corks. June 30.

GREECE.

Cigarette Paper.—Tenders are invited by the Greek Government for the supply of cigarette paper in rolls required by the Greek Tobacco Monopoly during the three years commencing August 1-14, 1914. The minimum quantities required in each year will be 3,500 rolls of 2,000 metres (2,160 yards) each. June 13.

BULGARIA.

Rails, Fishplates, etc.—Tenders are invited by the Bulgarian State Railways authorities for the supply and delivery of about 3,403 metric tons of rails, 155 metric tons of fishplates, 643 metric tons of soleplates, also bolts, dog spikes, and spring washers, as well as 72 sets of points and crossings. The estimated value of the contract is 879,019 frs. (£35,120). June 5.

Locomotive Coal.—Tenders are invited by the Bulgarian State Railways authorities for the supply and delivery of 12,000 metric tons of Cardiff coal for locomotives. June 3.

TURKEY.

Oil, etc.—Particulars are given in our Constantinople Business Letter of tenders invited for the supply of oil, tallow, white lead, etc., to the Clinkel-i-Hairie Co. June 13.

The Servian Minister of Public Works has sanctioned the contract between the Railway Administration and the Franco-Serbe for the supply of normal gauge iron sleepers. 200,000 sleepers at 5.50 frs. are to be supplied annually for the next ten years, for a total of 11,000,000 frs. The Franco-Serbe will have to buy these in the open market.

Egyptian Engineering Co., Ltd.
CAIRO and MANSOURAH.
Egyptian Engineering Stores, Alexandria.
Government Contractors, Engineers, Importers of Machinery of every description, Diesel, Steam, Gas and Oil Engines, Pumps Windmills, Agricultural Machinery, &c. Large stocks kept at all depots.
Sole Agents for over 40 first-class firms.

THE CAIRO MOTOR CO., Ltd.
The Largest Motor Depot in the Near East.
SUPPLIERS OF
Motor Cars, Cycles, Launches, Marine Sets, Evinrude Motor Attachments, Dunlop Tyres & all Motor Accessories.

AGRICULTURE IN CYPRUS.

(From an Occasional Correspondent.)

The High Commissioner, in his opening speech to the Legislative Council, spoke of application "from individuals and syndicates, with a view to the concession of prospecting and mining rights for minerals and mineral oils." Although one must be sceptical until more is revealed on this subject, it is sincerely to be hoped that experts may discover ground for such enterprise.

What is certain is that Cyprus lives by its agriculture, and that progress in this industry is a pressing need. Provision has been made in the year's estimates for some expansion of the Agricultural Department and for improvements on a small scale of several industries. The main produce of Cyprus consists of cereals, vines, and caroubs (locust beans), to which may be added silk. As regards the vine and its products, a subject too large to enter upon, it is to be said that insufficient progress has been made in respect either of wines or raisins. All that can be looked for apparently, under present circumstances, is a combating of the principal disease, oïdium, by providing cultivators with sulphur at a minimum price.

As to caroubs, the crop of which is gathered in August, any disaster affecting the trees on any extensive scale would be a serious calamity for the island. Unfortunately, a disease (called *Brachykarpia*, or "short pod") has been making some progress in late years. The High Commissioner, in fact, attributes a decline in the locust bean trade to this cause. The crop last year fell far below the average in quantity, while in some parts the quality was inferior. Provision is made for "improvement in the cultivation" of this tree; and the Government is not neglecting a study of the disease referred to. The caroub is assailed by many enemies, including rats and fruit-eating bats, as well as by late cold and frost. It is manifestly of great importance that this fresh disease should be dealt with energetically.

The cereal harvests are satisfactory. Good rains fell in April, assuring a good wheat harvest in parts that were backward. The barley harvest, after checks from rain and cold, has proceeded prosperously. On the other hand, agriculturists have had to face a steady rise in the price of wages, which have doubled, and in parts trebled, since the British occupation. Island labour is insufficient for its needs in harvest time, and is supplemented by temporary immigrants from Asia Minor. As much as 18 to 20 piastres (2s. to 2s. 2½d.) a day, plus food, is now paid to a labourer. Unfortunately, too, the majority of cultivators are in the hands of the money lender, who is as rapacious as any in the Levant. So that in view of many, the establishment of an agricultural bank, under Government auspices, is the most pressing need of Cyprus—a bank whose policy will tend to liberate the heavily indebted peasantry from their present bondage, and enable them to put more heart into their work, and to help to bring about agricultural progress.

Unhappily, too, locusts have appeared in certain areas, threatening no little damage and future trouble. Whether this is due not only to favourable climatic conditions, but also in some measure to failure in last year's campaign, is not yet clear. In 1913 experiments were made in the use of solutions of arsenite of soda against the locusts in their wingless and also in their later stages. It would be interesting to know exactly what were the results according to the records kept. In the absence of satisfactory conclusions, the locusts should, of course, be fought by the methods most effectively employed in the past, including purchase of the insect by weight.

General progress in agriculture is still disappointing. Irrigation works have not met with the success that was hoped for, and cannot be repeated in other parts of the island. Artesian borings have not yielded any promising results. They have been half-hearted and inadequate. Meantime, the lands of this too sparsely populated island are, under the present system, only cultivated in alternate years, the half lying fallow. Under happier conditions the productiveness of Cyprus could be immensely increased.

COMPANY MEETING.

BIBI EIBAT OIL CO., LTD.

Mr. Herbert Allen, presiding at the first annual general meeting of the Bibi Eibat Oil Company, Ltd., held on Tuesday, said he thought the evidence afforded by the report and accounts justified their faith in the reconstruction of the old company, which had brought such a speedy reward to the shareholders. The net profit for the first year's working had been £36,000. This company owned the entire share capital of a Russian company, which worked three oil plots at Bibi Eibat, leased from the Russian Government, and their income was made up largely from the dividend received on those shares. As time passed he hoped their other interests would equal or outweigh those at Bibi Eibat. For the first year under review the Russian company made a gross profit of about £49,000. After placing £1,500 to reserve, paying £2,500 Government tax on profits, and writing off for depreciation the liberal sum of £19,000, there remained a net balance of £26,315, which was remitted to the English company. Sundry additions brought up the total revenue of this company to £40,916, whilst the net profit, after meeting administration expenses, debenture charges, and other outgoings, was £32,764, or nearly 14 per cent. on the subscribed capital. They were going to write off the whole of the preliminary expenses, amounting to £11,218, by one effort instead of doing so over a period of years, a course from which they would feel the benefit in the future. This still left £21,526 for disposal, and the board recommended that £17,813 be applied to the payment of a dividend of 9d. per 10s. share, or 7½ per cent., and that £3,733 be carried forward. This, he thought they would agree, was not a bad start for their first year, but it should not be difficult to improve upon when the Russian business came to feel the benefit of the capital expenditure provided for under the scheme of reconstruction. The company possessed ample resources, the cash assets alone being over £100,000. One of their most prolific wells had been closed down for some time, to repair a damage, but it should be producing again in a few weeks' time. Their deep well No. 11, on plot 50, had now reached a depth of 2,926 ft., and in the ordinary course should be into the oil sands which it is designed to tap at a depth of about 430 sagenes 3,010 ft. This was a fountain source of a highly prolific character, and, though not hitherto tapped by this company, it had been well proved on neighbouring properties. With ordinary luck the completion of this well might easily revolutionise the fortunes of the company. The directors had authorised the sinking of two more new wells, namely, one on Plot 2 and one on Plot 48. The company had recently acquired several freehold properties at Adji-Cabul, a new field situated about thirteen miles from Baku, which was regarded with considerable favour by the most eminent geologists and petroleum engineers. They had also acquired, on highly favourable terms, both as to price and royalty, a zaiafka entitling them to 10 dessiatines, or 27 acres, of land on the new oilfield at Novo Aldi, a few miles south-east of the town of Grosny. The position of this property was exceptionally favourable, being within a few hundred yards of the prolific plot of the North Caucasian Company, and equally near the Belik and Tchermoieff estates, of which so much was heard just now. All these lands had been paid for, and, as regarded those at Novo Aldi, he thought they would have no difficulty in selling them at three or four times what they had cost. A good deal of correspondence had recently passed with the Government on the subject of royalties, and instead of paying a fixed royalty of 40 per cent. there was some talk of a sliding scale, ranging from 15 per cent. to 35 per cent., according to the price of crude oil. He purposely refrained from indulging in any cut-and-dried estimate of results for the current financial year, preferring to place the shareholders in possession of facts which would enable them to draw their own conclusions. The usual elements of speculation attending the business of oil production were well in evidence; but, on the other hand, they had several promising strings to their bow, their financial position was very sound, and the potentialities of biggish things for the company were not wanting.

On the motion of the Chairman, seconded by Mr. Richard Barnett, a dividend of 9d. per share, or 7½ per cent., was declared.

COMPANY NOTES.

Roumanian & Danube Steamship.

Our Bucharest Correspondent reports the establishment at that city of a new Roumanian Danube steamship company, the founders being:—The Banca Agricola, Banca Romaneasca, Banca Generale, Banca de Scont, Banca Commerciala, Banca de Credit, Banca Comertului of Craiova, Marmorosch Blank and Co., Kommerz and Discontobank of Berlin, and Fratelli Bach of Braila. The banks, it is understood, will provide sixty-six lighters, four grain elevators, and a tug; Marmorosch Blank and Co., the Banca de Scont, the Banca Comertului, and the Banca de Credit each subscribes 500,000 francs; and the total capital will be 15,000,000 francs. Subscription lists will shortly be opened for seven and a-half millions.

New Egyptian Company.

The report of the New Egyptian Co., Limited, to be submitted to the meeting on June 3, states that the profit and loss account for the year to December 31 shows, after providing debenture interest, depreciation and making conservative reserves, a profit of £17,694, to which must be added the sum of £1,485, being the balance of the profit and loss account for the previous twelve months, making a total credit balance of £19,179. The reserve for profits on sales of land has been increased from £16,249 to £20,925; the capital reserve from £33,005 to £40,398; sundry debtors for lands sold from £136,103 to £187,104, and the following new reserve has been created, "special reserve against realisation of Nashart Estate," £3,209. During 1914 and 1915 the annuities receivable in respect of sales of land concluded previous to December 31 last, including interest, amount to £22,934 and £34,631 respectively. The amount receivable during 1913 was £17,855. From the realised profits, the directors recommend the payment of a dividend of 5 per cent. (9d. per share).

Athens General Tramway.

The profit and loss account, including 1,683 drs. carried forward from last report, amounted to 437,484 drs. Working expenses, interest on mortgages and new construction absorbed 432,005 drs., leaving 5,479 drs. to be carried forward.

Balkan Bank (Sofia).

Net profits for the year amount to 759,630 leva, against 686,092 leva for 1912. The dividend will be maintained at 8½ per cent. on the capital of £240,000, and 36,999 leva will be carried forward.

National Bank of Greece.

Our Financial Correspondent in Athens informs us that at a meeting of shareholders of the National Bank of Greece, held on May 21 it was proposed by the Governor, Mr. Eutaxias, that the existing post of sub-governor should be abolished, and that in lieu thereof there should be appointed a second governor, with the same powers, responsibilities, duties, and remuneration as the existing governor. This proposal received the shareholders' sanction, and, on the proposal of Mr. Eutaxias, the meeting then elected Mr. Th. Zaimis, the former Prime Minister, and ex-High Commissioner in Crete, to the newly created post.

PERSIAN REVENUE INCREASE.

Under date of May 24, Reuter's Teheran correspondent reports that the gross amounts of the Persian Customs revenue for the year ended March 20, 1914, are as follows:—Northern revenues, £683,000, which is equivalent to an increase of 12 per cent. on the previous financial year; Southern revenues, £175,000, equivalent to an increase of 6 per cent. The total revenue thus amounted to £858,000, equivalent to an increase of 11 per cent.

Stock and Share Markets.

Bank Rate 3 per cent. (Jan. 29, 1914.)

SETTLING DAYS.

CONSOLS.
Tuesday, June 2.
STOCKS AND SHARES.
In Mining Shares the next carry-over is June 8.

Continuation Day.	Ticket Day.	Pay Day.
Tues., June 9.	Wed., June 10	Thurs., June 11

LONDON, May 28.

There are signs of improvement in the market. Dealers consider that the fall has been overdone. The intrinsic position, as far as Great Britain is concerned, is good. We have had three prosperous years, and large sums of money have been made. If the condition of Paris were better and if peace were declared in Mexico we might see something approaching a boom. We understand that the banking difficulties in Paris are in course of arrangement. Many new issues have been offered to the public. Dorman Long was over-subscribed, as it deserved to be. The Bobby preference were good, but the various Canadian offers require no notice. No one should invest any more in Canada at the present moment.

Monetary Stringency.

Money is always tight at the end of the month. However, June is certain to bring us a period of lower rates. The foreign demand for gold has died down, and although the Bank of France will probably strengthen her position during the next few weeks, she will draw her supplies from America. It seems a pretty safe thing to buy all gilt-edged securities.

Internationals Improve.

In the Foreign market the tone is much better. Russians have improved, and all Brazilian stocks have hardened, the rate of exchange having risen to 16d. Bulgarians are 85. Egyptian Unified have been dealt in at 99-99¼ but the arbitrage dealers complain bitterly that the rise in exchange has caused them very heavy losses. Greek Fours are 52. Hungarian Rentes made up at 82½. Japanese stocks have all hardened, and the bears have been buying back Perus. Turkish Unified are 82.

Rails Firmer.

Home Railway stocks have been firmer. Great Western have hardened to 114. The principal movement has been in the Underground stocks, it being supposed that under the new powers the directors will be able to divide up profits. Yankees are steady. Steels continue to rise, and the general tone is slightly more optimistic. Union Pacific and Southern Pacific have both improved their position. There is no new development in the Missouri Pacific squabble, but it seems certain that the Inter-State Commerce Commission will now grant an advance in rates. If this happens we shall see a smart rise.

Rubbers Depressed.

Plantation rubber is now under 2s. 4d., and this has had a depressing effect upon the Share market. Insiders think that the autumn crop from Brazil will be larger than anyone expects. The Rosehaugh report was extremely bad, the dividend having fallen from 36 per cent. to 6 per cent. Bukit Cloh paid a good dividend, and seems likely to pay 25 per cent. for the current year.

Oils Harden.

The Oil market is hard. There has been some steady buying of Shell on rather wild talk about a big increase in dividend. The Anglo-Persian deal with the Government has helped Burmah, which are hard at 4½. The report of this company was excellent. It is a pity that the Shell Company do not give us more information in regard to the Egyptian oilfields. It is rumoured that well No. 13 is now giving oil instead of oil and water, and this story has hardened Anglo-Egyptian B to 1 1-16, Oil Trusts are 4, Suez 6s. 9d., and Red Sea 1 3-16.

Mines Better.

There has been a small movement in Kaffirs, the leading shares being decidedly better. Rhodesians have also hardened. There has been very little business in Russians, but, on the whole, the tone in this market is better. In the Canadian market Kirklands have again been bid for, and insiders have been unloading.

Egyptians More Active.

The Egyptian market has certainly been much busier, although the amount of business doing has not been great. Paris has hardly sold any shares at all, and Egypt has also stopped unloading. The general condition of the country is excellent. Land and Mortgage Company of Egypt report shows a slight reduction in the available profits, and the dividend is reduced from 10 per cent. to 9 per cent., but the company is excellently managed, and holders should certainly keep their shares. The falling-off in the distribution is entirely due to lack of water and consequent failure of the rice crop. It is hardly possible that we shall get another low Nile. New Egyptian report is excellent, and there has been some steady buying of the shares all through the week round about 10s. 3d. Mr. Suares is careful only to buy land that he can sell again readily, and he is speedily building up the company and strengthening its position. The assets work out at 20s., and the shares are, therefore, ridiculously under-valued. National Banks are quoted 14½, with a fair amount of business doing during the whole week. There has been a certain amount of business done in Agriculturals at 4 11-16. Land Banks look cheap at 6⅜ ex the final dividend. Bank of Abyssinia are 5s. 3d. Delta Light Railway prefs. are quoted 8½, but very few shares have changed hands during the week. A few blocks of Delta Lands have changed hands at 8s. 9d. Beheras are slightly weaker at 9. Union Foncière have been done at 1¼. Alexandria Water are quoted 12⅜. The announcement of the dividend has had very little effect on the shares. Aboukir Lands have been offered, and at one time touched 21s. There has been quite a little business doing in United Lands at 1s. 9d. Sidi Salem remain nominally 5s. to 8s. Trusts are 5s. 1d. There is some buying of Salts reported, and the price is 14s. 9d. Markets are harder at 24s. ex dividend. Khedivial Mail prefs. have been idle all the week at just under 3⅞, the ordinary being quoted 10s. Daira Sanieh have been buyers at 3s. Associated Cotton Ginners are a nominal market, the price being ¾.

THE BULGARIAN LOAN.

(FROM OUR SPECIAL CORRESPONDENT.)

SOFIA, May 28.

Mr. Toncheff, the Minister of Finance, left here to-day by the Orient Express for Berlin in connection with the Bulgarian loan. He will possibly visit London subsequently.

MACEDONIAN SETTLEMENT.

(FROM OUR OWN TRADE CORRESPONDENT.)

ATHENS, May 23.

A noteworthy application has been submitted to the Ministry of National Finance by Greek emigrants in New York. They explain the desperate condition in which they find themselves, and request the Government to assist them to return to their native country, provided land is allotted to them for cultivation in Macedonia. They ask for fifty stremma (say, about seventeen acres) per family, and promise to pay 5 per cent. of the price in advance, and the balance by instalments. It seems that the Government is inclined to consider favourably the application of these people.

BUCHAREST FAILURES.

Our Bucharest Correspondent informs us that two large bankruptcies are reported on the Bucharest market, which have caused some sensation. The first is that of one of the leading agricultural machinery houses —Weil, Joseph, and Co. Liabilities are reckoned at about three million francs. The cause of this bankruptcy is undoubtedly the political occurrences of last year, when all payments were suspended. The second failure is that of the firm of E. A. Pucher for about half-a-million.

ALEXANDRIA NOTES.

(FROM OUR OWN CORRESPONDENT.)

ALEXANDRIA, May 22.

The Share Market.

Although the market has been fairly active, transactions are far from numerous. National and Agricultural Banks are neglected. Among the shares that are more sought after are Comptoir Financier et Commercial, New Egyptians, Port Said, Salk, and United Lands. Business in the futures market is almost nil. This is explained by the fact that speculators have practically deserted the share *corbeille* for the cotton market. On the other hand, banks are not at all keen on making advances on securities, which makes it impossible for speculators to buy stock that is not easily realisable.

The Zervudachi Failure.

There will shortly be sold by public auction 4,551 feddans of cultivable land at Cherbine (Gharbia) belonging to the Zervudachi estate. The upset price is £E275,341. Although the land is worth more than this figure, it is doubtful whether buyers will be found at present for such a large property. A new company should have been formed to acquire it, or else, it would seem, those responsible would have been well advised in breaking it up into small plots for sale to the fellaheen, with easy terms of payment. The receivers are also about to sell by auction 4,894 square pics of land at Alexandria, the upset price of which is £E3,009.

New Companies.

The following companies and partnerships have been registered:—

Grands Magasins Hannaux—a limited liability company with a capital of £100,000; objects, to carry on a general dry goods business in Alexandria

Bentata, Ebbo and Co.—capital, £E6,500; business, dealers in Manchester goods.

Hassan Madkow fils—capital, £E12,000; business, furniture dealers.

Hazan and Fua—capital, £E3,598; business, dealers in glassware, etc.

Ahmed Amin—capital, £E500; business, dealer in furniture

Kiriaco Antonello and Co.—capital, £E500; business, carriers.

Abdel Khalek Hassan el Guendi and Co.—capital, £E3,000; business, dealers in manufactured goods.

THE SUDAN LOAN.

The text of a Bill was issued on Saturday "to amend the schedule of the Government of the Sudan Loan Act, 1913." Under that Act the British Government guarantee 3½ per cent. interest per annum on a loan of £3,000,000 to be raised by the Government of the Sudan for the purposes set out in a schedule to the Act. This schedule allocated £1,000,000 to works for irrigating the Gezireh Plain and £1,600,000 for an extension of the Sudan Railway system. In the new Bill it is now proposed to devote £2,000,000 to the irrigation of the Gezireh Plain and only £800,000 to the extension of the Sudan Railway system. The balance of £200,000 is for "other irrigation works and contingencies," instead of £300,000, as proposed in 1913, for irrigating the Tokar and Kassala cotton-producing areas.

THE IMPERIAL BANK OF PERSIA

(Incorporated by Royal Charter, 1889).

CAPITAL (fully paid) - - -	£850 000
RESERVE - - - - -	£210,000
Reserve Liability of Shareholders -	£1,000,000

COOK'S NILE STEAMERS AND DAHABEAHS.

THOS. COOK & SON have unequalled facilities for Travellers visiting Egypt, now the premier Winter Resort of the World. Their fleet of **Fourteen Large Passenger Steamers** consists of the finest vessels on the Nile, specially built, luxuriously appointed throughout, and fitted with every modern convenience.

TOURIST SERVICE.—These large and handsomely-fitted Steel Steamers sail once a week from **Cairo** to **Assuan**, and twice a week from **Assiut** to **Assuan**, the sailings from **Cairo** beginning in November, and from **Assiut** in January.

EXPRESS SERVICE.—The Express Steamers also leave **Cairo** twice a week, the Friday departures commencing in November, and the Monday departures in December.

There is thus a Service of **Five Cook's Steamers per week** ascending the Nile to the **First Cataract** during the Season—three from **Cairo** and two from **Assiut**—calling at all points of interest on the Nile, in connection with which complete arrangements for sightseeing and excursions are made, enabling Travellers to visit, to the best advantage, all the famous

PYRAMIDS, TEMPLES, TOMBS, RUINED CITIES, etc.

SECOND CATARACT SERVICE.—In connection with the above Services there is also a Service twice weekly by First-class Steamer from the **First** to the **Second Cataract**, with through bookings to **Khartoum, the Sudan, and Uganda.**

PRIVATE STEAMERS AND DAHABEAHS. — **Thos. Cook & Son** have several small Steamers for charter at moderate rates, specially adapted to the requirements of Families, Private Parties, Sporting Parties, etc., accommodating from eight to sixteen passengers, with competent crews, and thoroughly equipped. Also a large Fleet of First-class Sailing Dahabeahs, the best on the Nile.

P & O Express Service via Brindisi.

From Charing Cross 9 p.m. every Friday.

LONDON (via Brindisi) **to EGYPT in 4½ days.**
LONDON (via Marseilles) **to EGYPT in 5 days.**
LONDON (by Sea) **to EGYPT in 12 days.**

For information as to general passage rates, descriptive handbooks and all information, apply at the Offices, P. & O. S. N. Company, 122, Leadenhall Street, E.C.; Northumberland Avenue, W.C., London.

Khedivial Mail Line.

FIRST-CLASS BRITISH MAIL STEAMERS.

GREECE-TURKEY MAIL SERVICE.

Shortest and most picturesque sea passage between Europe and Egypt. Fast steamers in connection with the Orient express train-de-luxe from Paris, Ostend, Vienna, Berlin, and Budapest leave Constantinople every Tuesday afternoon for Smyrna, Pirœus and Alexandria. Return from Alexandria every Wednesday afternoon via same ports.

Service between TURKEY, SYRIA & EGYPT.

Fast steamers leave Constantinople fortnightly on Saturdays for Gallipoli, Dardenelles, Mitylene, Smyrna, Chios, Rhodes, Mersina, Alexandretta, Tripoli, Beyrouth, Caiffa, Jaffa (for Jerusalem), Port Said and Alexandria. The voyage takes ten days.

Departure from Alexandria fortnightly on Saturdays for above ports, and WEEKLY on Saturdays from Alexandria, and on Sundays from Port Said, for all Holy Land and Syrian Ports to Mersina.

CYPRUS SERVICE.

Fast steamers weekly from Alexandria on Tuesday afternoons, and from Port Said on Wednesday mornings, for Famagusta, Larnaca, Limassol and Paphos.

SUDAN MAIL SERVICE.

Steamers leave Suez Docks on Wednesdays, at 5 p.m., for Port Sudan, connecting there with express train to Khartoum, at 1 p.m., on Saturdays. Calls made at Suakim as required.

RED SEA COASTING MAIL SERVICE.

Steamers from Suez Docks every Monday evening, at 5 p.m., for Jeddah, calling one week at Tor, El-Wedj, Yambo and Jeddah; and in the following week at Jeddah, Suakim, Massowah, Hodeidah, and Aden.

For information apply to the Company's London Office, 37, Bishopsgate, or at Alexandria, Constantinople and Suez. Passages may be booked at Company's Agencies at all ports called at, or from the principal Tourist Agencies.

NOTES OF THE WEEK.

At no time during the current year has the situation in Albania been satisfactory, but at the present moment the competition among those who seem set upon aggravating that situation is phenomenal. The impression conveyed to the outside world of the existing state of affairs in Albania is that of a pandemonium in which, from the highest quarters down to the irresponsible peasants swelling the ranks of the so-called insurgents, through the whole gamut of Cabinet Ministers, foreign representatives, gendarmerie officers, and the Prince's personal attendants, everyone's voice is raised to push his own nostrum for the country's difficulties and to decry all other remedies. In the background stand Austria-Hungary and Italy, conscious that the position is intolerable, but unwilling to take the first step necessary towards giving the new State a fair chance of working out its own salvation. That step would be to withdraw their representatives from Albania for the present or to prohibit them from interfering in the domestic affairs of the country. Prince William's Court Chamberlain, now on a visit to Germany, is credited with the statement that open antagonism prevails between the two Powers, which have never been able to work together in Durazzo. But it did not require this blunt assertion to enable the observer of recent events to realise that, directly or indirectly, the jealousies of the two Powers have been responsible for some at least, if not most, of Albania's troubles.

The immediate concern of Albania, however, is not to waste time in mutual recriminations, but to set about to evolve order out of chaos. In view of the multiplicity of interests involved, the task is difficult enough, but, unless it is grappled with at once, the present trouble in the country may give rise to a conflagration that will not be confined within the newly delimited frontiers of Albania. It is fortunate for Prince William and his Government that the chaos existing in the half-fledged State is reproduced in the ranks of the insurgents. If the latter had been led by a master-mind, a new chapter in Albanian history might have been opened with the advance on Durazzo. As things are, the dramatic incidents of that week may possibly be succeeded by an anti-climax while the insurgents are wrangling among themselves. The situation, however, is too obscure to justify any prediction. If the insurgents are able to compose their differences before the Government is prepared for definite action, the insurrectionary movement has already obtained sufficient start to prove formidable. The original grievance appears to have had a religious basis; it was felt that Prince William's Government was indifferent or even hostile to Moslem interests. Closer acquaintance with the condition of things in panic-stricken Durazzo led the insurgents to formulate fresh demands. They require the abdication of Prince William and the restoration of Turkish suzerainty. It is evident that intrigue has been on foot in Albania, and has found serviceable soil in the failure of the new Government to respond to the people's expectations. The International Commission of Control is endeavouring to reason with the insurgents, and, thanks to the differences among the latter, it may be able to restore them to a more complacent frame of mind, if the Government's efforts to raise a reliable military force have in the meantime been successful. The only alternative to the employment of international troops is to play off one section of Albanians against the other. The process is not conducive to the future cohesion of the nation, but, in view of the present temper of Austria-Hungary and Italy, it may be preferable to the introduction of foreign troops.

The fact would still remain that the Albanian Government has been to blame for giving offence to Mohammedan opinion in the country. It is a mistake, however, that can be rectified, and quite easily if Prince William would undertake to assert himself in the affairs of his adopted State. The suggestion has been repeatedly made in these columns, and has been widely echoed. Too much has been heard of individual Ministers or of the Cabinet. At first it was Essad Pasha who was all-powerful. No sooner has he been deported than the name of Prenk Bib Doda springs into prominence. He speaks for the Catholics of Northern Albania, and, as he has not yet accepted the portfolio for Foreign Affairs offered to him, it has been considered necessary to send the new Minister of Finance to Alessio to consult with him. We cannot help feeling that Albania is in urgent need of a little less constitutionalism and a little more personal government. The latter it cannot have until Prince William emerges from his comparative seclusion and takes command. There will be plenty of time for the new ruler to display the virtues of a strictly Constitutional monarch when Albania has settled down to an ordered existence. At the present moment the people

Digitized by Google

who are acquainted only with autocratic government are not being encouraged to look beyond the personal domination of their chiefs to a higher loyalty, which would bring Christians and Moslems together in a joint effort for the good of Albania as a whole.

While Ghalib Bey, the Turkish Minister in Athens, has gone to Macedonia to inquire into the complaints brought by Moslems against the Greek authorities, a Commission, composed of military and civilian officials, has left Constantinople for Thrace to investigate the charge that Turkish officials are responsible for the enforced emigration of the bulk of the Greek inhabitants. At the same time a letter to *The Times* from a correspondent near the Dardanelles throws a lurid light on the policy adopted in the various Balkan States, with the object of securing a homogeneous population in the "new territories." According to this informant, Greek villages in the Troad have been invaded by Turkish refugees from Macedonia, who have taken possession of the houses and property of the Greek villagers, and turned the latter adrift, with or without violence. To any remonstrance they retort that the Greeks are at liberty to proceed to Macedonia and to take over the houses and lands from which the Turks themselves had been ejected. If it could be proved that any one State had refrained from this policy of compulsory emigration, a strong case might be urged against the Governments which have acquiesced in it. But it would seem to be the only method of solving the problem of an alien population that commends itself to Balkan statesmanship. In Eastern Thrace military exigencies seem to have prompted the Turks to indulge in the policy on a larger scale than their neighbours, their aim being to interpose a purely Turkish screen between the capital and potential enemies. In certain parts of the coast of Asia Minor the Turkish inhabitants have so far fallen in with official views as not only to eject Greek villagers, but also to dismiss their Greek partners in any business or pursuit, while confiscating for their own benefits the whole of any property that may have been held jointly in the undertaking. Any tale that the Greeks may be able to tell of Turkish misdeeds will find an echo in Bulgarian complaints against Greeks and Servians, and so on until the circle is complete. Apart from the moral aspect, the policy is a misguided one; but, as far as the actual victims are concerned, it is difficult to know whether they are not better off under one great completed act of injustice than in being subjected to a lifetime of exaction, interference, and oppression.

The Roumanians have good reason to be proud of the Emperor Nicholas's decision to visit King Charles in Bucharest. It will be the first time that a Tsar of all the Russias has paid a visit of courtesy to the ruler of a Balkan or Near Eastern State, and incidentally the first time that the Roumanian King and a Russian Emperor have met since the days when Alexander II. passed through Roumania in his advance against the Turks and on his return from the war. Memories of the former meeting have been associated with the subsequent loss to Roumania of Bessarabia. This time King Charles will be able to welcome in the person of the Emperor Nicholas the monarch whose moral support proved most valuable in the sequence of events that led up to the acquisition of Roumania's new territory. It may even be that Roumanian hopes will be raised of a restoration of some of the territory across the Pruth which contains a large Roumanian population. If Russia wishes to clinch the policy for which the Imperial visit stands, she will not hesitate to make this sacrifice to Roumanian feeling. Be that as it may, the visit of the Tsar to Bucharest places the coping-stone on the edifice which Roumanian statesmanship and Roumania's military prowess have built up for the country. It is at once a personal triumph for King Charles and a national triumph for his subjects.

In Austria-Hungary the Tsar's visit to Bucharest is regarded with a chagrin which no attempt is made to conceal. Circumstances have driven the Dual Monarchy and Roumania apart since the outbreak of the Balkan War, and it is felt that the Tsar's action will serve to create a permanent breach. But while Roumania cannot fail to be flattered by the honour paid her, the strengthening of the ties with Russia does not necessarily imply a corresponding degree of antagonism to Austria-Hungary. The Roumanian Government is engaged upon delicate negotiations with the Dual Monarchy regarding the position of the Roumans of Transsylvania, and it will welcome any additional lever for the process of bargaining. But it is far from seeking at the present moment any cause for a quarrel with Austria-Hungary, and if the Russian visit is prejudicial to the relations between Vienna and Bucharest, the fault will not lie with the latter capital. On the other hand, not the least significance of the Tsar's visit is that it provides an additional factor for peace in the Balkans. By just as much as Roumania's prestige is enhanced will her voice carry more weight in Near Eastern councils. That voice, as we know, is likely only to be raised for peace, and with the certainty of Russian backing Roumania has a firm hold on the doors of the Balkan temple of Janus.

Readers of THE NEAR EAST have little reason to be under any illusion regarding the state of affairs in Azerbaijan, but each successive step taken by Russia to emphasise the elimination from that province of the Persian central authority comes as a fresh shock. Shuja-ed-Dowleh, the Governor-General, who prefers to be a creature of the Russian Consul-General to upholding the dignity of his own Government, has recently taken over into his own hands the collection of taxes, and the Belgian revenue officials have been sent about their business. In this action it appears he has secured the support of the Russian authorities, who refuse to support the protests of the Treasury officials. The Persian Government, it is stated, is about to make an appeal to St. Petersburg, in the hope that the Russian Government, which finds it convenient to turn a blind eye to what its officials do in Persia, will feel unable to sanction a particularly indefensible line of action when it is actually brought to its notice. So far, however, Persian overtures in this direction have not met with success, as Russia has refused to accept the Minister who was to state the Persian case in St. Petersburg.

In the meantime M. Mornard, the Belgian Treasurer-General, who profited by Russian antagonism to his American predecessor, but has found it difficult to follow with any degree of gracefulness the Russian triumphal car, has been accused in a Teheran paper of connivance with the alienation of the revenue of Azerbaijan. As the article, according to *The Times* correspondent, is clearly inspired, M. Mornard has informed the Persian Government that, unless the imputations are denied, the Treasury staff will cease work. Unless some other Treasury official is as ready for M. Mornard's post as M. Mornard was to succeed Mr. Shuster, it is to be hoped that the incident will have the effect of raising the whole question of the situation in Azerbaijan. The fiction that Russia is still acting for the best in the interests of Persia to which she pledged herself in the Convention of 1907 can hardly be maintained much longer by the British Government. Great Britain's cynical indifference to Persia's fate promises to form the worst chapter in the whole history of British foreign policy.

The report sent by our Cairo correspondent this week of the proceedings in the Legislative Assembly gives special significance to a passage in Lord Kitchener's report, in which he warned the delegates against "unreasonable obstruction and futile attempts to extend their own personal importance." It is unfortunate that Saad Pasha Zaghlul should have belied the favourable expectations formed of him. The type is not an uncommon one in the evolution of Oriental people, and his prominence in the Egyptian Legislative Assembly is, therefore, not so much a matter of surprise as that his authority to speak for the elected delegates should be challenged at this early stage by one of his own party.

CONSTANTINOPLE LETTER.

(From Our Own Correspondent.)

Constantinople, May 28.

Patriarch's Appeal to the Sultan.

The Œcumenical Patriarch has appealed to the Sultan. This is the most important event of the week, since in the appeal his Holiness Germanos V. hints that if Greek grievances are not remedied he may find that "the presence of the Œcumenical Patriarch at Constantinople lacks justification." In that case the Patriarch might conceivably repair to Mount Athos if the Turkish Government permitted him to leave the country, but it is more probable that he would attempt to retire to Russia, the Head of the Orthodox world. The Turkish Government is at present somewhat inclined to take the line that if the Patriarch does leave Constantinople Turkey will be no worse, but calmer consideration should show the Turks that such an event might have serious consequences. In the first place the Greek community, which has on the whole been kept in hand by the Patriarchate, might—probably would—fall into the hands of Hellenic agitators anxious to fish in troubled waters. In the second place the improvement in the relations between Russia and Turkey, which has been very marked of late, might cease to impress foreign observers. Russia is essentially a religious country, and the real or alleged sufferings of the Orthodox have never failed to move the Russian masses who have the last word in Government. The Turk in the same way waxes eloquent over the sufferings of non-Turkish Moslems under foreign rule. These sufferings may be less serious by far than he believes, but he is none the less impressed by tales concerning them; and the writer has a strong recollection of the excitement caused at a meeting held at Constantinople by an Indian agitator, who averred—there being none to disprove his allegations—that the Moslems of India were foully oppressed, and of the indignation aroused by a totally unfounded statement made by a local journal that British bluejackets engaged in punitive operations in the Persian Gulf had indulged in a carnival of murder and rape. So it is with the Russian, and the Turks, now that they are on distinctly better terms with their mighty neighbour, would be well advised to "take a rest," as far as the Thracian Greeks are concerned. Over 60,000 of these people have left Thrace and their places have been taken by Moslem colonists, and one wonders whether it is worth while going further in the Turcification of the frontier province.

The Moslems of Macedonia.

There has been a good deal of talk of "atrocities" committed by the Greeks at the expense of Moslems in "Greater Greece," and the writer has been at pains to verify some of the stories which he has heard. Thus far he has been unable to obtain confirmation of most of the graver charges brought against the Greeks. Political murders have in two or three cases turned out to be the commercial operations of brigands who have since added Christians to their bag, and the horrible stories published in a local Jewish paper seem to the writer to require to be taken with a great deal of salt, since in Turkey and the regions recently Turkish there is nothing that the Jew will not believe against a Greek and a Greek against a Jew. If a child disappears in Constantinople or Salonika, ten to one some Greek will start the ritual murder theory. If a fire breaks out some officious Jew will probably tell the Turk that Greek incendiaries were the cause.

The Greek officials from Athens seem, on the whole, to have behaved well; but there can be no doubt that some of the minor Greek officials recruited in Macedonia and a large section of the Greek population cannot refrain from pinpricks, and from what might best be described by the schoolboy word "ragging." Bulgar and Moslem have both suffered much at their hands. The Greek, be it remembered, has more initiative than the Turk. The latter has usually refrained from worrying his neighbours unless a *mot d'ordre* has been issued; the former, less disciplined and more impetuous, cannot easily be restrained even by a Venizelos. Witness the Epirote imbroglio. The situation of the Moslems in New Servia is bad. Leaving the "Old Servian" Albanians out of consideration, as folk who made life so unpleasant for the Serb that they could not expect much kindness from their conquerors, the fact remains that the Moslems (and the Bulgars) of Monastir are still suffering from official and unofficial exactions, and often from real cruelty. Little has been done to relieve distress; forced labour is imposed in certain districts on all males of from ten to over sixty years, who have to find their own food and tools. The penalty for disobedience is a fine of four dinars a day, sometimes accompanied by a beating. These exactions are levied on people whose villages have been impoverished by two destructive wars. Further, there are very ugly tales of the misbehaviour of officials and in some instances of soldiers. These last one cannot check, but that the "under dog" in New Servia is leading a very unhappy existence unfortunately admits of no doubt at all.

Progress in New Bulgaria.

From New Bulgaria one hears quite a different tale. There is no more talk of Pomak grievances; the Turks of Gumuljina have and use the franchise; the elections have not been "made"; and the Moslem now holds the balance between the parties in Bulgaria. Something has been done of late, though not very willingly, it must be admitted, to remedy the more crying grievances of the Greeks, and it would seem that the Bulgarian Government is now finding a certain amount of work for the many unemployed in the new territory. Altogether, it must be admitted that the Bulgars come best out of the comparison between the new masters of the Balkans, or so at least it seems to us here. In this connection I may add that Turks have recently admitted to me and other foreigners that there was "some exaggeration" in the accounts of Bulgarian atrocities in Thrace, to which so much prominence was given when the reoccupation of Adrianople was effected, and that foreign visitors to Thrace report that most of the destruction of houses of which complaints were made was necessary. The Bulgars, and on occasion the retreating Turks, pulled down houses to get at the timber rather than perish of cold, for Thrace is a thoroughly deforested region, and men in the open need fires in winter.

The Tashkishla Barracks Fire.

The fire at Tashkishla Barracks has had a sad sequel. Three of the German sailors of the "Goeben" and a Turkish fireman have died of their injuries. The funeral of the German sailors was attended by many high military and civil dignitaries, and the foreign colonies at Constantinople, who had learned to like and to respect the smart and admirably disciplined German sailors during the "Goeben's" long stay here in 1912-1913, were well represented at the sad ceremony. The injured men appear to have died as much from poisoning by cordite fumes as from the burns and other injuries which they received when the ceilings of the barracks fell in on them. The Turkish Press has spoken very feelingly on the subject, and the words of one of the wounded Germans to a Turkish military officer of high rank who visited him in hospital and condoled with him on his injuries, "I should do it again, Herr General, every time," have been quoted with admiring approval.

LETTER FROM CAIRO.

(From Our Own Correspondent.)

Cairo, May 28.

Lord Kitchener in the Behera.

On his way back from Alexandria last week Lord Kitchener, in the company of Mr. Macdonald, visited the proposed pumping station at Mex, and the scene of the irrigation and drainage works in the Behera. He also inspected the site of the model settlements in this province, which it is intended to distribute next year to fellaheen in a similar manner to those at Biala and Shalma. On Friday last the British Agent, accompanied by Mr. Storrs, motored to Galiub, where he inspected the Ankylostomiasis Hospital, which was opened by him and the Khedive last winter. He then drove on to Toukh and inaugurated another and similar institution, which Ibrahim Pasha Murad, one of the richest and largest fellah landowners, has erected and equipped at his own expense. Murad Pasha entertained his lordship and a few notables to luncheon afterwards.

The Report and the Capitulations.

The Annual Report was published here on Monday morning. So far the local Press has had little time to comment on its contents, and I shall next week be better able to analyse public opinion on it. At the same time I do not think that the report will evoke much criticism one way or the other this year. One point has already been seized upon, however, and erroneous deductions have been made therefrom. It occurs at the end of the "Introduction," where, in talking of the capitulations, Lord Kitchener writes that "it may be hoped that a settlement of the question will not now be much longer delayed." This, coupled with the rumours circulated in the Home Press and the statement made locally that negotiations have been started for the renewal of the Mixed Tribunals for two years, instead of the usual quinquennial period, as from February 1 next, has been seized upon as an indication that the long-talked-of modification of Egypt's international status has entered the realm of practical politics, that in fact it will come to pass before 1917. I have, however, the best authority for stating that this deduction is, to say the least, distinctly premature; that there is no question of renewing the mandate of the Mixed Tribunals for only two years, and that no steps have as yet been taken for the renewal of that mandate. This latter fact alone affords conclusive proof that the above-mentioned reform is not imminent, and that no changes whatsoever are contemplated, for usually when any reforms have been necessary the negotiations have had to be opened at least a year ahead, owing to the dilatory manner in which the Chancelleries deal with such matters.

The Legislative Assembly and the Wakfs.

The Legislative Assembly, or, perhaps, I ought to say a certain section of it, is distinguishing itself in a most unfortunate manner. As I wrote you last week, the Wakfs Budget came up for discussion on Thursday, but before the Commission's Report was examined Saad Pasha Zaghlul rose and raised the question of the legality of the creation of the Ministry of Wakfs. In a long and vigorous speech he criticised the Government and accused it of having violated the Organic Law by not submitting to the Assembly the decree constituting the new portfolio. His contention was that the Organic Law was promulgated on July 21, from which date the Assembly, theoretically speaking, existed, and that until it assembled the Government had no right to introduce any new measures, such as the one in question. The elected Vice-President moved that the examination of the Wakfs Budget be postponed until the Government either submitted the decree to the Assembly or furnished full explanations of its actions. A somewhat heated debate ensued, and late in the evening the sitting was adjourned until the following Saturday.

On that day the Prime Minister, who had been confined to his bed for some time with an abscess on his leg, came down to the House specially in order to reply to the question raised at the preceding sitting. His speech most ably refuted Saad Pasha's contentions. Briefly, his arguments were the following: Between the promulgation of the Organic Law and the inauguration of the Assembly the Khedive alone had the right to introduce legislation, and the fact that the elections took place in December, instead of earlier, did not alter matters, since the Khedive had the right to fix the elections whenever he liked. Moreover, even if the Assembly had been sitting, the Government would not have submitted the decree to it, seeing that the transformation of the Wakfs Administration, which was under the Khedive, into a Ministry constituted a gift made by his Highness, which the Assembly could not criticise, and that the Executive had the right to create Ministries without consulting Parliament or the Assembly, as the case might be, as was done in France in connection with the creation of the Ministries of Labour and of Posts and Telegraphs. In conclusion, the Premier insisted on the Wakfs Budget being examined without any further delay and "without any systematic opposition, which can only have a vexatious object." (He might have added that the creation of the Wakfs Ministry had been sanctioned by the Caliph, whose decision should surely not be contested by devout Moslems.)

Saad Pasha replied in an exceedingly long speech, in which he was followed by Me. Abdel Aziz Bey Fahmy, both of them trying to refute the Prime Minister's arguments. After Sarwat Pasha, Minister of Justice, had emphasised in an eloquent manner the points made by his chief, there came the surprise of the debate, when one of the elected members, Zacharia Namek Effendi, made a speech, in which he most spiritedly attacked Saad Pasha, who, he said, represented no one, and whose attitude merely tended uselessly to excite public feeling, and was dragging the Assembly to the edge of a dangerous precipice. After further desultory discussion, the Assembly accepted the Government's explanation by forty-nine votes to nineteen, and agreed to examine the Budget next day.

Thus two whole days have been wasted in a futile and purposeless discussion at the very juncture when the Assembly can ill afford to devote time to other than the many important projects that still await its approval. For this we have solely to thank Saad Pasha Zaghlul, who once again seized the opportunity of giving proof of his eloquence, but by contrast confirmed the impression gained during the preceding debates that he lacks all sense of proportion and foresight. *El Mokattam*, commenting on this debate, makes the very apt remark that the Assembly has become a sort of literary academy and debating society; that no doubt a great deal of satisfaction may be derived from the resultant debates by certain sections of the public, but that the Assembly was formed to attain other, more useful objects. There was no need to make an *affaire d'état* of the question at issue. All that was necessary, if the delegates really deemed any further remark necessary—a protest had been lodged on the subject at the beginning of the session—was to ask the Government its reasons for acting as it did, and to hear its reply. The matter would then have ended with the wasting of but half an hour instead of two whole sittings.

The debate has, however, had one satisfactory feature—it has shown that the rank and file are getting restive at the attitude that Saad Pasha Zaghlul and one or two of his friends are adopting towards it and all the measures brought before the Assembly. Hitherto it had been believed that the influence of the elected Vice-President over his fellow-delegates was paramount, and the applause from the gallery, which has invariably greeted his utterances, and which was suspiciously marked during this debate, has always seemed to impress the House. But from the courageous attack made by Namek Effendi it is evident that Saad Pasha's reiterated professions of disinterestedness and of solicitude for his country's rights no longer carry weight, and that the fact is slowly dawn-

ing on the delegates that he may have his own axe to grind. That after this speech the Government should obtain a majority of thirty in a House of sixty-nine certainly is very significant of the general feeling of the members, and shows that if only one or two of the more clear-minded delegates would take their courage in both hands, and speak out, the deliberations of the Assembly would assume a healthier and more useful tone. The way has been shown, and it is to be hoped that the good example set will be followed, and that Saad Pasha, who has undoubtedly many good qualities calculated to make him of great use to the Assembly, will realise the mistake of his tactics ere it is too late.

The Sudan.

Sir Rudolf von Slatin Pasha, the Inspector-General of the Sudan, has arrived in Cairo, and leaves to-day for Europe. I managed to obtain a few words with him yesterday morning, and he assured me that the state of affairs in the Sudan had been greatly exaggerated. The bad rains and low Nile had, of course, affected the country, but there was no such thing as famine or anything approaching it.

SUEZ NOTES.

(From Our Own Correspondent.)

Suez, May 26.

Summer has commenced. The hot season was inaugurated last week by a succession of hot days, felt the more by reason of the cool spell preceding. From 85 deg. to 105 deg. shade temperature is a fair jump, even for Suez, where the maximum and minimum show greater differences than most towns hereabout. The annual exodus homewards has already commenced, and the dog days will be dull to those remaining.

Social life has been fairly brisk of late, however, what with an amateur Pierrot entertainment and golf competitions. The former event was contributed by musical and histrionic members of the Eastern Telegraph Company mess, and achieved a great success. The Bush Golf Cup competition, an annual event, attracted a fair number of entries. Of the men, Mr. Robinson, playing from scratch, was successful, and Mrs. F. D. Davidson, also a scratch player, gained the Ladies' Cup. The competition was played under handicap, and provided close finishes in the men's division. Port Said sent down a golfing team to play return matches, and Suez managed to avenge the defeat sustained by the team sent to Port Said some weeks ago.

It is with much regret that the sudden decease of Mr. H. B. Bush, British Pro-Consul, has to be recorded. He had been ill for some little time, but no serious result was anticipated. The deceased was a prominent figure in all branches of public activity, and is sincerely mourned by a large number of relations and friends.

A VICTIM OF SUNSTROKE.

(From Our Own Correspondent.)

Port Said, May 23.

A distressing tragedy occurred on Tuesday last at one of the principal hotels in Port Said. An Austrian subject, Mr. Oscar Vojnieh, engaged a room, and, locking the door, shot himself in the head with a revolver. He had been on a shooting expedition in East Africa, where it is thought he had contracted sunstroke. Embarking at Mombasa in the s.s. "Berbera," it was noticed on board that his conduct was very eccentric. He appeared to suspect his fellow passengers, and on landing at Suez sent the Port Said police a long telegram to the effect that he was being shadowed and that his life was in danger.

The unfortunate man was taken to the Egyptian Hospital, where he expired the following day. He is said to have been well connected and personally acquainted with several distinguished Anglo-Egyptians.

EGYPT AND THE SUDAN.

EXTRACTS FROM LORD KITCHENER'S REPORT.—II.

Irrigation.

The report testifies to the great value of the heightened Assuan dam. Without the extra amount stored by the raising of the dam the total quantity of water available "would have been totally inadequate to meet requirements," owing to the abnormally low Nile.

The thickening and heightening of the dam has thus been entirely justified in the first year after its completion, and the fact that even further storage room is necessary to meet abnormal years and future development in new areas has been fully demonstrated.

The emptying of the reservoir began on March 10, and continued until the abnormally late date of July 31, a total period of 144 days, whereas in ordinary years the period should not usually exceed 100 days. However, with the exception of a few days in the month of April, when demand is generally heavy for cotton sowings, no great difficulty was experienced in water distribution until the beginning of July.

As to the future, the report states:—

The low flood has had a further serious consequence, as it is being followed by much lower levels than are usual in the river during the spring season of the year, an indication that the summer supply will also be much less than normal. The possibility of having to make provision for such an event was indicated in my last report, and the suggestion was made that the construction of a dam on the White Nile, somewhere in the vicinity of Gebel Auli, would probably be necessary. So far as the summer supply of Egypt is concerned this dam would not, when the possible development of Lower Egypt as well as the conversion of the remaining basins in Upper Egypt is taken into account, be adequate of itself to supply all the water required, though it is certain to meet all requirements for many years to come. Moreover, the erection of a dam as proposed might not be justifiable simply as a means of forming a storage reservoir to increase the Egyptian summer supply, since the true solution of this latter problem apparently would be to deal with the river as it flows from the great lakes, in order to produce a steady and adequate flow. But the site selected has the important advantage of permitting some control of excessive flood waves passing down the main Nile. Therefore the erection of a dam for the double purpose of control of excessive floods and of incidental use as a storage reservoir is very thoroughly justified, but its construction will not mean that resort will never be made to regulation on the Great Lakes as a final settlement of the problem of Egypt's summer water when all available areas are being developed. As a result of borings on the proposed site it was found that comparatively good rock can be reached at a reasonable depth right across the river bed. Detailed plans have yet to be prepared, but it is expected that the whole work will cost well under £1,000,000.

New Works.

Under the heading of "New Irrigation Works," some particulars are given of the Central Gharbieh Drainage Scheme and the Beheira Drainage Scheme. Concerning the former it is stated that—

1,373,340 cubic metres of earthwork have been excavated by hand in the remodelling of drains in this area during the course of the year. Practically all this work was done in the top layer of each drain, none of them being lowered to the eventual section. Further excavation, being under water, will be effected at a much cheaper rate by dredging. The thirteen dredgers already in operation completed 592,000 cubic metres of excavation during the year.

The contract for the Salahib masonry group, including a large syphon under the main drain of the system and a lock from the Bahr Tira into this drain, has been commenced and is making good progress. . . . The systematic piping of all drains and canals with reinforced concrete pipes is being carried out as far as possible in conjunction with the main earthwork.

In addition to the above work on the drainage system, the project for the subsequent irrigation of the area to be drained is being studied, so that the remodelling of the irrigation system may immediately follow the completion of the drainage. The total expenditure during the year was £E138,555, and the total spent up to date amounts to £E182,661.

Of the Beheira scheme:—

1,400,000 cubic metres of earthwork were excavated by hand last summer on the remodelling of the drains; 34 new bridges were erected, and 55 syphons, aqueducts, etc., were altered. Six dredgers, of a capacity of about 800 cubic metres per day of 10 hours, working in the Umum, Sharashra, and Nubaria drains, excavated 738,000 cubic metres. In order to assist these machines, the large 24-in. hydraulic dredger, having a capacity of about 7,000 cubic metres per day of 10 hours, was removed from the Sudan to Alexandria about the middle of April. Operations for re-erection commenced at once. The hull was launched at the end of August and the dredger is now almost ready.

The outlet channel from the pumps at Mex has been completed for three-quarters of its final length of 960 metres. The total expenditure during the year was £E128,650. In addition to the above works, the study of both drainage and irrigation projects in this area has been vigorously prosecuted.

BULGARIA REDIVIVA

(From Our Special Correspondent.)

Sofia, May 31.

Life, vigour, and energetic resolve are the keynote to the character of Bulgaria the New. A grave fault was committed—it seems but yesterday that the second Balkan War broke out—shattering for years to come the hopes and ambitions of those who sought to create a confederation of the Balkan States. To-day that fault, or series of errors leading up to that fault, is freely discussed, and names, both of people and States, are bandied about. There is much bitterness, but it is not the bitterness of those who are either despondent or resigned. For the Bulgarian there is no Kismet; there may be a written word, but if it is contrary to the national consciousness it must be effaced. The people must work, strive, and labour to that end; the wrong done must be wiped out. How? There is no thought how it will be done, whether by bayonet or compromise, but in the public mind there is no denying that it must be done. This shows the virility of the Bulgar, his self-consciousness, and his determination. He may have to wait years or more, but the painful situation created by the force of circumstances will never be forgotten. How, eventually, the memory of 1913 will be erased belongs to the future; the Bulgar, though continually dreaming of what will happen, lives in the present, which can be defined as a period of preparation and invigoration.

"We must be strong, so strong that our neighbours seek our aid and friendship; in return for which they will gladly recompense us for our losses in 1913." And my representative Bulgar mumbled words which sounded like Macedonia and the Dobruja.

"Our relations to the Powers are cordial," said the Prime Minister the other day in the Sobranje, and he added that they were friendly to Turkey, more cordial to Roumania, improving with Greece, and correct towards Servia. The anti-climax is significant. Noteworthy likewise were the rumours reproduced on the same day in the semi-official press to the effect that Talaat Bey's visit to Bucharest is not devoid of political significance, and that there may eventually be a *rapprochement* between the three eastern Balkan States bordering on the Black Sea. There is, of course, the question of the Dobruja, but its elimination by means of compromise need perhaps not be despaired of. Macedonia would then remain —the Alsace-Lorraine of the Balkans—the bone of contention between Bulgaria and her western neighbours. "Three members of the present Cabinet," Dr. Radoslavoff, the Prime Minister and Foreign Secretary, told me, "are Macedonians, and at least thirty deputies in the Sobranje are Macedonians."

But the shadows of Austria and Russia must never be lost sight of in the Balkans. Servia's only too natural bitterness against Austria was analysed in these columns a few weeks ago; in Bulgaria the bitterness against Russia is equally intense. "If Russia had said a word," it is argued, "Roumania would never have ventured on Bulgarian territory." I do not wish to discuss the accuracy or inaccuracy of this argument, but its effect can easily be established—namely, that the people of Bulgaria are now distinctly anti-Russian. Naturally enough, the Government, on the other hand, observes correct relations with all the Powers.

"We are not favouring either one group of Powers or the other," was the tenour of Dr. Radoslavoff's conversation with me; "we are pursuing a national policy, a purely national policy"—words which were amplified later on in the day in the Sobranje in such a way as to imply that the national policy would of necessity incline to those States whose interests were identical with those of Bulgaria.

In the meantime the delegates at Budapest strew flowers in Roumania's path, attempt to cover up the sufferings of Roumanians living in Hungary, and urge King Carol's Government to remain true to the Triple Alliance. Attempts are even being made to minimise popular anti-Austrian outbursts in Bucharest. Simultaneously comes the announcement of the Tsar of Russia's visit to the waters of Constantza.

In view of all these currents and counter-currents, it is not surprising that the Bulgarian to-day should discuss foreign politics in a hundred varied ways. But, in spite of this indecision regarding the means to an end, the end itself is clear, concise, and ever-visible. The country must be strong, must have its soldiers, must thoroughly exploit its resources, create industries, develope rapidly, and command the respect of some and the fear of others. Those who were fortunate enough to witness the wild, patriotic enthusiasm of the crowds last Sunday during the ceremonies in commemoration of the Macedonian saints, Cyril and Methodius, will have understood the vital force which produced it; no beaten race, conscious of and deploring its defeat, could have acted as did these crowds.

At present circumstances, not of Bulgaria's seeking, are inclining the country in the direction of the Triple Alliance. The new loan is being negotiated in Berlin, and its realisation will doubtless imply the construction of the Haskovo-Portolagos railway, as well as the port at the latter place, by the German financial group. But the Bulgarians as a people have no love for the Germans, Austrians, and Italians. Previous to the war their trust had been in Russia, and their admiration for Great Britain; to-day they look only to Great Britain. Sir Edward Grey's words in the House on the safeguarding of the interests of the minorities are hopefully acclaimed. "Do you think," I have been asked over and over again, "that they mean a revision of the Treaty of Bucharest?"

Such, then, is Bulgaria the New—a people determined to become strong and to efface the past; a people who are for the present isolated in the Peninsula, but whose statesmen are tentatively feeling their way in the "open market" of friendships. Public sympathy, however, inclines strongly towards Great Britain, for Great Britain, it is argued, is disinterested in her friendship, and can be trusted; which can be said of no other Power.

Our Bulgarian Correspondent reports that the Sobranje has appointed a Committee of thirty members to inquire into the responsibility of the Gueshoff and Daneff Administrations for the outbreak of the second Balkan War. All parties are represented with the exception of those supporting the two statesmen implicated.

AN UNWORTHY PRESS CAMPAIGN.

(From Our Special Correspondent.)

Sofia, May 31.

The British public, interested in fairplay for British citizens, should be informed concerning the scurrilous campaign of libel and slander which is being directed by a certain irresponsible section of the Hellenic press against Mr. James Bourchier. Broad head-lines, bearing the words "Lies of Bourchier," etc., introduce accusations of intentional prevarication, even of venality and corruption, that must disgust every fair-minded person. When these attacks were limited to insignificant and worthless "rags" published in obscurity they needed but little comment, but not only has the tendency been shown for these attacks to be published and extensively circulated in English by a Greek paper in America—at the time of the proposed visit of the Queen of Bulgaria to the United States—but there is also a tendency to extend the campaign so as to include Sister Augustine (as witness the letter of The Near East's Salonika Correspondent last week), a woman of the Florence Nightingale type, and one of whom every Englishman must feel proud.

The campaign is unworthy of the Greek nation. The services rendered by Mr. Bourchier to the cause of the Hellenes have been many and varied; he has been thanked publicly by the nation, and privately by Royalty and statesmen. Why, then, should ebullient provincial farthing sheets be allowed to place the Greek nation in a false light, as though it were thoroughly ungrateful and totally unacquainted with the modern principles of press polemics?

I feel convinced that when the matter has been brought home to the Greek authorities in this light they will do their utmost to muzzle the would-be biters and whip them back to their kennels.

SERVIAN LETTER.

(From Our Own Correspondent.)

Belgrade, May 30.

The Government's Difficulties.

The Parliamentary crisis continues, the entire Opposition absenting itself at each sitting, and leaving the Government to itself to sanction the new Bills laid before the House.

One of the most important projects which has passed the first reading and will be finally adopted on June 2, should the Radical Cabinet still remain in office, is an extraordinary credit of 122,823,866 francs for military purposes. This credit is to be spread over three years—1914, 1915, and 1916.

As it is considered urgent that the military orders should be placed and executed with the least possible delay, and as for this purpose it is expedient to contract another State loan, which, however, cannot be realised at present on account of the present state of the European money market and political circumstances, the Finance Minister, with the consent of the Council of Ministers, is authorised, in order to meet the payments necessary for these military requirements, to enter into provisional arrangements, substituting Treasury bonds, drafts, or other written engagements in place of cash payments. These engagements have to be for short periods only, and not to extend beyond the date of the conclusion of the next State loan, which will be made for the express purpose of liquidating them.

King Peter and the Cabinet.

The Opposition protest against legislation by a majority whose entire strength scarcely exceeds one-half of the members of the whole House, and they demand the resignation of the Cabinet and a new General Election. The Government, on the other hand, has considered it its duty to carry through the urgent Parliamentary work which the Opposition had attempted to hamper. The King, it is said, is placed in a difficult position, as he has to decide whether Parliament shall be dissolved after the urgent Parliamentary business has been disposed of and new elections take place under the existing Government, or whether the resignation of the Cabinet shall be permitted. The decision of his Majesty will probably be known in two or three days.

Army Reorganisation Scheme.

The Minister for War has worked out a new scheme of Army organization, and has laid it before the Council of Ministers. According to this project, the first contingent remains in active service until January 31 next, whilst for the second contingent men are available until forty-one years old, and for the third contingent until fifty years old, instead of forty-five as hitherto. The military service is to last two years, and the officers' pay is to be further increased.

The Servian authorities have restored to the Moslems several mosques at Veles, in the new Servian territories, which had been converted into taverns. The restoration of these buildings for religious purposes has given great satisfaction to the Mohammedan population.

*** According to a Reuter telegram, M. Pashitch, the Servian Prime Minister, has once more resigned in in view of the obstructive tactics of the Opposition. The resignation has been accepted, but apparently it will lead not to a change of Ministry, but to a reconstruction of the Cabinet under M. Pashitch and to an immediate General Election.

ASTONISHING ACTION OF GREEKS AT OKCHILAR.

Our Sofia correspondent announces that Mrs. Frank Musker, the wife of a British employee of the American Tobacco Company at Xanthi, in Bulgaria, was very grossly maltreated by the Hellenic frontier authorities at Okchilar. Both Mr. and Mrs. Frank Musker were provided with British passports and letters of introduction from the Greek General Damianos, but the lady, who is only eighteen years old, was compelled to strip in a room which failed to secure her privacy, and was minutely searched for "compromising documents." The victims of this astonishing behaviour on the part of a petty official have very properly complained to the Foreign Office and have presented their case to the notice of the British Diplomatic and Consular representatives in Athens and Salonika.

ROUMANIAN LETTER.

(From Our Own Correspondent.)

Bucharest, May 31.

The Tsar's Visit.

The arrangements for the visit of the Tsar to Constantza are being rapidly pushed forward. A special pavilion is being constructed at Constantza, where the formal meeting of the two Monarchs will take place. The Tsar is expected to arrive on June 12 on board his yacht, "Standart," and to be accompanied by the Russian Minister for Foreign Affairs, M. Sazonoff. Although not officially stated, it is well known that the visit is in connection with the engagement of Prince Carol to the Grand Duchess Tatiana, and that it has also the object of strengthening the friendship which is growing rapidly between this country and Russia.

It is stated that after the departure of the Tsar, King Carol will visit Dobritch.

In connection with the visit, the Russian cruiser "Almaz" arrived on Thursday at Constantza, and the usual compliments were exchanged. No Roumanian war craft being in the harbour at the time, the salute of twenty-one guns was fired by a battery of artillery.

Talaat Bey's Visit.

The visit to Bucharest of Talaat Bey, the Turkish Minister of the Interior, and the extremely cordial reception accorded him are giving rise to much discussion and surmise. Ostensibly his visit was merely in return for that made by Mr. Take Jonescu to Constantinople last autumn, but according to most papers his object was to beg King Carol and his Government to act as intermediaries between Turkey and Greece on the Island question. Other journals declare that the real object was to secure a promise of Roumania's neutrality in the case of Turkey's going to war with Greece, the former country having formed an alliance with Bulgaria for such an eventuality, and Bulgaria fearing an attack from Roumania in the event of war. Whatever the truth may be, if one may judge from the amount of attention paid to the Turkish statesman, this country must be supposed to be in agreement with any proposals made by him.

Anti-Austrian Feeling.

Yet another of those incidents which have gone so far to create the present state of coolness existing between this country and Austria-Hungary has occurred at Blag (Blazendorf), in Transylvania, where on May 23, Roumanian Independence Day, the "Mokans," as the Roumanians of Transylvania are known in Roumania proper, hoisted the Roumanian tricolour on their church. The gendarmes first ordered its removal, and on their request not being complied with endeavoured to force their way into the church in order to remove the flag themselves, but were prevented by the crowd assembled. A second attempt was equally fruitless, and, as the crowd was beginning to get out of hand and to assume a threatening attitude, the help of the military was called for, when, a regiment of cavalry arriving, the crowd was dispersed by repeated charges. Many persons were injured on both sides, and a number of students and others were arrested. This is, of course, cited in the Roumanian papers as an instance of Hungarian oppression and rapacity; but it is really the opposite, and anyone arrested or injured has only himself to thank for it. The people in question are Hungarian subjects, and their ancestors have been so from time immemorial. What would their sympathisers in this country think if the Bulgarian inhabitants of the Dobruja hoisted the Bulgarian colours and started anti-Roumanian demonstrations on every possible excuse and occasion? The people in question are supposed to be working for greater liberty of language, education, and religion, but they defeat their object almost weekly by such childish (and, to Hungarians, exasperating) actions

SALONIKA LETTER.

(From Our Own Correspondent.)

Salonika, May 28.

The Royal Visit.

About nine o'clock on the morning of the 15th inst. a salute of twenty-one guns from the Seven Towers' Battery welcomed the arrival of the cruiser "Psara," having on board the King and Queen, accompanied by Prince Alexander and Princess Helen, and half an hour later a similar salute from the cruiser announced that the Royal party had left the ship for the landing-place at the White Tower. Here their Majesties were received by all the high military and civil authorities, foreign Consuls, and notables of the town, but long before this a compact crowd had gathered along the route to the Royal residence, the whole way being gay with the Greek colours and lined with troops or Cretan gendarmes. The King and Queen, with their children, drove in open motor-cars, their passing being everywhere the signal for an outburst of enthusiastic cheering. During the afternoon his Majesty received the foreign Consuls, military and civil authorities, etc., an excursion being subsequently made to the model farm.

The following day the King inspected the different barracks, the fortifications at the little cape, and visited the drill grounds of the new recruits, in many cases speaking to each man personally. On Monday morning at nine o'clock his Majesty, with his two children, left by special train for Veria, the Queen leaving immediately after with the "Psara" to return to Athens. Throughout the stay of the Royal visitors the town was profusely decorated with flags, and there was official illuminating at night.

After Veria, the King, with the Prince and Princess, visited Niaousta, Yenidjeh, Vodena, Verticop, Florina, Sorovitch, Kozani, etc., reviewing the troops, inspecting all barracks, military works, and fortifications on his route, and having a most loyal and enthusiastic welcome everywhere. Leaving Vodena yesterday morning by motor car, his Majesty, with the Prince and Princess, left for Larissa (passing through Serfidjeh and Elassona), whence they would return to Athens by special train.

The Refugees from Thrace.

The immigration and emigration question is daily becoming more acute; so much so that the commander of the gendarmerie, who is our chief of police, has issued an order that whereas during the last and present months 65,000 Greek refugees from Thrace have arrived in Salonika, of whom 12,000 remain here, 4,000 of them being in the vicinity of the Custom House, and 2,500 still on board steamers through there being no place available for them, while some tens of thousands expelled from Turkey are expected; and whereas owing to the presence of Turkish emigrants in the town there is a danger of quarrels and disputes between the two elements calculated to cause further excitements and disorder; until this danger no longer exists all emigration through this port and all entry of refugees into this town are provisionally prohibited; which order has been communicated to the police of the interior, and published by them for the warning of those who are desirous of emigrating.

The situation is undoubtedly a most serious one, for in addition to the thousands of Greek immigrants under tents outside the town, those in the vicinity of the Custom House are lying in the open and in the streets without shelter and without any sanitary conveniences whatever. Last week, after a long spell of drought, we had exceedingly heavy rains, with occasional strong squalls, which washed away and blew down the tents of those encamped outside the town, so making things even worse, and increasing the general distress. Under such adverse circumstances, is it to be wondered at that some of these Greek immigrants, possibly driven to desperation by having had to leave their homes for a strange land, took forcible possession of about 200 Turkish houses in the town, driving out and ill-treating the occupants? Appeals for help and protection to the police being of no avail, the Turkish Consul-General had to take the matter up and to protest to the authorities in a most energetic manner. Thereupon the Governor-General gave orders that the Greek invaders were to be turned out by the police and the houses restored to their owners, which, however, was not done without considerable trouble and some arrests being made.

Now incidents of this kind cannot fail to give rise to a wondering as to what would happen under similar circumstances in an interior town or village, where are no regular authorities nor Consuls to whom an appeal can be made. Thousands of these immigrants are being sent into the interior, to settle down in the vicinity of Turkish and Bulgarian villages. Dump down a hundred immigrant families near, say, a Turkish village of fifty families, and what will happen? Undoubtedly, the Turk will be squeezed out and find it desirable to leave. The result is certain, and may account for much of the large Turkish emigration.

The Gift to King Constantine.

After all, it seems that the town is to pay for the purchase of the Villa Modiano and grounds, to be presented to the King, and that they are not a gift from the high military and civil officials and the members of our municipality. Moreover, another piece of land and some adjacent houses are to be expropriated to round off and seclude the property, so the total cost will probably exceed £25,000. It is thought by many, however, that while fully appreciating the desire of the inhabitants of the town to make this gift, his Majesty, taking into consideration the general distress here and all around us, will decline to accept it.

Charges Against the Jews.

We again have another glaring instance of the culpable licence allowed to the Greek Press in the matter of creating ill-feeling between the different sections of the population. The Janina *Epiros* accused a Jewish firm of that town of having sold poisoned flour to the refugees, whereupon the Athens papers, *Patris*, *Embros*, and *Athenî*, reproduced the charge as if it were a proved fact. The accusation is so monstrous and preposterous, so unlikely to thinking people on the face of it, so eminently calculated to foster hatred on the part of the ignorant classes, that one cannot understand how any respectable paper could fabricate or repeat such a gross charge, nor how the authorities could let it pass without exemplary punishment. Are the Jews also to be squeezed out? There is no doubt many would like to see it done; and even Mr. Venizelos, in an interview with a correspondent of the Paris *Temps*, showed he realised this feeling existed when he said: "As for Salonika, the Government have nothing to fear, notwithstanding that certain persons think the presence of the Jews in that town retards assimilation."

The action of the bands during the last fortnight has not been of any great importance, but a stiff fight in the Radovishte region between a strong Bulgarian band and Servian troops resulted in the former losing several killed, while the rest fled. Another engagement at Tsareva-Selo, again between Bulgars and Servian soldiers, ended in the same manner. The papers also report that some 1,700 Bulgarian *komitajis* made an incursion into Servian territory near Ghevgheli, and that Greek troops had been sent against them. Possibly this somewhat unsettled situation had something to do with the King making no tour in the eastern part of the province. All the same, I hear no big move is to be undertaken at present.

NEAR EAST BOOK NOTES.

The Cambridge University Press have issued "Greek Sculpture and Modern Art," by Sir Charles Waldstein. The volume is a collection of lectures, and the price is 7s. 6d.

Mr. John Lane will issue on June 9 a work entitled "A Chid of the Orient," by Demetra Vaka.

Mr. Edward Arnold has published "The Struggle for Scutari," by Miss M. Edith Durham. The price is 14s.

Mr. Percy White has completed a novel on which he has been working for the last two years, the scene of which is laid in Cairo. The novel is entitled "The Third Element," with the sub-title, "A Story of Modern Cairo," and is described as a comedy of manners. It will be issued by Messrs. Constable in the autumn.

THE PERSIAN COSSACKS.

(From Our Own Correspondent.)

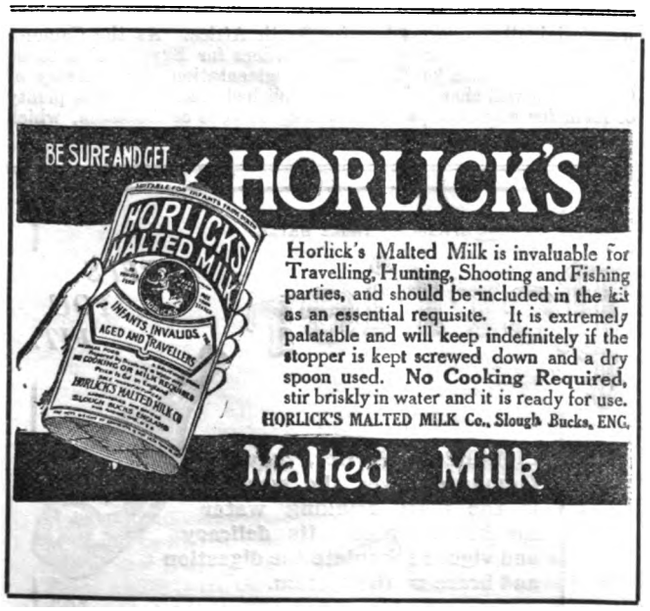
Odessa, June 1.

A private despatch from Tabriz received here a few days ago says that it is there credibly stated that the numerical strength of the Persian Cossack brigade is to be increased from 3,500 to 6,000 men of all arms—infantry, cavalry, and artillery. The additional force, it is understood, will be largely recruited from the Caucasus and from time-served Russian soldiers in Azerbaijan. The newly augmented brigade will, it is further stated, be officered by Russians, commissioned and non-commissioned. If this report be trustworthy the Persian Cossacks are likely in the near future to lose their present nondescript character as far as nationalities are concerned, and become, practically, a Russian legion, nominally under the control of the reigning Shah, but to all intents and purposes subject to the Russian Protectorate; and there is nothing to prevent Russia, should she later deem it desirable and expedient, from raising the strength of the force to 10,000 men. In any case the greater the strength of the Persian Cossack army, the more essentially Russian it becomes, and its paymaster is the Russian Exchequer.

For the moment Russia would appear to be particularly anxious to eliminate the activities of the Swedish Gendarmerie in Northern Persia; their very presence is irksome to the Russian authorities in that province, who insist that the services of the Swedes should be confined to Southern Persia. It is a matter in which the British Foreign Office has a clear claim to be consulted; but it has latterly, apparently, become a very far cry from Downing Street to Northern Persia, where Russia's policy of territorial absorption undeviatingly maintains the even tenour of its way, regardless of the polite remonstrances of Sir Edward Grey.

ELEUSINIAN MYSTERIES.

Mr. C. Delisle Burns dealt with the Eleusinian mysteries on Friday last, when he gave the last of his course of lectures at the University of London, South Kensington. The Greeks, he said, connected the rhythm of agriculture—the sowing and harvesting of corn—with the rhythm of life and death in the human race. The festival of the mysteries lasted nine days, and took place after harvest in late autumn. First came purification in the sea. Afterwards came the sacred procession, leaving Athens at sunset and reaching Eleusis at midnight. At Eleusis the mystics would wander backwards and forwards all night, waving their torches, ostensibly searching, like Demeter, for Persephone, but really imitating by sympathetic magic the movements of the sun in order to make the corn grow. Later, when mystics were gathered inside a huge hall in darkness, a curtain would be raised, and they would see in a blazing light figures moving about acting a play, representing a sort of marriage between Persephone and the god of the underworld. Of the mysteries themselves nothing definite was told, but no man saw them and was the same afterwards. The tendency of the Athenian mysteries was to lift the gloom from death. The tendency in Egypt, on the other hand, was to cast the shadow of death on life. Thus Attica was a land of temples, Egypt of tombs.



PERSIAN RAILWAY QUESTIONS.

Lord Sydenham's speech in the House of Lords on May 25 (briefly referred to in our issue of last week, page 117) dealt with several important aspects of the Persian problem. We are now able to give some further extracts from the speech, from which it will be seen that his lordship's remarks upon the subject of railway construction lend fresh emphasis to the views already expressed by us, notably in our leading article last week.

Lord Sydenham said that the railway question was one which raised many issues of the greatest importance to British interests in Persia. He did not know anything that could be more unsatisfactory and even more melancholy than the present condition of affairs in Persia and our relations to that unhappy country. We had a large sphere of interest in Persia, and we seemed to exercise no influence in it. We had responsibilities in Persia which we did not take any steps to fulfil. We had rights of which we did not make use—rights which we could never abandon—and, finally, we had a number of interests which we were bound to safeguard. It appeared to him that the future of Persia and our relations to Persia would depend to a very great extent upon the construction of railways. Therefore, it did seem most desirable that we should know clearly how the railway question stood.

The assurance given us by Nasr-ed-Din Shah to the effect that if any railways were constructed in Northern Persia we should be empowered to construct railways in Southern Persia was our charter for railway construction in Persia, and he assumed it still held the field. Then came the Anglo-Russian Agreement, which parcelled Persia into two spheres of influence, with a neutral zone of extraordinary shape, and containing most of our interests lying in between. He believed he was right in saying that Russia had formally recognised our special interest with regard to the Gulf Provinces of Persia which lay entirely within that neutral zone, and that when the Agreement was concluded with Russia both Powers arranged to recognise any previous treaties, rights, or concessions obtained by either of them. The Persian Railway Syndicate had obtained priority of rights to construct three railways from the Gulf inland—namely, Mohammerah to Khorremabad, Bushire to Shiraz, and Bunder Abbas to Kerman. He assumed that this syndicate still had that option of constructing those railways and that the option was not contested; but those railways seemed important if the Gulf Provinces were to be tranquillised and if their resources were to be peacefully developed. All those railways lay within the neutral sphere laid down in the Anglo-Russian Agreement. It, therefore, seemed vital that our position in this neutral zone should be placed beyond all doubt, and, if necessary, that that position should be re-defined.

Considering the Trans-Persian railway only as it would reach the coast at Bunder Abbas, he had been told that Russia was now willing to construct the line through Teheran to Yezd, on the very southernmost point of her sphere of influence. The remaining section to Bunder Abbas lay wholly in the neutral zone. If that northern section were created and the southern section were not, it seemed as if all the trade of Persia would be drawn away to the north, and that our great interests in the Gulf itself would be prejudiced. From the point of view of British interests, if that northern section was begun the southern section should be begun also, and not long afterwards, and should be kept under British control and administration. And in any case, in the interests of the pacification of Persia, those three branch railways from the coast should be begun with as little delay as possible.

LORD BRYCE ON TURKEY.

Lord Bryce, as Guest of Honour at the annual dinner of the Central Asian Society, on May 27, at the Savoy Hotel, delivered a speech full of interest to the student of developments in the East. He first dealt with the situation in China and the Far East, and said that he would deplore the break-up of China, and hoped the Western Powers interested in the East would continue their support of Yuan-Shi-Kai. Coming to Turkey, he said that he regarded conditions there with pessimism. Signs were not wanting denoting the break-up of that Empire. The near future might see great changes in the position of some of the European Powers concerned with the future of the component parts of the dying Empire, and statesmanship of the highest quality would have to prove itself if trouble of a general nature were to be avoided. Never having actually visited Persia—though he had touched her frontiers at various points—he felt a certain disinclination to speak of that country, but he thought the same spirit of change held sway there as throughout the countries passed in review from China to the Mediterranean. Every thinking person who had come in contact with the races of Central Asia and the Far East, and had before him a picture of the sequence of events which had led to the presence of the Mongol and the Greek at the gates of Vienna in the sixteenth century, and had some acquaintance with their arts and history, must feel the liveliest interest at the very critical phase through which the East, both Far and Near, was passing at the present moment. The pendulum was taking a swing from West to East, and no one could foresee the consequences. British sympathies had gone out to the East, but momentous changes would be witnessed, he thought, during the next twenty years.

THE TURKISH BOY SCOUTS.

(From Our Own Correspondent.)

Constantinople, May 30.

A few days ago the swearing in of the troop leaders, Oimak Begs as they are called, and of the Kalyai of the Turkish Boy Scouts, or as we should say the Vice-Chief Scout, Mr. Parfield, took place at the War Office in the presence of Enver Pasha, who, we are told, is to become the Bashbogh (Chief Scout) of Turkey (I trust the readers of The Near East who take an interest in things Turkish will not be too astonished by these strange names to continue to read this passage). The fact is that the Boy Scout movement in Turkey has two distinct objects—the military and the "Neo-Turanian." A certain number of influential Young Turks, and certain Old Turks, too, have come to the conclusion that the Turk of to-day is rapidly losing his Turkishness and becoming a sort of Moslem Levantine, speaking a language largely mixed with Arabic and Persian, leading a life which is half Oriental, half Latin, thinking in terms of Persian and Byzantine life. The peasant remains a Turk, but he, poor fellow, does not count for much in the Turkey of to-day, and the upper or better educated class calls itself Osmanli, but is in reality an amalgam of all sorts of elements, many of them non-Turkish. The word "Turk" is often used as signifying a chawbacon or lout in modern Turkish. The new tendency which I have called the Neo-Turanian is for the suppression of all unnecessary Persian and Arabic words in the language; the development of a Turkish nationalism, based on the fact that the Osmanlis were merely one clan of a great people which, coming from the Altai, conquered enormous areas in Asia and Europe, and under the rule of the kindred Mongols of the dynasty of Djenghiz Khagan made Turki or Jagatai, a language which is very closely related to Osmanli, and can still be understood by an up-country Turk, the lingua franca from the Magyar border to Peking; the insistence on the necessity for the Turk to turn his back on the influences of Arabia, Persia, and Byzance, and to develop on truly national lines as the Magyar and the Finn have done. It is a sign of the times that the word for God in the Turkish Boy-Scout's oath is not Allah, but Tengri, and that the Sultan is called therein not Padishah, but Khakan. The troop leaders are Oimak Begs, not Beys. The scouts, who are called Izdjis, will not hold a "Mejlis," but a "Kurultai," and so forth. As for the military side of the movement, it seems pretty clear that the new régime has determined to use the Boy-Scout as a means of making military service popular among the educated classes, which, despite professions of patriotism, have till now shown a rather unmilitary tendency to "buy out" on every possible occasion. This attitude, which compares unfavourably with that long since adopted by the Bulgars, and latterly by the Greeks, towards universal service will, it is hoped, be corrected by the Boy Scout training. It may be said that the close association of the latter with the Government, and especially with the War Office, is not calculated to develop the initiative and flexibility of the new organisation. Still, one cannot help feeling that the Boy Scout movement will in any case be a force for good.

THE BARZAN KURDS' RISING.

A letter received in London this week, and dated Mosul, April 30, gives some particulars of the fighting between the Government troops and the refractory Kurdish chieftain Abdul Salam, which was first reported in The Near East of April 17. The writer says:—

The latest news of the military expedition against the Sheikh of Barzan, according to the version of the Vali of Mosul, is as follows:—A fight took place between the Turkish troops and a band of brigands led by Sheikh Abdul Salam. A great number of brigands, with eight of their chiefs, were killed, and two soldiers were killed and eight slightly wounded. The Sheikh has taken to flight, pursued by the troops.

A version from a private source puts the number of killed and wounded at from 60 to 70 for the troops, and between 30 and 40 for the Kurdish tribe. The Sheikh is said to have taken refuge on the Persian frontier with the rest of his men, and will reoccupy his former positions on the retreat of the troops, whose permanent maintenance in the Barzan region will, it is feared, be too burdensome for the Government to undertake.

M.C.C. v. EGYPT AND SUDAN.

The annual match between the M.C.C. and Egypt and the Sudan, which was played at Lords on Wednesday and Thursday, was chiefly notable for the poor show put up by the visitors. Against some good bowling by Newman and Captain Crichton-Maitland, their first innings only aggregated 79, out of which meagre total Captain Brander was responsible for 34. The M.C.C. replied with 270, the Hon. R. Anson and M. K. Mackenzie making a useful stand of 83 for the second wicket. Good cricket was also shown by the last pair, J. R. Head and F. H. Browning, the captain of the I Zingari team that recently toured Egypt, who between them raised the total from 199 to 270 by some good, forceful batting, particularly on the off-side. The visitors fared little better at their second innings on Wednesday, and, when stumps were drawn, had lost seven wickets for 79, all the individual items being negligible. When the match was resumed yesterday another wicket quickly fell, but with the association of N. R. Udal with P. C. Organ the success of the M.C.C. bowlers received a check. At first the batting was very slow, but when both batsmen were set cricket of a most attractive nature was seen. Udal, in particular, batted finely, making some pretty leg glides and drives to the off. By slow and sure degrees the score mounted to 176, and then Udal, attempting an off drive, skied the ball over mid-off's head. The chance was not accepted, but in the following over Watson bowled Organ. Udal now monopolised the scoring and, batting freely, brought the score to 196, saving the innings defeat. He now abandoned all caution, and twice in succession drove Watson to the pavilion rails, but attempting to deal with the next delivery in the same way was bowled, the innings closing for 204. Udal had suffered a bad strain while bowling on Wednesday, and had to have a substitute to run for him. Under the circumstances, he played a wonderful innings for his side, and one that the few chances he gave in no wise marred. The Club set to get 13 to win obtained them in seven balls, E. J. Cuthbertson driving the seventh clean out of the ground for six. Score:

According to *The Egyptian Mail*, the 1st Battalion Royal Sussex Regiment, now stationed at Peshawar, India, are under orders for Egypt next trooping season. The 1st Sussex Regiment were originally under orders for South Africa. As the Camerons (from Malta) are also under orders for Egypt, it is to be presumed that the long expected augmentation of the Army of Occupation will shortly be an accomplished fact. There is plenty of room for more troops in the main barracks at Abbassia, which have recently been renovated and are now unoccupied.

FRENCH NATURAL SPARKLING TABLE WATER.

Perrier

"The Champagne of Table Waters."

KEEPS YOU FIT.

HOT CLIMATES.—Perrier, now famous all over the world, is the ideal drinking water for hot climates. Its delicacy and vigour stimulate the digestion and brace up the system.

TANGIER TO TEHERAN.

I am given to understand that certain of the Powers are supposed to be wearying of what they are pleased to call "the Albanian experiment," annoyed that the infant state, which was so hardly born amid the unceasing quarrels of partisans, has not yet found its feet amid the barren mountains, which alone have been left to it by those Powers who courted the favours of its neighbours solely at its expense. There are statesmen who are inclined to advocate the consignment of the newly fledged Principality to the lethal chamber in order to put an end alike to its independent existence and their annoyance occasioned thereby. In fact, they suggest that Albania should be partitioned between Servia and Greece in the interests of the peace of Europe. Undoubtedly, such a solution of the Albanian problem, which, after all, is now purely domestic, would lead to profound peace at least from Shkodra to Shkumbi, for readers of Miss Durham's new book will perhaps realize how other races besides the Romans

"Solitudinem faciant, pacemque appellant."

***

Not long ago, THE NEAR EAST deprecated the introduction of international troops into Southern Albania for the purpose of settling the Epirote difficulty on the ground that the occasion did not warrant the risk, and that the difficulty would speedily be adjusted without recourse to such drastic measures. In the event of a proposal for the partition of Albania as an alternative to international occupation, the latter must unhesitatingly be chosen. Great Britain was one of the chief sponsors of the new State, and, if necessary, must stand out as a protector in the event of calculated weakness on the part of the other Powers. France, in her affection for Greece and Greek armament orders, has shown undisguised hostility to the State which has been endowed with a German sovereign. Russia bewails the retention of any scrap of territory by Albania in the north as so much soil lost to her beloved Slav protégés. Germany, as there is as yet no money in the Principality, rivals an historical character in her elaborate disregard of these things. Remain therefore the other two members of the Triple Alliance. For the sake of Albania I can still hope much from the unwillingness of Vienna to see Servia on the Adriatic at Durazzo, and from the dislike of Rome to the prospect of finding the blue and white of Greece floating over Valona now that the Marchese di San Giuliano has successfully chased it from Sasseno. We are the only people who are likely to support Shqipenia for her own sake—and maintain the right of a Balkan people to a place in the sun. But I cannot but help thinking that our altruistic support will be seconded by the jealous activities of the Interested Powers—even though their eager machinations may contribute not a little to internal unrest in the realms of the Mpret.

***

It is axiomatic that agricultural land requires the presence of cultivators and that without them the most fertile province is reduced to an economic equality with a barren steppe. With this in view, it is no wonder that the continued depopulation of Servian and Hellenic Macedonia is exciting the anxiety of statesmen. According to *The Times*, the latest estimate of the population of new Greece is 2,030,419, a figure more than 410,000 in excess of the foreign calculations which were published in THE NEAR EAST on April 10 of this year. But it must be remembered that of these many are town-dwellers—for, as a rule, the nimble-witted Hellene finds agriculture but a poor opening for his pre-eminently commercial and maritime genius—and many are refugees but recently arrived from over the new borders. I hope no one will make the mistake of considering refugees as being as valuable citizens as voluntary emigrants from a foreign country. Violent and compulsory uprooting from old associations usually precedes the arrival of a destitute fugitive, who, often physically damaged and suffering from the loss of family as well as fortune, has to face the world with nothing upon which to rely except his shattered faculties and the charitable provision of an embarrassed Government. I have myself seen refugees who, nine years after their expulsion by political and racial adversaries, had not recovered heart and spirit enough to fend for themselves and had, instead, deteriorated into feckless sawners subsisting upon doles, a nuisance alike to themselves and their neighbours.

***

In Macedonia the shortage of population will have deplorable results. Numbers of Turks and Bulgars have emigrated, many Albanians have simply disappeared, and, in the Servian provinces, the efforts of the Government to Serbize its new territories tend to depopulate still further an area which Old Servia cannot for years to come hope to colonize. Attempts have been made to attract Serbs from the Dual Monarchy, but there are two reasons why this has failed. The first is that the subjects of the Emperor Francis Joseph saw little prospect of bettering themselves in Macedonia under existing conditions, and the second is the opposition of patriotic Serbs to the weakening of the southern Slav element over the border as tending to militate against the irredentist policy which finds favour in the hearts of many. Hopes have been expressed that Servians now resident in the United States may be persuaded to return in order to help in the opening-up of Macedonia to commerce, but as most of these people have a niche waiting for them in their native villages in Old Servia, it is improbable that any large influx of population will be obtained from transatlantic sources.

***

The greater number of Balkan residents in Canada and the United States appear to have small intention of adopting either of those countries as a native land. Rather they regard them as sources of wealth where labour is better paid than at home, and as soon as a reasonable competence has been amassed, these voluntary exiles purpose to return and enjoy an enhanced position in their native village. In the case of the Greeks, this tendency is particularly marked. The Continent of America is for them a place where money can be earned for remitting to Greece, and so considerable have been the sums patriotically sent home by Hellenes from their temporary Tom Tiddler's ground that the course of Greek exchange has been materially improved by that means alone. Nor during their exile do these people lose touch with the homeland. Many publicists in the United States were shocked and grieved at the time of the Balkan war at seeing so many reservists return from "God's own country" to fight the battles of an effete Europe, thus demonstrating that the celebrated melting-pot which was to have turned Bulgar, Gheg, Tosk, Greek, Vlach, Serb, and Rouman into enthusiastic celebrants of the Fourth of July had failed in its duty.

***

A correspondent in Persia sends me two items of news which throw a little more light on Russian methods in Persia, and bear out all that "Mirza Firooz Khan" and other correspondents write on the same rather painful subject. The first item referred to is a copy of an official telegram from Menjil, a small town between Enzeli and Teheran. It reads:—"May 7, 1914.—Three days ago eleven Russian Cossacks, one of them a photographer, arrived here. After taking a census of the inhabitants and making minute inquiries as to the wealth of the inhabitants they photographed the surrounding villages and went towards Tarum. They are particularly interested as to the amount of cultivable land in the villages they visit." My correspondent's brief comment is:—"Preparations for fresh Russian immigrants, perhaps!" I am afraid I cannot reply, "Perhaps not."

***

The second item sent by my correspondent is a translation of a message forwarded by the Ispahan correspondent of the *Raad*, a Radical paper with a large circulation. This says:—"Under instructions from Teheran the Governor had the seven supervisors elected to control the general elections. On the result being made known, the Russian Consul wrote to the Governor recommending either of two, from among the number of his protégés, to be put in the list. The Governor replied that the legal number being complete, he could not oblige the Consulate. The Consulate finds this reply not satisfactory, and insists upon one of the seven already elected being made to resign to make room for his protégé." On this telegram my correspondent offers no comment at all. I feel I cannot do better than copy his example. In such a case words seem to be quite useless.

***

I gather from various sources that a number of Orthodox in the diocese of Metrai (Chatalja) have offered to become Uniats in order to enjoy the foreign protection accorded to Latins in the Ottoman Empire. This overture has been apparently embodied in a petition to Mgr. Saidi, Archbishop of Cæsarea, the local representative of the Vatican. Should it lead to any considerable secession of Orthodox we may yet live to see a Latin Patriarch of Constantinople once more resident in his titular city. At present Mgr. Ceppetelli, the Latin Patriarch, lives in Rome, but doubtless, should occasion arise, he would be ready to resume a practice which has for various reasons been in abeyance since 1261.

***

It is truly a remarkable coincidence that the Northamptons, who now form part of the Army of Occupation in Egypt, should have been called upon to conduct the funeral of French soldiers killed by the old 58th Regiment in the Battle of Alexandria in 1801. Some human remains were recently found while building new barracks at Alexandria, which, from the buttons with which they were surrounded, have been identified as having once been General Menou's men who fought Sir Ralph Abercrombie. The 58th Regiment in the interval has become the Northampton Regiment, and France and Great Britain have built up the Entente, on the one hand, and have shared in the regeneration of Egypt, for the lordship of which they were fighting when last those dry bones lived.

LETTERS TO THE EDITOR.

The columns of THE NEAR EAST *are always open for the discussion of subjects of general interest to its readers. The publication of such letters must not be taken, however, as indicating that the views expressed by the writers are those of* THE NEAR EAST.

Letters intended for publication MUST be accompanied by the writer's full name and address, not necessarily for publication, but as an evidence of good faith. They should be worded as briefly as possible and must be written on one side of the paper only.

THE GOVERNMENT OF TURKEY.

To the Editor of THE NEAR EAST.

SIR,—To those foreigners who have resided in Turkey for any length of time, or, rather, for a period long enough to enable them to become acquainted with the traditions and ambitions of the peoples of Asia Minor, most of what appears in the British Press about Turkey, the Turks, the party of "Union and Progress" and its policy, appears hopelessly biassed. It matters not one iota whether he be pro-Turk, or pro-Hellene, whether the politics of the country have received his attention or not—indeed, if he has paid no attention to them the better his judgment—whether he be of French, German, Italian, or British nationality, he experiences the same difficulty—how to account for the strangeness of views expressed in the British Press and by British writers, and their narrowness of vision.

The writer's only explanation of the phenomenon is that all who make a study of the Near East and its politics internal and external begin and end with Constantinople and Constantinople's point of view.

The traveller athirst for knowledge starts with a letter for his Ambassador, and through him obtains a passport, signed by the Grand Vizier, or Minister of the Interior. Could beginning be more inauspicious? The very act of seeking a letter of introduction to the Ambassador and a recommendation from the Grand Vizier to the Valis and Kaimakams in the provinces constitutes a formidable obstacle to a conscientious effort to obtain accurate information; and the very sight of Constantinople obscures the vision for all future impressions. And if the would-be traveller and seeker after knowledge has the further ill luck to fall in with the personnel of the Embassy, newspaper correspondents, or the European-educated Turkish official, then he might just as well return home; he can do no good to the cause he has at heart. For where is the Briton that wends his way Eastwards for such purpose who is not fathered by some pompous committee or association, be it Ottoman, Hellenic, or Balkan? Does an Englishman or other European wish to arrive at some unbiassed conclusions as to that complex problem, the Near East, let him leave London, or his native city, vow to avoid all officials and eschew all preconceived ideas, and, above all, never set eyes on Constantinople—land in Beyrout, and gradually work his way up as far as the Dardanelles via Alexandretta, Mersina, Adana, Konia, Afion-Karahissar, Ushak, Alashehr, Magnesia, and Smyrna, and then visit the principal towns served by the Ottoman Railway Company, such as Aidin, Nazli, Odemish, Denizli, Dineir, and Egerdir and Sparta, and he will have seen the best part of Turkey. In dealing with Turkey, the Turk and his Government, let him keep well to the fore the following cardinal factors:—(1) That Constantinople is not Turkey, and that the political instincts of the inhabitants of Constantinople itself and within a radius of 50 miles are not those of the rest of the Empire; (2) that the Rayah is Western Asia Minor's economic backbone, on which the prosperity of Turkey's best provinces depends; (3) that Turkey has been ever since the advent of Abdul Hamid to the throne, and still is, governed by the worst elements of the Ottoman race; (4) that patriotism as a moral force is non-existent among the higher governing classes. Were it otherwise men like Mahmoud Shevket and Enver could not possibly have come to the front.

The writer could give any number of proofs of the complete absence of any idea or desire among the ruling classes to do something for their country, but he will limit himself to one instance as an illustration. The Western Provinces of Asia Minor were, and still are, threatened with a plague of locusts. Eight months ago an edict was issued obliging all inhabitants of the infected districts to bring in to the authorities 10 okes of larvæ *per capita*. No sooner had the various Kaimakamliks or Mudiriets collected a sufficient quantity, than they started selling to all such who had to comply with the law, but could not afford the time, or for other reasons, to hunt for the eggs, thus defeating the object of the measure, viz., the destruction of the locust. The local government of Smyrna then brought out a French expert, Monsieur d'Herelles, to advise as to the best means to be adopted for fighting the evil. After a stay of a week in Smyrna, Monsieur d'Herelles left, the Government giving it out that he considered the season too far advanced, whereas everybody knew that the miserable £T15,000 credit asked for to organise the campaign against the pest was not forthcoming, and that this was the true reason of his departure. Meanwhile, the local authorities had mulcted the poorer population of this Vilayet of thrice the amount, to say nothing of the time and labour given by the peasant in collecting larvæ, which the same authorities afterwards turned into cash.

Now can it be pretended by Messrs. Aubrey Herbert and Pickthall and Mrs. Margaret Robinson that the authorities of the Vilayet of Aidin knew nothing of all this, or that the source of the revenue they so illicitly collected for headquarters in Constantinople was unknown to Talaats and Djavids? Of course it was—and these are the men who are ruling Turkey to-day.

But such is always the case. Any misfortune that visits the land is absolutely seized upon by the authorities as an excuse to rob the people. Let the pro-Turk writers mentioned above come and live in Turkey during a visitation of cholera, or any plague, but far away from Embassy, Sublime Porte, or the Grande Rue de Péra, and their eyes will be opened to what government by the party of union and progress means.

Lest your readers should think that I am unduly severe, I will quote the following story as proof that even Turks know exactly what is happening and what the future has in store. A friend of mine was lately in some very remote village in one of the most unfrequented parts of Asia Minor. He there met the Hodja, who asked how things were getting on, and whether there was any hope of better times. My friend, not wishing to hurt the old man's feelings, answered that he hoped the present Government meant well, and would bring about some improvement in the land, upon which the Hodja promptly retorted: "You are not an honest man, for you know even better than I do that there is no hope for our country." And need I add that the poor Hodja's hope of better times was a foreign occupation? The Englishman is too dull-witted to see that even in Turkey the benefits to the fellah of his rule in Egypt is being compared with the lot of the Turkish peasant, and that the dullest Turk is capable of making his comparison, and drawing his own conclusions, however clumsy.

Those who uphold the present Government in the European Press are doing the worst possible service to Turkey. At least, such is the opinion of,

Yours, etc.,
PRO-TURK, BUT ANTI-GOVERNMENT.

THE ISLANDS OF THE ÆGEAN.

To the Editor of THE NEAR EAST.

SIR,—Your impartiality emboldens me to send you a few lines, hoping that you will be kind enough to publish them in your estimable journal.

In your issue of May 15 Mr. C. Mayo, in replying to "Macedonicus," makes what I can assure him are very inaccurate statements.

I do not know if "Macedonicus" has seen the Near East at close quarters or not, but, having been born in Macedonia and having known Turkey in Europe for forty-two years consecutively, I can assure Mr. Mayo, in spite of what he pretends, that, except the Jews dwelling in great towns and the strangers enjoying particular protection, all other natives of this country, including the Turks themselves, have a desperately bad opinion of Turkish rule.

Mr. Mayo seems to ignore that Turkey's friends in Europe, the so-called "acquainted with the Near East," are those who have visited only the great towns of the empire, without coming into any free communication with the peasantry. I ask Mr. Mayo what can be the value of the opinion formed by the European who, immediately on his arrival in Turkish territory, is received by the authorities with all possible ceremonial suggested by the fear of the Freñk, who is for the Turk a superhuman being, who suspends over his head the sword of Damocles?

The Turks are masters of hypocrisy, and are not so mad as to commit violence before the stranger, having plenty of time and means to outrage the *giaour* when they choose to do so.

Mr. Mayo believes that Turkey's friends in Europe are increasing, but he does not tell us why and how long. Is it since her false Constitution, or by the expulsion and massacres against Greeks now committed in Thrace and Asia Minor?

As for his remarks about naval matters, he proves himself so inexcusably ignorant of the facts as not to be worthy of contradiction. But I wish to inform him that Greece's naval superiority is exclusively due to her excellent seamanship; that the Turks possessed two more big warships than the Averoff; and that if the solitary cruiser of the enemy was able to range for some time over the Eastern Mediterranean, and finally to take refuge in the Red Sea, it was because the only other Greek cruisers were older and slower than she.

Mr. Mayo says nothing about the blowing up of the Turkish cruiser by the torpedo No. 11 in Salonika harbour, and seems to have forgotten that the Averoff served as a cork to the Dardanelles.—Yours, etc.,

(DR.) ANT. NAKIS.

Salonika, May 24.

CHRISTIANS AND MOSLEMS.

To the Editor of THE NEAR EAST.

SIR,—I regret having to encroach upon your valuable space in order to reply to Dr. Hollist and Mr. Seed. It is perfectly clear that a correspondent ("A Member of the Ottoman Association") asserted that the Turcophils kept silent about outrages perpetrated by Christian races. Dr. Hollist was justified, therefore, in pointing out that, under the title of the "Ottoman Committee," members of the said Association had certainly not kept silence. Mr. Seed goes a step further, and claims apostolical succession for the Ottoman Association from the late Ottoman Committee. So far as this claim has any foundation, it only endorses Dr. Hollist's contention.

When your distinguished correspondent passes to the question of creating rancour and venom by making an historical statement as to the Balkan atrocities, I naturally refuse to accept his standpoint. He takes the usual course of assuming that none but himself and those holding his own views have studied the past

Digitized by Google

history of the subject. *The Review of Reviews*, to which he refers us for information on the Balkans, was run by a man who was a monomaniac on the subject of Turkish rule. He neither adopted a "dignified policy of silence and reticence" nor did he act in a level-headed manner.

I have not expressed any regret that the public are sick and tired of atrocities—in fact, I said in my last letter, "Turkey's task is not to recount her sorrows, but to renew her strength."

Just a word to my very good friend Mr. Seed. I would be very unwilling to spend time on distinguishing between the claims of Mr. Duse Mohamed and myself to be the founder of the late Ottoman Committee. I was the first to propose it; Mr. Mohamed the first to organise the proposal. Both Mr. Mohamed and myself, together with Mr. Adolphe Smith, Professor Léon, Mr. George Palmer, Mr. C. F. Ryder, Dr. Griffin, the O'Donnell, Mr. C. E. Ward, Mr. Barling Fisher, Mrs. Summers, Mr. Douglas Fox-Pitt, Colonel Hime, Mr. John Arnall, together with many others, who were later members of the Ottoman Committee (but not among the earlier members), formed the Anglo-Ottoman Society when the late Ottoman Committee came to an end. It would, of course, as Mr. Seed hints, be most unseemly for any dispute to arise between the friends of Turkey in this country. Nothing in my last letter in any way brings our two Societies into any relations which could be considered disputatious. At the end of 1913 the Committee distinctly divided into two organisations. Mr. Seed considers that at a meeting in December, 1913, the Committee definitely decided to become the Ottoman Association. He is wrong in his facts. What happened was that, at an irregularly convened meeting, with insufficient notice, the members having no information to guide them in the proposals which were to be voted upon, a scratch resolution was passed, by which the late Ottoman Committee voted into the hands of an extraneous body the power to alter the Ottoman Committee into another form of association. On the same evening those who protested against this action met, and resolved to continue the work of the late Ottoman Committee as "The Anglo-Ottoman Society." The absurdity of Mr. Seed in saying that "one or two others withdrew from the organisation" will be seen from the fact that Lord Mowbray and Stourton, the original President, remained President of the movement in its form of the Anglo-Ottoman Society, and was always of opinion that the resolution of December, 1913, should have been ignored and our work continued as the Ottoman Committee. To avoid anything like a charge of irregularity, however, we agreed to hand over to Mr. Seed's Society the assets and liabilities of the old Committee, on an undertaking that neither Society would use the title "Ottoman Committee" in future.

Such details are of no interest to the public, and would not be quoted here except for Mr. Seed's statement. He speaks of twenty-five persons joining his Society who were members of the old Committee. I will not go into the peculiar facts about the way in which those names found their way on to his Society's books, except to say that many were sublimely ignorant that they had become members of his Society until they were informed of that fact. At the present moment there is no dispute between these two Societies, and there has always been the utmost good feeling between Mr. Seed and ourselves. We do not, however, accept his statement of the difference between the two Societies in the matter of policy or constitution. It is quite gratuitous to assume that his Society alone contains persons who have a special knowledge of Turkey or are connected with matters Turkish. Professor Léon, H.E. Djélaleddin Arif Bey, Ahmed Quilliam Bey, Messrs. G. W. Bennett, C. Mayo, and T. C. Tucker, of Constantinople, may be taken to know at least as much about Turkey as Mr. Seed himself. It is quite true that some members of the Ottoman Committee at first threw their lot in with Mr. Seed, and subsequently have joined the Anglo-Ottoman Society in addition. This is a proof that the Anglo-Ottoman Society must be carrying out properly the work inaugurated by the late Ottoman Committee. Mr. Marmaduke Pickthall is now a Vice-President of this Society, Mr. Louis Wills a member of the Executive, while among the members is Miss Grace Ellison. We think that these mutual memberships will tend to bring about that unity of action which Mr. Seed so much desires. Perhaps our Society will be able to do a little special work in consequence of its refusal to restrict its membership solely to Europeans. For example, none can over-estimate the value to our movement of such men as H.H. Prince Omar Toussoun or of Moulvie Zafar Ali Khan. The patronage of such men forms a practical link between Moslems of all parts of the world and those Britons who stand for good-will and good-fellowship with the Moslem world.—Yours, etc.,

ARTHUR FIELD
(Secretary of the late Ottoman Committee;
Secretary of the Anglo-Ottoman Society).
The Anglo-Ottoman Society,
158, Fleet Street, London, E.C.,
June 1, 1914.

THE THRACIAN PERSECUTIONS.

To the Editor of THE NEAR EAST.

SIR,—Mr. Hollist and Mr. Field are both labouring under a misapprehension of the sense of my letter. I ought to have expected as much. The "we were silent" applied to the whole of Great Britain, not to any friend of Turkey. If my letter gave cause for sorrow to any such person, I regret heartily not to have made my meaning clearer.—Yours, etc.,

A MEMBER OF THE OTTOMAN ASSOCIATION.

June 1.

PERSIAN INFLUENCE ON JUDAISM.

To the Editor of THE NEAR EAST.

SIR,—I have read with much interest in your issue of May 8 your quotation from the Rev. C. T. Harley Walker's article in *The Interpreter* concerning the Persian influence on Judaism.

The allusion in Isaiah to "the Lord who forms the light and who creates darkness, who makes peace and creates evil," is evidently borrowed from the Mazdean doctrine of the two principles of good and evil.

Whereas the Persians attributed the good to a good God (Ormuzd) and the evil to a wicked God (Ahriman), the Jewish prophet does not attribute the evil to Satan, but proclaims one God alike author of good and evil.

There are many connections between the Persian and Jewish religions, besides the fact that these two only of all religions of old are iconoclastic. This religious affinity explains the great kindness always shown by the Persians towards the Jews.—Yours, etc., MATINU-SALTANAH.

Teheran, Persia, May 23, 1914.

PLAYING THE GAME FOR RUSSIA.

To the Editor of THE NEAR EAST.

SIR,—In your issue of the 8th inst. your correspondent, Mrs. Diana Apcar, returns to the charge, vilifying the Turks and traducing anyone defending these much-maligned people. It must be unfortunate for your correspondent that 90 per cent. of those who have visited Turkey and resided for long periods among the Turkish people should testify that they are a most kindly, simply honest, clean-living, and sober race. The Armenians paint the Turks in the blackest colours—so did the erstwhile Balkan allies. What do we find? As soon as Turkish rule is removed from these warring sects and races in the Balkans they commence a fratricidal war of extermination, and their subjects are now pleading for the Sultan's protection. The alleged ill-treatment of their subjects by the Turks is an exploded fallacy. A little support is given to this assertion by a Servian, H.E. Chedo Myatovitch, a former Servian Minister to the Court of St. James's. Writing in last October's number of *The Asiatic Review*, he says:—"Political interest made us (the Balkan peoples) paint the Turks as cruel Asiatic tyrants, etc. An impartial history would prove that the Turks are rather Europeans than Asiatics, and that they are *not* cruel tyrants, but a nation loving justice and fairness, and possessing qualities and virtues which deserve to be acknowledged and respected." This belated confession may be pondered over by the Armenian, and also the wholly pitiful Nemesis which has so speedily overtaken the Slavs in the Balkans, who are now starving and perishing in a country which they have made almost a desert.

Your correspondent further says in her letter that she neither wishes nor cares for my opinion or advice. It is proverbial that the truth is often not palatable, but may I ask your correspondent why she brings her grievances to us and makes mischievous statments in our Press about the Moslems, 60,000,000 or more of whom are our fellow-subjects?

If your correspondent is not playing the game for Russia and her own personal aggrandisement, and really desires peace in Turkey and the welfare of the peasant, without further delay she ought to take her grievances to Russia, and try and get a hearing there. If she succeeds, and can persuade the Tsar and his Black Hundred to remove their covetous eyes and their agents provocateurs from the provinces where unruly Kurds and Armenians reside and lend themselves to plotting and stirring up strife, she will be taking the first step along the path to peace in Turkey. If England has kept Russia at bay in the past she has, I repeat, saved the Armenian peasantry from hell. It is obvious that the Powers do not care one iota about reform in Turkey or elsewhere, for if they were sincere in the matter of genuine reform they would have enough to do to put their own houses in order. Their sole concern is for fresh fields as dumping grounds for their war material; human lives are of no more importance to them than pawns in the game. Your correspondent is too self-centred. She says the Powers have assisted the Turk to victimise the Armenians, whereas it is rather the Turks who are harassed and victimised by the Powers, assisted by traitors in Armenia, who are ready to sell themselves and their people to the highest bidder. But may I ask, Who are the Powers upon whom your correspondent calls for vengeance? Alliances, wars, ententes (so-called) are made over the heads of the people—who are not consulted, but are misled by a Jingo Press—by half a dozen men in the Chancelleries, and by the financier who pulls the the strings therein. The people everywhere are victimised by the soulless spoliators—in Africa, in Mexico, in China, in Japan, in the U.S.A. The Turks are almost the only people who have no desire to take part in this sordid game, for it is very many years since Turkey sought fresh territory. There are worse tyrants in the world to-day than ex-Sultan Abdul Hamid, who was provoked by treachery and plotting, and was open when young to the good influences which *our* statesmen and diplomatists could have brought to bear upon him. But instead they abused their power to deceive and betray and plunder.

These men in the Chancelleries do not desire peace; if they had been in earnest they could have stopped the infamous brigandage in Tripoli and the Balkan War. But they hoped for a share of the spoils. They do not desire peace, otherwise the islands of Chios and Mytilene would have been secured to Turkey and the help of British officers given (at the Turks' request) for administering the Asiatic provinces. In conclusion, I may say I will help the Turks, and by helping the Young Turks I shall be helping the Armenian peasantry, whether Mrs. Diana Apcar likes it or not.—Yours, etc., (Mrs.) MARGARET MARION ROBINSON.

20, Sutherland Place, W., May 25, 1914.

YŌST

"The Typewriter for Beautiful Work"

The latest visible-writing model of the Yōst Typewriter is far in advance of any previous accomplishment in the writing machine world. From every point of view it is all that can be desired. Strong, simple, speedy, light in touch, and reliable to the last degree. Every description of writing or figuring can be negotiated on a Yōst with the utmost ease and speed. Prominent among the Yōst innovations which have met with great success is

The YŌST *for* Writing Arabic.

هذا رغم العرب واذا مشت زخمهم فكبيرٌ ولاحرج فانهم سادة الفصحآء وقدوة البلغآ وارباب السيف والقلم الآ ان الحوادث ابكمتهم والمظالم ازلتهم بطيآن فئة من المسلمين تسنّموا الامارة واركبوا السوء نفوسهم الآمارة حتى كادت البلاد تقفر عى ايديهم وتدثر رسومها باقر اط تعدّيهم .

اما الان وقد تدارك بعض القواد الامر واطفأوا ذاك الجمر بهمة العسكر فلا ينكر بان البلاد كلها قد اشتركت بهذا النصر الآ الفخر فانه المسلمين وكفّارة الانراك الحديثين عن سيآت ابيهم الاقدمين!

THE PRESS ON THE NEAR EAST.

The Balkan Chess-board.

In the current number of *The National Review* there is an important and illuminative article on "Future Developments in the Balkans," by "A Diplomatist." Referring to the relations of Roumania with Russia and the Dual Monarchy, he says:—

Transylvania can only be won by the overthrow of Austria, and that, in its turn, implies the victory of Russia. But such a victory signifies the definite triumph of the Slav race, which will then form a vast ocean, encompassing Roumania on all sides. . . . On the whole, and appearances to the contrary notwithstanding, it is very doubtful whether Roumania has at any moment seriously thought of altering her traditional policy.

In spite of the traditional friendship of Greece with England and France, she is more likely to find that she has more in common with the Triple Alliance than the Triple Entente. "When all the facts about the latest Balkan crisis are known," he says, "it will be found that some of the warmest champions of Greek interests come from unexpected quarters." The present uneasy distribution of forces in the Balkans will in the future assume the form sketched in the following passage:—

A Servo-Bulgarian understanding will be equally advantageous to Servia and Bulgaria. To the former country it will not only afford an additional guarantee against the Austrian peril, but also an indispensable support in the event of a union with Montenegro. Such a step is certain to meet with stubborn opposition in the Dual Monarchy, which will probably be backed on this occasion by Roumania. The friendship of Bulgaria, under these circumstances, becomes a valuable asset and is worth acquiring, even at the price of some territorial modification in Macedonia and the recognition of the Bulgarian nationality in that province. These concessions must be made by Servia, as otherwise the profit will be all on one side, and Bulgaria will have no inducement for striking a bargain. Just as a whole set of circumstances warrant the conjecture that a *rapprochement* between Bulgaria and Servia is by no means excluded, so, on the other hand, there are facts which point to the conclusion that the present Greco-Roumanian friendship will eventually mature into something more precise and permanent. Thus, instead of the present somewhat uneven distribution of the Balkan forces, two distinct groups will be formed, each drawing its inspiration from a different source, and each pursuing a different ideal. And, as the law of attraction holds good in the political as well as the physical world, the Slav group will naturally gravitate towards that European constellation with which the fortunes of the race are linked; while the non-Slav group, probably reinforced by Turkey, will be arrayed on the opposite side.

"But," the writer adds, "then, as now, the Balkans will remain what they have been for many years past—a chessboard on which the Great Powers play their game, using the Balkan peoples as pawns."

In Epirus.

In an article entitled "A Visit to Epirus" a correspondent of *The Morning Post* (June 1) contrasts the Janina of to-day with the Janina of six years ago, when he last visited the place:—

There is now a good hotel, with a view over the lake and the great snow-clad range of mountains behind it which Switzerland might envy, and which, as I saw it, with the full moon shining in the romantic and tragic waters, where once the "Lion of Janina" drowned the fair Euphrosyne, is the realisation of grand opera. A club, to which visitors are admitted, provides meals and the newspapers, and a military band in the evenings enlivens the "Square of Constantine the Liberator," as the centre of Janiote life is now called. Janina however, suffers commercially from the loss of Northern Epirus, which cuts her off from some of her old markets, such as Argyrocastro, while the problem of the 25,000 refugees weighs heavily upon the country.

Of the heads of the "Autonomous Government" he writes:

People in England, accustomed to regard insurrections as the work of *sansculottes*, hardly realise the position and quality of the men who have directed the government of Autonomous Epirus. . . . M. Zographos, the President, is a very rich man, who was Foreign Secretary for a few weeks in 1909 at Athens, and holds what we should call Conservative views. His nephew, M. Alexander Karapanos, who directs Epirote foreign policy, is an ex-diplomatist who represented Greece in Rome from 1910 to 1912, and has inherited a large fortune from his father, who excavated Dodona at his own expense. M. Parmenides, the Minister of Finance, might easily pass for an Englishman, for he was born in England, speaks English to the manner born, and is married to an English lady. He has abandoned his beautiful villa near Benizze, in Corfu, to work for the Epirotes. All these men have left luxurious homes to live in tents and spend laborious days and nights in the cause of Northern Epirus. With them is the Metropolitan of Vella and Konitsa, a striking example of the Church Militant, a divine who carries a prayer book in his pocket and has a Mauser rifle handy beside him.

Persian Oil and Imperial Communications.

The Daily Graphic (May 28) has an interesting note, under the heading "A Problem in Oil and Water," from which the following is an extract:—

When Lord Beaconsfield sought to secure our maritime route to India by buying the Khedive's interest in the Suez Canal our domination of other sections of the route was complete and unquestioned; and later on, when, by the Cyprus Convention, he made the whole of Asiatic Turkey a British sphere of interest, he not only earmarked the landward route for Great Britain, but also brought those very oil-wells in Persia which are now so necessary to us within easy reach of British protection. To-day the situation has so completely changed that one of the hardest problems for us in case of a great war would be, not how to utilise the Suez Canal and the Persian oil-wells, but how to get to either of them.

Lord Kitchener's Report.

We give below some representative extracts from the Press on Lord Kitchener's Report:—

It was well said a few weeks ago that Lord Kitchener's link with the life of Egypt is "a human link." To those familiar with his views his long and careful analysis of the degree to which an Oriental race can be entrusted with a share in its own control will not in the least be unexpected. His vein is hopeful, but cautious. He perceives that in Egypt representative institutions must be plants of slow growth, sometimes liable to droop and become weak; but the obstacles encountered do not deter him from favouring a guardedly progressive policy.—*The Times* (May 28).

Lord Kitchener's great personal influence is seen very clearly in every page of the annual report on the finances, administration, and condition of Egypt and the Soudan, which has just been published. It is a document that recalls in some respects the brilliant annual reports which Lord Cromer used to issue during his long and successful *régime*. That is to say, there is the same note of quiet confidence which comes from strong self-reliance, and an entire absence of all fuss and over-eagerness. The British Agent points out that Egypt is making steady progress. He does not pretend that it is fast, or that miracles are being accomplished, or that all the difficulties have been surmounted. But he gives a record of sound, untiring work on the part of the Administration, and shows what energy is being expended in promoting the best interests of the Egyptian peoples.—*The Daily Telegraph* (May 28).

The British public may well be proud of the work done by its representatives in Egypt. . . . The report may be recommended to the careful study of everybody interested either in Egypt especially, or in Imperial matters generally, for it will bear out the belief that in Lord Kitchener we have a statesman as well as a great soldier.—*The Statist* (May 30).

If one cannot quite picture an Egypt cleared of ophthalmia, debt, drought, and dirt diseases, one can at least imagine twenty years of Kitchener making serious inroads on all these plagues of the Nile. But what we hope is that this enlightened policy of barrages, inspections, anti-usury laws, and scientific agriculture will go hand-in-hand with the not less important aim of teaching Egypt how to work it.—*The Nation* (May 30).

PERSONAL & SOCIAL

CALENDAR OF THE WEEK.

Showing Concordance of the Gregorian, Julian, Moslem, and Jewish dates.

Gregorian. New style.	Julian. Old style.	—	Moslem.	Jewish.
1914. June.	1914. May		1332. Rejab	5674 Sivan
5	23	Friday	11	11
6	24	Saturday	12	12
7	25	Sunday	13	13
8	26	Monday	14	14
9	27	Tuesday	15	15
10	28	Wednesday	16	16
11	29	Thursday	17	17

To-day, 11 Rejab, is the birthday of Princess Fatma Sultana, daughter of the late Sultan Murad Khan, who married Damad Refik Bey in 1907.

Sunday is the birthday of Tsar Ferdinand's unfortunate first cousin the Dowager Empress of Mexico.

Monday, 14 Rejab, is the birthday of the daughter of the ex-Sultan Abdul Hamid, Princess Naiyme Sultana, who was at one time married to Damad Kemal-ed-Din Pasha, son of the famous Ghazi Osman Pasha, and is now the wife of Damad Djelal Bey.

Thursday is the birthday of Princess Olga, the eldest daughter of Prince Nicholas of Greece.

Thursday is the birthday of Prince Igor Constantinovitch of Russia, brother-in-law of Princess Helena, only daughter of the King of Servia.

Thursday is the birthday of Prince Gaëtan of Bourbon-Parma, half-uncle of the Crown Prince of Bulgaria.

Thursday, 17 Rejab, is the birthday of Mehmed Abid Effendi, the youngest son of the ex-Sultan Abdul Hamid.

Reuter's telegram from Constantinople states that in honour of the King's birthday a garden party was held on Wednesday at the British Embassy, and was very largely attended by the British colony and the official and diplomatic world. A Turkish naval band played during the reception, which was a great success.

King Ferdinand of Bulgaria is reported to have arrived at Ebenthal, in Lower Austria, to spend a few days on his estate there.

According to the *Matin*, the Ottoman Heir Apparent, H.I.H. Yussuf Izz-ed-Din Effendi, who last year took a "cure" at Edlach, in Austria, wishes this year to consult a French physician, and will possibly be accompanied by H.I.H. Zia-ed-Din Effendi.

His Majesty the King of the Hellenes, attended by Mr. Venizelos, his Prime Minister, is in Corfu for the jubilee celebrations of the union of the Ionian Islands with Greece.

According to *The Manchester Despatch*, Mr. Thomas Mawson, who is engaged in the replanning of Athens, has returned to England.

A Reuter's telegram from Athens, dated June 3, reported that in connection with the celebrations commemorating the fiftieth anniversary of the cession of the Ionian Islands to Greece, King Constantine telegraphed from Corfu to King George on Wednesday expressing the gratitude of the Greek nation for Great Britain's action on that occasion, and the support given by her to the Greek cause. Dr. Streit, the Foreign Minister, also telegraphed to Sir Edward Grey, in the name of his Government.

Our Bucharest Correspondent writes (May 31):—Prince Carol of Roumania left on Monday morning last for Potsdam, in order to resume his military duties in the Prussian Regiment to which he is attached.

For some time the younger members of the Crown Prince's family have been stopping at Constantza. Lately Princess Ileana and Prince Mircea made a sea voyage as far as the Piræus, where they were for a time the guests of the Greek Royal family.

H.R.H. Princess Elizabeth of Roumania, has arrived in Madrid, where she is the guest of her aunt, the Infanta Beatrice d'Orleans of Spain.

Lord Kitchener who, as we have already announced, will leave Cairo on June 18 for Alexandria, will there embark on the Austrian Lloyd steamer for Europe with Major Fitzgerald. Mr. Ronald Storrs will be on the same boat, but will disembark at Brindisi. Lord Kitchener and Major Fitzgerald will proceed, viâ Trieste, direct to England. The British Agency will move into its summer headquarters at Ramleh on June 18, and Mr. Cheetham, who is returning about that date, will then become Chargé d'Affaires.

Sir Francis Elliot, H.B.M. Minister in Athens, has left Greece on leave, and during his absence Mr. Erskine will act as Chargé d'Affaires.

Our Roumanian Correspondent announces His Excellency Mr. M. G. Ristitch, who has been Servian Minister in Bucharest since the end of 1906, has been appointed to the vacant Legation in Berlin. Mr. Grigorovitch will succeed him in Bucharest.

H.E. Fethi Bey, Ottoman Minister in Sophia, has left for Constantinople on two months' leave of absence.

Halil Bey, Councillor of Legation in Sofia, will act as Ottoman Chargé d'Affaires during the absence of his chief.

The Hellenic Minister and Mme. Gennadius have returned to the Legation from the country, where they spent Whitsuntide.

Captain Orr, the Chief Secretary of Cyprus, will shortly be coming home on leave. Major Bolton, Commissioner of Limassol, will act for him.

Mr. Alison Russell, the King's Advocate in Cyprus, will be coming home on leave in July. Mr. Alan Stuart, President of the District Court, of Limassol, now at home on six weeks' leave, will act for him.

Mme. Gennadius, the wife of his Excellency M. Jean Gennadius, the Hellenic Minister in London, has consented to perform the naming ceremony on the occasion of the launch of the "Basileus Konstantinos" on June 9.

Mr. Nedcoff, Bulgarian Consul-General at Adrianople, has been appointed in a similar capacity to Salonika.

Lieut.-Colonel Sirmanoff, Bulgarian Military Attaché in St. Petersburg, is about to retire, and has been received by H.I.M. the Tsar in farewell audience at Livadia.

Don Ernesto Freire, Spanish Consul at Trieste, has been appointed Consul at Tangier vice Don Juan Potous, promoted Consul-General in Lisbon.

A Reuter's telegram from Constantinople, under date May 29, stated that Talaat Bey, the Minister of the Interior, returned to Constantinople from Bucharest on that date.

Our Jaffa correspondent writes, under date May 25:—Mr. W. Hough, H.B.M's. Vice-Consul at Jaffa, left Jaffa on the 18th inst., on three months' leave, and Mr. N. H. Fiani, the British Pro-Consul, has assumed charge of the Vice-Consulate during his absence.

Colonel Echague, A.D.C. to H.C.M. Don Alfonso XIII., has gone to Rabat to visit the French Resident-General in Morocco.

M. Georges Morand, of the Ministry of Foreign Affairs in Paris, has been appointed French Vice-Consul in Cairo.

The Japanese Military Mission under General Tanaka, which has been visiting the Balkan capitals, went to Constantinople and was received as the Seraskierate by Damad Enver Pasha, the Minister of War.

We appear to have been very unfortunate in giving the name of the German Consul at Tabriz. A Tabriz correspondent informs us that it is neither Von Linden nor Wilhelm Liken, but Wilhelm Litten. We hope that this third attempt is correct.

The Cavaliere Enrico Albertazzi has been appointed Judge-Consul in the Italian Consular Court in Constantinople.

Major von Strempel, formerly German Military Attaché in Constantinople, has been appointed Instructor to the Ottoman Imperial Princes who have gone to Berlin for their education.

Mr. Hallett Johnson, the newly appointed Secretary to the American Embassy at Constantinople, arrived in town on Monday evening from Draycott, Chippenham, where he has been spending Whitsuntide with Princess Hatzfeldt.

Comte Doynelde St. Quentin, secretary to the French Embassy at Constantinople, arrived in London last week, and visited M. Paul Cambon, the French Ambassador, last Friday.

WHERE TO STAY.

LAUSANNE-OUCHY (Switzerland).

SAVOY HOTEL.
Near the lake, with splendid park.

CECIL HOTEL.
In the town and 5 minutes from the station.

Two First-class Family Hotels. High-class Cuisine. French Chef.
J. SUMSER, Manager-Proprietor.

Sofia (Bulgaria).
GRAND HOTEL BULGARIE
(opposite the Royal Palace).
First-class Hotel. Entirely renovated and beautifully situated in the centre of the city, near Post Office, Theatre, Museums, Banks, etc. Electric Light. Central heating. Baths. Garage. Telephone. Garden. French Restaurant. Good wines. Café. Foreign newspapers. Most frequented by English and American Visitors. Interpreter meets all trains. Rooms from 4 frs.

Cyprus.
THE CYPRUS HOTEL CO.
Open all the Year round—
LIMASSOL (Olympus Hotel).
FAMAGUSTA (Savoy Hotel).

C. Serkis Bey Hamandjian, Secretary to the Turkish Embassy, has returned to London from Paris.

A Central News telegram from New York, dated June 2, states that according to a telegram from Phœnix, Arizona, Mr. Ryan, Controller of the United States Reclamation Commission, has announced that Sir William Willcocks has been retained by the Government as consulting engineer in the reclamation service.

We regret to learn from a *Times* correspondent that Sir Reginald Wingate, who arrived at Cairo at the beginning of this week, is indisposed. He was expected, however, to leave for Europe yesterday.

Sir Rudolph von Slatin Pasha, the Inspector-General of the Sudan, is on his way to England.

El Kaimakam C. E. Palmer Bey, D.S.O., has been appointed acting Adjutant-General of the Egyptian Army during the absence on leave of H.E. El Lewa Drake Pasha.

The Right Rev. Dr. Gwynne, Bishop in Khartoum, who has made a ten days' visit to Jerusalem and other places in Palestine, returned to Egypt on May 21. He was expected to arrive at Khartoum last Friday.

Sir George Macaulay, Director-General of the Egyptian Railway Administration, will leave for England on June 15.

Brugsch Pasha has left Egypt for Europe.

Lord and Lady Mowbray and Stourton have arrived at the York Hotel, Albemarle Street.

Lieutenant-Colonel Hickman Morgan and Mrs. Morgan have returned to 14, Grosvenor Place from yachting in the Adriatic.

Mr. Wellcome, who has stopped his excavations at Jebel Moya for the summer, left Khartoum on May 21.

Dr. Ethel Smyth has left Alexandria by the Austrian Lloyd steamer on her way to Vienna to make arrangements for the production of her new English opera, which she has composed during her five months' residence this winter at Heluan. It is a dramatisation, by the composer, of W. W. Jacobs' well-known story, the "Bosun's Mate."

Major and Mrs. Comfort, with their daughter, Mrs. Crookshank, who has just returned from Egypt, are expected to make a short stay at Vichy before returning to England.

Mrs. Bernard left Khartoum on May 21. Colonel Bernard was not expected to leave Khartoum before the end of May.

The King has been pleased to grant unto Mr. Charles Elliott Lyall, Senior Inspector, Sudan Government, authority to wear the Insignia of the Fourth Class of the Order of the Osmanieh, which decoration has been conferred upon him by the Khedive, authorized by the Sultan.

Tsar Ferdinand has conferred the Military Cross for Valour upon Sister Augustine of Salonika in recognition of her services to the Bulgarians (sick, wounded and imprisoned) in Hellenic Macedonia.

The *Sudan Government Gazette* announces that H.H. the Khedive has conferred the Second Class of the Order of the Mejidieh upon Said Pasha Shoucair, Director-General of Accounts, Sudan Government.

Mr. Zographos, formerly the President of the Autonomous Government of Epirus, has been returned to the Greek Parliament in unopposed for a constituency in Attica.

Lady Inchcape is giving a ball at the Ritz Hotel on June 19.

Mrs. Peter Ralli's ball, which was to take place on June 3, at 11, Hyde Park Gardens, is postponed owing to illness.

Mrs. M. G. Mavrogordato is giving a ball, at Hyde Park Hotel, on June 10.

A marriage has been arranged, and will shortly take place, between Hermann Nathaniel Bowden-Smith, of the Ministry of Finance, Cairo, eldest son of the Rev. F. H. Bowden-Smith, of Careys, Brockenhurst, Hants, and Daisy Beatrice, youngest daughter of the late George Edward Porter, I.C.S.

The marriage arranged between Major Cyril Eustace Palmer, D.S.O., Royal Artillery, attached to the Egyptian Army, and Nina Kathleen, daughter of Mr. and Mrs. Harry Scarlett, of Prestone, Firle, Sussex, will take place on August 6, at Firle Church.

A marriage has been arranged between Peter, eldest son of Mr. and Mrs. Pandia Rodocanachi, of 34, Pont Street, and Dunchurch, Rugby, and Olga, younger daughter of Mr. and Mrs. John Zitto, of 18, Cleveland Gardens.

Major-General the Hon. Sir Savage Lloyd-Mostyn, who died suddenly on Tuesday morning at Cole-Orton Hall, near Ashby-de-la-Zouch, where he was staying as the guest of Mrs. Abel Smith, served in the Crimea in 1855, taking part in the siege of Sebastopol and the attack on the Redan, and was awarded the medal with clasp and the Turkish medal.

We regret to announce the death from typhoid of Mr. Ernest H. Walden, on May 21, at Cairo. He was well known and greatly respected in the city.

We regret to report the death of Prince Constantine Soutzo in Bucharest.

By the generosity of Sir Charles Waldstein, Vice-President of the Hellenic Society, and Lady Waldstein, the Victoria and Albert Museum has just acquired a remarkably fine velvet cope. This is one of a complete set of vestments, consisting of this cope, two dalmatics and a chasuble, which has been on loan at the museum for some time past. The cope, which is, perhaps, the finest of the set, has an embroidered hood showing the Virgin and Child enthroned, while on the magnificent orphreys appear SS. Apollonia, Philip, Margaret, John the Evangelist, Simon, Mary Magdalen, Bartholomew and Catherine of Alexandria, thus adding great iconographical value to its general artistic importance. The gift is made in memory of Lady Waldstein's parents, Mr. and Mrs. Einstein, whose great collection of textiles and needlework was deservedly famous.

Our Bucharest Correspondent writes:—The first Roumanian woman engineer is Miss Elisa Leonida, daughter of Colonel Leonida, who has just completed her examinations at the technical school at Charlottenburg and obtained her diploma as engineer. It will be interesting to see whether the young engineer will be able to follow her profession in her native land. So far only lady doctors and chemists' assistants have been allowed. Although one lady succeeded in passing every examination for lawyer, she is legally not permitted to follow her vocation.

The King of the Hellenes has conferred the following docorations on the members of the British Naval Mission serving with the Greek Fleet:—Grand Officer of the Second Class of the Order of the Redeemer, Rear-Admiral Mark Kerr. Commander of the Third Class of the Order of the Redeemer, Engineer Captain James Watson, R.N. (retired); Commander Reginald Henderson, R.N.; Commander Hubert Cardale, R.N.; Commander Gerard Wells, R.N.; Commander Cecil Hamilton, R.N.; Commander Andrew Strange, R.N.; Commander George Leith, R.N.; Engineer Commander Sydney Bryer, R.N.; Lieut.-Commander Sidney Meyrick, R.N. Officer of the Fourth Class of the Order of the Redeemer, Acting Lieutenant C. P. Pizey, R.N.R.; Engineer Lieutenant George Cannan, R.N.; Assistant Paymaster Alexander Winter, R.N.; Assistant Constructor C. W. Kerridge; Assistant Naval Store Officer, W. B. Stanton. Knight of the Fifth Class of the Order of the Redeemer, Mr. George Prince, gunner, R.N.; Mr. Frederick Moon, gunner, R.N.

WHERE TO STAY.

Cairo's Hotels de Luxe.

SHEPHEARD'S HOTEL.
Open all the year round.

SEMIRAMIS HOTEL.
Splendid position on the East Bank of the Nile.

GHEZIREH PALACE.
Formerly the Palace of the late Khedive Ismail.

GHEZIREH CASINO.
In pure Moorish style, with a permanent Restaurant Francaise, is situated in the immediate neighbourhood of Ghezireh Palace.

FRIDAY, JUNE 5, 1914.

CYPRUS AND CORFU.

Yesterday was the thirty-fifth anniversary of the signature of the Cyprus Convention which constituted that island into an autonomous sanjak of the Ottoman Empire, to be administered by Great Britain on behalf of the Sultan so long as Russia should occupy certain provinces in Asia Minor, which will probably still be Muscovite some centuries hence. To-day the inhabitants of Corfu are engaged in celebrating the jubilee of the evacuation of the United States of the Ionian Islands by Great Britain in order that they might be annexed to Greece, a fate which had been demanded for them by vote of the Ionian Senate. It may seem to the casual observer that there is no particular connection between these two events of which the anniversaries happen to coincide. In the minds of Hellenic Irredentists, however, the abandonment of Corfu in favour of Greece is merely a precedent for the transfer of Cyprus to the same country. That Great Britain, after spending much good money and building many miles of good roads, should have been intimidated by a vindictive Press campaign of vilification and mendacity into making a present of some islands in the Adriatic to her calumniators is, to some people, an excellent reason why she should yield to another campaign of misrepresentation and abuse on the part of grievance-mongering agitators and gracefully concede an island in the Levant upon which also a million of good money has been spent from the pockets of the British taxpayer. It is a curious argument at best, and the methods of enunciating its beauties adopted by many of its advocates are singularly unlovely, and would, under any but a British Administration, have led long ago to rigorous methods of repression, such as fines and imprisonment for sedition or *lèse majesté*. Advocates of ἕνωσις in Cyprus picture themselves as victims of an oppressive and stultifying rule which chokes their every effort, of an intolerant and incompetent alien bureaucracy which by its mere existence deprives many Cypriots of eagerly desired political employment. They assert that but for the odious presence of the detested British the island of Cyprus would have been seized by the Greek Navy during the recent war with Turkey, oblivious of the possibility that it might have been previously occupied by the Italians, whose sovereign's ancestors for many generations styled themselves Kings, not only of Sardinia but also of Cyprus. Had Cyprus been in the market, so to speak, at the outbreak of the Turco-Italian War it is a moral certainty that Rome, which represents the claims alike of the House of Savoy and of the Republic of St. Mark, would have restored the Italian dominion in Cyprus which was overthrown by the conquering Ottoman in 1570. In the unlikely event of the British Government deciding to withdraw from Cyprus at the present juncture the island would revert to the unfettered simplicity of Young Turkish administration, and enthusiastic supporters of union with Greece would doubtless find themselves subjected to a similar régime to that which is inducing so many Greeks in Thrace and the Troad to realize that there are more ways of becoming a subject of King Constantine than waiting for actual annexation to his realms. It is possible, however, that the Turks might be persuaded that Cyprus was a marketable property. Greek residents in Rhodes are unlikely to advise their Cypriot cousins to pray for an Italian occupation. Annexation by Germany, while possibly preferable to subjection to Rome, would not be union with Greece, and might tend to limit the licence allowed by a tolerant British Administration to vociferous patriots. Acquisition by France would undoubtedly revive unpleasant memories of the Latin ascendency of the days of the Lusignans, and in spite of French friendship for Greece could not be considered as a real triumph of Hellenic irredentism, while in all probability natives of the island would find less and less room for them among the ranks of their salaried administrators. Subjection to Russia would be to put "Hellenic soil" under the foot of the Slav, a proceeding which has no cheerful precedent to sweeten its adoption. It may appear that we have been discussing unlikely hypotheses, but at least we can assure the somewhat noisy advocates of the abandonment of Cyprus by its present Administrators that in the first place such an abandonment, possible in the case of Corfu fifty years ago when international rivalries were less developed, is quite outside practical politics so far as Cyprus is concerned, and in the second place we should like to impress upon them, on excellent authority, that if Great Britain at any time has to withdraw from Cyprus Greece has no chance whatever of being her successor in the possession of the island. The claims of Hellenic nationalism may find Continental support when arrayed against Albania or Bulgaria—against Turkey they are in a less favoured position inasmuch as the Porte has more potential concessions at its disposal than the Cabinet of Athens, but a conflict between Hellenism and the actual interests or ambitions of any great Power could only end in lamentable disappointment for Greek aspirations.

We do not claim that the Government of Cyprus is perfect; indeed, the majority of the elected members of the Legislative Council devote immense energy to the perpetual obstruction of its efforts whenever they can find opportunity for so doing in a sufficiently public manner. Apart from that there is the burthen of the Tribute, although the High Commissioner has at last won the consent of the Colonial Office for a minor mitigation of its incidence by securing the application of surplus revenues to immediate works of utility within the island. It is not for us to discuss whether or no the Tribute is too large. It exists. The British Crown is pledged to the payment by Treaty, nor do we advocate that disregard of an international obligation which is involved by the arguments of those who clamour for the immediate abolition of that onerous charge. But by agreement with the Porte the Tribute can be capitalized, the British Government can guarantee a Cyprus loan at such a rate of interest as will allow the island to establish a sinking fund for the ultimate liquidation of the loan, and the Treasury of Nicosia will then be honestly free of a serious financial incubus, while the British taxpayer will equally be quit of his present obligation to contribute £50,000 a year to assist the island. The payment of so large a sum of ready money to the Porte can readily be made contingent upon Ottoman recognition that "inhabitants of Cyprus," who at present have an unsatisfactory international status, are to enjoy British protection when in the dominions of the Sultan, and upon the readjustment of those minor points of detail wherein at present Ottoman official procedure is detrimental to the interests of the Cypriots. We have already emphasized the profound modification which has been effected in the political and mercantile importance of Cyprus by the establishment of a German commercial centre at Alexandretta, and by French railway and harbour activities along the Syrian coast. Opportunities are at hand; let the inhabitants of Cyprus grasp those opportunities, let them, by way of change, do something for themselves and devote their adaptable genius to building up the commerce of the island to something like what it was under the Latins, and abandon the sterile fields of a preposterous political agitation to those whose mental calibre prevents them from framing a commercial advertisement or competing with real antagonists, and limits them to the acquirement to notoriety by mouthing abuse of an adversary who merely despises them. Heaven has given most men the capacity to make the best of what they have, and it is only a child, or a politician with the mind of a child, who sulks because he cannot get the moon, and declines to make shift with the earth which is offered to him.

THE ALBANIAN "ULSTER."

(From an Occasional Correspondent.)

Victories of the Pen.

Since the outbreak of war in the Balkans—and, indeed, before it—the triumphs of journalism have rested with the Greeks. That quick-witted and cosmopolitan race, possessing opulent and influential colonies in all the great centres of European civilisation, has used its wealth and its very considerable intellectual equipment without stint in the national cause, and has acquired a scarcely disputed monopoly in the creation of Western opinion. Gifted with an inherited talent for dialectics and great imaginative powers, the Greeks have won an easy victory in the literary arena; as each question affecting Hellenic interests arises their view is impressed upon the public in a host of newspapers, reviews, and books, and the battle is already won before their slow-paced opponents are ready to take the field. A signal instance of Greek mastery over the public mind was afforded by the wonderfully successful Press campaign against the Bulgarians last summer; those who organized it, according to a Greek assertion in the British Press, "deserve to be honoured by their country far more than the brave men who have fallen on the battlefield. That the impression created throughout Europe was false only proves more clearly than ever the intellectual superiority of the Greeks." Another remarkable Greek triumph has been won in the presentation of the case of the "Epirotes." That the world has been successfully convinced is shewn, among other indications, by the frequent designation of Northern Epirus—or, rather, Southern Albania—as "the Epirote Ulster."

A False Analogy.

The analogy, of course, is totally false, or rather non-existent, and Ulster, if she only knew the facts, would protest with indignation. There is absolutely no parallel either from the racial or the religious point of view. In the Protestant portion of Ulster there is a fairly compact population, Anglo-Saxon—or, at least, Scottish—in origin, alien in race and in religion from the neighbouring Irish element and bound by the strongest ties of tradition and sentiment to the kindred people of Great Britain. In Northern Epirus nine-tenths of the population is Albanian both in its origin and its sympathies, the remaining tenth being Kutzovlach, or "Arumanian"; the genuinely Greek element is practically negligible, and is confined to a few inhabitants of the principal towns. In religion the Tosks, or Southern Albanians, are mainly Moslem, with a very considerable Christian minority, which is quite as Albanian in sentiment as the majority. The proof of this may be found in the fact that wherever the Christian Epirotes have been left free to act independently they have taken part in the recent struggle against the Greeks. With the Moslems as well as the Christians the consciousness of nationality is strong, notwithstanding the persistent efforts of the Turks and the Greeks to widen the cleavage of creeds. The comparison of Southern Albania with Ulster is therefore wholly illusory.

"Greek" and "Orthodox."

The prevailing error with regard to Albanian sentiment is largely due to the mistaken idea that all Christians in these regions are "Greeks," an impression confirmed by the loose and incorrect description of the Eastern Orthodox Communion as the "Greek Church." The Patriarchate at Constantinople is, strictly speaking, Œcumenical or universal, and formally condemns "phyletism," or the propagation of any racial movement, as contrary to its teaching and principles. The Greeks have nevertheless at all times sedulously employed the ecclesiastico-scholastic propaganda for the furtherance of their national aims, and from the days of Byron the Christian inhabitants of Southern Albania have been commonly misnomered "Greeks." But even in the maritime district of Chimara the Greek propaganda has only been partially successful; only three villages speak Greek to any extent, and the great majority of the population speaks Albanian in the household. This is universally the case in Northern Epirus; the circumstance that a portion of the male population is bi-lingual is solely due to the fact that the Turks absolutely prohibited the teaching and even the writing of the national language while leaving the Greeks free to open schools wherever they pleased. The principle *Divide et impera* was sedulously applied by Abdul Hamid with the object of extinguishing Albanian national sentiment, and his example was followed by the Young Turks, who, though nominally allowing the opening of Albanian schools, imposed the Arabic characters, which the Albanians would not accept. The Greek bishops and schoolmasters have thus been enabled to create a small Greek party (especially in the principal towns), which has been augmented by various means since the Greek military occupation of Southern Albania.

The "Epirote insurrection" cannot therefore be described in any sense as an indigenous movement. Its outward and visible sign has been the formation of an "insurgent" force—in reality a heterogeneous body composed of adventurers and free-lances from all parts of the Levant, "deserters" from the Greek Army, contingents from Crete, Acarnania, Aetolia, and the Morea, and a small admixture of mercenaries drawn from the local Christian element, which was exposed to considerable pressure during the process of recruitment. The Cretan contingent, composed of professional warriors under the leadership of Manurekis, Zurudakis, Kapetanakis, Yerogiannis, and many other pallikars, is especially numerous, and is stated by the Athens Press to exceed 2,500 men. There are also the "Garibaldians," under Count Roma of Zante, and the Maniotes, under Mr. Mavromichalis, the son of one of Mr. Venizelos's most conspicuous opponents. The "Holy Battalions" are indeed a motley force, commanded and instructed by commissioned and non-commissioned officers from the Greek Army and furnished with field artillery, quick-firing guns and ammunition from the same source. The indigenous element is as conspicuously lacking in their ranks as it is prominent in those of the Ulster Volunteers.

A Fictitious Hellenism.

The effort to create a false conception of racial conditions in Northern Epirus was also made—but in this case with indifferent success—during the investigations of the International Commission for the delimitation of the Albanian frontier. The Greeks, being in military occupation of the districts through which the Commissioners passed, provided all the requisite apparatus for a *mise en scène*. The villages were tricked out with Greek flags, the natives were shut up in their houses, and genuine Greek peasants from Southern Epirus—and even, it is said, from the Morea—were imported in order to personate the inhabitants. The Commissioners were everywhere met by clamorous deputations of men, women, and children demanding annexation to Greece. At Kinami, in the Colonia district, a purely Moslem village, the usual Greek paraphernalia were exhibited, and a bell was heard tolling, which the Commissioners were assured belonged to the Christian church. Unluckily, the servant of one of the delegates was a native of the village. He stoutly protested that neither a church nor a Christian, much less a Greek, was to be found in the neighbourhood. The Commission decided on an autopsy, and proceeding towards the supposed church, discovered a bell suspended from a tree and being lustily pulled by a Greek emissary. At Prodani a deputation of so-called Moslem women made the usual Philhellene demonstration, but the fraud was exposed by the wife of an Albanian Bey, who had been banished to Crete for revealing his Albanian sentiments. She declared that the women were Greeks from Southern Epirus, and suggested the removal of their upper garments. This was done in presence of the Commission, and the costume of peasant women of the Janina district was revealed. When another deputation—of "Greek" women and children—presented itself one of the delegates threw some coins to the children—a scramble followed, and exclamations in the purest Albanian rent the air.

It is easy to mislead the unsuspecting Western, and, to judge from such phrases as the "Albanian Ulster," it would seem that the British public is still under the illusion that the "Holy Battalions" represent a gallant peasantry contending *pro aris et focis* against an alien tyranny. Owing to extraneous causes, the Epirote movement—in reality a foreign aggression—has attained a certain measure of success, and a limited autonomy will be conferred on the disputed area. The decision of Europe is from one point of view satisfactory, inasmuch as the future of the young Albanian State undoubtedly lies in the creation of a series of autonomies. But under any system of self-government the real sentiments of the people will assert themselves, and Northern Epirus will remain, as it is to-day, essentially Albanian.

THE NEW ALBANIAN CABINET

Turkhan Pasha's Cabinet, which originally took office on March 17, has been reconstructed, and is now composed as follows:—

Grand Vizier and Foreign Affairs	Turkhan Pasha
Minister of the Interior.....	Akif Pasha
Minister of Finance	Mr. Philip Nogga
Minister of Justice.....	Mufid Bey Libohova
Minister of Public Works and Posts	Midhat Bey Frasheri
Minister of Education	Dr. Turtulli Bey
Minister of Agriculture	Abdi Bey Toptani

The Foreign Office was offered to the Mirdite Chief, Prenk Pasha Bib Doda, but was apparently declined. Abdi Bey Toptani is cousin to Essad Pasha Toptani, but a political rival. The Ministers of Justice and Education, together with the Grand Vizier, are the only representatives of the old Cabinet to retain office. Midhat Bey Frasheri is the Albanian member of the International Commission of Control, and Mr. Philip Nogga was for some weeks in London during the peace negotiations of 1912-13 as a delegate of the Albanian Provisional Government.

NOTES AND NEWS.

NEAR EASTERN EXCHANGES.

On the dates given the rate of exchange ruling in the undermentioned centres on London was:—

Alexandria.....	June 4 ..	97⅛—⅜ p.t.
Athens	June 1 ..	25·16 drs.
Bucharest	June 4 ..	25·42½—25·47½ lei.
Constantinople ..	June 4 ..	109⅜—110⅜ pi.
Sofia.....	June 1 ..	27·10—27·25 leva.
Teheran	June 3 ..	55·20 krans

I am glad to see, by our Cairo correspondent's letter, that Sir Rudolf Slatin declines to join the prophets of evil who have been predicting gloomy things for the Sudan. One of these gentry, I observe, in a report dated May 22, said: "The maize crop, upon which the population depends for its staple food, has practically failed entirely, with the result that in many districts famine is threatened. The Government is importing maize in large quantities in order to relieve the distress, and the order has gone forth that the strictest economy is to be observed in every Government department." That the exercise of economy—even of the strictest kind—should be regarded as a sufficient excuse for some of the alarmist reports that have been circulated would be amusing, if it were not mischievous. None the less, I am not sorry to find Sir Rudolph inclined to cheerfulness, and ready as ever to give expression to the optimism that is in him.

***

The remarks made last week by Sir Marcus Samuel as chairman of the Flower Motor Ship Company were surely made at the wrong company meeting. I can understand a responsible official of the Shell deploring the sudden entry of the British Government into the arena of competition in the oil trade, and the consequent transformation of an important customer into a powerful rival. But surely it is a case of mistaken identity when the chairman of a shipping company complains of a decision which can only result in the re-establishment of order in one of the chief areas to be served by his fleet, and in all probability will lead to considerable business for him in transporting engineering and other supplies for the development of important new properties. Influential financiers, as a rule, keep their varied interests reasonably distinct, and take care not to bewail the woes of one company to the shareholders of another, just as tact induces them to refrain from congratulating a general meeting of an unsucessful third upon the handsome dividend declared by a competitive fourth.

***

The Epirote settlement, by placing a frontier between Janina and Santi Quaranta, the somewhat overrated roadstead which has hitherto been called the "port" of Ali Pasha's former capital, has at last induced the Greeks to think of Gumenitza, just south of the mouth of the Kalamas, as a necessary substitute. This town was made the capital of a sanjak by the Young Turks for electoral purposes, but no steps were taken to connect it by road with Janina. This will now have to be done as a first step to making the town of value as the gateway to Epirus. Hitherto the intermediate Austrian Lloyds have called there, but the judicious expenditure of no very considerable sum will do much to make Gumenitza a far more important place than poor Santi Quaranta, squeezed in between high mountains and deep sea, could ever hope to be. I suggest that some enterprizing British firm might make an offer to supply the Greeks with a port and railway—at least to Janina—or do it as a business proposition themselves. Gumenitza, with care, will readily be able to supplant Preveza as the future port of Epirus.

***

Our Constantinople trade correspondent draws attention to the creditable display made by British firms with their exhibits in the Electrical Exhibition which is being held in the Grande Rue de Pera. It is both unusual and pleasant to find that British commerce is brisking up in order to retain, in the face of assiduous competition, a position won by long years of honest but somewhat haughty, conservative, and unaccommodating trade. Our correspondent pleads for the establishment in the Ottoman capital of a centre for British commercial and national influence similar to those already founded for the benefit of France, Germany, and Italy—the "Union Française," the "Teutonia" Club, and the "Societa Operaja Italiana." These institutions are more than mere clubs, and as a rule house their respective Chambers of Commerce.

***

It is interesting to notice that local observers believe that the opening of the Alexandretta-Aleppo line will very gravely harm the commerce of Tripolis and El Mina, which has had a chance of expanding since the opening of the railway to Homs. For a year or so this may be the case, but I am prepared to assert that the prospects of Tripolis will not necessarily be blighted, as the extension of the Homs line on to Ed Deir, on the Euphrates, should more than compensate Tripolis for the loss of that transitory prosperity which it now enjoys as the railway port of Aleppo. Moreover, it is one of the coast towns which is to be handed over to French engineers in order that proper harbour works should be constructed, and I am interested to learn how far the reef and islands are to be utilized in this connection. It is at least probable that when the harbour has been made, the local centre of commerce will return from modern Tripolis—which was the outlying castle and village of Mont Pelerin during the Crusades to El Mina, which stands on the site of the famous Tripolis of old.

***

So much has been said about British "commercial ineptitude" and "hidebound conservatism" that it is almost a relief to find that others are in the same boat. I see that Mr. Harris, the United States vice-consul at Tripolis, deplores the insufficient packing for American imported machinery, and I am told that this is a long-standing grievance of customers against American exporters all the world over. The firm in question on this occasion lost further orders, and—deplorable sign of the times on the Syrian coast—the trade went to Germany. In giving advice in his consular report, Mr. Harris urges that the "exporter of agricultural implements should remember that such machinery, in order to comply with native conditions, should not be too heavy or too complicated, and that local importers should keep in stock such spare parts as do not require too great a technical knowledge for their application."

***

We hear daily of fresh efforts on the part of the Germans not only to hold the commercial and financial influence they already enjoy in the Near East, but to reach out and strip their rivals of the "few poor shreds" of what they have left. It may be that our share of trade in that part of the world is still substantial—but that only makes it the more worth while for Germany to acquire it, and it is high time for the British merchant to abandon a purely defensive policy. In shipping circles great British combines have been formed with the avowed intention of fighting the highly organised and skilfully directed German competition in the outer seas. Can nothing be done on similar lines to pool British interests in Levantine waters and the countries around them, and thereby construct a vast commercial organisation which, by sheer weight of capital and vigour of enterprize, will win back the lost fields of British commerce in the Near East? The position already established by our commercial rivals is not easily to be attacked with success. For years past they have lent money right and left—and have drawn stiff interest upon it with one hand while with the other they have sold their own goods at a good profit to the borrowers. It is a form of giving "tick"—only it is more convenient to the creditor to disguise these trading operations under the respectable cloak of an international loan. This practice is extraordinarily lucrative to our rivals, and places them in a most commanding position, for in addition to having to pay the trader his interest and buy his goods with part of the borrowed money, the unfortunate client has to soften the heart of the financier with some sort of concession which enables him to turn still more pennies—honest or dishonest, as the case may be. Verily, the proverb is bitterly true in the case of certain Near Eastern Governments: "Who goes a-borrowing goes a-sorrowing." One of the greatest difficulties which lies before those who attempt to readjust the balance of trade in the Near East is the necessity for keeping finance and Foreign Offices apart.

Constantinople Business Letter

(From Our Own Trade Correspondent.)

Constantinople, May 30.

Electrical Exhibition.

There was opened last week, without any great flourish of trumpets, an Electrical Exhibition, the first of its kind, organised by the Société Anonyme Ottomane de l'Electricité. To some the mere mention of an exhibition conveys to the mind extensive grounds, imposing buildings, and immense crowds of people; to others, perhaps, it recalls recollections of banquets and handshaking with royalty. The Electrical Exhibition of Constantinople is lacking in every one of these adjuncts of an exhibition, with the exception of a display, for which no admission is charged, of a goodly variety of electrical appliances—I should be inclined to call them requisites—as well as novelties, and this to a public of whom the great majority have not the faintest notion of the many uses to which electricity is put in modern life.

This modest exhibition has been simply but very tastefully arranged in a not over-large shop in the Grande Rue de Pera by the Constantinople Electric Company, with a view to teaching the inhabitants of this city in general the uses of electricity, and in this way it serves a purpose. It is a pleasure to note that a few British firms, locally represented, make a most creditable display. It is not my intention to attempt to deal in more than a very superficial manner with the various appliances exhibited. Electric lights and fans represent a very large percentage of each firm's display, but apart from these one sees every imaginable article, from a vacuum cleaner down (or up) to a perfect model of a torpedo boat built by Messrs. R. and W. Hawthorn, Leslie and Co., Ltd., and displayed by the British Agencies' Association, of which the director is Mr. Robert Rowell, and the technical advisers, Messrs. Willliam Sprowson and Bernard Tubini, A.M.I.E.E. Amongst the firms represented by this Association and exhibiting are:—Messrs. Thomas Firth and Sons, Ltd., makers of tool steel, engineers' tools, projectiles and shells, steel castings, etc.; Messrs. R. and W. Hawthorn, Leslie and Co., Ltd., builders of war vessels, passenger steamers and tug-boats, marine engines and turbines, marine boilers, locomotives, etc.; Messrs. Dick, Kerr and Co., Ltd., electrical installations, generating plants, motors, etc.; Messrs. Callender's Cable and Construction Co., Ltd., cable manufacturers and electrical engineers; Watlington and Co., Ltd., electrical appliances of all kinds; Messrs. The British Vacuum Cleaner Co., Ltd., vacuum cleaners and vacuum cleaning plants. The British Agencies' Association is to be congratulated on its well-displayed section, and if some of the other important firms which it represents have not an exhibit, this is due to the limited space for the display of big machinery, such as motor wagons, electric and steam cranes, pumping machinery, forced draught apparatus, etc., which, in any case would hardly come within the scope of an electrical supply current exhibition.

Another section which does great credit to the enterprise of a British firm is that of Messrs. Sidney Nowill and Co., of Constantinople, representing the General Electric Co., Ltd. Their display is one of the best of the exhibition, notwithstanding the fact that when I visited the exhibition in its early days there were several blank spaces in their section bearing notices to the effect that the steamer carrying some of their exhibits having been delayed these would be exposed at a later date. This exhibit does credit to both agent and principal alike, and is due to the taste of Mr. Rowland Rees, who is a certified electrical engineer and a member of Messrs. Nowill's staff. This firm claim to have in their stores the largest assortment of electrical goods in Constantinople, which claim I have no doubt they could substantiate. Messrs. S. Nowill and Co. likewise have a sanitary and heating department, which is in charge of Mr. G. W. Barwell, R.P.C., London.

Yet another London firm with a local branch must share the credit of the British Section, Messrs. Claudius Ash, Sons and Co., Ltd., whose exhibit covers every branch of the dental supply trade, from an artificial tooth to an electrically worked operating chair. Messrs. George and Arthur Baker, of Constantinople, have an attractive display, and are exhibitors of office furniture, lamps, vacuum cleaners, electrical heating stoves, breakfast table bread-toasters, etc.

I do not claim in this short description to have done justice to the exhibits of the British firms concerned, but I do commend their enterprise and wish it were imitated in some similar manner by every British manufacturer doing business in this country.

Permanent Exhibition.

Why not a permanent exhibition or museum of British manufacturers? This ought to be possible in a distinctive British building, housing the Chamber of Commerce, with showrooms and the British Club under the same roof. France has a magnificent building, the Union Française, which is a club, and the meeting place of all Frenchmen visiting Constantinople, and in this building the Chamber of Commerce has its offices. This national monument was built with the aid of a grant from the French Government and the contribution of French firms interested in the trade of this country. It is furnished throughout by French firms. In its concert hall, the largest in Constantinople, are pianos of French make, presented to it on condition that no foreign make of piano is allowed in the building. This idea is even carried to the extreme of not allowing any other than a French tuner to tune these instruments. Germany has its "Teutonia," likewise a club, and run under similar conditions. Italy has its "Societa Operaja Italiana," which is the meeting place of all Italians visiting or resident. Our Chamber of Commerce rents rooms in an office building; we have a British library dating some forty or more years back and possessing many valuable works of reference, presented by the British Museum and others, and this institution now has refuge in a single small room rented from the British Seamen's Home, a building owned by the British Government. A British Club has recently been established by purely local effort and has filled a much-needed want. Ought it not to be possible to bring these various British institutions under one roof, the "Britannicus" Club, Library, Chamber of Commerce, Permanent Museum of British-made goods? To the man in the street this would be the "British House," and it could be made a living advertisement of everything British. Show cases of goods in various stages of the process of manufacture, samples, models, reading-room of trade publications (which the Chamber of Commerce can hardly display effectively in its limited premises), these thrown open to the public would make it a permanent museum. A British School for Boys has been established by subscription here and in Great Britain. Now let us set about the British building to rank with the Union Française and the Teutonia. Where is the firm to start the ball rolling with a donation of £1,000? Don't all speak at once, please!

TURKISH FINANCE.

In a message dated May 30, Reuter's Constantinople correspondent stated that the general estimates for the year 1914-15 were submitted to the Chamber on that date. The expenditure amounts to £T34,007,619, and the revenue to £T31,921,163, showing a deficit of £T2,086,456. The President invited the Financial Committee to proceed to the examination of the estimates without delay, in order to enable the Chamber to begin the debate on them in about a fortnight's time. In the course of the sitting the Chamber for the first time in the session manifested some independence, having voted by a large majority against the opinion of the President that the discussion of the Bill for the Encouragement of Industries should be adjourned pending a report on the subject by the Financial Committee.

In a statement accompanying the Budgetary estimates, Djavid Bey, Minister of Finance, observes that, notwithstanding the economy in expenditure and the increase in receipts, it has been impossible to obtain equilibrium. Nevertheless, he says, when it is considered that the Empire has emerged from two disastrous wars, the deficit seems very insignificant, and practically nil with the elimination from next year's Budget of certain items of expenditure. Although he is optimistic as to the future equilibrium of the Budget, the Minister recommends that there shall be no departure from the spirit of economy and the exercise of strict control of all branches of the administration, and he further states that his forecasts of the past five years regarding the progressive increase of revenues has been justified, even two disastrous wars, followed by the loss of the European Provinces, not having affected the regular growth of the revenue of the Empire. It should be observed that this increase will become more marked with the progress of the irrigation works in Anatolia.

The Minister hopes that the negotiations with the Powers with regard to economic questions will enable the Government to acquire liberty of action at the beginning of ext September. The Army estimates amount to £T6,000,000, and the Navy estimates to £T1,338,932. Finally, the statement calls attention to the high figure of the civil and military pensions, which exceeds £T2,000,000. The Finance Bill annexed to the statement authorises the Ministry of Finance to conclude advances or issue Treasury bonds, repayable in the current year, for an aggregate amount of £T2,000,000.

BANKS IN THE NEAR EAST.

Referring to the opening by the Deutsche Bank of a branch at Baghdad, as reported in our last week's issue, *The Financial News* says:—"This particular institution is already largely interested in Turkey and the East, and is already established at Constantinople. In view of the growing commercial importance of that part of the world, the step just taken is of some significance, and presages considerable development of trade and industry there in the near future. The big continental banks, following their policy of extension to all parts, either by holdings in separate banks or occasionally by branch establishments, are keenly alive to new openings which may be presented. Undoubtedly good opportunities exist in both Asiatic Turkey and the Balkan States for banking enterprise, and these institutions are rapidly completing their arrangements to avail themselves of the existing circumstances. The Deutsche Bank, although not now the largest German bank from a capital point of view, is still the foremost German commercial bank from most other standpoints, and is evidently bent upon an expansion policy. The great service to German trade and industry rendered by the German banks does not need any mention, but it can safely be concluded they will be continued and extended in future."

Servian Trade Opportunities.

Openings for British Exporters.

(From Our Special Correspondent.)

British firms desiring further information concerning paragraphs marked (A), *please to communicate with the Manager*, The Near East, *Devonshire Square, E.C.*

Belgrade, May 22.

The Servian market has not been popular in Great Britain for many years, but it is difficult to determine why this has been so. If we take the State Treasury returns and the report of the Monopoly Service, we must admit that the Government has always loyally met its obligations, and that the country's finances have shown a steady improvement. On the other hand, I know of no big firm dealing through bonâ-fide channels that has made a single bad debt in Servia. Admittedly the Servian farmer is not always a regular payer; sometimes he is months in arrears, but for those months he pays interest at 6 per cent., and when he realizes on his crops or cattle he invariably regularizes his payments. The fact of the matter is that Servia is essentially a land of smallholders, a certain area of whose land is inalienable (the Five Feddan Law in Egypt is based on this system), but anything over and above this area can be mortgaged and is mortgaged by the agents in Belgrade if the need should arise. It is above all necessary, therefore, that the British manufacturer should deal through an established agent who has his sub-agents and other sources of information and is not speculative enough to take any risks.

Servia and the Entente.

Nor is Servia's "black fate" on our market due to local antipathy to England. On the contrary, I have observed during my stay here a desire—nay, an eagerness—to improve trade and business relations with England. This applies to State offices as well as to private individuals, and it is a notorious fact that when Servia's railway programme was being drawn up and Continental firms were urging their claims to carry the work out, the Council of Ministers reserved one line for England without a single effort being made on our part to secure anything at all! The reason for this consideration shown to England is partly political, partly an expression of gratitude. It is generally recognised that the Entente counteracted Austro-Hungarian policy with regard to Servia's port in the Adriatic, and this naturally throws Servia into the arms of the Entente group; the French, on the other hand, have been too grasping, and, as moneylenders, have imposed heavy conditions, with the result that Servia is attracted rather to England than to France; besides which, Great Britain is the great trading partner of the Entente.

The two factors in the past which have made the Servian market uninteresting to us were:—(1) the lack of a port and (2) some dubious Anglo-Servian company promoting in London. If our traders as a whole knew what harm is done abroad by British or soi-disant British adventurers, who take advantage of our lax company laws to finance foreign propositions in London, they would urge the modification of those laws. As regards the port, Servia is now to have her free zone in Salonika, which will facilitate trade between both countries. (The Johnston Line, in connection with Shenker and Co., of Vienna, already draws up direct bills of lading from Liverpool to Belgrade viâ Salonika at rates comparing favourably with those viâ Trieste, Fiume, and Vienna.)

State of the Market.

At the present moment trade is dull and money tight, bills being discounted at the larger banks at from 8-10 per cent., and from 12-15 per cent. at the smaller banks. But this is only a momentary inconvenience, due largely to the wars and to the failure of last year's crops. The outlook for this year's crop is excellent, and when it is realized there will be a big demand from the interior. Hence agents in Belgrade are busily preparing for the coming season, which begins, as a rule, towards the end of August.

Regarding New Servia, the time has not come to express an opinion. Salonika and Monastir are dead as trading centres; the former's immediate rôle will be that of a transit port for Servia, and the latter may eventually develope some industries (*e.g.*, leather and sugar), because water power is available. Skoplje, on the other hand, is the coming distributing centre for Servian Macedonia, and already customers from Shtip, Veles, Kotchané, and Giurgejevo, even from Vranja and Nish, in Old Servia, are beginning to deal through Skoplje, and some of the agents there to appoint sub-agents in Belgrade. After this year's crops in New Servia (opium, by the way, is going to be a failure), there will be a considerable amount of trade, especially in cotton goods and yarns, but whether, in view of the exodus of the population, this trade will steadily increase during the next two years is doubtful. After that, if the country settles down, the importance of Skoplje as a commercial centre will be second only to that of Belgrade.

Agents.

Methods of trade in Servia are the simplest imaginable. The British manufacturer has to deal through his agent in Belgrade (the necessity of an agent in Skoplje for certain articles is beginning to show itself), the great and only distributing centre for the whole of Old Servia. The number of agents in Belgrade for British, German, Austrian, American, and other goods is extraordinary. Some of these agents are good, others indifferent, and others again worthless. But the big ones have been coining money, and are now preparing for the new season, when orders will come from the interior through sub-agents, or when, as is generally the custom, the peasant comes to town and saunters through the streets on business bent.

The essential, therefore, is the agent; both as regards openings for private business and Government contracts. These are many and lucrative, for the State municipal system flourishes in Servia. But if the plums are to fall in the way of a British firm, the latter must have *a good agent*. (A newly opened agency wrote to 200 of the leading German firms asking to represent them; of the 200, 189 replied that they were already represented!) It is difficult sometimes to get a good agent: as to his reliability, information can be obtained through the British Vice-Consulate (we need a Consul badly here), the Belgrade Chamber of Commerce, or the Servian branch of the British Chamber of Commerce of Turkey and the Balkans. As for the energetic and capable agent, I would strongly advise big British firms intending to compete on the Servian market to send their own man out (to Belgrade only), who will be able to "spot" the agent suitable for pushing his line of goods. The expense is practically nil, and the firm can then rest assured that they have not only a good, but a capable, agent. (A)

(To be continued.)

A SERVIAN LOAN RUMOUR

(From Our Own Correspondent.)

Belgrade, May 30.

Mr. Chedo Mijatovitch, the former Servian Minister in London, was lately at Belgrade, and whilst here was in constant negotiation with the Servian Government in connection with British enterprises. Among other things, it is currently reported that on behalf of a British syndicate he offered to this Government to float a Servian State loan for several hundred million francs. The initiated, however, are very sceptical about the truth of the rumour.

In order to encourage the exportation of live cattle from Servia, all exporters of live cattle will obtain a reduction of 15 per cent. on the railway carriage on all Servian lines of railway.

THE ORIENT RAILWAY QUESTION.

(From Our Own Correspondent.)

Belgrade, May 30.

It is expected that a definite arrangement will be concluded in a few days between the Orient Railway Company and the Servian Government.

The chief obstacle to arriving at a conclusion is the amount to be paid to the Orient Railway Company, which demands sixty million francs, whereas the Servian Government is only willing to pay thirty-five or thirty-six million francs.

The Servian technical officials estimate the worth of both Orient lines in the new Servian territories at only about thirty million francs, and it is believed, therefore, that the Orient Railway Company will at the last moment reduce what is considered here as an exorbitant demand. On the other hand, as the Servian Government is anxious to put an end to these prolonged negotiations, it is thought in well-informed circles that Servia may considerably increase its offer for the purchase, even though it is far beyond the actual value of the railways.

RAILS AND ROADS IN SERVIA

(From Our Own Correspondent.)

Belgrade, May 30.

There is a pressing need for railway material in this country just now, and the Germans have lost no time in taking advantage of the present financial situation in order to obtain orders for manufactures from the Servian Government.

The firm of A. Borsig, in Berlin, has not let the grass grow under its feet, and has quickly offered to supply railway material and accept Treasury bonds in payment, and as this firm formerly manufactured for and delivered to the Servian Railway Direction several railway engines for goods trains and for passenger traffic, which have given satisfaction, the Government has placed with the firm an order for twenty goods locomotives, costing each 89,900 frs., to be paid for in bonds bearing 5 per cent. per annum interest.

The country roads in Servia are, generally speaking, in a very unsatisfactory state, and this applies more especially to the roads in the newly annexed Servian districts. Before the war a French company of contractors for street building, with a capital of two million francs, had agreed with the Ottoman Government to reconstruct 420 kilometres of roads in those territories which have since been annexed to Servia. The work had just been begun when the war between the Balkan States and Turkey broke out, and now negotiations are going on between the Servian Government and the same firm of contractors to continue the work, and there seems to be every prospect that a new contract for the same purposes will shortly be concluded between the parties.

BULGARIAN TOBACCO.

The Monopoly Rumours.

(From Our Special Correspondent.)

Sofia, May 31.

A commission of Xanthi tobacco merchants, representing Bulgarian and foreign firms, of planters and workmen, has just left Sofia after having interviewed the Prime Minister, the Minister of Finance, and other politicians and statesmen.

Their mission was in connection with a rumour which has been current here to the effect that the German group negotiating the Bulgarian loan had made it a condition that not only were they to construct the Haskovo-Portolagos line, together with the port at the latter place, but that they were also to be empowered to create a tobacco monopoly in Bulgaria.

The Commission was informed by the Prime Minister that the Government had no intention whatsoever of granting the German group the desired monopoly. In an interview which I had subsequently with Dr. Radoslavoff, the Prime Minister, a similar assurance was given to me; and in reply to a question whether the Government intended to create a State tobacco monopoly, I was told that the Government had no such intention at present.

Near East Markets.

SPECIAL REPORTS.

(From Our Own Correspondents.)

Odessa. June 1.

The firmer tone taken by our grain market at the end of last week is well maintained, although from the foreign consumption markets the demand is still restricted. It would appear that the quality of the Argentine maize crop is by no means so good as was anticipated, and, consequently, more interest is shown in the Russian (Bessarabian) commodity. Barley of good middling quality, with 3 per cent. admixture, is to-day quoted at 81½c. per pood f.o.b. here. Maize brings 77½c., and Cinquantin 91½c. to 92½c. Rye of good quality, 90c. to 93c. Wheat is steady at 1r. 19c. f.o.b., but the chief business done in this cereal during the last few days has been with the Russian millers. The arrivals from the interior are mere driblets, and the spot stocks are still very small, namely, 370,000 poods of wheat; 20,000 poods of rye; 150,000 poods of barley; 100,000 poods of maize; and 15,000 poods of oats.

Cloudbursts and hailstorms have wrought considerable damage in several southern districts, but the general outlook is fairly good. One always reckons with a certain loss through summer hail in these latitudes.

Bucharest. May 31.

The rain which has fallen during the last few days has been most beneficial to the wheat crop; whether the maize, barley, and oats have similarly benefited the next few days will show. The drought must, in any case, have caused damage in certain quarters, but this the rain will partially remedy. In any case, unless most unfavourable weather conditions prevail hereafter, a more than average wheat crop may be counted on.

The effects of the heavy rains have made themselves appreciably felt on the Bucharest Bourse, where for some time things had been altogether flat. Now the favourable crop outlook has had a very stimulating effect.

The foreign markets will also benefit, as orders for manufactures and goods in general abroad, which were being withheld on account of the unfavourable crop outlook, are now going forward daily. Should the favourable situation be maintained, a very lively summer and autumn business in the import trade in all branches is assured.

Cyprus Caroubs.

It is still too early to speak positively as to prospects of the caroub (locust bean) crop. It is hoped that it will be good, notwithstanding the disease prevailing in parts. Last year the crop was poor, being 50 per cent. or more below average, the quality being also indifferent.

The following information is compiled from the weekly bulletin received at the London offices of the Imperial Ottoman Bank from its correspondents in the Near East:—

Angora. May 20.

The following are extracts from the monthly report for April:—

Some good showers have fallen, and the optimistic crop forecast is consequently strengthened. Unfortunately the rains have been only partial, and though a good crop may be expected in the district of Haimana and Polatli, it will only be a mediocre one round Kalaidjik and Tchibouk. Nevertheless rains are still indispensable, and all is uncertain for a month to come.

The cold weather during the second fortnight of April has ruined the fruit crop. The loss from this cause alone amounts to more than £T50,000.

The mohair market is quite active, and large purchases have been made. The mohair markets of Constantinople and Bradford, however, remain dull.

The business in cereals is very restricted, and the prices on the Constantinople market are unfavourable.

Homs. May 15.

The following are extracts from the monthly report for April:—

The alternation of abundant rains and bright sunshine during the month in review has largely benefited the growing crops. We were assured that the previous drought was going to do serious harm to the crops, but only in a few places of secondary importance will the yield be reduced, while for the district as a whole it is expected to be at least equal to, if not better than, last year's.

During the month in review the great cattle fair took place in this town. This market grows in importance from year to year. It seems that the cattle trade prefers Homs to Aleppo, as Homs is the central junction of the branches of the Damas-Hama-Liban Railway, and the town has greatly benefited by this situation.

Imports of English manufactures and colonial produce have stimulated the activity of our market. Sugar, coffee, and petroleum continue to be bought in the hope of a rise in the prices of these articles.

Busreh. May 8.

The shipments of cereals to Jeddah, referred to in our last report, have lent a momentary animation to the market. On the other hand, the harvests having begun everywhere, the arrival of the produce of an abundant crop will stimulate business. But the prices offered by foreign buyers, especially in London, are considered to be unfavourable, and holders, it is feared, will refuse to sell.

Last week the steamer "Koweit" loaded 2,000 tons of cereals for Jeddah. The "Woolwich" and the "Tigre" will shortly leave our port for the same destination with cargoes of about 2,000 and 1,500 tons respectively.

The stock of cotton cloth is very limited, and prices are harder.

The colonial produce market improves gradually. The available stock of sugar here is estimated at from 15,000 to 20,000 packages.

Mosul. April 30.

The following are extracts from the monthly report for March:—

The continual rains, usually rare enough at this season, greatly benefited the growing crops. The yield of the barley harvest, which is on the point of commencing, will be superior to last year's. In spite of the locusts in certain parts of the vilayet, the wheat crop forecast is still optimistic.

The second fortnight of the month was marked by the preparations for the wool sales, which promise to be excellent, thanks to the good pasturage of this year.

SMYRNA CROPS.

In a report dated May 4, H.M. Vice-Consul at Smyrna (Mr. C. E. Heathcote Smith) forwards particulars of the crop results and prospects in that district. Weather conditions for the 1914 sultana crop have not, he says, been unfavourable, rain having been fairly plentiful, and the vines seem to be in a fair condition. Locusts are abundant, however, and growers are apprehensive as to the damage this pest may cause. As to figs, the prospects for this year are good, and hopes are entertained of a satisfactory yield, the fruit so far being in good condition.

The 1912-13 olive crop was a complete failure, whilst that for 1913-14 was excellent, being only slightly inferior to the bumper crop of 67,000 to 70,000 tons in 1911-12. The quality of the oils was good, and in view of the large yield, low prices were expected. As demand has been keen, however, sales have been effected at high levels, ranging up to £47 5s. c.i.f. United Kingdom.

The prospects of the next valonea crop are so far satisfactory.

OPIUM MARKET.

Messrs. Barker Brothers, Smyrna, report as follows for the week ending May 22:—Early this week the Interior reported a material deficit to the crop owing to the dryness of the weather, and as a natural consequence small speculative purchases were effected, bringing up the price of Extrissimo Carahissar of 11½ per cent. to 16s. 3d. and 11 per cent. Carahissar to 15s. 6d. Since Wednesday, however, copious showers of rain have fallen all over the country, which will very likely make up in part for the reported deficit of the yield; and although prices have not receded, there is a feeling that holders will be induced to sell at a shilling lower. The sales in all amount to fifteen cases, all taken for account of Interior and local speculators. The arrivals amount to 4,627 cases, against 2,420 at same period last year.

PRODUCE REPORT.

London, June 4.

Owing to the Whitsun holidays the produce markets have shown little activity this week, and prices were fairly maintained.

Sugar.

Some time ago the opinion was expressed by good authorities that if the Cuban yield did not exceed the estimated 2,500,000 tons, there would not be enough sugar to meet the world's consumption, but the large receipts of the last two or three months led to the belief that the crop would be larger than 2,750,000 tons, and thus the disquieting opinion created no fears in the markets. It is not so now, however, for the rainy season has set in much earlier than usual, and there has also been a rapid falling off in the receipts, while, at the same time, well informed authorities are now estimating the crop at 2,502,000 to 2,529,000 tons. The effect of these was the creation of a strong speculative demand in the American markets. However, this American and Cuban situation has not yet had the stimulating effect upon prices in the European markets as was expected. On the contrary, owing to some beneficial rain on the Continent, Beet sugar fell from 9s. 10½d. to 9s. 8½d. for August, and from 9s. 9d. to 9s. 7½d. for October-December. Prices of all other kinds of sugar remain unaltered.

Coffee.

The steady advance in the Brazilian market and the falling off in the receipts had the effect of advancing prices on the terminal market fully 1s. per cwt., and much larger business has been done than for a long time past. It is now evident that the total crop for the year will be as much as 13½ million bags, or one million more than was originally estimated. Advices from all quarters are to the effect that there is very little more Costa Rica to come forward. The market here has been very quiet this week, the auctions after Whitsun recommencing to-day. Prices, however, are well maintained.

Currants.

There has been a very steady demand, especially in medium grades. The recent arrival of some 500 tons, mostly of Pyrgos and smalls, is being quickly disposed, and with the prospect of no further arrivals for three or four weeks it is very probable that holders may stiffen their prices. Pyrgos bags are quoted 22s. 6d. to 23s., quarter cases 24s. to 25s., Amalias 25s. to 27s., Patras 27s. to 29s., Gulf 30s. to 36s., Vostizza 32s. to 45s., and siftings 28s. to 36s.

Sultanas.

There has been a very large business in sultanas and heavy buying by importers, owing, it is believed, to the reports of a reduced estimate, and to the possibility of damage to the new crop. This has brought about an advance of 2s. on the lowest grades, and this market is now cleared of any fruit below 28s. In Liverpool the position of sultanas has undergone a considerable change, and latest quotations show an advance on the old rates of 3s. to 4s. per cwt. This sudden rise is attributed to reports of unfavourable weather in the growing districts and serious damage to the vines by peronosporus.

Seeds.

Linseed has been dull with little business at late rates. Canary seed is more inquired for, and Turkish has sold at 92s. per 464 lbs. Haricot beans are in more demand, and any cheap lots are being secured by dealers. Split peas are dearer; supplies of small Indian suitable for splitting are exceedingly scarce, and prices will probably rise, particularly when the demand sets in.

Egyptian Onions.

Egyptian onions, although just a little cheaper, are still much higher than usual at this time. Finest bright are quoted 16s., fine 15s. 6d., good 15s.; bags about 1 cwt,

Corn.

Wheat.—The cargo market has been, and remains, quiet, but no material change occurred in price. Barley is sparingly offered, Azoff-Black Sea, June, offered at 22s., September-October 21s. 7½d. Oats are quiet and unaltered. Maize is firm, with rather more inquiry.

EGYPTIAN COTTON MARKET.

(From Our Own Correspondent.)

Alexandria, May 29.

Owing to the rise in American, prices here have advanced, the market has been more animated, and speculators are active. In the futures market certain purchases are reported on behalf of spinners with a view to providing for long term sales of cloth.

The rise very soon made its effects felt on spot, in which transactions have been active. The superior grades of Afifi, Assili, Joannovitch and Sakellarides are advancing and in strong demand. Exports are on the increase.

Reports regarding the new crop are very favourable. The warmth of the past few days has been very beneficial. The plants are making satisfactory progress, and it is recognised that the set-back caused by the cold has been partially made up for. The question of water no longer causes any anxiety. The levels of the Nile in the Sudan have risen, and an early rise is expected, so that a shortage of water is not feared. The cotton worm has not made its appearance, and with the increased area under cultivation we ought to have a record crop this season, which will compensate us for the loss of the rice crop.

Cotton seed continues to fall in price owing to the lack of demand from abroad. But, on the other hand, local consumption increases day by day.

Messrs. Davies, Benachi and Co., of Liverpool, have received the following telegram from Alexandria, dated Wednesday :—

Market steady. July, 18⅛, November, 18 11/16. Exchange, three months' date, 96½.

June 1.—"City of Cambridge."

LIVERPOOL REPORT.

Messrs. Reynolds and Gibson telegraph :—During the three days upon which the market has been open since our last report there has been only a small inquiry for Egyptian spot cotton. The sharp rise experienced over the week-end induced one or two concerns to secure lots for which they had been in negotiation for some time past, but outside these transactions the business put through has been of a very light description. Quotations for all qualities are raised 5 points. Estimated sales for three days: 1,000 bales.

News reached London last Saturday that a small Greek coasting ship coming from Samos had been fired upon from the Asia Minor shore. There were four victims, according to a Smyrna newspaper.

MANCHESTER MARKET.

(From Our Own Correspondent.)

Manchester, June 2.

This has been a holiday week in our market, the only market day being Tuesday, when there was a meagre attendance, as is usual at Whitsuntide. There was, however, an important feature, namely the publication of the Washington Cotton Bureau report on the condition of the American cotton crop. The report is very adverse as to the average state of the plant, the figure being 74.3, which compares with the corresponding period last year of 79.1, of two years ago 78.9, and of three years ago 87.8, and a ten years' average of 80.4. This sent up cotton in the States, which was reflected in Liverpool. Quotations of cloth were against buyers, but the demand was unimportant. There does not seem to be very much trade about for Egypt. Shippers have few orders of weight to place. The nearer markets of the Continent are slack. China is doing hardly anything for the Nelson sateen trade. It is said that half the production of that town goes to China. The coloured woven trade in Colne is depressed, indeed the weaving branch of our staple industry leaves much to be desired. Manufacturers are losing money, but they prefer, for various reasons, to run rather than stop. American cotton spinners are also losing money. A company has declared today a loss of over £4,000 for the last six months. This refers to American yarns. Egyptian spinnings keep steady, and for the most part profitable.

THE LOCUST WAR IN CYPRUS.

(From an Occasional Correspondent.)

The locust war has been again occupying considerable attention in Cyprus, in view of this year's invasion. Complaints have been raised by Greek members in the Legislative Council, and petitions received from certain districts (chiefly in a part called the "Kokkino Khoria," or red villages), asserting that not only has the system adopted last year of spraying locusts with a solution of arsenite of soda been a failure, but that damage has been caused in other directions, e.g., to bees, by the spraying of plants which they visit.

The truth of the matter appears to be plainly and satisfactorily given by the Receiver-General in his reply in Council. He states that the system adopted in 1913 proved thoroughly successful. In one part only (Ayios Kendéas) the application of the remedy was made later than circumstances required, and a considerable incursion of locusts into the crops took place. But the fault lay with the people, who failed to notify the Government respecting the hatching out of the pest, owing, it is surmised, to the villagers indulging in hopes that the Government would revert to the system of purchasing locusts by weight. Fortunately, too, the damage caused was insignificant. In most other parts where the poison was used the areas have been absolutely cleared of the pest. Moreover, as regards cost, the new system is much less expensive than the old. The Receiver-General states that the average cost of the campaign during the last ten years has been £3,500 per annum (sometimes reaching £10,000), whereas the new method has cost £1,000, a sum which it is hoped will be reduced.

It would, however, be far more satisfactory if the Government were more prompt in publishing facts and figures on this and some other subjects connected with agriculture for general information. There is also a strong feeling that the locust tax should now be suspended, and that other funds should be applied to purposes of destruction. One proposal is that the cost should be defrayed out of the sum derived from surplus of tithe grain. Cereal tithe is taken by the Government in kind; and, as is well known to those conversant with such matters, there is always a surplus of at least 3 to 4 per cent., due to the difference between measuring in and out: tithe grain not being weighed but taken and sold by bushel measure.

NEWS FROM ALL SOURCES.

The Ottoman Post Office has issued a postal guide in Turkish and French.

A party of Italian merchants and manufacturers are shortly expected in Servia, says our Belgrade correspondent. They are visiting the country for the purpose of studying its commerce and agriculture, and it is hoped that their visit may serve to draw the two countries more closely together. They intend to visit the newly acquired territories as well as Old Servia.

The Greek Chamber of Deputies has passed the Bill for the creation of a Council of State.

There is a rumour that a French company intends to ask for a prospecting concession near the Gemsah oilfields.

Our Bucharest correspondent informs us that the International Tariff Commission, consisting of forty delegates from the German and Austro-Hungarian railways, and others, which met in Bucharest, after two days' negotiations arranged for through tariff rates beween Italy, Roumania, Austria-Hungary, Germany, and the Balkan States.

According to Belgian Consular reports, the trade in fancy cloths is assuming great importance at Aleppo, the value of the annual imports amounting to 450,000 frs. The demand is chiefly for merinos and cashmeres of a black and dark blue colour, 100 to 105 centimetres wide, which are used in the make-up of clothes for the Moslem women.

The General Manager, Sudan Government Railways, is prepared to receive offers for the following scrap material :—15 tons of copper, 20 tons of brass tubes, 10 tons of steel, 50 tons of tyres, and 150 tons of scrap iron. The material will be delivered free on truck at Halfa or Port Sudan Quays, as desired by the purchaser.

The Egyptian Government schools require teachers of English and a Science Master. Inquiries for further information and for application form should be addressed not later than June 10 to Mr. J. W. Crowfoot, care of the Director, the Egyptian Educational Mission in England, 28, Victoria Street, Westminster, S.W. Selected candidates will be interviewed in London.

The adulteration of grain by some dealers in Cyprus, which was the cause of serious complaints received from Egypt last year, is a matter of some importance. The appointment of a Commission to investigate the subject may be necessary as a first step towards the adoption of preventive measures.

On Wednesday the Ottoman Minister of Marine handed over the Naval Arsenal to the newly constituted shipbuilding company created by Messrs. Armstrong and Vickers.

According to the Consular Report Cd. 7,048-92, the trade of Syra and the Cyclades during 1913 has decreased from £384,330 in 1912 to £358,818. Imports from the United Kingdom have increased by £6,447 over the figures for 1912—to £152,610, but are still £28,000 below the figures for 1911. British shipping in Syra during the year was 111,134 tons, compared with 133,874 tons under the Austro-Hungarian flag and 500,483 tons under Hellenic colours.

POWER FROM WASTE

IS NOT AN EXPERIMENT

but a proved success with a

RUSTON

"WOOD REFUSE"

SUCTION GAS ENGINE.

We can prove our claim by practical demonstration, and furnish abundant independent testimony in support from satisfied users in nearly all parts of the world.

The following are a few of the waste materials used:—

Wood Refuse	Rubbish from Cotton
Sawdust	Sunflower Seed Husks
Rice Husks	Safflower Seeds
Cocoa-nut Shells	Sugar Cane Refuse
Olive Residue	Ground Nut Shells
Cotton Pods	Corn Cobs

Also Charcoal, Peat, Lignite, etc.

Engineering Notes.

Acetylene Lighting.

Lighting by acetylene is becoming quite popular in the East. Besides the ordinary stationary plants there are those used for lighting factories, large warehouses, private houses, etc.; there are also in use small hand lamps of a very simple construction, which even peasants can charge with carbide and light as easily as they would fill and light an ordinary paraffin lamp. But for its simplicity, powerful illuminative properties, and moderate cost acetylene appeals particularly to authorities in rural districts for lighting small towns or villages, and to estate owners and farmers for either indoor or outdoor use. There is, however, a wider scope of the acetylene light for outdoor use, and a suitable portable plant that can be employed by contractors, railways, harbour authorities, shipping companies, etc., would be welcomed. For such outdoor purposes, as well as for mines, quarries, farm work, etc., a new portable plant, of recent design and simple construction, may be found very suitable, particularly in the East. The plant consists of three main parts, an outer tank holding water, an inner receptacle holding the carbide, and a burner stand pipe. The lights are small and compact in size, being less than one-half the weight of oil lights of equal power. The apparatus is more quickly charged and put into operation than any other portable light made, only water and carbide being necessary, while the action is entirely automatic. With this lighting system there is no possibility of an explosion. The flame is not affected by currents of air, and requires little oxygen for its consumption, a most important feature in its favour when used in tunnels, mines, or other underground work. One or two powerful reflected lights can be supplied from one generator, or a series of smaller burners. This system is cheaper to operate than oil or arc lights, and is extremely simple to handle.

Motors for River and Canal Service

Paraffin or crude oil motor-driven shallow-draught boats are coming into more extended use for river and canal service in the United Kingdom and upon the splendid waterways of the Continent, and in some of the British possessions motor-propelled boats for carrying freight have long become a common feature. Some new barges which recently began to trade on the Mersey and between various ports around the Lancashire coast are giving, it is said, entire satisfaction. One that we happened to see on her trials has an engine with four cylinders 6-in. bore by 8-in. stroke, driving a propeller at 350 revs. per min., and placed aft of the cargo hold, so that the cargo capacity is not affected. The fuel is paraffin, and the controls are worked from the deck. On a long and severely tested run the average fuel consumption proved to be 0.47 pint per b.h.p. per hour.

Turning to the practical side of the matter, there is everything in favour of introducing such craft, of suitable draught and capacity, in the East, where the cumbersome and costly steam-tug and the sefina and other native craft are still serving the modern hustling commerce in their slow and costly way. The paraffin or crude oil motor-driven shallow draught boat would prove far more economical to run, and, of course, more serviceable than the above vessels. It would be easier to handle; it could travel greater distances at greater speed; and could carry, as well as tow, much heavier loads. These advantages are real ones, and it only remains for our engineers and boat builders to be more alert and ready to cater for the demand that is eventually bound to arise, especially if they take more practical steps to draw the attention of Eastern buyers to the advantages of such craft.

Motors in Epirus.

A correspondent of *The Morning Post*, who has been making a tour in Epirus, gives some interesting particulars about the progress of the motor car in Epirus. Contrasting his recent journey with one made six years ago, he writes:—"On my previous journey it took me the best part of two days by carriage to accomplish the sixty-five miles which separate Prevesa from Janina, while from the port of Santi Quaranta, a distance of seventy miles, the drive was somewhat longer. Now a daily public motor takes one up from Prevesa in four hours; and, when the Albanian question is quiet, similar public motors ply between Arta and Janina. Janina and Argyrocastro, Janina and Santi Quaranta, and from Janina to Premeti and Leskoviki. Ere long, moreover, the communication between Janina and the outside world will be still further facilitated by the new road in course of construction between the Epirote capital and the fine natural harbour of Goumenitza, opposite the southern end of Corfu. When the supposed interests of Italian policy demanded that Greece should be deprived of Santi Quaranta, the Epirotes began at once to bethink themselves of Goumenitza, which lies well within the new Greek frontier. Goumenitza is only forty-eight miles from Janina, and, as of these forty-eight miles the first six coincide with the fine carriage road from Janina to Santi Quaranta, only forty-two miles actually required making. Goumenitza, which is mentioned in the later Venetian days as one of the Epirote dependencies of Corfu, will then become the usual port of Janina."

Greek Railways.

The permission of the Greek Ministry of the Interior has been sought for the purchase of the necessary rolling-stock for the new railway between Larissa and Papapouli, also for the construction of certain new works on the Athens-Larissa line. Herr Truck, a retired officer of the Austrian Army, is reported to have submitted proposals to the Greek Government for the survey and construction of new railways in Macedonia and Epirus.

Oil in Roumania.

Our Bucharest Correspondent writes (under date of May 31):—The question of the price of benzine does not yet seem settled. The mill proprietors, who are the largest consumers, have called another meeting for June 6 and 7, in order to discuss the reduction for the price of heavy benzine. They contend that benzine of a consistency of 770 is not good, and that this quality was formerly sold at a much lower price than it is at present.

NEWS IN BRIEF.

The Greek Chamber of Deputies has finally sanctioned the scheme for bringing the waters of Lake Stymphalos to Athens and Piræus, to which reference has frequently been made in our Engineering Notes.

Our Belgrade correspondent informs us that an English group has asked for a concession for a coal mine in Valjevo, and undertakes to form a limited company, with a capital of £120,000, for working it.

A message received in London last Friday from Gibraltar stated that seven gunboats built in France for Turkey had arrived there on their way to Constantinople.

A company has been formed in London under the title The Roumanian Sheet and Galvanizing Co., Limited, with a capital of £75,000, for the erecting and working of a tin and iron plate factory at Galatz, Roumania.

The section of the Baghdad Railway from Baghdad to Sumike, a distance of about thirty-nine miles, was handed over for traffic on Tuesday.

Our Bucharest correspondent informs us that the result of the tenders for the completion of the buildings on the Merzdra-Vratza-Lom Railway will be announced about the middle of June.

The Engineering Editor of "The Near East" will always be pleased to answer inquiries from readers respecting any machinery or appliances described in these pages.

EGYPTIAN RAILWAY RATES.

A Fayoum representative in the Legislative Assembly has given notice of his intention to question the Government on the subject of the preferential tariffs granted by the Egyptian State Railways, which operate unfavourably to Fayoum. Details of the case are of interest (says the Cairo correspondent of *The Railway News*). The port of shipment is Gabbary (Alexandria), and the commodity most concerned is ginned cotton in bales. The distance from Fayoum to Gabbary is 334 kms., and the rate for transporting hydraulically pressed ginned cotton between these places is 10.92 milliemes per 10 kilos. at railway risk and 9.78 milliemes at owner's risk (1 millieme equals 1 farthing). More favoured stations are Maghagha, Beba, and Beni-Suef. Maghagha is 384 kms. from Gabbary, but the rates for the commodity under notice are only 9.32 milliemes per 10 kilos. at railway risk and 9.07 milliemes at owner's risk. Beba is 349 kms. from Gabbary, the rate per 10 kilos. being 9.33 milliemes at railway risk and 8.61 milliemes at owner's risk. Beka is 349 kms. from Gab-Gabbary, and the rates are 9.03 and 8.33 milliemes respectively. The details given are best summarised in the following table:—

To Gabbary from	Distance. Kilometres.	Rate per 10 ton per kilometre. Milliemes.
Fayoum	334	32·5
Maghagha	384	24·3
Beba	349	26·7
Beni-Suef	328	27·5

Apropos of a question raised by *The Egyptian Mail*, "Do the rules governing the formation of tariffs on the Egyptian State Railways admit of unbridled preference being given at anybody's discretion?" the correspondent comments: "This, perhaps, is scarcely fair. Railway tariffs in Egypt are largely dependant upon water competition. Towns situated on the Nile, which are in direct water communicatiton with the port of shipment by means of the river and the Mahmoudieh Canal, must perforce enjoy the advantage of preferential rates if the railway is to get any traffic from them at all. Human nature and business being what they are, the tendency then is to level up matters by levying higher rates from centres which are solely dependent upon the railway, as is Fayoum."

TENDERS INVITED.

EGYPT.

Sundries.—Tenders are invited by the Egyptian War Office for the supply of the following articles at the Citadel Stores, Cairo: Canvas, sail, native; Crena, vegetable; Kharz, cotton; Shammoot, cotton; leather, Kusla; calico, Wilaya; wax, bees. June 25.

Petroleum.—Tenders are invited by the Ministry of the Interior, Cairo, for the supply of petroleum required by the police for one year commencing July 1, 1914. June 25.

Cement.—Tenders are invited by the State Dominions Administration, Cairo, for the supply of 50 tons of cement. June 6.

Coal.—Tenders are invited by the Local Mixed Commission of Kafr el Zayat for the supply of 130 tons of coal (Newcastle). June 24.

Egyptian Engineering Co., Ltd.
CAIRO and MANSOURAH.
Egyptian Engineering Stores, Alexandria.
Government Contractors, Engineers, Importers of Machinery of every description, Diesel, Steam, Gas and Oil Engines, Pumps Windmills, Agricultural Machinery, &c. Large stocks kept at all depots.
Sole Agents for over 40 first-class firms.

Shipping Intelligence.

THE SUEZ CANAL.

(From Our Port Said Correspondent.)

Some interesting comparisons may be drawn from the statistics of canal traffic issued by the Suez Canal Company for the quarter ending March 31, 1914.

The receipts for dues paid during the month of March compare very favourably with past years, and while the number of transits is practically at the same level as the four previous years, the tonnage has considerably increased, as the following figures will show. This increase is mainly due to the growing dimensions of vessels trading in Eastern waters:—

Year.	No. of Steamers.	Tonnage in Thousands of Tons.	Receipts in Thousands of Francs.
1870	53	72	621
1880	213	452	4,130
1890	297	835	5,785
1900	288	1,122	7,406
1905	407	1,728	10,698
1906	401	1,779	10,152
1907	398	1,850	10,351
1908	352	1,736	9,865
1909	378	1,860	10,446
1910	473	2,352	13,329
1911	475	2,374	12,622
1912	497	2,536	12,338
1913	477	2,547	11,561
1914	476	2,605	11,895

From the foregoing it will be seen that in March, 1914, 476 vessels, of a gross tonnage of 2,605,000 tons, transitted the Canal and paid dues aggregating Fcs. 11,895,000, whereas in March, 1911, 475 vessels, of a total tonnage of 2,374,000 tons, paid dues amounting to Fcs. 12,622,000, representing to shipowners an increase of 231,000 tons passed through the Canal, and a decrease in dues paid of Fcs. 727,000.

During the month of March three large steamers made their maiden transits, namely, the Union-Castle s.s. "Llanstephen Castle," 11,600 tons; Hamburg Amerika Linie s.s. "Wurtemburg," 7,700 tons; Holt and Co.'s s.s. "Troilus," 7,500 tons.

The average duration of transit of vessels during March was 16 hours 42 minutes, 22 per cent. of passages being made in 14 hours or less, and 52 per cent. in from 14 to 18 hours.

It is of interest to notice that since the recent extension of the maximum draft, six vessels have passed through the Canal which before could not have entered, as their draft in each case exceeded 28 ft.

Some striking figures are given of the exports from India through this famous waterway.

During the quarter ending March 31, 1914, 1,237,000 tons were exported, including 364,000 tons of rise and 369,000 tons of cereals. These figures compare as follows with the same period in 1912, the most active year in the history of the Canal:—

First Quarter, 1912	1,502,000
First Quarter, 1914	1,237,000
Decrease of	265,000

A corresponding reduction is apparent in the outward tonnage passed at the ballast rate through the Canal to shift the Indian crops, namely:—

First Quarter, 1912	392,000
First Quarter, 1914	202,000
Decrease of	190,000

STEAM COMMUNICATION WITH CYPRUS.

It is stated that a new line of Greek steamers will shortly connect Cyprus with Greece, *vid* Egypt, and that the Hellenic Government has promised a substantial subsidy. Greek merchants are called upon to support the new line.

LEVANT SHIPPING.

Every day now seems to bring news of some fresh attack on British commercial supremacy, and not the least disquieting of these is the determined efforts which are now being made to substitute foreign flags for the Red Ensign in the Levant ports. Statistics recently published by the French Chamber of Commerce in Constantinople give eminently unsatisfactory figures for the relative proportions of the tonnage frequenting all Ottoman ports, with separate figures for Constantinople as well. We consider these unsatisfactory, because, in spite of the limitations imposed on Hellenic shipping alike by war during six months of the year under review, March, 1912, to March, 1913, and by organised boycott in many ports since the restoration of peace, the blue and white flag of Greece shows itself to be a very serious competitor to our own. Other flags, notably the Austro-Hungarian and the Russian, are increasingly formidable, and the steady rise in German tonnage during the last few years is far from pleasant. The figures are:—

A.—For All Ottoman Ports, 1912-13.

Flag.	No. of Vessels.	Tonnage.
British	8,014	12,021,273
Austro-Hungarian	4,418	7,667,143
Russian	4,026	5,037,563
Ottoman	99,378*	5,030,318
Greek	6,649	4,657,881
French	3,602	3,352,710
German	1,912	2,246,105

B.—For Constantinople Only, 1912-13.

British	3,008	5,371,905
Greek	2,310	1,958,201
Austro-Hungarian	810	1,616,417
Russian	952	1,428,435
Ottoman	18,505*	906,416
German	535	733,580
French	852	572,750

*91,914 sailing vessels in Table A, and 16,788 in Table B.

According to the British Vice-Consul's report on the trade of Lingeh, just issued, enamelware shows a steadily increasing demand in this district, not to the detriment of porcelain, china, and glassware, all of which have increased considerably in recent years. Enamel bowls, 6 to 10 ins. in diameter, are mostly used, which sell at an average price of 6s. per dozen.

Company Notes and Reports.

Heliopolis Oasis Company.

The annual general meeting of the Heliopolis Electric Railways and Oasis Company was held in Cairo on May 19. The Chairman announced that, owing to the recent loss of an important lawsuit against the Egyptian Government in the Court of Appeal, the board, after paying the heavy costs thereby incurred, found itself unable to declare a dividend for the past year. It was with some satisfaction, however, that the directors were able to announce that they were carrying forward a sum of 222,375 frs. towards the dividend of next year. The directors and auditors were then re-elected and the annual statement approved. The annual meeting was immediately followed by an extraordinary meeting, at which, however, only provisional resolutions could be taken, to be confirmed at the next general meeting, which will take place in November.

Mortgage Company of Egypt.

The report of the Mortgage Company of Egypt, Limited, to be submitted to the meeting on the 9th prox., covers the year ended March 31, 1914, and states that, after providing for interest on the Four and a-Half per Cent. First Charge Debentures and on temporary loans, the accounts show a profit for the year of £93,680. Deducting the amount of the dividend paid and accrued on the Five per Cent. Preferred shares to March 31, there remains a balance of £43,680, to which is added the amount brought forward from the previous account, making a total sum of £49,883. The directors propose to pay a dividend of 8 per cent., being 2s. per share, on the amount paid up on the Ordinary shares, less tax, to add to general reserve £17,500, to write off the balance of expenses of the Preferred share issue, £3,399, and to write off the discount and expenses of the Debenture issues, £2,800, leaving a balance to be carried forward to the next account of £6,184. In November, 1913, an offer made by the Agricultural Bank of Egypt to purchase the whole of the Ordinary shares of the Mortgage Company of Egypt at £2 1s. 2d. per share was communicated to the shareholders. Out of a total issue of 200,000 Ordinary shares 194,721 shares were sold to the Agricultural Bank of Egypt on the above terms, and are now held by them. An arrangement has been entered into between the two companies whereby advances are being made by the Agricultural Bank to the Mortgage Company at a fixed rate of interest and secured by the deposit of scrip for Four and a-Half First Charge Debentures. With the funds so provided the Mortgage Company is increasing its business in a satisfactory manner. Mr. E. W. P. Foster, M. J. Mosseri Bey, and M. J. H. Thors, directors of the company, retire by rotation, and, being eligible, offer themselves for re-election. Messrs. W. B. Peat and Co., the auditors, retire, and offer themselves for re-appointment.

The following figures, showing the amount invested in first mortgages at March 31 in each of the years stated, illustrate the growth of the company's business since it began operations in December, 1908:—1910, £1,183,611; 1911, £2,064,178; 1912, £2,597,473; 1913, £3,037,991; 1914, £3,276,225. The area of agricultural land mortgaged to the company is 80,550 feddans, well spread over the different provinces of Egypt. The total value of this land and of the town properties mortgaged to the company is upwards of £7,400.000. The results of the company's operations during its existence are shown below:—

Year ending 31st March.	Profit.	Dividend on Preference Shares		Dividend on Ordinary Shares.		Carried to Reserve Fund.	Written off Issue Expenses.	Carried Forward.
		Amount.	%	Amount.	%			
	£	£		£		£	£	£
1910	39,880	28,219	5	10,000	4	—	—	1,661
1911	78,821*	50,000	5	15,000	6	8,000	3,000	2,821
1912	81,837*	50,000	5	17,500	7	12,000	4,500	2,837
1913	93,203*	50,000	5	17,500	7	15,000	4,500	6,203
1914	99,883*	50,000	5	20,000†	8	17,500†	6,199†	6,184†

* Including amount carried over from previous year. † Proposed.

Union Fonciere d'Egypte.

The following resolutions were carried at the ordinary general meeting of the above Company held on May 15:—

1°.—L'assemblée après avoir pris connaissance du rapport du Conseil d'Administration et du rapport du Censeur, approuve le bilan tel qu'il lui est soumis, ainsi que le compte (Profits et Pertes), et décide de reporter à nouveau le solde présenté par ce dernier compte.

2°.—Prend acte de la démission de Messieurs S. Bonan et E. W. P. Foster et donne quitus de leur gestion aux Administrateurs pour l'Exercice 1913-1914.

3°.—Renouvelle le mandat d'Administrateur arrivé à terme de MM. Isaac Aghion, René Ismalum et J. Charles Roux et nomme Administrateur Monsieur Guy Foster, pour une durée de trois ans.

4°.—Fixe le montant des jetons de présence à livres Sterlings trois par séance.

5°.—Renouvelle à Monsieur S. Pappo, sous-directeur de la Land Bank of Egypt, le mandat de censeur pour l'Exercice 1914-15 et fixe ses émoluments à Livres Sterlings Quatre-vingt par an.

Land and Mortgage of Egypt.

Sir Walter F. Mieville, presiding at the meeting of the Land and Mortgage Company of Egypt on May 29, said the present position of the company was sound and satisfactory. They were declaring a dividend of 9 per cent., and then the shareholders would have had returned to them in the past ten years 99 per cent. of their capital. This was a satisfactory record, considering the troubled state of company finance in Egypt and the monetary crises during seven at least of the ten years. They had not distributed all their earnings, but had made provision for certain eventualities. The board placed sound finance before all other considerations.

Albanian Development Syndicate, Limited.

A new "private" company with the above title was registered on May 21 by S. M. Perowne, 10, Coleman Street, E.C. (and Paris), with a capital of £3,000, in £1 shares. The objects are to carry on the business of explorers, prospectors, miners, builders, farmers, etc. The first directors (to number not less than two nor more than five) are to be appointed by the subscribers. Qualification, 50 shares.

COMPANY CHARGES.

New Egyptian Co., Limited.—Particulars have been filed at Somerset House of a charge created outside the United Kingdom, dated February 3, 1914, to secure £64,000 Egyptian. The property charged is certain land in El Kahwokieh and elsewhere in the province of Behera. Holders, Crédit Foncier Egyptien, Cairo.

Mortgage Company of Egypt, Limited.—Particulars have been filed of an issue on May 5, 1914, of £222,200 debentures, part of a series of which particulars have already been filed.

Standard Petroleum Exploration Co., Limited.—Particulars of £20,000 debentures created May 4, 1914, filed pursuant to Section 93 (3) of the Companies (Consolidation) Act, 1908, the amount of the present issue being £10,000. Property charged—Certain specified properties, the company's undertaking, and other assets, present and future, including uncalled capital. No trustees.

COMPANY MEETINGS.

ALEXANDRIA WATER COMPANY.

The following is the report of the directors submitted to the shareholders at the thirty-sixth annual general meeting held at Alexandria on May 28:—The directors, in submitting to the shareholders their annual report on the year's working, together with the accounts and balance-sheet, have pleasure in again showing a very marked progress in the company's affairs. The comparative table of the last two years' working in the accounts shows a total number of 34,896 consumers, as compared with 33,013 last year, an increase of 1,883. During the course of the year there has been a considerable decrease in revenue due to the general lowering of house rents, but this has been compensated by the large increase in the number of consumers. The total number of fire hydrants at the disposal of the fire brigade amounts to 942, of which 142 are connected to the high pressure mains in the Minet-el-Bassal district. The length of new filtered water mains laid during the year amounts to 9,237 metres and includes a new 12-in. main between the Ramleh road and Ibrahimieh for increasing the pressure to some of the higher parts and also to provide for the large extension of this quarter of the town. Certain existing canalisations have been renewed, amounting to 1,280 metres, the cost of which has been paid out of revenue. Referring to the high pressure installation at Minet-el-Bassal, the new installations during the year consist of 6,000 sprinklers and drenchers, 43 high pressure hydrants, and 3,500 metres of additional high pressure mains. There have been seven cotton fires during the year, requiring the services of the high pressure installation, which in all cases has proved its efficiency. The water supply to shipping has shown a considerable increase during the year, the receipts being £2,048 more than last year. A larger main has been laid for filling the water barges quicker, and powerful pumps have been installed on the barges thus reducing the time required for supplying ships at anchor. At the Ramleh pumping station an entirely new engine house has been built, and one of the steam engines has been replaced by a Diesel engine of 150 h.p., which has now been at work about three months and is giving entire satisfaction. A second Diesel engine of 250 h.p. for driving an existing pump is now in course of erection. The rebates on water consumption, allowed to mosques, churches, hospitals, and charitable institutions, amount to £1,221 for the year; in addition to this, the rebates given to the Municipality and the Egyptian Government amount to £6,741, not including the share of the Municipality in our profits, which this year amounts to £16,500. The Government and the Municipality having changed the commencement of their financial year from January 1 to April 1, a rebate on fifteen months' water consumption has been laid out of this year's revenue, so that in future their financial year and that of the company will coincide. The amount of the extra three months' rebate is £554. A sum of £8,163 has been spent on new works during the course of the year:—Pipes, sluices, fire hydrants, £1,604; machinery, £3,858; port, £832; water meters, £1,803; water installations on hire, £66; total, £8,163.

The total lengths of canalisations existing are as follows:—

Filtered Water Mains.

HIGH PRESSURE WATER MAINS.

	Inches				
Diameter.....	12	8	6	4	3
	Metres				
Length.....	1448	8071	372	1058	1837

Total, 12,786 metres.

The total receipts, which amount to £144,270, show an increase of £6,227 as compared with last year, and the working expenses show a decrease of £63, making a net increase of £6,290. The directors have decided to write off a sum of £4,280 from their securities owing to a general depression in all first-class securities, also a sum £7,109 off buildings, machinery, meters, canalisations, etc., making a total amount written off of £92,882. Besides this £200 have been written off materials in stock and £50 off furniture. The balance of the profit and loss account, after making the above depreciation and the usual allowances, and after deducting the interim dividend of 4 per cent. paid on December 15, 1913, is £69,000, from which should first be deducted 6 per cent. to complete with the interim dividend, the 10 per cent. on the capital, £36,000, leaving a balance of £33,000, of which one-half is due to the Municipality according to our Convention (£16,500), and the other half to the shareholders, £16,500, which represents two shillings and ninepence per share, and which, added to the above 6 per cent., makes a total of eight shillings and ninepence for the dividend of June 15, 1914. The directors therefore recommend the shareholders to fix the dividend payable on June 15, 1914, at eight shillings and ninepence per share, which makes with the interim dividend of four shillings paid on December 15, 1913, a total dividend of twelve shillings and ninepence for the year. According to Article 84 of the Articles of Association Messrs. M. C. Salvago and H. E. Barker are the two directors who retire by rotation, and, being eligible, they offer themselves for re-election.

NEW EGYPTIAN.

Increased Profits.

The thirteenth ordinary general meeting of the members of the New Egyptian Co., Ltd., was held on Wednesday at the Cannon Street Hotel, Cannon Street, E.C., Mr. Arthur A. Baumann (the Chairman) presiding.

The Secretary (Mr. Thomas Day) having read the notice convening the meeting and the report of the auditors,

The Chairman said: Gentlemen,—I must apologise to you for the late date at which the meeting is held. The accounts from Egypt arrived quite a month later, for some reason or other, and we have had to wait an unexpectedly long time for the conclusion of a mortgage on our Docmera and Nashart properties, to which I shall refer later on. The mortgage is not yet completed, but we trust that it will be in a few days. There are merely technical formalities to be gone through. The fact is, of course, that lawyers in London do not, as you know, hurry themselves, and in Cairo apparently they hurry themselves even less. I understand, however, that nothing has now to be done except the examination of some cadastral maps. Now, I will turn to the accounts, and first of all to the profit and loss account, which is what interests everybody more than anything else. Our total gross profit for 1913 amounted to £39,256 odd, as compared with £36,581 odd for the previous year, showing an increase in gross revenue of £2,675. That increase is made up as follows:—The increase in profit on sales, together with sundry profits, amounts to £6,019, from which we have to subtract a decrease in the net revenue from the company's rentals of £1,802 odd, and an increase in interest on loans of £1,541 odd. The decrease of £1,802 in the net revenue from the company's lands is due chiefly to the record low Nile, and the increase in the item of interest is principally on account of the company taking the responsibility of the whole loan of £36,661 secured on Samatay, whereas formerly the R.S. Syndicate were charged with 50 per cent. of the interest on that loan.

The Dividend.

Coming back to our net profit, we have to subtract from the £39,000 odd £18,353, which are our total expenses for debenture interest, salaries, travelling, law, advertising, depreciation, directors' fees, and reserves, which leaves us finally with a net realised profit for the year of £17,693 odd. To that you must add the carry-forward of £1,485, which gives us an amount available for dividend of £19,179. Out of that amount we recommend you to accept a dividend of 5 per cent., or 9d. per share, less income-tax, which will absorb about £15,762 odd, to which must be added the managing directors' and directors' percentage, £2,087 odd, making a total of £17,850, and leaving to carry forward to next year £1,328 odd, as compared with £1,485 in the previous year. With regard to the balance-sheet, I do not know that I need say very much, as the account is so very ample and so very detailed; but, turning to the debtor side, I may remind you that the debentures show a reduction of £3,100, being the amount of the debentures purchased and cancelled during 1913. The debenture debt now amounts to £110,450, as against the original issue of £125,000. The Samatay loan stands at £36,661, which is an increase of over £18,000, and is accounted for by the company taking over, as I mentioned just now, the 50 per cent. share of the R.S. Syndicate. As to Kahwakia, that is perhaps the most important item in the balance-sheet, and you will see on the debtor side a sum of £110,966, which is the purchase price of this new property. The property has been financed, or paid for, in the following manner. There was an existing mortgage of £65,641 on the property, which we renewed at 6 per cent. for a period of fifty years, and that left a balance of the purchase price of £45,000 to be met, which we paid out of the money which we had standing to our credit and by the assistance of an overdraft from an Egyptian bank of, I think, some £16,000. Now, that money, of course, was taken out of our revenues and rental, and it is to repay that money taken from our revenue that we are now concluding a further mortgage of £66,666 at 6 per cent. with the Mortgage Company of Egypt. That sum will enable us to repay to revenue the amount that we have taken out and it will also give us something between £20,000 and £30,000 for capital expenditure purposes. The capital expenditure both on this new property and on our other estates is likely to be heavy this year, because we hope to be able to finish once for all the greater amount of our capital expenditure.

The Kahwakia Property.

That Kahwakia was an extremely good purchase is, I think, evidenced by the fact that the purchase price is something like £50 per feddan, and will cost, when we have spent on it a certain amount for improving it, £60 per feddan. It is an estate of 2,300 feddans, and we have already sold over sixty feddans of that estate since the beginning of the year at an average price of £155 per feddan, and I think you will all agree with me that that looks like extremely good business. The next item I should like to call your attention to in the balance-sheet is that we have placed £3,209 to what we call the Nashart reserve. That is really a sum of money by which we have written down the estate of Nashart, and we have done that because Mr. Bonan, our expert told us that, in his opinion, it was the prudent thing to do to write off this sum, as the estate had deteriorated. But it is our expectation that we shall be able at the end of this year, when we have spent a certain amount of money in improving the property, to write back that £3,209. I must remind you that our net profits for this year would have been £20,000 if it had not been that, as a measure of precaution, we wrote off this £3,000, which we hope to replace, from Nashart. Turning to the credit side of the balance-sheet, I do not know that there is anything that calls for remark. "Sundry debtors for the sale of land" shows the satisfactory increase of over £51,000 as compared with last year. The amount now stands at £187,104. Turning to the report, I would ask you to just glance for a minute at the paragraph relating to the sales of land, which is, after all, the most important part of our business as a land company. From June 30, 1909, to December 31, 1913, 2,589 feddans have been sold for £241,048 odd, or an average of £93 1s. 11d. per feddan. That does not include some 682 feddans of sandy land on three of the Upper Egypt sites which have been granted to the purchasers of those estates.

Sales and Prices.

But let us take the last two years, 1912 and 1913, and see how our sales compare. In 1912 we sold 497 feddans at an average price of £99 19s. 5d., and in 1913, not including the sandy lands in Upper Egypt, we sold 795 feddans at an average price of £89 15s. 4d. Now, that looks as if the average selling price of our land had fallen off, but it is not so. The reason for the difference in the figure is that last year we sold a large block of land in Upper Egypt, and when you sell land en bloc, of course, you get a lower price. Now, in regard to Rodah, we sold 400 feddans odd out of the 795 feddans at an average price of £80 per feddan, but the rest of our lands, excluding the sales of Rodah, realised an average selling price of £102 per feddan, so you will see there is no falling off either in the market or in the prices that we obtained per feddan for our properties. I do not know that there is any other point I need allude to, as you have all had this report in your hands for a considerable time. I might mention that since the beginning of this year we have sold over 600 feddans at an average price of over £110 per feddan. With regard to the concluding paragraph in the report—namely, that which relates to our staff—I may mention that our secretary, Mr. Day, went out to Egypt this year and visited our properties. He presented a very able and detailed report to the Board, and there can be no doubt that we have in Egypt a marvellously well equipped and energetic organisation, and a staff that works with enthusiasm under the guidance and direction of Mr. Suares and his fellow director, Mr. Barker.

Additional Working Capital.

I think that we are one of the most progressive and successful land companies in Egypt, but you must remember this: that it is our business to buy and sell land. We have sold, as I have told you just now, no less than 2,500 feddans. If we are going on selling our property, we shall gradually subside into the stagnant condition of a mortgage company, which is not what we want to do; we want to remain a live and active company, buying and selling land. For that purpose we shall have to consider how we may increase the resources of our working capital. Gentlemen, I beg to move: "That the directors' report, together with the annexed statement of accounts, duly audited, be received, approved, and adopted, and that a dividend of 5 per cent. (9d. per share), less income-tax, be paid, such dividend to be payable on June 27, 1914." I will ask Sir Ernest Spencer to second the motion.

Sir Ernest Spencer (Deputy Chairman) seconded the motion, which, in the absence of questions or comment, was carried unanimously.

The Chairman next moved: "That Mr. Edward Nathan be re-elected a director of the company."

Mr. T. L. Gilmour seconded the resolution, which was unanimously agreed to.

On the motion of Mr. Gilmour, seconded by Mr. Nathan, Mr. T. F. Dalglish was re-elected a director pursuant to Article 71 of the company's articles of association.

Mr. J. Foat proposed the re-appointment of Messrs. Cooper Brothers and Co. as auditors of the company, which was seconded by Mr. Rikoff and unanimously approved.

Mr. Rikoff proposed and Mr. Gibb seconded a hearty vote of thanks to the Chairman and directors for the splendid results achieved, which was passed, and the Chairman having briefly acknowledged the compliment, the proceedings terminated.

ANGLO-PERSIAN OIL.

Increase of Capital Sanctioned.

An extraordinary general meeting of the Anglo-Persian Oil Co., Limited, was held on the 29th ult. at Winchester House, Old Broad Street, E.C., for the purpose of considering, and, if thought fit, passing resolutions for increasing the capital of the company and making certain alterations in the articles of association. Mr. C. W. Wallace presided.

The Secretary (Mr. F. Macindoe) read the notice convening the meeting.

The Chairman said that before proceeding to deal with the strict business for which the shareholders had been called together he desired to express the great sorrow which they all felt that their late chairman, Lord Strathcona, had not lived to preside over that meeting, called to confirm and consummate the objects for which he so ardently laboured during the closing years of a life spent strenuously in the service of the Empire—objects

but for which, indeed, he would never have joined this company. No hope of personal gain would secure his co-operation, but only their exposition of the opportunity of doing a great service to the nation, and only the resolve to accomplish this could have drawn him so far afield from the scene of his previous life's work, from Canada to Persia Lord Strathcona quickly formed the view that it was essential for the welfare, or, indeed, the safety, of the Empire for its Navy to secure a hold over, or at least a claim in, oilfields of such extent and productivity as would ensure to its rulers a continuous supply of oil fuel—the best fuel known to science at the present day for naval purposes. He became the chairman of the company in the strong hope that these fields might be found in Persia, and as a director watching the daily progress of the company's experts, geologists and drillers, he felt hope grow into confidence, and confidence into certainty, that the Persian fields filled those conditions, and he spared no effort to impress both his own and the directors' views upon the authorities, and so to bring about the conditions they had now reached. Next to Lord Strathcona, the credit for the success of their efforts was due to their hard-working managing director, Mr. Greenway, and he hoped he would long be with them in health and strength to mould, or largely to assist in moulding, the commercial destinies of this company.

Although he did not think that any advocacy on his part was necessary, and although he felt quite confident that the resolutions would be passed without a dissentient voice, yet the shareholders were, no doubt, expecting to hear something as to the nature of the arrangements entered into with his Majesty's Government. The agreement provided for the subscription by the Government at par for £2,000,000 in 2,000,000 ordinary shares and £1,000 in 1,000 preference shares, one-fourth of which amounts would be payable on application, and the balance in calls at not less than one month's notice, as and when required by the company. The object of the Government in taking this small amount of preference shares was that their holding might be slightly more than one-half of the total issued capital in order that they might secure a voting majority. The remaining £99,000 of the authorised preference share capital had been allotted to the Burmah company, and, therefore, when their arrangements with the Government had been completed their issued share capital would stand at a total of £4,000,000. The Government had also undertaken to take up at par, as and when required by the company, debenture stock to the amount of £199,000, such stock to rank pari passu with the £600,000 of first debenture stock already issued. Furthermore, the Government had stipulated that the company should, if called upon to do so, redeem on December 31, 1920, the whole of the debenture stock already issued, and re-issue it to them at the redemption price of £105 per cent. This additional capital of £2,200,000, which was to be provided by the Government, was the amount which it was estimated would be required to cover the cost of the further field work, extensions to pipe line and refineries, additional tank installations, jetties and transport facilities necessary to enable the company to carry out the contracts which had been entered into by the company for the supply of oil fuel to the Admiralty, and also to expand the company's general trade. As regarded this contract, he regretted that he was not permitted—as the shareholders were doubtless aware from what passed in the House of Commons—to give any information as to the quantity of oil fuel which had been contracted for, nor as to the price to be paid for it; but it would, he thought, suffice to say that the quantity was of a sufficient magnitude and the term of years over which the contract extended sufficiently long to justify this large additional outlay of capital, and that the price to be paid for the oil fuel was one that would give a remunerative return. He might, however, mention that the contract provided for an automatic reduction in price down to an agreed minimum to the equivalent of 25 per cent. of any profits earned by the company in excess of the amount required to pay the preference dividend and a dividend of 10 per cent. per annum upon the ordinary shares.

As would be seen from the new clauses which it was proposed to incorporate in the company's articles of association, the Government had taken power to be represented on the board by two directors, who should have the right, subject to appeal to his Majesty's Government, of negativing any resolution which might be proposed at a board or committee meeting, but he was pleased to tell them that they had a letter from his Majesty's Government stating that they did not propose to make use of this right of veto except in regard to matters of high general policy, such as questions which might affect the foreign naval or military policy of the Government, sale of the company's undertaking or change of the company's status, or the control of new exploitation or sales of crude or fuel oil or other exceptional sales which might endanger the due fulfilment of current Admiralty contracts, and that their interference, if any, in the ordinary administration of the company as a commercial concern would be strictly limited to the minimum necessary to secure these paramount objects of the Government. The chairman then proceeded to give some account of the further developments on their concession, which had led them to the conclusion that it was desirable immediately to embark upon a much larger programme of work than was anticipated when the company was first formed. On the Maidan-i-Naphtun and the neighbouring Maidan-i-Naphtek fields they had so far proved about three and a-half square miles of oil territory, in which it should be practicable to drill some 400 wells at a distance of 500 ft. apart. They were putting down a test well on another field known locally as the White Oil Springs, this field having been favourably reported on by their geologists. Several other fields in closer proximity to the coast had also been examined by their geologists, and had been very favourably reported on by them, and at one or more of those fields they would shortly start drilling further test wells. Everything indicated that their oil resources were very large, and, therefore, there was every reason for embarking as quickly as possible upon a larger scale of operations. Their present refinery was now completed and was in full operation. So far as regarded the arrangements made with the Government the shareholders would, he thought, agree with him that they were extremely satisfactory from the points of view of both parties. From the company's point of view, they not only ensured the additional capital necessary for developments on very favourable terms, but also a large purchaser for one of their main products, without any of the large expenses attendant on creating a marketing organisation. Moreover, the provision of this large amount of additional capital in ordinary shares and the admission of the Government as predominant partner in their concern would, of course, greatly increase the value and security of their preference shares, and extend the possibilities of the company's future operations. From the Government's point of view, the arrangements ensured a certain supply of a large portion of the Navy's requirements of oil fuel of a quality eminently suitable for naval purposes from an absolutely independent British company—conditions which it would be quite impossible for the Government to secure at the moment in any other direction, either within the British Empire or from any British-controlled company. *The Times*, in an article which appeared on Wednesday, drew attention to the possible political difficulties which might arise from the Government's participation in their undertaking. Although he was not in a position to know what the Government's views on this point might be, he thought it desirable to say something as to their own views on this matter.

The political aspect of the question might, he thought, be separated under three heads—(1) danger of damage to their properties by the local tribes; (2) possible consequent need for protection by the Indian Army; and (3) possible complications with other Powers. As regarded the first, their relations with the chiefs and the tribes in the districts in which their work was being carried on had always been of the most friendly nature, and in their opinion there was little, if any, reason for uneasiness on this score. It had also to be recollected that the Persian Government and the chiefs of the local tribes were interested pecuniarily in the success of the company, and it might be confidently anticipated that the railway and industrial developments which were now taking place in this part of the country would, as they progressed, more and more tend to promote the prosperity and tranquillity of the country. As regarded the second possibility, which could, of course, only arise in the event of serious menace to their properties, all he need say was that they should have every right to expect protection from the British Government, no matter whether they were, or were not, financially interested in the company's undertaking. As *The Times* quite correctly pointed out, "British property, even in the neutral sphere, was entitled to due protection," and, should the need arise, it was inconceivable that the Government would in any circumstances deny this protection to an undertaking of such financial and national importance as the one which they were conducting. Therefore the political responsibilities of the Government would not, he ventured to state, in this respect be in the least increased by the step which they were now taking. The third point was one that it was scarcely in his province to deal with, but he would take the opportunity of pointing out that this concession was granted thirteen years ago—long before the Anglo-Russian Convention was ever conceived, and consequently that it was in no way governed by the spheres laid down by that Convention. But even under that Convention it was agreed that neither party should oppose the grant of concessions to subjects of the other in the neutral sphere, and that all concessions existing at the date of the Convention were to be maintained. This, it appeared to him, effectually disposed of all possibility of any difficulties of the nature contemplated by the writer of *The Times* article in regard to the sphere in which their operations were being conducted.

Another Press comment which had appeared was one by a naval correspondent suggesting that the Government should look for oil within the Empire rather than go to Persia. This was quite sound so far as it went, but to-day there was no oilfield within the British Empire capable of yielding more than a very small proportion of the supplies required by the British Navy, nor was there any certainty that one would ever be found, and for the Government to risk the loss of the Persian supplies on the offchance of sufficient oil being produced at some future time within the Empire by companies under British control would be a very grave mistake, particularly in view of the fact that the Navy's needs were immediate and could not await the uncertainties of the future. And, failing the existence of sufficient supplies within the Empire, what better source could be found than one that was so much under the sphere of British influence as Southern Persia? Apart from one or two criticisms based on incorrect premises, he had been pleased to see that the comments in the Press expressed the warmest possible approval of the Government's action in this matter, and he hoped the shareholders would indicate their approval of what the directors had done on behalf of the company by unanimously passing the resolutions. The chairman concluded by moving resolutions to the effect that the capital of the company be increased to £4,000,000 by the creation of 2,000,000 additional ordinary shares of £1 each, and that the company's articles of association be altered in the manner as set out in the notice convening the meeting.

The resolutions, which were seconded by Mr. W. K. D'Arcy, were carried unanimously without discussion, and the proceedings terminated.

Stock and Share Markets.

Bank Rate 3 per cent. (Jan. 29, 1914.)

SETTLING DAYS.

CONSOLS.
Wednesday, July 1.
STOCKS AND SHARES.
In Mining Shares the next carry-over is June 8.

Continuation Day.	Ticket Day.	Pay Day.
Tues., June 9	Wed., June 10	Thurs., June 11
Wed., June 24	Thurs., June 25	Fri., June 26

LONDON, June 4.

A flood of liquidation destroyed the nerves of the Stock Exchange when it met after the Whitsuntide holidays. Most of it appeared to come from Paris and St. Petersburg, where there has been serious trouble. A reaction is certain, for, as far as Great Britain is concerned, the position is perfectly sound, and such losses as have been caused by depreciation can be met without difficulty. It is quite probable that when the Ulster and Mexican questions are settled we shall get a revival in the markets. Both questions appear on the eve of arrangement.

Russian Loan.

A five million Russian railway loan is to be offered. The interest is 4½, and the issue price 93. The security is quite sound. The City of Moscow will also be asking for three millions. The Montreal Central Terminal bonds appear somewhat speculative, and the Bachelet Railway scheme just a gamble. The Gold Coast Government loan is, of course, a gilt-edged trustee.

Egyptian Unified Bought.

In the Foreign market there is no particular selling. It is rumoured that arrangements have been made for a new Brazilian loan, but the story must be received with great reserve. Bulgarians are quoted 84 ex coupon. There has been a certain amount of buying of Egyptian Unified, which are a shade over 99. Greek Fours are quoted 53. Hungarian Rentes are 82. Turkish Unified remain at 82, but it must be admitted that the dealers are not inclined to put any stock on their books.

Rails Dull.

Home Railways, in spite of excellent Whitsuntide traffics, remain dull. Undergrounds have been sold on the fear of a strike, and although Great Western show quite a respectable increase on the half year to date, they do not rise over 114. In spite of the fact that Missouri Pacific notes have now been extended for a year, Yankee Rails refused to respond. Coppers are all weak, the metal having fallen. Canadas continue to be sold, and in spite of the good news from Mexico, Mexican Rails are very dull.

Rubber and Oil.

There is no business in the Rubber market. Plantation remains at 2s. 4d. All the talk is of synthetic rubber, but very few people have seen anything larger than a small sample, and it is clear that the big lots that are sold on the market are either fine hard cured Para turned into crepe or reformed rubber sold as synthetic. There has been a bad break in the Oil market. North Caucasians have been heavily sold, and are now 5s. down from the make-up price. Roumanian Consolidated hold their own, but the Maikop group has been very weak. It is said that good news has come in from Egypt, and although nothing has been published, prices in this section have kept steady. It is now officially stated that one Red Sea share will receive one Anglo-Egyptian share plus 2s. 6d. in cash, and one Egyptian Oil Trust A will receive three Anglo-Egyptian shares plus 19s. in cash. 100 Red Seas, therefore, get 110 Anglo-Egyptian and 11s. in cash, and 100 Trusts A 376 Anglo-Egyptian and 9s. in cash. Fractions are sold at 1¼.

Mines Neglected.

There is no business in the Mining market, which has become completely unfashionable. A few Modders have been purchased. Modder Deep being now 2¾. Both Tin and Copper have been very flat and the shares have tumbled. Russians were heavily sold, but are now harder.

Egyptians Steady.

The Egyptian market has kept fairly steady, with very little business. There has been no attempt to sell. The reports that have come out have all been satisfactory. The New Egyptian meeting went off well, and the shares look a bargain at 10s. 6d. National Banks are now 14 9-16. Agricultural Banks are a shade harder at 4 13-16, and the deferred are nominally £260. Land Banks are quoted 6¾ ex the dividend of 4s., whilst the deferred are quoted 40 ex dividend of £2. Delta Light Railway preferreds are steady at 8¼—8⅝. Delta Lands are 8s. 9d. Behera are a shade weaker at 9—9¼. Union Foncière are nominally quoted 1½, but buyers have to pay a shade over this price. Alexandria Water figures are good, and the shares are now 12¾. There has been very little business doing in Aboukir. The middle price is 22s. United Lands are 1s. 9d.—2s. Sidi Salem are a nominal market, the price not having changed during the week. Investment Trusts have been picked up at 5s. 3d., and there have been some buying orders for Salts at 15s. Egyptian Markets remain at 24s. 9d. Khedivial Mail preferreds have hardly been mentioned, and are quoted 3¾, whilst the ordinary remain at 10s. 3d. Daira Sanieh look a shade harder at 3s. 3d. But the business throughout the whole week in every section of the Egyptian market has been of a very limited character. The tendency remains good.

Miscellaneous.

In the Miscellaneous market everything has been dull. Brazil Tractions were sold on the report, which does not come up to the official prophecy. Shipping shares are being quietly unloaded. Marconis have been offered, and Hudson Bays have been down to 9.

THE GREEK DEBT.

The Council of Foreign Bondholders issues the following information compiled from figures published by the International Financial Commission at Athens with regard to the revenues assigned under the Law of Control for the service of the Greek Debt from January 1 to March 31, 1914 (new style January 14 to April 13, 1914):—

—		Monopolies, Tobacco, Stamps, Stamped Paper, Naxos Emery.	Piræus Customs.
		Drachmæ.	Drachmæ.
Gross Receipts, Mar.	1914	3,537,287.99	2,789,556.32
Do. do do	1913	1,969,676.25	2,409,854.37
Estimated Receipts for 3 months (Law of Control)		7,225.000.00	2,675,000.00
Actual receipts, 3 months	1914	10.815,031.31	7,593,844.02
Do. do. do.	1913	7,578,539.60	6,571,304.06
Difference between estimated and actual receipts for 3 months	1914	+3,590,031.31	+4,918,844.02
	1913	+ 353,539.60	+3,896,304.06

Note.—Of the surplus over the estimated receipts from monopolies, tobacco, stamps, stamped paper, and Naxos emery 49 1-5 per cent. is applied towards increasing the minimum rates of interest and sinking fund of the External Gold loans of 1881 to 1893. The receipts in gold from both Naxos emery and the Piræus Customs are converted into drachmæ at par when the average rate of exchange for the month is par or below par, but when the average rate for the month is above par the conversion is made at that average rate.

TURKISH DEBT.

The Council of Foreign Bondholders have received from the Council of Administration of the Ottoman Public Debt at Constantinople a statement, of which the following is a summary, of the complete receipts in respect of the month of January, 1914, as compared with those of January, 1913:—

COMPLETE RECEIPTS.

	January, 1914.	January, 1913.
*Five revenues	£T164,723.12	£T120,648.87
Tobacco Tithes	31,797.03	37,597.05
3% Customs surtax	95,147.45	68,482.11
Sundries	4,180.59	6,811.45
	£T295,848.25	£T233,639.48

* Including provisional surtaxes imposed on salt and spirits for three years from August 1, 1912.

Servian Government Monopolies.

The figures for the Servian Government monopolies for this year show the following increases:—

	1913.	1914.
Receipts for April	3,919,587 dns.	6,793,670 dns.
Total to April 30	13,650,885 dns.	27,649,404 dns.
Paid o National Debenture Account	9,023,765 dns.	15,373,050 dns.

ALEXANDRIA NOTES.

(FROM OUR OWN CORRESPONDENT.)

ALEXANDRIA, May 29.

The market is extremely inactive, but our leading securities show a little firmness. As for the Cairo share market, it is in a state of absolute stagnation.

There has been a certain demand for Cassa di Sconto shares, which has led to a rise of 2½ frs. The fall in Cotton Ginners is due to the fact that the company has ginned less cotton than last year.

Port Said v. Alexandria.

It is announced that the Menzaleh Canal Co. is making efforts to establish a centre for the export of cotton at Port Said. As a matter of fact, freight rates for England or the Continent are much lower from Port Said than from Alexandria, and this fact ought certainly to divert a good deal of cotton from the former port, without taking into account the fact that railway rates to Port Said are lower from certain districts. But the absence of pressing facilities, of stores, and of a cotton market constitute obstacles to the export of cotton from Port Said. The latter port has a great future as a centre for the coal importing trade, etc., but it is hardly likely that it will ever prove a serious rival to Alexandria as a port of exportation for cotton or for onions.

Industrial Building Co.

At the last general meeting the board was authorised to reduce the capital from £150,000 to £50,000, as a consequence of the losses in connection with the Société des Biens-Fonds du Caire and other bad debts. As a result of this reduction, the company finds itself practically in liquidation, since the statutes provide for the dissolution of the concern in the event of half its capital being lost. Now a group is being formed to take over the affairs of the company and its liabilities and engagements on behalf of third parties.

Recent Failures.

The following are particulars of some recent failures:—

H. Bercovitz—liabilities, £E3,623; assets, £E1,466

Nabih S. Anhouri—liabilities, £E9,855; assets, £E10,269.

Mohammed Hassan el Sabban—liabilities £E9,078; assets, £E14,165.

Cesana, Tanil and Co.—liabilities, £E4,992; deficits, £E2,326.

Jean Sotiris—liabilities, £E14,137; deficit, £E44,409.

Nessim Moussa Cabbani—liabilities, £E5,519; assets, £E3,239.

Ahmed and Mohammed Abou Heif—liabilities, £E5,849; assets, £E1,258.

D. and B. Serapian—liabilities, £E7,691; assets. £E7,142.

FINANCIAL ITEMS.

As submitted to the Chamber, the Turkish Budget Estimates show that the expenditure amounts to £T34,007,619, and the revenue to £T31,921,163, showing a deficit of £T2,086,456. The Army Estimates amount to £T6,000,000, and the Navy Estimates to £T1,338,932.

On account of the international loan granted to Montenegro by the Great Powers the Government has arranged with Paris and Milan banking houses for a fresh advance to the amount of £120,000.

The directors of the Imperial Ottoman Bank announce that they have opened a branch at Zahlé, Lebanon.

It is stated that the Deutsche Orientbank will absorb the branches of the Deutsche Palestina Bank in Egypt and Palestine from July 1. These branches will thenceforward take the name of the Deutsche Orientbank. Their branches are situated at Jaffa, Jerusalem, Haiffa, Beyrout, Damascus, Alexandretta, and Tripoli.

Mr. Fitzpatrick William Bulkley Praed, of Chester Square, chairman of the Lake Copais Co., Limited, and a director of other companies, who died on April 26, left £37,959.

Digitized by Google

COMPANY RESULTS, &c.

ANGLO-EGYPTIAN OILFIELDS.—Gemsah production for the week, 2,425 tons.

ANGLO-ROUMANIAN. — Production (week ended May 30), 628 tons. Bordeni Well No. 24.—Corked 9 p.m., Friday; made another flow yesterday; now 40 ft. very hard cork; continuing cleaning.

ASTRA ROMANA, BUCHAREST.—After large amortisations, the dividend for 1913 has been fixed at 50 frs. per share.

EGYPTIAN GOVERNMENT IRRIGATION TRUST CERTIFICATES.—The Bank of England announce the numbers of 368 4 per cent Egyptian Government Irrigation Trust Certificates which have been drawn for redemption on July 1, when interest thereon will cease.

EGYPTIAN MARKETS.—Receipts for week ended May 28 amounted to £841, an increase of £1 on the same period of last year. The aggregate to date amounted to £24,642, a decrease of £1,418.

GREEK LOAN OF 1890.—The coupons falling due on June 15 of the Greek Five per Cent. Loan of 1890 (Piræus-Larissa Railway) should be presented at the office of Messrs. C. J. Hambro and Son for payment of 56 per cent. in gold of their face value, being 32 per cent. ordinary interest and 12 per cent. per annum augmentation payable on the coupon of the first half of the year.

IMPERIAL OTTOMAN BANK.—The annual meeting will be held on June 24, at Winchester House, E.C., at 1 p.m.

OTTOMAN 4 PER CENT. LOAN OF 1909.—The dividend due 14th inst. will be paid by the Imperial Ottoman Bank, 27, Throgmorton Street, and by Messrs. Morgan, Grenfell, and Co., 22, Old Broad Street.

OTTOMAN RAILWAY FROM SMYRNA TO AIDIN. —The receipts for week ended May 30 amounted to £8,008, an increase of £2,629 over the corresponding period of last year.

PIRÆUS, ATHENS, AND PELOPONNESUS.—Receipts for the month of March were:—762,469 drachmas, an increase or 83,605 drachmas over the corresponding period of last year. Aggregate from January 1, 2,082,450 drachmas (increase 292,874 drachmas).

UNITED EGYPTIAN LANDS.—The seventh ordinary meeting will be held at the company's offices, 12, Rue Mahmoud Pasha El Falaki, Alexandria, on June 11, at 4 p.m. The transfer books will be closed from June 3 to 11, inclusive.

UNITED HOTELS OF EGYPT.—An extraordinary meeting is called for the 6th inst., to receive the liquidator's report, and to consider the question of further remuneration to be paid to him.

IMPERIAL OTTOMAN GOVERNMENT FOUR per CENT. LOAN of 1909.

Notice is hereby given that the half-yearly COUPONS due 14th June, 1914, may be PRESENTED daily between the hours of 10 and 2 o'clock (Saturdays excepted), at the offices of the Coupon Department of the Imperial Ottoman Bank, 27, Throgmorton Street, E.C., and at the offices of Messrs. Morgan, Grenfell and Co., 22, Old Broad Street, E.C. They must be entered on forms which can be obtained on application, and be left four clear days for examination before payment.

IMPERIAL OTTOMAN BANK.

Notice is hereby given that, in accordance with Article 29 of the Statutes, the ANNUAL GENERAL MEETING of Shareholders will be held on Wednesday, the 24th June, 1914, at Winchester House, Old Broad Street, London, at 1 o'clock p.m., to receive a Report from the Committee, with the Accounts for the year ending 31st December, 1913, to propose a Dividend, and to replace the retiring Members of the General Committee.

By the 27th Article of the Statutes, the General Meeting is composed of Shareholders possessing at least thirty Shares, who, to be entitled to form part of the Meeting, must deposit their Shares at the Chief Office of the Company, Constantinople, or at either of the several Branches or agencies abroad (in London at 26, Throgmorton Street), 10 days at least before the day fixed for the Meeting.

CHARLES E. L. CORTHORN,
London, 30th May 1914. Secretary.

COOK'S NILE STEAMERS AND DAHABEAHS.

THOS. COOK & SON have unequalled facilities for Travellers visiting Egypt, now the premier Winter Resort of the World. Their fleet of **Fourteen Large Passenger Steamers** consists of the finest vessels on the Nile, specially built, luxuriously appointed throughout, and fitted with every modern convenience.

TOURIST SERVICE.—These large and handsomely-fitted Steel Steamers sail once a week from **Cairo** to **Assuan**, and twice a week from **Assiut** to **Assuan**, the sailings from **Cairo** beginning in November, and from **Assiut** in January.

EXPRESS SERVICE.—The Express Steamers also leave **Cairo** twice a week, the Friday departures commencing in November, and the Monday departures in December.

There is thus a Service of **Five Cook's Steamers per week** ascending the Nile to the **First Cataract** during the Season—three from **Cairo** and two from **Assiut**—calling at all points of interest on the Nile, in connection with which complete arrangements for sightseeing and excursions are made, enabling Travellers to visit, to the best advantage, all the famous

PYRAMIDS, TEMPLES, TOMBS, RUINED CITIES, etc.

SECOND CATARACT SERVICE.—In connection with the above Services there is also a Service twice weekly by First-class Steamer from the **First** to the **Second Cataract**, with through bookings to **Khartoum, the Sudan, and Uganda.**

PRIVATE STEAMERS AND DAHABEAHS. — **Thos. Cook & Son** have several small Steamers for charter at moderate rates, specially adapted to the requirements of Families, Private Parties, Sporting Parties, etc., accommodating from eight to sixteen passengers, with competent crews, and thoroughly equipped. Also a large Fleet of First-class Sailing Dahabeahs, the best on the Nile.

NOTES OF THE WEEK.

If the latest reports from Albania may be trusted, the state of affairs in that country has in some respects taken a turn for the better. Durazzo remains in a state of siege, but the insurgents have shown no inclination to advance upon the town. Any movement they may have made has been away from it. Attempts have been made by some of their number to leave the insurgent camp and to make overtures to the force in Durazzo, but as no one has been allowed to enter or leave the town, their efforts have not borne fruit. Meanwhile, discussion is reported to be rife among the insurgents, who have been unable to agree among themselves in regard to the claims to be put before the International Commission of Control. Nearly a fortnight has elapsed since the insurgents approached Durazzo, and it would be strange if an unorganised force of this description proved able to keep the field indefinitely. The longer they remain quiescent, the better the opportunity for organising some force against them. Steps to this end are now being taken by Prince William; and unless the insurgents disperse, an attempt will presumably be made to converge upon them from three directions by the forces remaining loyal to the Mpret.

But while the insurgent problem may be in process of being overcome Prince William has had other difficulties to contend with. From giving counsel, not always of the wisest, his advisers and coadjutors have proceeded to action on their own account. Two Italian subjects, one a colonel officially attached to the Italian Legation, were suddenly arrested one evening by a Dutch officer of the Gendarmerie, and the house where they lived and their effects were searched. The intervention of the Italian Legation secured their release, and a Commission was appointed to investigate the documents seized by the Gendarmerie, with a view to establishing their innocence or guilt. Only one sentence in a single document appears to have been capable of being construed into evidence of some attempt at intrigue in Italian interests, and on the strength of this discovery Colonel Thomson, the Dutch officer commanding the Gendarmerie, has refused to apologise for the arrest. The Italian Government has accordingly requested the Albanian Government to dismiss Colonel Thomson. But inasmuch as the latter as head of the Gendarmerie is virtually the nominee of the Powers, Prince William's Government finds itself unable to accede to the Italian request, and has merely notified the Netherlands Government of the demand for Colonel Thomson's recall put forward by the Italian authorities. Up to the present the Dutch Mission to Albania has not been signally successful. An excess of zeal led its members to court disaster for the Gendarmerie in an encounter with an insurgent rabble; their subsequent panic, or inability to prevent one in Durazzo, brought about the Prince's temporary flight to a man-of-war in the harbour, and now they have contrived to prejudice the foreign relations of the Albanian Government. If the proposal made elsewhere in this issue that Roumania should be invited to provide the military force necessary for the support of Prince William be adopted, it might be advisable to entrust the Gendarmerie to the same hands.

In their quarrel with the Italian authorities local sympathy in Durazzo will probably be with the Gendarmerie officers. There is not enough evidence in the reports of the proceedings before the Commission of Inquiry to determine whether the arrest of the two Italian subjects was justified by the contents of the documents seized. But there can be little doubt that the whole attitude of the Italian community, or the interpretation which it has placed on its duties in Albania, has materially enhanced the difficulties of the Mpret and of the Gendarmerie. So long as Prince William is left to the mercies of Italy and Austria-Hungary friction is likely to come. In the multitude of the counsellors with whom he has surrounded himself—all, it would seem, ignorant of or unsympathetic towards Albania and its people—the Mpret has sought to find wisdom. What he has achieved is to increase the opportunities for intrigue, against which he ought to have been on his guard from the outset. The system of government or misgovernment that he has introduced has been condemned, lock, stock, and barrel, by the sequence of events. His one chance of saving his own reputation and of extricating the country from the confusion now overwhelming it is to take the reins of government in his own hands, and with the help of those of his Ministers whom he has reason to trust to put himself in close touch with his people. If he were himself to apply for Roumania's assistance, and the request were granted, he would be assured of sympathetic support and of disinterested advice when it was required.

With nearly every Government in the Near East embarked upon a policy of ousting by fair means or foul all

Digitized by Google

the subjects of other Balkan countries from its territories, it is obvious that the Government with the largest number of such subjects is going to make itself the most objectionable. Turkey, with her large Greek population, is in this enviable position. For many weeks or months past Bulgarian refugees, whether rightly or wrongly we need not stop to inquire, have felt themselves forced to abandon, amid the greatest hardships, their homes in Greek Macedonia. The Bulgarian experiences, but to a larger extent, are now being reproduced in the case of thousands of Greeks settled in Thrace and Asia Minor. The Greek Government is just as angry with the Porte as the Bulgarians were angry with the Greek Government. But little heed has been paid to Bulgarian protests. The Greek Government, on the other hand, has more effective means of making its grievances heard. The Holy Synod in Constantinople has closed all Orthodox churches and schools, and the Œcumenical Patriarchate has ceased for a time to exercise its functions. Undoubtedly the policy of forced emigration has become a scandal in Turkey, and the Porte will now be as anxious to discontinue it in Asia Minor as it was in Thrace. But if we are to place the same credence in Bulgarian statements as we do in Greek allegations, it is evident that Greece is undergoing the penalty which her officials imposed upon a helpless Bulgarian population. We do not suppose that M. Venizelos and his Cabinet were cognisant of all that was taking place in Macedonia. The responsibility, however, remains theirs. In the face of the long list of complaints presented by the Bulgarian Government, official denials from Athens carry little weight. If the treatment meted out to British subjects in the person of Mr. and Mrs. Musker can be the work of an officer at a railway station, it is not difficult to infer what is likely to have been the treatment of Bulgarian peasants off the beaten track.

The streams of refugees from the different countries exercise a very prejudicial effect on the relations between the different States. In Bulgaria there have been reprisals at the expense of Greek churches and schools. The Bulgarian Government has tendered a prompt expression of regret to the Greek authorities, and can in no way be held responsible for the isolated occurrences, however regrettable. In the case of Greece and Turkey, not only does the influx of refugees impose a severe financial strain on the Greek Exchequer, but it serves to increase the nervousness with which each State views the still unsolved problem of the Ægean Islands. In order to redress the naval balance which was disturbed by the recent purchases and orders of the Turkish Government, Greece has had to place orders for further men-of-war, this time in the American market. Even if the money for this expenditure can be found, it can ill be spared at the present moment, when there are so many demands on the Greek Exchequer. But there is little chance of an improvement in Greco-Turkish relations while the question of the Islands remains unsettled and the forced emigration of Greeks from Asia Minor continues.

The elections in Roumania for the Constituent Assembly, as was expected, have resulted in the return of the National Liberals with a strong majority in the Chamber. As soon as the alterations in the constitution have been passed through Parliament another general election will follow, in order that the two Houses may be elected in accordance with the terms of the amended Constitution.

Mr. Roosevelt is not the only enterprising traveller engaged in correcting or amplifying the world's maps. Captain Shakespear, the British Resident at Koweit, has recently reached Suez after a fifteen weeks' journey across Arabia, in the course of which he discovered between Buraidah and Jauf-al-Amar a hitherto untravelled route. This contribution to our geographical knowledge may not be as important as the discovery of Mr. Roosevelt's new river, but it is the more likely to be accepted without challenge.

The interminable Bulgarian State trial has been advanced a stage by the delivery of judgment upon various pleas raised by the defendants. Two of the defendants, the Court has decided, cannot be prosecuted for violation of the Constitution; but as all five are required to answer other charges brought against them, whether they were or were not mentioned in the vote of impeachment in the Sobranje, the trial will continue. To this judgment the defendants have replied by raising fresh issues, and the real business of the prosecution has once more been deferred.

In spite of the influence and prestige which the successful direction of two Balkan wars have won for him, Mr. Pashitch, the Servian Prime Minister has fallen a victim to intrigues, which in some measure revive the unsavoury episodes which brought about a change in the Servian dynasty eleven years ago. There is still a Military Party in the country, and some of its leaders appear not to have forgiven Mr. Pashitch for their removal at one time from the active list of the army. The Ministerial crisis has other ramifications; but it is difficult to believe that in forcing it upon the country at this juncture the Opposition have consulted the interests of Servia to the subordination of their own. It cannot fail to be a blow to their aspirations and intrigues that the King should have again confirmed Mr. Pashitch in office with his former Cabinet.

Nine months have passed since the Persian Government announced its decision to hold Parliamentary elections and issued instructions to the provinces to this end. But until recently, except in Teheran, no elections had been held, and even in the case of the capital they do not appear to have been completed as far as the outlying districts are concerned. The reason for this state of affairs is not necessarily to be attributed to any lack of good intentions on the part of the Regent or of his Ministers, but to the incapacity of the Persian Government to translate its decisions into action. No doubt obstacles are encountered in the provinces themselves; they arise both from the attitude of individual Governors-General and from the conditions of country districts. In Azerbaijan the Governor-General and the Russian authorities decided that elections should not be held, and the Persian Government has been powerless to take any further steps in the matter. In another province the holding of elections had to be postponed owing to a transfer of officials. At Ispahan the Russian Consul was dissatisfied with the personnel of an electoral committee, and it was necessary to nominate a new one.

The advantage of elections held in such circumstances would be problematical, even if they could be carried out systematically throughout the country. When they are confined to a few provinces they can only be regarded as useless. Meanwhile the date of the coronation of the young Shah is approaching, and it is felt that the constitutional significance of that event will be lost if there is no Parliament or an unrepresentative one before which the monarch can take the oath. The failure of Parliamentary institutions both in Persia and in other countries similarly situated prevents much store being set upon the usefulness of any body of popular representatives. But if the constitutional form of the coronation is to be adhered to there is much to be said for a Parliament regularly constituted. If, therefore, the Persian Government is unable to hold elections in a satisfactory manner, it would be a wiser course to adopt to acknowledge its powerlessness and to dispense with Parliament altogether for the time being.

CONSTANTINOPLE LETTER.

(From Our Own Correspondent.)

Constantinople, June 6.

Greek and Turk.

St. Constantine's day has passed off quietly, though it is the name day of the Greek sovereign, and the Hellenic colony at Constantinople displayed Greek flags to an imprudent extent in Pera and Stamboul. I do not for a moment dispute their perfect right so to do. This is a free country; there is a Constitution (tempered by martial law and courts which try you *in camera* without counsel and without appeal), and Greece is nominally and officially on friendly terms with the Sublime Porte. Still, given the tension that exists between Greece and Turkey in reality—given also the belief of many Turks that the Greek Rayah population is longing for the day when King Constantine shall reconquer the Empire of his predecessor, one cannot but think that the Hellenic Consul-General at Smyrna, who forbade excessive decoration and discountenanced a *Te Deum*, played a wise part. The large number of Greek flags which appeared in Constantinople, flanked though they were by the Crescent and by the flags of other nations—for June 3 was celebrated by the British colony, it being the King's birthday—caused considerable ill-feeling; but Talaat Bey had given strict orders to the police and gendarmerie to prevent any disturbance.

The Minister of Interior has now gone to Geumlek near Mudania to inquire into an alleged plot by local Greeks to massacre Moslems. How far the story of this plot, as published by the Turkish Press, is accurate, it is impossible to say. It certainly seems improbable that the few hundred Greeks of Geumlek would have arisen in their wrath, and smitten the tens of thousands of Moslems in their vicinity, or would even have thought of doing so. It is also noteworthy that the Greeks assert very strongly that the evidence against the persons arrested was based on anonymous denunciations which, alas! remain in favour under the new régime as under the old.

Talaat Bey and King Carol.

Of Talaat Bey's visit to Roumania little is said, so little that there is a very general impression that the Minister did not find King Carol at all inclined to encourage the policy of adventure which the Committee extremists would desire the Porte to favour. It is said that he received Talaat with the courtesy and kindness which the compelling personality of the best man among the Young Turks merits, but that as regards European adventure he was icily cold. "Hands off Salonika and no tampering with the Treaty of Bucharest" was the substance of his advice to Talaat, and these counsels were coupled with a recommendation to find a pacific solution of the question of the islands. It would be interesting to know whether Talaat discussed the Albanian situation with the Mpret's aunt, the Queen of Roumania! He seems to have advised the Mpret—through the medium of a Roumanian newspaper—to take Izzet Pasha, ex-Generalissimo of the Turkish Army, into his service, and with his assistance bring the disorderly Albanians to their knees. Excellent advice, but was not Izzet Pasha the candidate for the Albanian throne, and in whose name Bekir Bey and his followers landed near Avlona to be cast into prison on landing? Vainly will that net be cast in the sight of the bird!

Albania.

As for Albania, a great deal of news has reached Constantinople of late. The general belief is that the rebellion is more or less due to Turkish inspiration, but that the initial errors of the Prince were a factor therein. At present it would seem to a dispassionate observer that whatever happens Albania as a State may come to grief owing to the fact that if there are Albanian Nationalists there is no Albanian nationality. If you have a Christian Prince the Moslems of the Centre rise and demand Turkish flags and a Moslem Prince, provided that the latter comes in to the tune of "Nothing to pay." If there is a Moslem Prince, a Turkish general, Essad Pasha, or Burhan-ed-Din Effendi, son of Abdul Hamid, a youth who knows less of Albania than the babe unborn, it remains to be seen how he will be able to govern Moslems who pay no taxes and object to military service; Epirotes who only agreed to sign the Treaty of Corfu because Albania had a Christian Prince; Roman Catholics who fear a "Turk" ruler, and Tosk Moslems whose Beys detest the Ghegs. A loose confederation of cantons under the rule of an international Governor-General seems the only way out of the impasse, but will it suit the Triple Entente to adopt the one solution which can prevent Italy and Austria from quarrelling?

The Situation in Arabia.

There have been unpleasant rumours abroad of late concerning the situation in the Hejaz and elsewhere, but it is to be hoped that they are exaggerated. It does, however, seem that the Beni-Harb, a really strong clan, which controls the road between Mecca and Medina, is on the war-path, and demands subsidies and a promise that the Hejaz Railway will never be prolonged from Medina to Mecca. The Sherif, so rumour says, can do nothing to check the unruly Bedouins. Meanwhile, the Turkish garrisons, in consequence of numerous skirmishes with Said Idris's people and with the nomads, are sadly depleted. They are not at all strong—seven weak battalions in Hejaz, seven in Assir, and fourteen or fifteen in the Yemen is their normal effective. Battalions at Constantinople do not average more than 480 men: it is doubtful whether there are half as many men to many a battalion in Arabia, and even with the dispatch of about 2,000 soldiers from Damascus to Medina the total garrison of Turkish Arabia does not exceed 15,000 troops; and this force is not nearly sufficient nowadays when the Bedu is armed with Martini, Gras, or Mauser, and Idris's warriors are well supplied with Italian imported rifles.

In Mesopotamia the Muntefik and other clans of Southern Irak seem to be doing what they please, and the Government cannot do more than send preachers among the tribes that are being converted to the Shiah tenets. Artillery would be more suitable; but the authorities have no force to spare. The fact is that the army just now is in rather a parlous condition. It has lost an immense amount of war material, and its morale has suffered; for the recapture of Adrianople was followed by a great mortality from sickness among the troops crowded in insanitary barracks or exposed in flimsy tents to the inclemency of the Thracian winter. Kurdistan needs its quota of troops if the wild tribes of that region are to be kept in order, and the necessity of keeping a considerable force in easy range of the Dardanelles, Smyrna, Mermeris, and other points of great strategical importance in case of a war with Greece prevents the depleted garrisons of Irak and Arabia from being rapidly reinforced. If the Beni-Harb remain on the war-path this year's pilgrimage is likely to be a perilous affair.

LETTER FROM CAIRO.

From Our Own Correspondent.

Cairo, June 3

The Birthday Review.

Early this morning the usual review of the British troops that is always held on the King's Birthday took place on the square outside Abdin Palace. It passed off exceedingly well, though such ceremonies are nowadays somewhat shorn of their brilliance owing to the khaki uniform. The men all presented an efficient and smart appearance. Lord Kitchener, who was wearing Field-Marshal's uniform, was accompanied by Sir Reginald Wingate, who arrived from Khartoum on Friday last. (The Sirdar had to hasten his departure from the Sudan owing to sudden indisposition, but I am glad to say that he is quite well again now.) After the troops had marched past, Lord Kitchener rode forward towards the Palace and saluted the Regent, Rushdi Pasha, who had watched the ceremony with the Ministers from one of the balconies, and whose arrival had been heralded with military honours. This courteous action of the British Agent is, as far as is known, quite unprecedented, and was much remarked by the spectators. To-night, a dinner followed by a reception is being given at the Agency.

The Legislative Assembly.

The Organic Law lays down that the annual session of the Legislative Assembly must last until the end of May, but that no prorogation shall take place until all the measures submitted to it have been dealt with. It is said that the Assembly will not sit after the middle of this month; it is, therefore, to be presumed that the Government will agree to hold over the Co-operative Syndicates measure until next session; for otherwise it is difficult to see how the Assembly, with the best will in the world, is going to dispose of all its business in the time. But nine working days at the very outside remain, and the House still has to finish off the discussion of the Wakfs Budget, which has had to be delayed owing to Moheb Pasha's illness, and to deal with several projects amending the Native Penal Code and creating various new schools. If so much time were not taken up at each sitting with the reading of the minutes and of petitions and replies to questions sent by the different Ministries, it might perhaps be possible to discuss the Co-operative Syndicates Bill, but it would appear that it will take up some considerable time, owing to the divergent views of the members on the subject, and it is for these reasons that it is thought that the Bill may be held over.

This week the Assembly passed the Birkets (Pools) and Marshes Bill, but not without a somewhat stormy debate, due to one of the delegates asking that private individuals should be authorised to fill in and take possession of birkets belonging to the Government if the latter neglected or refused to do so. The law empowers the Government to force private individuals or corporations to fill in the birkets and swamps on their estates, or to take them over and do the work itself, the object being to render the districts more salubrious, since these birkets are the breeding-place for all manner of germs that do serious harm to the local population. The Prime Minister characterised this request as revolutionary, whereupon a terrible hubbub resulted, and quiet could not be restored for a long time.

But, whilst this very excellent measure has been approved of by the Assembly, it appears that its enforcement may be subject to some delay. Very rightly the Committee deputed to examine the measure recommended that it should be made applicable to foreigners as well as to natives, and the Government quite readily promised that it would take the necessary steps to obtain the approval of the Mixed Courts. That did not, for some inexplicable reason, satisfy the Assembly, and by 44 votes to 21 it decided that the Bill must not be promulgated until the assent of the Mixed Courts had been obtained. It was no use explaining to the House that this would take four months at least, and that few foreigners owned birkets: the point was insisted upon, with the afore-mentioned result. It is understood that the Government declines to accede to the Assembly's unreasonable request, and that it is referring the measure back. It is to be hoped that the members will adopt a sensible attitude and not waste more time in needless discussion of what is after all not a vital point, since the Government undertakes to make the measure eventually applicable to foreigners.

Mis-statements in the London Press.

My attention has been drawn to an article that appeared recently in the *Asiatic Review* entitled "The Darkness over Egypt." It contains a most amazing collection of mis-statements with regard to this country and considerable surprise has been expressed that such a periodical should publish an article of this nature, which can do little good to whatever cause it may be intended to further, and which can work incalculable harm to British prestige in the East.

Egyptian Students in Europe.

In his report Lord Kitchener referred to the scheme which has been initiated with the object of providing Egyptian students studying in Europe with the care and guidance of which they stand badly in need. On Sunday last a meeting of the Advisory Committee formed for that purpose was held under the presidency of the Minister of Education, and a report on the progress made was read. From this report it appeared that about 600 Egyptians are studying in Europe at their own expense (373 in the British Isles, 139 in France, and 64 in Switzerland). Nearly half of these have been placed under the guidance of the Advisory Committee and its inspectors, whilst 61 are having their accounts paid through the director of the Educational Mission. Over 750 reports were received from the inspectors and transmitted to the parents and guardians of private students. Of these, 369 related to the conduct or diligence and progress of the students, and of this number only 180 were classified as satisfactory. This shows that there is something wrong; and to the committee will fall the duty of ascertaining where the fault lies and of prescribing a remedy. It is satisfactory to learn that the hostility which the students at first displayed towards the scheme has ceased almost entirely, and that they now realise its value to them. It may interest those concerned at home and on the Continent to know that the committee is seriously considering what are the best measures to adopt to prevent students incurring debts in Europe and leaving them unpaid. From other details published, it is evident that the scheme is steadily gaining favour in this country.

Time's Whirligig.

One hundred and thirteen years ago there took place near Alexandria the battle of Canope, in which Napoleon's troops were defeated by British soldiers. Ten years ago the remains of a French soldier were unearthed on the beach at Mustapha Pasha and handed over with military honours to the French authorities. The other day British soldiers unearthed at Mustapha Pasha Barracks the skeletons of three soldiers, identified from buttons found by their side as belonging to the famous 32nd Half Brigade of Napoleon; and on Friday last, amid great ceremony, these remains, together with others near by, were handed over by the British military authorities to the French colony, and were afterwards escorted with full military honours to Sidi-Gaber station, whence they were conveyed by special train to Cairo. The next day, on a gun-carriage provided by the Army of Occupation, and escorted by detachments from each British regiment in garrison, they were paraded through the streets out to the Latin Cemetery, where they were solemnly interred. This ceremony and, indeed, the whole incident bears eloquent testimony to the changes wrought by the whirligig of time, for amongst the British troops engaged at Canope was the old 58th Regiment, which, under its more modern name, "Northamptonshire," is now in barracks at Mustapha Pasha. It was fitting that the remains of the French soldiers should have been found by the great-grandsons of the men who killed them; it was fitting that they should have assisted in rendering them the last honours; but it was even more fitting that this ceremony should have taken place in Egypt, the scene of fierce rivalry between the two countries up to ten years ago. For the fact affords

Digitized by Google

eloquent testimony of the change that has come over their relations, thanks to the Entente Cordiale. It is by incidents such as these, which appeal so directly to the imagination, that the links of friendship that now bind the enemies of a century ago are drawn even tighter, and that the two peoples are enabled thoroughly to appreciate one another and the benefits accruing from this "unwritten alliance."

The Pan-Islamic Tendencies of Enver Pasha.

The accounts of the welcome accorded to the Turkish aviators during their stay in Egypt, which have been sent to Constantinople by the organising committee, appear to have pleased the committee immensely, and Enver Pasha has sent to the president, Prince Omar Pasha Toussoun, a warm letter of thanks. In it he makes use of a sentence which, to say the least, is extraordinary. He says: "These sentiments strengthen the hope of a renaissance of the Moslem world." Apart from the ironic fact that the welcome could scarcely be said to strengthen such a hope, since it was not even lukewarm—*vide* the gala performance in Alexandria, where the audience shone by its absence—this remark is noteworthy, since it places on record in an unmistakable manner the pan-Islamic tendencies of the present Turkish Government; and as such it has been freely commented upon here.

EXCAVATIONS IN EGYPT.

In connection with the Egypt Exploration Fund, the Rev. Professor Sayce gave a lecture on "Recent Discoveries in the Nile Valley" in the rooms of the Royal Society at Burlington House on Monday. Professor Sayce said that Egypt just now was the scene of feverish international competition in archæological research, and the Egyptian Government itself was in a chronic state of excavating. The scientific excavator had passed on into the Anglo-Egyptian Sudan, and some interesting and unexpected results had been obtained. In Egypt itself there was still no lack of important, if not sensational, discovery. The sites already known covered only certain periods of time. Other periods were unrepresented, or meagrely represented, which was the case with the Hyksos period.

When once a purely Hyksos cemetery was discovered they would find that in many localities graves and monuments now assigned to the middle period really belonged to the Hyksos age. Sooner or later discoveries would be made which would throw light on the dark periods of Egyptian history. There was, however, one enemy to be reckoned with—the irrigator. The Egyptian dead were buried in the desert, which had now been invaded by the irrigating engineer. The sites of the ancient towns had been changed into fertile fields. The chief monument of the English occupation was the destruction of the temples of Northern Nubia. If the past history of Egyptian civilisation was never fully known it would not be because no records were left, but because the records were destroyed by the Ministry of Public Works. All the more honour, therefore, to those who were spending time and money to save these before it was too late. The greatest discovery of the season had been made by Professor Naville at Abydos. The famous tomb of Osiris, which had been brought to light, reminded them that the history of Egyptian culture was in many respects a history of decadence.

A little to the south of the third cataract Dr. Reisner had made discoveries which would completely change our ideas of early Sudanese history. When the lecturer made some diggings there four years ago he came across some pottery of the Fourth Dynasty, and concluded that the cemetery belonged to that period. Dr. Reisner, however, had found that the cemetery really covered a long space of time. The earliest tombs went back to the age of the Fifth and Sixth Dynasties, while the later graves came down to the end of the Seventeenth Dynasty. This proved that the Northern Sudan was already occupied by Egyptian troops as far back as the time of the Egyptian Empire, the time of the Fifth and Sixth Dynasties. It was possible that the history of the Hyksos period, which had been obliterated in Egypt itself, might yet be discovered in the Sudan.

At Meroe an African Pompeii had been brought to light. This included a larger area than Memphis, and included the Royal City surrounded by a magnificent wall of dressed stones, which was 15 ft. thick in places, and must have been 30 ft. high. Meroe was the Birmingham and Liverpool of ancient Africa. It was the place where the trade routes from the Red Sea met the Nile, and was the centre of the iron industry. On the north and east rose veritable mountains of iron slag, and the furnaces in which the iron was smelted had been discovered. Enough iron must have been worked to supply the whole of northern Africa with iron implements. Many of the most beautiful objects found in the ruins were made of biscuit ware, which was as fine and thin as that of china, but was not translucent. Recent discoveries in China had shown that under the Hun dynasty trading voyages were made by the Chinese as far as the coast of Abyssinia. Pottery was among the articles of trade. The work of excavation was showing how false were the ideas prevalent a generation ago. Ancient Egypt was no more isolated in its culture than Great Britain was to-day. The intercourse was more leisurely, but it existed.

THE SUDAN IN 1913.

(From Our Own Correspondent.)

Cairo, June 1.

The Sudan Government is now occupied in drawing up its preliminary estimates for 1915, and it is therefore of interest to study the accounts for 1913, which have just been closed. These accounts present a peculiar and unprecedented feature, as they are the first to be submitted since the Egyptian Treasury ceased to accord an annual subvention to Khartoum. That subvention at the last amounted to £E163,000 nett, and in its place the Sudan now receives from Egypt payment of the dues levied by the Egyptian customs on all goods destined to the Sudan that enter through the Egyptian ports. For the past year that payment amounted to £E85,000, so that the Sudan became a net loser to the extent of £E78,000 by the new arrangement.

Under these circumstances a comparison between the figures for 1912 and 1913 gives an interesting insight into the progress made by the Sudan. The figures are as follows:—

	1912.		1913.
Receipts	£E1,591,605	.....	£E1,654,149
Expenditure	1,490,668	.....	1,614,007
Surplus	£E100,937	.....	£E40,142

From this it is apparent that the Sudan has made up the loss it incurred by the stoppage of the subvention, and that, in fact, the final result is £E17,205 better than that of the previous year.

The principal increases in revenue heads are: Customs £E93,676, Railways £E48,587, Ushur tax £E46,646, Animal Tax £E17,977, Royalties £E12,173, Tribute from Nomad Tribes £E5,899, Rent of Government Land and Properties £E13,696, etc.

The actual revenue is £E23,149 more and the expenditure £E16,993 less than were budgeted for, and on the face of it the position appears satisfactory; for these figures have been realised in spite of an abnormally low flood and of the absence of the usual heavy rains. But, although the Sudan authorities have been exceedingly prudent, and have fixed the estimates for the current year at £E10,000 less than the actual figure attained in 1913, they will have a very anxious time during the next six months; for the real effects of the unfortunate climatic conditions that have prevailed will only make themselves felt from now onwards. It is, therefore, permissible to expect that the surplus at the end of 1914 will not exceed that realised in 1913, if, indeed, it attains that figure, whilst unless better conditions set in soon, it is to be feared that no expansion in the ordinary expenditure such as has characterised the administration during the past few years, and has had such beneficial effects, will be possible in framing the estimates for 1915.

An additional and serious reason why the Sudan Government will have to walk warily is that whereas at the beginning of 1913 a small balance remained in the Reserve Fund, the latter was exhausted at the beginning of 1914, *i.e.*, the whole unspent balance of £E127,746 had been pledged; whilst of the special credits advanced by Egypt for capital expenditure, only £E5,659 remained unexpended on December 31, 1913.

The Sudan has all along shown such wonderful recuperative power, and has, indeed, during the past year maintained its reputation in this respect, that any restriction on the expenditure side, where every outlay has been hitherto so directly remunerative, is to be deplored, and it is to be hoped that the forebodings ex-

Obtainable from all leading Grocers and Druggists in Egypt and the Levant.

Digitized by Google

pressed at present will not be realised, and that a change in climatic conditions, which is required as much by the Sudan as by Egypt, will soon set in.

By many it is considered that the cessation of the payment of the Egyptian subvention was premature, and that that assistance should have been continued until the Sudan had built up a fair Reserve Fund; but although its continuance for some little while longer would undoubtedly have alleviated the stringency caused at present by the low Nile and insufficient rainfall, such a course would necessarily have meant the postponement of the raising of the loan required for the capital expenditure by means of which the Sudan will be enabled to develop its resources as they should be developed, and towards which Egypt herself could contribute no adequate sum.

However, the present situation, whilst it is anxious without being grave, is but one more cogent argument in favour of the policy that has dictated the execution of irrigation and other works, for they will, in time, render the country more independent of climatic conditions, and since to-day the Sudan is suffering by its absolute dependence thereon, it is a great satisfaction to know that a start is to be made this coming autumn in the direction of remedying this state of affairs.

PORT SAID NOTES.

(From Our Own Correspondent.)

Port Said, May 31.

The Summer Season.

A ball given at the Casino Palace Hotel last night, which was attended largely by our cosmopolitan populace, signalised the opening of the Port Said summer season. The town is growing yearly in popularity as a summer resort for the wives and children of residents in Cairo and the villages whose business keeps them in Egypt during the hot season, and to whom the expense of sending their families home each year is an alarming if not prohibitive item in the domestic budget. The hotels are already commencing to fill with visitors, and a large number of furnished flats and villas are engaged for the summer. Bathing-boxes are obtainable only with great difficulty and at high rates.

Port Said possesses many unexpected attractions to the overheated dweller of the interior. First and foremost is the sea bathing, with a sandy beach rivalling the most approved French "plage," and covered for half a mile with bathing-cabins three deep. A large number of visitors as well as residents spend many hours of the day in the cool surf, while the children play on the beach at sand-castles, and paddle to their hearts' content. For the more energetic tennis and cricket can be had at the International Sporting Club, which opens its doors to the visitor, and a sporting nine-hole golf course has recently been constructed out of the native sand near the railway station. A club has quickly sprung into existence, monthly competitions are held, and the "royal and ancient game" is as keenly played in Port Said as on the classic home courses. Sir Thomas Dewar recently played on the links, and marked his appreciation of a pleasant sojourn and the hearty reception accorded him by offering a challenge cup to the club, which was readily accepted, and will be played for next month. Boating, sailing, and fishing are easily obtainable in the harbour, while the more adventurous spirits fish outside in deep water for sharks. Moonlight donkey picnics along the beach are greatly in vogue, and excursions by steam launch down the Canal to Ras el-Aish provide a popular and pleasant variation to the visitors' programme.

From being the insanitary, dreary spot of thirty years ago, notorious for its immorality, it will be seen that Port Said has become a well-conducted, alluring summer resort for the less fortunate residents of towns in the interior, numbers of whom eagerly avail themselves of the cool sea breezes and pleasant attractions of Lesseps' Port.

Rex v. Debarro and Debarro.

This case came up for hearing at the British Consular Court on the 28th instant before Mr. Vice-Consul Chafy. The defendants, Maria and Giuseppi Debarro, both Maltese, were accused by the Crown of stealing Egyptian Unified Bonds to the value of £1,000 from the estate of the late Marianna Gameo, who died at Suez on March 22, 1912. The female defendant was charged with the theft, and her husband with being an accessory after the fact.

It is alleged that the deceased had kept a school at Suez, Mme. Debarro having been one of her pupils, and subsequent relations between the two were of an intimate nature. Mme. Gameo was an eccentric old lady and a miser to boot. When she died the British Consul was called in and found large sums of money lying about the house, and the whole place in a state of filth and disorder. Her estate realised about £3,000, part of which resulted from the sale of Egyptian Unified Bonds, which were found wrapped up in cloth on the top of a cupboard in a disused lumber-room. From inquiries made at the time it would appear that certain of the bonds were missing, as the number of coupons cashed before Mme. Gameo's death were considerably in excess of those on the bonds realised for the estate. The Caisse de la Dette were notified, and although the accused succeeded in cashing several of the coupons as they fell due, it transpired in evidence that she inquired carefully whether payment of them had been stopped. Becoming suspicious, she, together with her husband, deposited the missing bonds with the British Consul at Cairo, making a statement that they had been given to her by the deceased lady as a pledge for a loan of £625. She had no acknowledgment of such debt, and, after inquiry, the present proceedings were instituted by the Crown prosecutor, Mr. Preston. Defence was reserved, and both the accused parties were committed for trial, bail being allowed under substantial sureties.

THE ART OF EGYPT.

Mr. Talbot Kelly, speaking on the Art of Egypt at the Arts and Crafts annual dinner at the Lyceum Club, on Monday evening, said that the environment of the early Egyptian artists consisted of plains and arable countries, one dead level, as flat as a billiard table, and beyond that mountain plateaus of biscuit coloured rock. Such poetry as the country had produced was sensuous and not elevating, and it was touched with the pessimism of Solomon and Omar Khayyam. Granting that their inspiration came from nature, it had been adapted to their purpose remarkably well. The most striking feature of Egyptian art was its bigness and dignity, but their large structures were not without elegance and grace, as could be seen in the colonnade at Luxor. You would not find in Egypt any form of animal or human life wrongly depicted. Perspective was eliminated entirely from their decorative scheme, except in the procession of pylons, or entrance gates to their temples, so that the growing grandeur burst on the mind of any stranger entering the shrine. In painting they never achieved as much as in sculpture. We might justly look to Egypt as the source and origin of all the art we knew, and could only wonder that so long ago the marvels of stone-cutting and animal and natural life were achieved.

CHRISTIANITY AND ISLAM.

Presiding at a lecture on "The Gospel of Islam" delivered by Zari Sarfaraz Hussein, of Delhi, at Caxton Hall, on Monday afternoon, the Right Hon. Syed Ameer Ali said that for more than forty years he had been trying to bring about an understanding between Christianity and Islam, and he believed that to some extent he had removed the false impressions in the West regarding the latter religion. He saw no reason why Christianity and Islam should not work together in the elevation of the human world; they worshipped the same God, had the same traditions and ideals, and did not differ in their moral standards. It grieved him to see that some of the heads of the Church of England had taken up rather a militant attitude against the diffusion of Islam among races where they themselves were unable to make any progress. As a matter of fact, it must be acknowledged that there was a great deal of work for both religions. It was the greatest misapprehension, he concluded, to think that Islam degraded the position of women; it had done more to raise the status of women than any other creed or religion or social system in the world.

LETTER FROM ATHENS.

(From Our Own Correspondent.)

Athens, June 6.

The Epirotes and the Mpret.

The events of the past fortnight in Albania have somewhat overshadowed the Epirote question, but it is understood that amid the preoccupations of Durazzo the Albanian authorities have realized the necessity of ratifying the Convention of Corfu at the earliest opportunity. In view of the dynastic possibilities in Albania it must be remembered that the Epirotes have agreed to submit to the reigning Mpret, in whose Christianity they found a guarantee that their political position would not be rendered intolerable. If, however, a Moslem Prince were to ascend the Albanian throne, whether it be an Ottoman, an Egyptian, or even Essad Pasha Toptani, the Epirotes would appeal for Greek assistance to preserve them from the re-establishment of Moslem domination.

By-elections in Attica.

The event of the past week has been the double by-election in Attica. The Opposition parties united to support Mr. Pop, a bitter opponent of the Prime Minister's policy, who at one time was one of Mr. Venizelos' most ardent supporters. The Prime Minister made the mistake of accepting the challenge of the Opposition, and declared that he would regard the result of the by-elections as an expression of confidence, which if withheld would lead to his resignation. One of the vacant seats fell to Mr. Zographos, who enjoyed the united support of all who approved of his patriotic labours in Epirus, while the Ministerial candidate was returned for the other with but a small majority—a bare 500 out of a total poll of 4,500. In consequence of this the Opposition is predicting the speedy downfall of the Administration. I think its members are mistaken, as by-elections go for little in Greek party politics, and I believe that many Venizelists did not trouble to vote, knowing that the result of the polling was a foregone conclusion.

The Cession of Sasseno.

The Prime Minister was fiercely attacked in the Chamber for having agreed to the cession of Sasseno and for not having occupied Durazzo during the war. Mr. Venizelos, recalling his previous statement on this subject, reminded his hearers that Greece had only yielded the point under threat of war from Italy. The same reasons had induced him to give way on the question of the coast opposite Corfu, a matter which interested not only the Adriatic Powers, but, in a less degree, the rest of the Concert as well. It was impossible for Greece to oppose united Europe, which had removed the Servians from Durazzo and the Montenegrins from Scutari. The Prime Minister reminded the Chamber that Sasseno was an uninhabited island and valueless to Greece.

The Islands.

Dr. Streit, the Foreign Minister, in the course of the same debate, denied that Greece had ever made proposals for a *condominium*, or had ever proposed to recognize any form of Turkish suzerainty, over the newly acquired islands in the Ægean. He further asserted that the Hellenic Government had no intention of withdrawing from the islands, the annexation of which had received international sanction in virtue of the decision of the Powers, which it was obligatory for Turkey to respect.

The Greco-Servian Convention.

The recently concluded Commercial Convention, which guarantees highly advantageous terms for Servian commerce passing through Salonika for the next fifty years, is expected, in conjunction with the new railways about to be constructed in Macedonia, to preserve for Salonika much of its commercial hinterland, and to contribute to the development of the Hellenic mercantile marine. It is hoped that the Commercial Treaty which is shortly to be signed may lead to the formation of a Customs Union with Servia. Naturally such an increase in commercial relations cannot fail to draw tighter the political ties which unite the two countries, and that friendship which has been manifested during the last week by Athenian society towards the members of the Choral Society of Belgrade, who have been visiting this capital.

The Corfu Jubilee.

Their Majesties and the Prime Minister are at Corfu for the celebrations of the fiftieth anniversary of the union of the Heptanesos to the Hellenic kingdom. The memory of this historical event, which did honour alike to the patriotic aspirations of the Ionian Islanders and to the great people which for half a century had accorded them its civilising protection, fills the hearts of the Greeks with gratitude towards Great Britain. The example set on this occasion might well serve as an object-lesson for certain other States, which, although they occupy no position at all amongst the ranks of ordered nations, and are indeed far below zero in point of civilisation, claim to enforce their yoke on civilized subjects whom they were once able long ago to subjugate by force of arms, and even presume to demand the retrocession of such populations as have already been liberated from their detestable domination.

THE CAPITULATIONS.

IN THE LOST PROVINCES.

(From Our Own Correspondent.)

Belgrade, May 22.

The question of the capitulations in the ex-Turkish territories is perhaps more complicated than would appear from the short paragraph dedicated to it in the account of my conversation a fortnight ago with Mr. Pashitch. Thus, for instance, our two vice-consuls in Monastir and Skoplje (Uskub) are not accredited to the Servian Government, but to the Turkish Government. Officially they still recognize the capitulations, and, I believe, our Consul-General in Salonika and the Vice-Consul in Kavalla are placed in a similar awkward position. Austria and Germany are increasing the number of their consular officers in New Servia, but will they, who, perforce, must be accredited to the Servian Government, recognize the Capitulations or not? The Capitulations in the "Principality of Servia" were abolished by treaty with the Powers years ago, and as a result the Levant Consular Service had no officer at Belgrade, the post being filled at the present time by an honorary vice-consul, our only accredited consular representative in Servia. In Bulgaria, on the other hand, the Capitulations were never officially abolished, though negotiations to this effect have been carried on, I am told, during the past few years.

We are, therefore, confronted in the new territories with a threefold problem: first of all, the abolition (or non-abolition) of the Capitulations; secondly, the accrediting of our respective consular officers to the powers that be or the abolition of their posts altogether; and, thirdly, the status of the Levant Service. If the abolition of the Capitulations is officially recognized by the Powers, including Great Britain, the following consular posts will be affected: Candia, Canea, Salonika, Skoplje (Uskub), Monastir, and Kavalla. Will the Levant Service be directly affected by these changes, or will it retain the posts now held by it? If not, there will be a considerable shrinkage in the number of posts available for the Service, and a proportionate number of officers awaiting promotion. If, on the other hand, the Service retains these posts, it will only be logical that the remaining officers in Greece and Servia should belong to the same consular body, which should also have jurisdiction over Albania and Bulgaria.

It is likewise possible that the posts mentioned will be abolished entirely, with the exception of Salonika. In which case Servia will have no consular officer *de carrière*. This would be deplorable. We need a consul in Belgrade badly, and the vice-consulate at Skoplje should, I think, be maintained; though perhaps the best way out of the present muddle would be its temporary abolition. The outlook in Monastir is, on the other hand, not sufficiently promising to warrant the upkeep of a vice-consulate at the present time. With regard to Albania, I can get no information here as to what are our intentions, either diplomatic or consular.

RUSSIA AND ROUMANIA.

(From Our Own Correspondents.)

Bucharest, June 6.

At last the date of the Tsar's visit to this country, and the programme to be followed—which are said to have been kept secret until the Russian police arrangements had been perfected—have been made public. Accompanied by the Empress and their four daughters, the Tsar will arrive at Constantza on the morning of the 14th inst., on board the royal yacht "Standart," and will be welcomed by the Roumanian Royal family, who will travel on the Roumanian Royal yacht. The actual meeting will take place on the "Standart," on which luncheon will be served. In the afternoon the visitors will land and see something of Constantza, and in the evening a gala banquet will be given at the Municipal Palace, after which the Russian party will leave.

It is reported that Prince Carol may obtain leave from his military duties at Potsdam for the occasion, and rumour is again rife to the effect that his betrothal to the Grand Duchess Tatiana will take place and be publicly announced during the visit.

M. Sazonoff will not travel with the Tsar, but will come here by rail, and will arrive a day or two earlier than his Royal master. While in Bucharest he will have interviews with the Roumanian Prime Minister and Minister for Foreign Affairs, and on the 14th he will proceed to Constantza. The entire Roumanian Cabinet will also go to Constantza and accompany the Royal family when they put to sea to meet the Russian yacht.

Naturally, much significance is attached to the visit here. It would be ridiculous to pretend that it is not connected with a strong desire for Roumanian friendship on the part of Russia; and the Roumanians as a whole appear to be weary of a pro-Austrian policy. Indeed, feeling against the Dual Monarchy runs high just now, and the conferring upon Count Czernin of the Order of the Star of Roumania has caused considerable surprise, not to say dissatisfaction, amongst the public.

Odessa, June 7.

The Bourse Gazette says that M. Isvolski, the Russian Ambassador from Paris, will attend the meeting of the Tsar and King Charles at Constantza. Much importance is attached to this consultation of MM. Sazonoff, Isvolski, and Bratiano. The Tsar is expected to disembark from the Imperial yacht "Standart" at Constantza early on the 14th inst., and re-embark in the evening of the same day for Odessa, arriving here in the forenoon of the 15th. His Majesty's halt in this city will be of brief duration; he proceeds the same day to Kishineff.

From Bucharest it is stated that the meeting of the Russian and Roumanian Sovereigns will take place in a spacious pavilion, and one of the features of the occasion will be a review by their Majesties of a complete Roumanian army corps. The *Indépendence Roumaine* says there is nothing conventional or platonic about the Imperial visit. It is one of true and genuine friendship between the two monarchs and the two Governments, and an epoch-marking event for Russia and Roumania, the sealing of a bond of enduring amity between the two nations, the Northern Colossus and the dominant Power in the Balkans.

(From Our Special Correspondent.)

Bucharest, June 7.

The meeting between King Carol and the Tsar next Sunday is keenly interesting public opinion here, and in official circles there is a tendency to clothe it with political significance. I have been given to understand that Talaat Bey left Bucharest last week greatly pleased with the results of his visit, it being the object of the Porte to strengthen its friendly relations with Roumania in view of possible developments in the Balkans, to which the Ottoman Empire could not remain an indifferent spectator. But the greatest interest will centre in the propsed visit of the German Kaiser to the Court of King Carol, which, I have been assured on good authority, will take place this year.

NOTES FROM BULGARIA.

(From Our Own Correspondent.)

Sofia, June 6.

Anti-Greek Demonstrations.

Last Thursday being the name-day of King Constantine of Greece, a Te Deum was celebrated at the Greek Church here, and at the same time a Greek flag was hoisted on the building. The latter fact caused a large crowd to gather round the church, and very soon insistent demands were made for the flag to be pulled down. The Prefect of Police, arriving on the spot, suggested that the Greeks should either haul down their flag or hoist the Bulgarian one beside it, and, finally, his first suggestion was acted upon. The Greek Chargé d'Affaires, however, lodged a complaint with Dr. Radislavoff, who gave orders that the Greeks should be allowed to hoist their flag again, which was done in the afternoon. But the angry crowd rushed into the church, pulled the offending bunting down, and tore it into strips. The following day Mr. Hajji Misheff, Secretary-General of the Foreign Office, called upon the Greek Chargé d'Affaires, expressed the Government's regrets for the incident, and assured him that the offenders should receive exemplary punishment. The Bulgarian Chargé d'Affaires at Athens was also instructed to offer similar apologies and assurances to the Greek Foreign Minister.

On the same day the citizens of Varna held a mass meeting, at which the Greek terrorisation and persecution of Bulgars in Macedonia were described, and it was resolved, as a measure of reprisal, to take possession of the Greek churches and schools in Varna. Accordingly, at the close of the meeting, the crowd marched in procession and occupied the four Greek churches and schools and the Bishop's residence. The authorities were able to avert bloodshed and rioting, and, apart from the actual "capture" of the buildings mentioned, there was no other incident to record.

Rumano-Bulgarian Postal Convention.

The new postal and telegraphic convention recently concluded between this country and Roumania, by which the postal and telegraphic rates are reduced, has received the approval of the Sobranje.

The Government's Majority.

The Sobranje is proceeding with its scrutiny of the elections, and the commission charged with the investigation of their legality has proposed that four of the Opposition deputies should be unseated on the grounds of illegal practices. Should the Sobranje uphold this proposal, the number of Ministerialists would be brought up to 133, which would give them a majority of twenty-one over the united Opposition, and thus render it easier for them to pass the Budget, the Peace Treaties, and all the other legislation necessary for the financial and military consolidation of the country.

THE BOSNIAN RAILWAY.

Our Special Correspondent writes from Bucharest under date of June 7:—"Commentator's" reference on May 29 to the Green Book for Bosnia and the Herzegovina ought to draw British public attention to a matter of immense political interest. The statement that it is the Austrian Government's intention to prolong the standard gauge line from Schamatz to Serajevo indicates a reawakening of Count Aehrenthal's old policy of linking up Salonika with the Dual Monarchy not only by way of Belgrade, but by an alternative route farther to the west. The fault committed at the time was the construction of narrow gauge railways in Bosnia, the Salonika-Mitrovitza section being standard gauge. The conversion now, at no little cost, and at a moment when the sale of the Orient Railways is practically concluded, shows that the old policy is going to be revived. It is, however, impossible to believe that Austria would burden herself with the enormous expense (the lines are purely strategic) without being convinced that ultimately the continuation of the line to Uvatz and its prolongation across the frontier to Mitrovitza, etc., will be assured. Developments in Albania or Austrian policy in connection with that State will probably be found eventually to conform in the most marvellous manner with railway construction in Bosnia and the creation of a line dangerously near the frontier, which will be in a position to throw Austrian troops between Belgrade and the Adriatic.

NOTES FROM CYPRUS.

(From Our Own Correspondent.)

Cyprus, May 29.

The Legislative Council.

The Legislative Council has at last passed the Estimates for the current year, and may now possibly give its attention to the more useful task of legislation. Among the new Bills is one introduced by a private member for the establishment of co-operative societies, which is practically identical with one submitted by the Government some three years ago, but not proceeded with. The present Bill includes provisions for co-operative banking, but is intended to cover all kinds of co-operative enterprise.

New Khedivial Service.

The Khedivial Steamship Company has lately formed a new route by which its steamers will leave Larnaca fortnightly on Sunday for Rhodes, Smyrna, and Constantinople, arriving at the latter port on Wednesday afternoon. This route should become very popular among the English community who wish to proceed to Europe, and will doubtless find much favour also among the Turks who are frequently travelling backwards and forwards between Constantinople and Cyprus. The cost of the journey to England compares quite favourably with that of the various routes viâ Port Said and Alexandria. It is decidedly quicker, and at least the traveller is spared the extreme annoyance of an indefinite delay at Port Said or Alexandria while waiting for passage accommodation. It is a surprising fact that, in spite of the large number of vessels calling at these ports on their homeward way, the difficulty in obtaining berths for passengers from Cyprus is very great during the summer leave season. The ships mostly arrive full from India or other Far Eastern parts, and any possible spare accommodation is snapped up by the swarm of Anglo-Egyptian officials who take their annual three months' leave. The unfortunate Cyprus official who, not infrequently, is only able to arrange for his leave at short notice, finds himself crowded out, and if he is travelling with a family the expense is no small additional annoyance to that of wasting precious days of his limited holiday in sweltering Port Said. Much the same difficulty is met with when he returns in October or November, when the rush is all in the outward direction, and valuable last days, which might be occupied happily with gun or rod, must be spent in London, in a fretful, chafing spirit, seeking passages and finding none. This new itinerary provided by the Khedivial Steamship Company should for these reasons meet a very decided want. The success of the service will, however, mainly depend on the amount of cargo, and this, we hope, will not be wanting.

Vital Statistics of the Island.

The vital statistics for the year ending December 31, 1913, have been published, and show a total population in the island on that date of 286,442. The birth rate for the year was 29.4 per 1,000, and the death rate 11.4 per 1,000.

Of the total population above stated 48,178 are in the six principal towns, and in these towns the birth rate was 19.5 per 1,000, and the death rate 10.8 per 1,000.

REFUGEES IN SYRIA.

(From Our Own Correspondent.)

Beyrout, May 25.

The great influx of Albanian and Macedonian emigrants into Syria is deeply perturbing the native population both Moslem and Christian. About 3,530 emigrants from the new territory acquired by Servia on the Albanian frontier have lately arrived, of whom about 3,000 were landed at Tripoli and the remainder at Beyrout, to be sent thence on to Aleppo. The Government is said to have decided upon sending as many as 30,000 Macedonian emigrants to the vilayet of Aleppo alone. According to a very recent report from Aleppo, the mosques in that town are teeming with these emigrants, whose number is estimated at from 3,000 to 4,000. Most of these are said to be the remnant of those whom the Government had sent to the caza of Rekka, but who refused to settle therein. Some of these emigrants demand settlement in the lands of Al Hamraa, which, however, are occupied by the Arabs.

The fact that the Government, in spite of its financial difficulties, has just voted a first instalment of £tq 40,000 for this purpose is taken to indicate on the part of the Young Turks certain political designs that the Arabs, both Christians and Moslems, cannot but view with the deepest apprehension. The former look upon the dumping down of such great numbers of Macedonian emigrants as an attempt on the part of the Young Turks to further weaken the Christian element, while the Moslems see in this action a contrivance for strengthening the Turkish element in Syria. Whatever may be the real design of the Turkish Government, it seems that it would have been more logical for them to settle these emigrants in Anatolia, where by race and language they could more easily be assimilated by the native population, and where climatic conditions approximate those under which they were born and bred.

BISHOP BLYTH'S RESIGNATION.

In a letter to the Archbishop of Canterbury, dated May 23, published in *The Guardian* of June 4, the Right Rev. Popham Blyth tenders his resignation as Anglican Bishop in Jerusalem, the resignation to take effect on October 18.

Bishop Blyth, who was ordained deacon as long ago as 1855, was appointed to his position in Jerusalem after twenty-one years of service as chaplain in India, the last eight of which he was Archdeacon of Rangoon. At a time when many Anglo-Indians return home to enjoy a leisured life upon a pension, Archdeacon Blyth received the call to a sphere of new interests and activity.

Probably no one, and least of all he himself, dreamed that he would be spared to administer his new responsibilities for over twenty-seven years. It is not wonderful that he cannot now any longer make the arduous journeys necessary for the proper episcopal supervision of an area which includes much of Asia Minor and all Syria, Egypt, and Cyprus. Recently he has had much assistance from his Suffragan, the Right. Rev. L. C. Gwynne, of Khartoum. The episcopacy of Dr. Blyth has witnessed a considerable expansion of the two old Church societies—the C.M.S. and L.J.S.—both in Palestine and Egypt, and a new society initiated by the Bishop, the Jerusalem and the East Fund, has done much excellent and needed service both in supplying chaplaincies and in educational and missionary work. Bishop Blyth will pass on his jurisdiction with greatly extended responsibilities and agencies, but his tenure of office will always be notable for the splendid buildings he has erected, particularly the Collegiate Church of St. George's the adjoining Bishop's house and College, and St. Mary's Home for girls, all in Jerusalem, and the beautiful buildings, including a church and hospital, at Haifa. Not less important has been the Bishop's friendly attitude towards the leaders of the Greek Church in Jerusalem.

The English Bishopric in Jerusalem has had a remarkable history, and was once—when missionary bishoprics were unknown—the subject of acute controversies. The first three bishops were appointed under a peculiar arrangement whereby the Prussian Government paid £600 per annum, a second £600 being derived from interest on funds raised by Lord Shaftesbury and other leaders of evangelical thought some seventy years ago. Before the appointment of the present Bishop the Germans withdrew from this arrangement, and the two Church societies then working in Palestine—the C.M.S. and L.J.S.—undertook to contribute £300 per annum each. The Archbishops of Canterbury and York and the Bishop of London are the three trustees of the Jerusalem Bishopric Funds, and upon them will fall the responsibility of selecting a successor to the retiring Bishop. It is a difficult post, yet it is one which should present great attractions to the right kind of man. One experienced in Oriental life, knowing at least Arabic, thoroughly conversant with the problems of historical Christianity, and sympathetic towards different points of view in the Church, would seem essential. It would appear that the separation of the original bishopric into two—one for Palestine and one for Egypt—is not likely to be carried out at once, and if that is so, the work of the new Bishop will be one demanding not only scholarship and diplomacy, but energy, activity, and a sound constitution innured to the semi-tropical climate of much of the diocese.

INSECURITY AT KAZERUN.

(From Our Own Correspondent.)

Persian Gulf, May 18.

After re-occupying Kazerun the gendarmerie despatched a force into the hills to punish the Nasr-i-Diwan and his followers, and in this they were joined by Mohammed Khan Kashguli, cousin and rival of the famous outlaw Mohammed Ali Khan Kashguli. The expedition, however, came to naught, and nothing more has been heard of it.

It would, perhaps, be of interest to explain here that the Kashgulis are a sub-division of the great Kashgai tribe, whose nominal head or Ilkhani is Sowlet-ed-Dowleh. The chief of the senior branch of Kashgulis is Mohammed Ali Khan, and that of the junior branch his cousin Mohammed Khan. These two chiefs are deadly enemies, and whilst the former professes to own allegiance to Sowlet-ed-Dowleh, the latter is a partisan of Sardar Etesham, Sowlet's half-brother, and formerly Ilbegi of the Kashgais. Both Mohammed Ali Khan and Mohammed Khan are enemies of the Nasr-i-Diwan, and before the advent of the gendarmerie the neighbourhood of Kazerun was a scene of periodical conflict between Mohammed Ali Khan and the Kazerunis.

The Kazerun plain and town remains in a state of great insecurity. The townspeople are in a pitiable condition, and after nightfall are preyed on and robbed by outlaw "tofangchis," who descend from the hills, which they took to after the fight, and infest the outskirts of the town. Although the gendarmerie are now quartered in Kazerun in large numbers, their presence would seem to have little effect on the marauders. And, as you will doubtless have learnt from the cables, on April 25 a caravan of over forty mules travelling to Shiraz from Bushire was attacked and carried off just outside the town without opposition and in broad daylight. It is true that after the event a force of gendarmerie set out in pursuit of the brigands and succeeded in recovering the mules, but it cost them eight men killed and some half-a-dozen wounded, whilst not a single kran's worth of the goods was retrieved, the whole caravan-load—again much of it British owned—being successfully carried off by the robbers.

More recently a caravan of mules journeying down to Shiraz from Ispahan has been attacked and carried off by Boerahmedis in the neighbourhood of Yezdikhast, some of the loot including valuable chests of opium belonging to British firms.

NOTES FROM BAGHDAD.

(From Our Own Correspondent.)

Baghdad, May 22.

The New Vali's Activities.

The new Vali, Djavid Pasha, has lately been instituting an inquiry into municipal matters, with the result that the *Rais el Belladieh* (head of the municipality) has been replaced by a *mudir* appointed by the Vali, and the whole council has been suspended until they are able to justify their methods in certain transactions inquired into. Considerable pickings are alleged to have been made from the street-asphalting contract, but perhaps the most important question is that of the *Gaz Khane*, or municipal oil store. Oil deposited in this depôt is supposed to be insured against fire risk by payment of a higher rate than that required for deposits at owner's risk. Two years ago a fire occurred at the store, and since that time those merchants who had oil deposited there at the insured rate have been endeavouring to obtain some compensation for their loss. Now it would appear that such compensation, amounting to something like £T3,000, must eventually come from the pockets of the members of the Council, since they had neglected to take up fire insurance on the depôt and so cover their liability.

A military officer of no small reputation, the Vali appears to have taken great interest in military matters in the vilayet. There is a constant movement of troops in and around Baghdad, long route marches seem to be the order of the day, and at the recent review on the occasion of the anniversary of the Sultan's accession one could not help favourably comparing the general appearance of the different corps with that observed during the last few years. It would seem that the Vali is striving to attain the standard of efficiency maintained in the days of the late Nazim Pasha.

The Irrigation Works.

The works at the Hindieh Barrage are practically complete, and the finishing touches are being put to the escape which was afterwards considered necessary to take the weight of water from the main barrage in the high floods, and can best be described as a "safety valve." The majority of the British engineers engaged on the works have left for Home, and several Turkish engineers have arrived and taken up their residence on the spot. They have, however, not yet taken over entire control of the barrage, and the regulating of the sluice gates is still in the hands of the British engineer in charge. Some of the plant has been already transported to Ramadi for use on the Habbania works; but it remains to be seen what steps the Turkish Government will take for the furtherance of this latter scheme, and whether the work will be continued by the firm of Sir John Jackson, Limited, on the present commission basis, or whether sufficient funds will be voted for Mesopotamian irrigation to allow the Government to give the contract for the completion of the works to either Sir John Jackson, Limited, or Messrs. Pearson, whose engineers have lately made a survey of the district. At the present moment work is going on slowly at Ramadi, and only a comparatively small number of men are employed in cutting the canal into the Habbania depression from the Euphrates.

Progress of the Baghdad Railway.

It is expected that the first section of the Baghdad Railway will be opened for traffic on June 1, the line from Baghdad to Semaika, a distance of about eighty kilometres, being ready. The line to Samarra should be completed by September, and a fair passenger traffic will no doubt be done, considering the great number of pilgrims who travel annually to that place to worship at the holy shrine there.

Baghdad-Kermanshah Road.

The roads between Baghdad and Kermanshah are again in a state of great insecurity, some of the tribes on the route having recommenced marauding.

NEAR EAST IN PARLIAMENT.

HOUSE OF COMMONS.

The Late Sir H. Layard's Pictures. June 9.

Mr. Montague Barlow asked the Secretary of State for Foreign Affairs, with regard to the pictures, the property of the late Sir H. Layard, which were left to this country by his will (to which reference has frequently been made in The Near East), whether negotiations were proceeding with the Italian Government with a view to their being transferred to this country; if not, whether they were being retained in Italy, and, if so, under what circumstances; and what was proposed to be done with them?

Sir E. Grey: Negotiations are proceeding with the Italian Government in the matter, and in the meantime the pictures are being retained in Italy. I trust, however, that a satisfactory settlement may shortly be reached.

Gun-running in the Gulf.

Sir J. D. Rees asked the Under-Secretary of State for India whether His Majesty's ships in the Persian Gulf had been engaged with gun-runners during the months of April and May.

Dr. Macnamara: No, sir, so far as the Admiralty is aware.

Persian Food Duties.

In answer to a question from Sir Richard Cooper, Mr. Burns said, with regard to Persia: Foods and beverages generally are dutiable at specific rates, but there is a provision in the tariff that "groceries" other than those specifically mentioned (*i.e.*, other than pepper, curry-powder, pimento, mustard, cinnamon, nutmegs, cloves, vanilla, vanillin, saffron, and truffles) are to be dutiable at 15 per cent. ad valorem.

Rights of Minorities in the Balkans. June 10.

Mr. Acland (Under-Secretary for Foreign Affairs) stated, in reply to Sir J. D. Rees, that His Majesty's Government propose to inform the Balkan States concerned that they are willing to recognise the recent annexations in so far as such changes constitute a departure from the settlement sanctioned by the Treaty of Berlin, and subsequent international agreements between the Powers signatories of that Treaty, provided that the annexing States on their part acknowledge the binding force in respect of the annexed territories of those provisions of the Treaty of Berlin which ensure the equal rights of religious or national minorities.

TANGIER TO TEHERAN.

Affairs appear to be working up for another Greco-Turkish crisis. I see that reprisals are at last being contemplated by the Cabinet of Athens, and in order to impress the Ottoman public with the intense resentment which is felt throughout the Hellenic world at the treatment of Greeks in Turkey, the wholesale confiscation of the property of Moslems in Hellenic Macedonia is being suggested. Two blacks do not make a white, and the Hellenes of the kingdom must remember that if it comes to the point of making official reprisals there are far more Greeks exposed to Turkish antipathy in the Ottoman dominions than there are Moslems upon whom to retaliate in Hellas, old or new. Like most people in this country, I detest racial or religious persecution—more especially so when the persecution is carried out by a mob—and I think third parties should intervene to compel a proper respect for individual liberties, guaranteed in both countries by the letter of the law and the spirit of the Constitution. A Moslem mob, accustomed for years to regard most Christians as "Greeks," may at any moment make the mistake of treating all Christians as Greeks. There would, of course, be a hideous uproar; a naval brigade would be landed to protect Pera, Ambassadors would vie with one another in demanding apologies and reparation. I suggest, therefore, that the proper persons should intimate to the Young Turks that if they want to be rid of their Greeks they had better expropriate them by legislative enactment and award them reasonable compensation. The Hellenic Government has agreed to co-operate in such a scheme, and the requisite transfer of populations could then take place as if they were human beings. It is quite obvious that the Powers are being merely selfish spectators of what, did they desire a grievance against the Porte, would have already led to a magnificent display of journalistic heroics and international fireworks. As, unfortunately, they are entirely selfish, it is necessary to point out that by making the Turks bear the cost of an expropriation, by which they hope to benefit, the Powers will be spared the expense of naval movements and armies of occupation, which will become necessary if a Moslem mob gets out of hand and kills or beats some foreign Christian who does not happen to be a Greek. Meanwhile the relations between the two countries become daily more strained, and I am told that the Young Turks are calculating on the breaking point being reached by the end of August—though, of course, Mr. Venizelos may see fit to strike before then.

***

The action of the Oecumenical Patriarch in closing all Orthodox churches and all Greek schools within his jurisdiction as a protest against the cruel maltreatment to which his flock are subjected in various parts of Turkey, appears to be a return to the medieval interdict which used to play so large a part in the foreign policy of the Vatican at one time. The situation is desperate, and needs a desperate remedy; but it still remains to be seen whether His All-Holiness has prescribed the correct treatment. The attitude of the Turk towards his Greek *rayah* is very hostile at present, and gives the impression that he is anxious entirely to rid himself of the *millet-i-Roum*. In these circumstances it may be that the Porte will regard the action of the Phanar as an act of insubordination on the part of a Government official—such being the status of the Oecumenical Patriarch in the eye of the Ottoman—and will treat it accordingly. On one occasion a Patriarch was hanged; very frequently have they been deprived; and the immediate predecessor of Germanos V. was forced to make way for a successor, himself now in exile, and was restored to the throne only after years of retirement. The Bulgarian Exarch some months ago withdrew from Turkish territory, and if the position alike of the Patriarch and his people is made intolerable under the Turk, it may be necessary for the successor of St. John Chrystostom to retire from Constantinople, as did his predecessor, John X. Kamtera, in 1204, when the Latins sacked that city and established a Latin hierarchy, while the Orthodox Church transferred its headquarters to the temporary capital of the Byzantine Emperors in Nicæa.

***

I see that the Albanians, like their neighbours in Greece, Turkey, Bulgaria, and Roumania, have realised that the average inhabitant of the West is a stupid fellow who understands no Balkan language and is too lazy to try to do so. In consequence of this they have established a French and English edition of *Koha*, an Albanian journal published in Koritza. This is purely for the benefit of foreigners, and will enable them to read the Albanian point of view. I believe that the Servians and Montenegrins are now the only Balkan peoples who have failed to appeal to the West in a journal published locally, but printed in a language more readily understandable by foreigners than the native idiom.

Jules Verne's hero went round the world in eighty days, and other enthusiasts have since then considerably reduced his record. In fact, there is now nothing remarkable about rapid transit, and it is only those travellers who can reckon their journeys by weeks or months who are worthy of attention. I see that the British Resident in Koweit has returned home viâ Er Riadh and Cairo, taking three-and-a-half months to ride the first 1,800 miles of his route. Captain Shakespear is to be congratulated on having thus acquired a sound working knowledge of the interior of Arabia, its political conditions and commercial possibilities. I look forward with interest to the lecture which I understand he is to deliver before the Royal Geographical Society, and to the alterations in maps which he will then make.

***

One correspondent in Cyprus tells me that it is not at all unlikely that a deputation of Cypriote Greeks will visit London at no very distant date in order once more to urge the British Government to "hand over" the island to Greece, a matter on which they have suffered rebuff once or twice already. With somewhat suffragette-like tactics the Greek agitators have been trying to make representative government impossible in the Island as a protest against the non-fulfilment of their aspirations, with which we dealt in last week's issue. For days they opposed every item in the Estimates, but at last, as another correspondent puts it, "worn out by loss of gas, they practically collapsed over the last few votes." It is a silly policy, and does not impress people over here. I shall be quite pleased to see another Cyprus deputation in this country, as it all tends to advertise the island, and advertisement is good for trade. It is to be hoped that the missionaries of Ἕνωσις will have a second string to their bow, and, after exhausting their forensic eloquence on behalf of their party, will turn their attention to arranging measures for the benefit of the Island—as, for example, the formation of a powerful company for building first-class hotels on Troodos and making it a recognized summer station. I can assure them there are far larger profits to be made from such a venture than from years of political agitation—though naturally the work, being useful, would be harder.

***

"On account of the unfavourable weather prognostications for the approaching total eclipse of the sun throughout the European countries traversed by the track of totality, it seems particularly desirable that stations should be occupied beyond the Black Sea, nearer the sunset limit of eclipse, in Eastern Turkey and Western Persia." I am quoting from an article in *Nature* by Mr. David Todd, in which the most eligible spots for making observations are pointed out, and advice and directions are given one how to get to them. It may be expected that several parties of astronomers will trek across Turkey and Persia with the object of making their observations of the solar eclipse under clearer skies. The central line of the eclipse passes through Baiburt and Bitlis, just a few miles to the west of Lake Van, in Turkey; and in Persia, through Kermanshah and Khoremmabad, to the south-west of Teheran, and through a point midway between Persepolis and Dehbid, and slightly to the north-east of Shiraz, only a few miles distant from Bushire. These twentieth-century students of the heavens will be able to visit the country of the Chaldeans, their forerunners of antiquity. As most of this region is desert, the chances of a cloudless afternoon sky in August are good; and the height above sea level of the country traversed by the shadow (as much as 5,000 to 6,000 ft.) "would, in large measure if not entirely, compensate for the lesser altitude of the afternoon sun at local totality." The travellers will have many difficulties to overcome, not the least being the safe transport of delicate instruments and telescopes on muleback. And doubtless they will experience many little rubs and mischances, not conducive to scientific calm and detachment, which are incidental to travel in the unsettled country between the Black Sea and the Persian Gulf.

***

Those who have read Mr. Anthony Hope's "Phroso" will remember that the path of the purchaser of a Greek islet in the Ægean was not strewn with roses, but tried, like those of glory, to lead "but to the grave." I see, however, that the Italians, no whit abashed by Lord Wheatley's experience, have just bought the Island of Akronnisos from Mr. Manglis, and now enjoy full rights of proprietorship. How far these will conflict with Ottoman sovereignty remains to be seen, but, as the island dominates the historic port of Budrum (which used to be Halikarnassos), a famous castle of the Knights of Rhodes, it is certainly a somewhat curious commentary upon the statements—believed in some quarters—that the Italians intend to evacuate the Dodekanese. If that operation depend upon the consent of the Porte to the new Italo-Aidin railway agreement, it may yet have to be postponed a little.

NEAR EAST BOOKSHELF.

THE INNER HISTORY OF THE BALKAN WAR.*

Among a score of books on the latest Balkan crisis, the volume which Colonel Rankin has just published stands out as one of the few contributions of abiding interest. Most of those who preceded him in the field had to labour under difficulties which were bound to detract much from the permanent value of their work. The storm came as a surprise even to the meteorologists of the European Chancelleries, and where responsible statesmen for a long time only saw chaos it was hardly reasonable to expect that journalists would discover system or sequence. Those of them who had been eye-witnesses of the Balkan drama did well to record their personal impressions as raw material for the future historian, but this was the utmost limit to which their ambition could aspire. To have aimed higher would have been to attempt the impossible.

The lapse of one year has altered conditions and greatly simplified Colonel Rankin's task. His object has evidently been to write a book that will stand the test of time. Putting things at their lowest, he has endeavoured to combine the functions of a conscientious journalist with those of an historian. Every page of his bulky volume contains evidence of his constant preoccupation to neglect no source of information, and to give a rational explanation of occurrences which at first sight appear as by-products of human perversity. Most of the authors who have hitherto written on this topic mainly indulged in homilies and censures at the expense of the Balkan States. In contrast with them, Colonel Rankin never forgets that free peoples cannot be tempted into shedding their blood in order to gratify the lust for destruction, but are actuated by motives of a nobler nature. As an impartial spectator, cherishing kindly feelings towards all the parties, he is able to do justice to their separate claims and to distribute blame, where blame is deserved, in an even-handed manner, The result of such a judicial attitude will probably be that no one will remain entirely satisfied with his conclusions, but this is the highest compliment which can be paid to the author's fairness and impartiality.

While recognising conspicuous merits in Colonel Rankin's book, it must be admitted that its perusal does not altogether justify the expectations awakened by the title. It hardly advances our knowledge of the inner side of the Balkan Wars beyond the point where it stood before. Colonel Rankin has been at great pains to unravel the threads of secret negotiations which led to the war with Turkey, and succeeds in giving a tolerably good account of the formation of the Balkan League. On this subject he accepts the guidance of the well-informed Balkan correspondent of *The Times*, to whom he very gracefully dedicates his work. It is, therefore, not surprising that he should have fallen into the error, committed by Mr. Bourchier, of ascribing to M. Venizelos the inception of the League. The services rendered by the Greek Prime Minister to the cause of Balkan union are beyond dispute, but it is none the less true that the Serbo-Bulgarian alliance had been practically concluded before earnest negotiations between Sofia and Athens had commenced. Colonel Rankin makes no mention of the circumstances under which Montenegro was induced to join the League. This took place during the early summer of 1912, and not the least piquant detail of the transaction is that it took place under the roof of the Imperial Palace in Vienna, where King Nicholas was staying as the guest of the Austrian Emperor. There was on this occasion no written pact, but the Bulgarian Government undertook to serve Montenegro a subsidy of 700,000 francs per month in the event of the war breaking out. Colonel Rankin maintains that King Nicholas declared war on his own responsibility and without the knowledge of the other Allies. Although this is the prevailing impression, future disclosures will establish that the conduct of Montenegro was in conformity with a pre-arranged plan.

It is, however, with respect to the war among the Allies that Colonel Rankin's book fails to turn darkness into light. Next to nothing is known of the various intrigues and schemings that went on behind the curtains from the break-up of the first Peace Conference to the eve of the second Balkan War, and in the absence of such information it is well-nigh impossible to apportion responsibilities among the contending parties. Within the last few months the Governments of Roumania, Russia, and Austria have published very interesting collections of diplomatic documents bearing on these events. It is much to be regretted that Colonel Rankin has not been able to avail himself of the fresh materials. In the light of these disclosures he would have had to modify some of his conclusions and abandon a good many of his surmises. Some time must elapse before all essential facts become public property, and until then the most scrupulous pronouncements will be liable to periodic revisions and corrections. Much may be expected in this direction from the inquiry which the Bulgarian Sobranje has just ordered into the circumstances surrounding the disasters which overwhelmed Bulgaria last summer.

What has been said of diplomatic events also applies to military matters. The author of this book accompanied one of the Bulgarian armies during the war against Turkey, and is consequently well qualified to speak with authority. But generals are no more communicative than Ministers, and do not like to take the outside world into their confidence, except when this suits their convenience. The main facts concerning military operations during the first war are, on the whole, well authenticated, but even here there still remains much to be learned. Could the great battle of Lule-Bourgas have ended in a more decisive result and brought the entire war to a stop within five weeks of its declaration? In the course of a recent controversy between the Chief of the Bulgarian Staff and General Radko Dimitrieff, the latter maintained that his plan had been to drive the entire Turkish Army towards the Istrandja mountain and force it to capitulate. This, however, pre-supposed the active co-operation of the first Bulgarian Army, which he failed to secure owing to the timidity of the Bulgarian General Staff. The latter was expecting a *sortie-en-masse* of the Adrianople garrison, and held General Kutincheff's army in reserve with the object of frustrating such an attempt on the part of Shukri Pasha. The author speaks of a second Bulgarian attack on the Chataldja lines while Adrianople was being stormed. What really happened on that occasion was in the nature of a masking movement, which degenerated into a sanguinary battle through the rashness of the commander of the First Bulgarian Army. The Bulgarian General Staff seriously contemplated forcing a passage through the Chataldja fortifications, and had brought all the heavy artillery from Adrianople as soon as that fortress had been captured, but the plan was abandoned owing to the determined opposition of Russia.

Colonel Rankin would have rendered his readers an inestimable service by elucidating the true military history of the war among the Allies, for that subject still remains shrouded in considerable mystery. This is especially true of the second period of the war, after the Bulgarians had succeeded in concentrating their dispersed forces. All through the latter half of July, 1913, stubborn fighting continued along the entire front, each side claiming victory. But beyond what appears to be an undisputed fact, that the advancing wave of the Greco-Servian armies had been stemmed, nothing definite is known. Such virgin soil might well have tempted an enterprising student like Colonel Rankin, and his labour there would have been richly rewarded. For reasons which he does not explain, he has neglected this splendid opportunity, and dismisses in half-a-dozen pages a topic which fully deserved as many chapters.

Having taken such pains to probe the Balkan problems to their bottom, and knowing all the influences that sway the Balkan peoples, Colonel Rankin was bound to be impressed by the utter futility of the settlement enacted at Bucharest and Constantinople. His opinion on this subject is that the new order of things in the Balkans is not destined to a long life. So impressed is he by that fact that he devotes a whole

* "The Inner History of the Balkan War." Lieut.-Colonel Rankin, F.R.G.S., Special Correspondent of *The Times*. (Published by Constable and ompany, Ltd. Price, 15s. net.)

Digitized by Google

chapter of his instructive book to sketching a solution of the problem which, if neglected, might soon prove the source of fresh troubles. Whatever the practical value of his suggestion, most readers will agree that it does not lack originality. Colonel Rankin proposes nothing less than "the constitution of an Eastern Empire on the German model, with the Tsar of Bulgaria as its elected and its hereditary chief." He seems to overlook the all-important fact that, whereas the German Empire is reared on racial unity, in the Balkans it is the multiplicity of ethnic elements which is at the root of the whole trouble. A far simpler, if less ambitious, way out of the difficulty would be to take as a rough basis the principle of nationality, evolving out of it a system that would guarantee to the various races conditions for free development. Besides its other merits, which are too patent to require elaboration, this plan offers the additional advantage that, if carried out with statesmanlike moderation, it might result in the establishment of a lasting Balkan equilibrium.

NEAR EAST BOOK NOTES.

Messrs. William Blackwood and Sons have issued "The Life and Times of Cleopatra, Queen of Egypt," by Mr. Arthur E. P. Weigall, formerly Inspector-General of Antiquities in Egypt. It is a sympathetic study of a very elusive character. The price is 16s. net.

"The Adventures of Hajji Baba of Ispahan," by James Morier, has been added by Messrs. Dent to their Everyman's Library. Never was there conceived a more delightful rogue than Hajji Baba, and "Everyman" will now be able, for the modest sum of one shilling, to enjoy to the full the rascalities of this diverting vagabond and very pleasant companion. Though the satire is merciless, Morier has given a true as well as a lively picture of Persian life as he knew it in the early years of the nineteenth century.

Messrs. Constable and Co. have published a book by Professor W. M. Flinders Petrie on "Amulets," being the first of a series dealing with various branches of Egyptian archæology based on the collection at University College. Some two hundred and seventy different kinds of amulets are described. It is issued at 21s. net.

LETTERS TO THE EDITOR.

The columns of THE NEAR EAST *are always open for the discussion of subjects of general interest to its readers. The publication of such letters must not be taken, however, as indicating that the views expressed by the writers are those of* THE NEAR EAST.

THE THRACIAN "PERSECUTIONS."

To the Editor of THE NEAR EAST.

DEAR SIR,—My correspondence, which you have kindly published, has brought forth some interesting statements by Mr. Field and Mr. Seed respecting the Turcophil organisations they respectively represent.

I would, however, point out to these gentlemen that the points of their differences of opinion are no concern of mine. Further, it is sufficiently obvious that both the Ottoman Association and the Anglo-Ottoman Society, by keeping alive and attempting to make capital of certain incidents of a very sordid nature and of very questionable authenticity, are doing considerable harm not only to their own cause but to the welfare of the Balkan peoples.

According to your correspondent Mr. Seed, his Association is to some extent composed of people financially interested in Turkey. It is quite intelligible that bondholders and others financially interested in Turkey should wish to do everything in their power to uphold Turkey. But I fail to see how they can hope to obtain this object so long as they unceasingly cause enmity between Turkey and her neighbours. Statements such as Mr. Field made in his letter in your issue of May 22, the publication of "Turkey in Agony," and the indictments against neighbouring countries as brought forth by the pro-Turk Press, can have no other result than to produce and maintain bad feeling amongst the nations concerned. Bad feeling leads on to war, and surely war is at the moment the last thing that anybody interested in Turkey can wish for. I hold my statements demonstrate the utterly illogical attitude of the pro-Turk party.

Your courteous correspondent, Mr. Arthur Field, in criticising my objection to the rancour and venom created by the pro-Turks, states that "I take the usual course of assuming that none but myself and those holding my own views have studied the past history of the subject." What exactly your correspondent means by this I do not understand. But, so far as Balkan matters are concerned, I never "assume" anything. I have read and heard too much obvious fiction on the subject.

I recently pointed out in your valuable columns how at one time recently the pro-Turks joined with Greeks in vilifying their neighbours. Now, not only are the Turcophils and Greeks at loggerheads, but it seems the pro-Turks have divided camps. Although modern tendencies are towards extremes as regards party politics, both by their methods and actions the Turcophils appear to be pressing these extremes almost to the point of absurdity.

I do not accept your correspondent's criticisms on my remarks about *The Review of Reviews* articles. To me these articles appealed from a purely Imperialistic standpoint, having more regard to the future than to past history. I do not know who inspired the articles referred to, but I conclude in his letter your correspondent refers to the late Mr. Stead as "The monomaniac on the subject of Turkish rule who ran *The Review of Reviews.*" But I may remind your correspondent with regret that Mr. Stead died long before the articles were published. Further, Mr. Stead was an Imperialist, and his views on foreign matters were considered by many to be very sound.

But if, in the articles referred to, there was any mention that past history proves that the Turks are absolutely incapable of governing, and consequently are a constant menace to the peace of Europe, I would heartily endorse these views.—Yours, etc.,

G. W. C. HOLLIST, M.R.C.S., etc.

Riseley Lodge, Maidenhead,
June 7, 1914.

CHRISTIANS AND MOSLEMS.

To the Editor of THE NEAR EAST.

SIR,—I desire to express my regret that I, in common with Mr. Hollist, misunderstood "A Member of the Ottoman Association." He is certainly correct in saying that the British public as a whole was silent as to the atrocities committed in the Balkans. There is now a movement to declare those atrocities were "somewhat exaggerated." We must take up this matter elsewhere, as the photographic evidence of deliberate outrage is either a barefaced fraud or is full of indisputable proof of the asserted outrages.

Mr. Hollist, when he learns that he, like myself, misinterpreted "A Member's" letter, will see that his criticisms are without point. However, his general attitude of scepticism about the existence of any outrages committed by Christians on Moslems coincides with that of so many Englishmen that it must be countered on every possible occasion. We have before us at the moment not only documentary and photographic evidence of the atrocities during the war, referred to above, but details of current events—(1) In Macedonia; (2) in the new territory acquired by Montenegro; (3) in New Servia. If such events can occur in a state of peace, after the passions supposedly exclusive to wartime have subsided, they offer a further presumption of proof that the outrages circumstantially attributed to the Christians during the war are true.

These current events are briefly as follows:—(1) In the territory recently incorporated in Greece there is a systematic exercise of violence, injustice, and outrage, which has resulted in a vast exodus of Moslems, far larger than any exodus of Greeks from Thrace. It has been asserted by Christians that the cruelty and expropriation going on in Macedonia are a retort to the squeezing out of Greeks from Thrace. In the first place, such deeds have been going on continuously for several months; secondly, the exodus from Thrace has been stimulated by agents, who have told the Greek peasants to come to Macedonia, where they can get land and property for nothing; thirdly, the Greek immigrants into Macedonia, who have done most of the expropriation of the Moslems, have been drawn in from all parts, even from Russia, which is proof of a concerted Greek action. It is admitted that the exodus from Thrace has been chiefly—almost entirely, in fact—unaccompanied by violence. The forcing of the Moslems out of Macedonia has been, on the contrary, the result of regular and systematic violence. I hope to be allowed to give instances in your columns later. (2) In the new territory of Montenegro the Montenegrins are squeezing out, by a sustained boycott and in many cases by violence, the Moslems from their lands. Four thousand have already left, 4,500 are now in course of departing, and 3,000 more are preparing to leave. (3) Twenty thousand people of various races and religions have removed from Monastir and the blessing of Servian rule. Life is made intolerable for large numbers of the population under the new Christian régimes. The exodus from Servian and Montenegrin territory is small as compared with that from Greek territory (estimated at from 160,000 to over 200,000), though the mere fact of such an exodus proves that that in Macedonia is not a mere retort to any Turkish action elsewhere.

It is, in fact, impossible for the average Greek Christian to grant the elementary rights of humanity to Moslems, once they find themselves in a position to crush them. This is "liberation"! There was a large Moslem population in Greece at the time of its liberation. Where is that Moslem population? Its absolute exclusion from Greece, when compared with the Turkish admission and retention of a huge Greek population, is a telling comment on the liberality of the Greek Christian.

In conclusion, may I announce here that it is not my intention to waste your space upon any further discussion of the internal organisation of English Turcophil societies?—Yours, etc.,

ARTHUR FIELD,
Secretary of the Anglo-Ottoman Society.

158, Fleet Street, E.C.,
June.

PERSONAL & SOCIAL

CALENDAR OF THE WEEK.

Showing Concordance of the Gregorian, Julian, Moslem, and Jewish dates.

Gregorian. New style.	Julian. Old style.	—	Moslem.	Jewish.
1914. June.	1914. May		1332. Rejab	5674 Sivan
12	30	Friday	18	18
13	31	Saturday	19	19
	June			
14	1	Sunday	20	20
15	2	Monday	21	21
16	3	Tuesday	22	22
17	4	Wednesday	23	23
18	5	Thursday	24	24

To-day, Rejab 18, is the birthday of H.I.H. Jemal-ed-Din Effendi, nephew of the Heir Apparent to the Ottoman throne.

To-morrow will be the birthday of H.R.H. Duke of Parma, uncle of the Crown Prince of Bulgaria.

To-morrow is the anniversary of the accession to the throne of H.R.H. the Grand Duke of Oldenburg, nephew of the late Queen Amelia of Greece, the wife of the deposed King Otho.

Sunday will be the birthday of her Majesty the Queen of the Hellenes.

Sunday will be the birthday of H.I.H. the Grand Duke Dmitri of Russia, brother of her Majesty the Queen Dowager of the Hellenes.

Monday is the anniversary of the accession of H.I.M. the German Emperor, brother of the Queen of the Hellenes.

Monday is the anniversary of the accession of his Majesty the King of Servia.

Monday is the anniversary of the wedding, in 1905, of H.R.H. Princess Margaret of Connaught to the Crown Prince of Sweden, then Duke of Scania.

Monday, Rejab 21, is the birthday of H.I.H. Mehmed Salah-ed-Din Effendi, eldest son of the late Sultan Murad Khan, and third in order of succession to the Ottoman Throne.

Monday is also the birthday of his Imperial Highness's eldest grandson, H.I.H. Ali Vassib Effendi, the only son of H.I.H. Ahmed Nihad Effendi.

Tuesday is the birthday of Princess Jemilé Sultana, sister of the Sultan and widow of the late Damad Mahmud Jellal-ed-Din Pasha.

His Imperial Majesty the Sultan has taken up his residence in Yildiz Kiosk, the favourite palace of his predecessor.

Her Majesty the Queen of the Hellenes arrived at Venice last week and left for Frankfort on Saturday evening.

It is expected that her Majesty the Queen of the Hellenes will come on a private visit to England towards the end of this month, accompanied by some of the younger members of her family, and will spend three weeks at Eastbourne before going to Germany in connection with the courtship of the Crown Prince of Greece and Princess Elizabeth of Roumania.

His Majesty the King of Roumania has made arrangements to stay in Constantza for some time after the Russian Imperial visit, and will only go to Bucharest for the day on June 18 in order to open the Constituent Assembly.

His Majesty the Tsar of the Bulgarians has arrived at the castle of Muranyalja, where he is expected to stay for some time.

The Khedive is expected to arrive in Paris about the middle of this month, and will stay on the Continent till July 24. Afterwards he will visit the Sultan at Constantinople, where he will spend the month of Ramadan.

H.I.H. Yuzzuf Izz-ed-Din Effendi, the Ottoman Heir Apparent, has gone to Chanilija Kiosk for the summer.

It is reported in Bucharest that the Crown Prince of Roumania will shortly pay a visit to Constantinople.

Their Imperial Highnesses Abdur Rahim Effendi, fifth son of the ex-Sultan, Abdul Halim Effendi, nephew of the Sultan, and Osman Fuad Effendi, grandson of the late Sultan Murad Khan, left Constantinople on Tuesday last for Germany to undergo a course of military instruction.

Prince Christopher of Greece has arrived in London from Paris.

H.I.H. Adilé Sultana, daughter of H.I.H. Salah-ed-Din Effendi, the Sultan's nephew, was married last week to Moralizade Salah-ed-Din Ali Bey.

We learn with the liveliest satisfaction that the latest reports about the Earl of Cromer's health, which has lately given rise to considerable anxiety, are of a much more favourable nature, and that there are now reasonable hopes for a complete recovery.

The Times Cairo correspondent telegraphed on June 8 that he was asked to deny rumours that Sir Reginald Wingate, the Sirdar, is retiring owing to ill-health.

The garden party given at the British Embassy in Constantinople on the occasion of his Majesty's birthday was a brilliant affair. H.I.M. the Sultan was represented by Mehmed Tewfik Bey, First Chamberlain, H.I.H. Yussuf Izz-ed-Din by his Chamberlain, Major Hassan Bey.

H.E. the Russian Ambassador and Mme. de Giers, H.E. the Italian Ambassador, H.E. the French Ambassador and Mme. Bompard, H.E. the German Ambassador and the Baroness von Wagenheim were present, and all the other members of the Diplomatic Corps with their wives.

H.H. the Grand Vizier, Said Halim Pasha, also attended with the following members of the Cabinet:—Talaat Bey (Interior), Enver Pasha (War), Djemal Pasha (Marine), Djavid Bey (Finance), Suleiman Bustani (Commerce and Agriculture), Shukri Bey (Public Instruction), Ibrahim Bey (Justice), Oskan Effendi (Posts and Telegraphs).

There were also present Admiral Limpus and the British officers, Liman von Sanders Pasha, and a large number of senators and prominent officials.

A similar celebration of his Majesty's birthday was held at the British Legation, Tangier, where the British colony was invited to an At Home by H.M.'s Chargé d'Affaires, Mr. Herbert E. White, and Mrs. White. Those present included, besides the members and staffs of the Legation and Consulate and the chief part of the colony, Mulai Abd el Aziz and Si Menebhi.

Mr. Barnham, H.B.M. Consul-General, held a reception in Smyrna on the occasion of his Majesty's birthday, at which H.E. the Vali of Aidin, Pertev Pasha, the commander of the Smyrna Army Corps, and the Consular Body were present.

Our Sofia correspondent informs us that on June 3, the birthday of his Majesty King George, the Bulgarian Prime Minister, Dr. Radoslavoff, accompanied by the Secretary-General of the Foreign Ministry, called at the British Legation in Sofia to express to the British Minister the congratulations of the Bulgarian Government. Mr. Dobrovitch conveyed the greeting on the part of his Majesty King Ferdinand.

H.E. the Marquis Pallavicini, Austro-Hungarian Ambassador to the Porte, has returned to Constantinople.

Mme. Gennadius, the wife of the Hellenic Minister in London, performed the ceremony of launching from the yard of Messrs. Cammell, Laird, Birkenhead, on Tuesday, the first of two steamers ordered by the National Steam Navigation Company of Greece for the passenger and emigrant service to the United States.

The Bulgarian Minister and Mme. M. J. Madjaroff and M. and Mme. Mincoff attended the Te Deum in commemoration of the name day of H.I.M. the Tsaritsa of Russia, at the Russian Church, Welbeck Street, at noon on Sunday.

Our Bucharest correspondent writes (June 7):—His Excellency the American Minister at Bucharest and Mrs. Vopicka gave a dinner, followed by a ball, on Saturday night, at which the Crown Prince and Princess of Roumania were present.

It is reported that the Roumanian Minister to the Austro-Hungarian Court, M. Edward Mavrocordat, will shortly resign his post in order to take up the duties of Secretary-General to the Minister for Foreign Affairs, and that M. Nanu, the present Secretary-General, will be appointed to the post thus left vacant.

WHERE TO STAY.

LAUSANNE-OUCHY (Switzerland).

SAVOY HOTEL.
Near the lake, with splendid park.

CECIL HOTEL.
In the town and 5 minutes from the station.

Two First-class Family Hotels.
High-class Cuisine. French Chef.
J. SUMSER, Manager-Proprietor.

Sofia (Bulgaria).
GRAND HOTEL BULGARIE
(opposite the Royal Palace).
First-class Hotel. Entirely renovated and beautifully situated in the centre of the city, near Post Office, Theatre, Museums, Banks, etc. Electric Light. Central heating. Baths. Garage. Telephone. Garden. French Restaurant. Good wines. Café. Foreign newspapers. Most frequented by English and American Visitors. Interpreter meets all trains. Rooms from 4 frs.

Cyprus.
THE CYPRUS HOTEL CO.
Open all the Year round—
LIMASSOL (Olympus Hotel).
FAMAGUSTA (Savoy Hotel).
For Summer Seasons—
PLATRES (Platres Hotel). 4,000 ft. from the sea level. Opens from May till Oct.
TROODOS (Olympus Hotel). 6,000 ft. from the level of the sea. Opens from May till Oct.
Perfect Situation. French and English Cuisine. Moderate Terms. Also Excursion to Mount Troodos.
For Tickets and further particulars apply to—
NAJEM HOURY, Limassol, Cyprus
(*Proprietor of the Army and Navy Stores*).
Head Office: Najem Houry Stores, Limassol, Cyprus.
Branches: Polymedia, Troodos, Nicosia, Famagusta, Larnaca, and Platres.
All arrangements for Transport by Carriages, etc. are made by the above Firm.

Mr. Hallett Johnson, the newly appointed secretary to the United States Embassy in Constantinople, leaves London to-day to take up his new duties.

Prince Antoine Bibescu, who has been appointed First Secretary of the Roumanian Legation in London, a position he has held before, is expected to arrive during this week from St. Petersburg.

Denmark has established a legation in Constantinople; and the first Minister appointed to the post, M. Waendel, was received in solemn audience on June 1 by H.I.M. the Sultan.

The Times Cairo correspondent reports, under date June 8, that Sheikh Idris El Senussi, a brother of the head of the sect, has arrived at Alexandria, where he is staying as the Khedive's guest at the Ras-el-Tin Palace. The ostensible object of his journey is a pilgrimage to Medina, but it is believed not to be unconnected with the peace negotiations between the Senussi and Italy.

The Archimandrite Dionysus, Superior of the Monastery of Sinaia, who has recently been to Jerusalem in connection with the building of a Roumanian cathedral in that city, has returned to Bucharest.

Rear-Admiral Limpus, who has been promoted to the rank of Vice-Admiral in the Turkish Navy, celebrated his fifty-first birthday on Sunday. He has been in Constantinople since April, 1912, and has recently, it is understood, accepted a renewal of his contract beyond the two years for which it was originally available.

His Majesty the King has been pleased to grant Major Percy Matthew Dove, the Sherwood Foresters (Nottinghamshire and Derbyshire Regiment), authority to wear the Insignia of the Fourth Class of the Order of the Osmanieh, which decoration has been conferred upon him by the Khedive of Egypt, authorised by the Sultan.

The Khedive has approved of the nomination of Mr. Xydaki to be Hellenic Diplomatic Agent and Consul-General in Cairo.

H.E. Bekir Sami Bey, Vali of Beyrout, has been promoted Commander of the Legion of Honour by the President of the French Republic.

Abdul Vehab Bey, formerly Mutessarif of Dedeagatch, has been appointed Mutessarif of Mersina

Mr. Heer, the newly appointed Director-General of Forests in the Ottoman Ministry of Commerce and Agriculture, has taken up his duties.

Colonel Thomson has been appointed Military Governor of Durazzo.

General Sir John and Lady Maxwell entertained at dinner at 7, Grosvenor Place, on Tuesday evening Prince Albert of Schleswig-Holstein, the Duke and Duchess of Somerset, the Duchess of Buckingham and Chandos, the Marquess of Dufferin and Ava, Lord and Lady Powerscourt, Lord and Lady Decies, the Earl of Cathcart, the Earl of Westmeath, Lord and Lady Weardale, General Sir Francis and Lady Lloyd, Mrs. Hope Vere, Mrs. and Miss Lowther, Mr. Arthur Portman, and Captain Joliff.

Lord and Lady Inchcape were present at the dance given by the Hon. Mrs. Hastings, at 5, Grosvenor Gardens, on last Friday night, for her daughter, Miss Margaret Hastings.

The following is the class-list of probationers for the Civil Service of Egypt and the Sudan for 1914.—Class 1.—E. G. Coryton, King's, Cambridge; J. A. Reid, Brasenose, Oxford; C. H. Thomson, Clare, Cambridge; T. M. Gent, Trinity, Oxford. Class 2.—R. O'Donoghue, T.C.D. and Cambridge. Class 3.—J. G. Monteath, Wadham, Oxford; P. C. B. Blair, King's, Cambridge; E. R. Burgess, Magdalen, Oxford.

Sir Launcelotte Gubbins, late Director-General, Army Medical Service, who has recently retired, served in the Egyptian War, 1882. At first attached to the base hospital, Cyprus, he was afterwards transferred to the Field Force and placed in medical charge 79th (Cameron) Highlanders at Cairo.

Colonel R. W. Ford, D.S.O., who has been promoted surgeon-general, vice Sir W. L. Gubbins, joined the Army Medical Serivice in 1881, and saw active service the following year in the Egyptian Expedition.

Major Cosmo Little, Lady Guendolen Little, and the Misses Chaplin have arrived at 37, Lowndes Square for the remainder of the season.

Our Cyprus correspondent writes (May 29):—Mrs. W. Bevan and children, and Mrs. Kerby left for England last mail.

Mr. A. L. C. Stuart, President of the District Court, Limassol, and Mrs. Stuart, and Mr. W. Smithers, of the Railway Department, have gone on leave.

Miss Ida Spencer, of Nicosia, was among the passengers for England this week.

Mr. and Mrs. Martindale and Mr. and Mrs. Harrison were passengers by the Messageries s.s. "Karnak," which arrived at Marseilles on June 4.

Lieutenant J. O. Thurburn, Royal Horse Artillery, Lieutenant the Hon. T. P. P. Butler, Royal Horse Artillery, have been appointed for duty with the Egyptian Army.

Mr. Milne Cheetham, of the British Agency, Cairo, who is now on leave, and Mrs. Milne Cheetham are staying at 9, Upper Berkeley Street, for the season.

A marriage has been arranged, and will take place shortly in Egypt, between Mr. Adam Storer Wylie, of the Ministry of Public Works, Cairo, eldest son of the late A. H. Mylie, M.D., of Oldham and South Brent, Devon, and Winifred Mary, eldest daughter of Mr. A. J. Harris and Mrs. Harris, of Llanishen, Glamorgan.

The marriage of Mr. Herbert St. George Peacock, Judge of the Sudan Courts, son of the late Right Hon. Sir Barnes Peacock and Lady Peacock, of 3, Buckingham Gate, with Marguerite, daughter of Mr. and Mrs. Cecil Palmer, Guernsey, took place at St. Matthew's Church, Westminster, on Monday. The fully choral service was conducted by the Rev. W. T. Stratford, Vicar of Rillington, Yorks, assisted by the Rev. G. W. Hockley, and the bride, who was given away by her father, was followed by a small page, Master Peter Dudgeon, and four bridesmaids, Miss Joan Dudgeon, Miss Gordon-Canning, Miss Colquhoun Reade, and Miss Ogilvie Grant. The bride wore a robe of cream moire trimmed with diamanté, with a pink and white chiffon train draped with Limerick lace. Mr. Walter Peacock acted as best man to his brother, and the reception was afterwards held by Mrs. Palmer at the Hans Crescent Hotel. Later in the day Mr. and Mrs. Herbert Peacock left for North Berwick.

Archdeacon and Mrs. Algernon Ward left Port Said for London by the P. and O. s.s. "Mooltan" on June 1.

Captain G. A. D. Harvey has left the Royal Army Medical College, London, for service with the Egyptian Army.

We regret to announce the death of his All-Sacredness Mgr. Kyril, Metropolitan of Vidin in Bulgaria, who died on June 3.

DOMESTIC ANNOUNCEMENTS

BIRTH.

SAYER.—On June 1, at Pinecroft, Mortimer, Berkshire, the wife of Sydney Sayer, of Cairo, Egypt, of a son.

DEATH.

SMITH.—On June 7, at 94, West Hill, Sydenham, Emily, wife of Jabez Smith, late of Suez, Egypt, aged seventy-one.

WHERE TO STAY.

Cairo's Hotels de Luxe.

SHEPHEARD'S HOTEL.
Open all the year round.

SEMIRAMIS HOTEL.
Splendid position on the East Bank of the Nile.

GHEZIREH PALACE.
Formerly the Palace of the late Khedive Ismail.

GHEZIREH CASINO.
In pure Moorish style, with a permanent Restaurant Francaise, is situated in the immediate neighbourhood of Ghezireh Palace.

UPPER EGYPT.

Luxor.
The Winter Palace. The Luxor Hotel.
The Karnak Hotel.

Assouan.
The Cataract Hotel. The Savoy Hotel.
The Grand Hotel.
Are the Finest on the Nile.

Cairo.

HOTEL D'ANGLETERRE.
Comfortable and Quiet. Near Opera Square.

GRAND CONTINENTAL.
Central Situation. Opp. Esbekieh Gardens.

SAVOY HOTEL.
Most Fashionable Hotel in Egypt.

MENA HOUSE HOTEL.
At foot of the Great Pyramids.

GRAND HOTEL, HELOUAN.
Excellent Family Hotel, adjoining Golf Links.

HOTEL DES BAINS, HELOUAN.
Opposite Sulphur Baths Establishment.

HOTEL CASINO, SAN STEFANO.
Near Alexandria. Favourite Bathing Resort.

CAIRO.

HELIOPOLIS PALACE HOTEL.
The most luxurious and comfortable Hotel in the world.
Connected with the centre of Cairo by the Electric Metropolitan (10 minutes' journey).
Altitude, 40 metres above the Nile valley.
Splendid view over Cairo.
GOLF, POLO, CRICKET. HIPPODROME in vicinity of Hotel.
Under the same management—
HELIOPOLIS HOUSE,
A first-class Family Hotel, with moderate terms.

Alexandria.

WINDSOR HOTEL (*Facing the Sea on the New Quay*).
Most delightful and healthy situation of any Hotel in Alexandria. Electric Light throughout. Daily Concerts on Verandah. Meals served *al fresco*. French Cuisine and English Management.
Inclusive Terms from P.T. 50 (10s.) per day.
Special Terms to Government Officials, Commercial Travellers, and for long stays.
Proprietor and Manager—AUG. van MILLINGEN.

Alexandria.

CARLTON HOTEL, Bulkeley.
Just outside Alexandria. Half-way to San Stefano.
Ramleh's Fashionable Hotel.
Patronised by the Elite.
Open all the year round. Visitors from Cairo alight at Sidi Gaber Station and thence drive to Bulkeley in five minutes. Full Pension P.T. 80 per day.
G. AQUILINA, *Proprietor.*
(Late of Messrs. Thos. Cook & Son.)

ZWEISIMMEN (SWITZERLAND).

HOTEL KRONE & KURHAUS
A GOOD FAMILY HOTEL.
Newly Renovated and Enlarged.
SUMMER AND WINTER SEASON.
Pension from Frcs. 6.
Summer and Winter Sports. Tennis Courts.
Orchestra. Large Garden.

ROUMANIA TO THE RESCUE.

The situation in Albania is precarious, but not yet hopeless. Although Prince William is believed to have contemplated abdication at one moment, the fatal step has not been taken, and there is reason to suppose that he has now been dissuaded from such a purpose. The report that the insurgents have been defeated lacks confirmation, but their position is clearly less favourable than it was. But even if the present storm were weathered and the revolutionary elements threatening Durazzo were scattered into the obscurity of private life, Prince William's task would still be full of difficulties, and for some time to come he would lack an efficient and reliable force to support his authority. It is not necessary to question the loyalty of the bulk of the Albanians in order to feel that a people of many heterogeneous elements which have not yet had time to acquire national cohesion can only provide an indifferent army. The Gendarmerie has proved a broken reed, and as far as the Dutch officers are concerned the Prince may with justice ask for someone to protect him from his protectors. There remains the employment of foreign troops, which has long been urged in the interests of the Albanian Government. But the Concert of Europe sees rocks ahead in the dispatch of an international force for general purposes in Albania, whether it comprise detachments from all the Powers or be restricted to Austria-Hungary and Italy. Feeling between these two countries on the subject of Albania is probably more bitter than it has been at any time, and it might require but little provocation in the present state of tension to bring about a collision between Italians and Austrians. The need of Albania, however, is insistent, and we believe that the best solution of the difficulty is to be found in the employment of Roumanian troops until the Albanian Army is ready to supplement the efforts of the Gendarmerie to establish law and order in the new State. By the use of Roumanian troops the objections to an international force would be overcome. The cost of the undertaking would have to be guaranteed by Italy and Austria-Hungary as the two most interested Powers. It was in their interests and in order to keep the peace between them that the European Concert agreed to their suggestion that an Albanian State should be created. The experiment so far has not been a conspicuous success, and if it can only be continued with the help of foreign bayonets it is right that the two Powers responsible for the Albanian tangle should bear the cost of straightening it out.

There is much to be said for entrusting the task of protecting Prince William and his Government to the Roumanians. The rôle of "policeman to the Balkans" is an honourable one, and Roumania has shown her peculiar fitness for it. Her resources, whether in men or in money, place her beyond the individual rivalry of the former Balkan Allies, and she has not been crippled by two exacting wars. Her intervention in the struggle between Greece and Servia and Bulgaria was opportune and decisive. She has since shown herself able to maintain the part of arbiter in the destinies of the Balkan States by bringing about peace between Turkey and Greece and by discountenancing any bellicose tendencies on the part of the unsuccessful combatants in the two wars. Roumania's position, therefore, as mentor in the Near East is tacitly accepted by all the States concerned, and the employment of some of her troops in Albania at the mandate of Europe could give umbrage to none of them. Such a step, indeed, could only be gratifying to all the Near Eastern Governments, inasmuch as it would be in keeping with the principle of "the Balkans for the Balkans," to which they all pay homage in spite of internal jealousies and animosities. For Greece and Servia the next best alternative to dividing Albanian territory between them is a peaceful and progressive Albania with which commercial relations can be usefully established. To the possible objection that Roumanian and Albanian territory do not march together, and that the employment of Roumanian troops overseas would be an unprecedented course for the country to adopt, it may be urged that the close relationship between the two Royal Houses makes the scheme particularly appropriate. A Roumanian Government, it is true, might consider that in assenting to the proposal it would be offering a handle to its political opponents. But the present Cabinet enjoys a substantial majority, and any argument advanced against the despatch of Roumanian troops to Albania might be countered by the prestige involved in acting as the mandatory of Europe and by the experience to be gained by the Army without expense to the Roumanian Government.

From the point of view of Europe the employment of Roumanian troops in Albania would relieve the Albanian question of many of its dangers. Adequate protection would be provided for Prince William and the Government, while the Roumanians would be free from any suspicion of intrigue or territorial designs. If the object of the Powers be to establish the new State as soon as possible as "a going concern," Roumanian troops as an instrument to this end offer many advantages over a joint army of occupation supplied by Italy and Austria-Hungary. They can also be relied upon to carry out their task more rapidly and efficiently than any army which the Albanians may succeed in holding together. The weakness of Albania has been brought out into clearer relief by the necessity of having to cope with a crisis at such an early stage in its existence. If Prince William resolves to remain on his throne and can rely upon Roumanian troops for any emergency, the task of organizing an Albanian army can be undertaken more deliberately and thoroughly. The spirit of nervousness and indecision would be eliminated from Albanian administration, and a brighter future might dawn for the country. The presence of foreign troops would not relieve Prince William of the cares of government, although they might hearten him for it. With the experience of the last few weeks behind him, the Mpret will at least have learned the mistakes to avoid—and they have almost been numerous enough to leave but one course open to him. He must govern his people directly, and not exclusively through the medium of Cabinet Ministers, gendarmerie officers, and foreign advisers. In view of the hostility shown by the Albanians to Turkish rule when it was exercised over them, the insurgent claim for the restoration of Turkish sovereignty need not be taken too seriously. Moslem opinion in the country has been offended, and the chaos at Durazzo encouraged the insurgents to pitch their demands high. They have shown little capacity for reasoned negotiations, and their ultimate discomfiture ought not to be long delayed. It would be a mistake, however, for the Powers to be satisfied with any makeshift settlement of the Albanian problem. If the Albanian State is to be set upon a firm foundation, ordered government must be rendered possible by the presence of a force sufficient to overawe revolutionary elements until the unsophisticated tribesmen have had an opportunity of appreciating the advantages of a system to which they have hitherto been strangers. The request for Roumanian troops would have to be made to the Roumanian Government by the Concert of Europe, either at the initiative of Prince William himself or of one of the Powers. If the greatest possible benefit is to be derived from the step it must be taken with the least delay.

HEBREW IN PALESTINE.

Spread of the Language.

No observant person can travel in Palestine at the present day without realizing that something in the nature of a Jewish revival is in progress. The evidence is by no means confined to that of witnesses who may be suspected of finding what they are set out to find. So impartial and experienced a traveller as Mr. Phillips Price, whose observations were quoted in a recent issue of THE NEAR EAST, bears eloquent testimony to the significant movement of which he observed unmistakable symptoms. And among those symptoms none is more striking than the renewed vitality of the Hebrew language. Until quite recently—the prejudice, indeed, still lingers on in many quarters—Hebrew was regarded as a stereotyped vehicle of prayer, incapable of a natural development and not to be profaned by adaptation to the purposes of ordinary intercourse. That view is rapidly becoming obsolete. The last thirty years have seen the re-birth of Hebrew as a living tongue. It is to-day a normal medium of expression for tens of thousands of Palestinian Jews. The tram-ticket, the picture post-card, the shop-keeper's sign, all bear witness to its self-assertion—so much so, indeed, that, according to recent advices, which have, however, not yet been authoritatively confirmed, the Turkish authorities have decided to make it an offence to fix notices in Hebrew to street walls in the towns of Palestine. The growing generation in most of the Jewish agricultural colonies speaks Hebrew as naturally as an Englishman speaks English. There is a Hebrew Press. There is a Hebrew Academy. There are elementary, and (in such centres as Jaffa and Jerusalem) secondary schools in which Hebrew is the normal language of instruction. The Herzl Gymnasium at Jaffa, the largest of the higher grade schools, has 515 pupils and a revenue of 90,000 francs; and those who question the adaptability of Hebrew to the purposes of higher education are faced with the fact that the gymnasium is already able to give its pupils leaving-certificates which qualify them for matriculation at European Universities.

This phenomenon has been to some extent based on practical considerations. The increasing influx of Jews from very various parts of the world has urgently called for a medium of common intercourse. Such a medium Hebrew can most readily supply. It starts with the advantage of being in some form and in some degree familiar to nearly all; whereas the Yiddish of the 12,945 Russian Jews who landed in Palestine between 1905 and 1910 is utterly unintelligible to the 2,000 Jews from the Arabian Yemen who arrived during 1912, just as it has nothing in common with the Ladino or Judæo-Spanish of the older Sephardic settlements.

But there has been also, as need hardly be pointed out, an idealistic motive at work. It was felt by those who desired Palestine to become the seat of a genuinely Jewish way of life that this was achievable only on condition that the Jews asserted their common and distinct identity in a Hebrew culture on a Hebrew basis. Mere force of circumstances might in the long run have been sufficient to make Hebrew a casual lingua franca; but as has been the case with other contemporary movements of a similar kind—the development of the Albanian language is a case in point—little of value would have been accomplished but for the deliberate resolve of a few enthusiasts to sacrifice all other interests to the task of nursing the infant tongue into healthy life.

This ideal of a Hebrew culture, with its background of practical expediency, has won an increasing measure of support from the mass of the Jewish population; and it is to-day so firmly established that any attempt to check it must necessarily meet with passionate opposition.

This is the explanation of the acute form which the language question has suddenly assumed.

The origin of the controversy is worth recounting. Many of the Jewish educational establishments in Palestine are dependent for their existence on the Jews of the West. The French Alliance Israélite, the Anglo-Jewish Association, and the German Hilfsverein all maintain or subsidise schools of one kind or another. Between them they educate, according to the latest available statistics, 5,876 pupils at an annual cost of £22,148. Each of these bodies has shown a natural tendency to favour the language of the country to which its members belong. On the other hand, a certain number of independent schools standing outside the "European" system—especially the Herzl Gymnasium at Jaffa and the Hebrew Gymnasium at Jerusalem (both of them recent foundations)—have successfully excluded non-Hebrew influences from the beginning; and there has been of late a general tendency even in the "European" institutions already mentioned to recognize the claims of Hebrew more and more generously.

Up to the present the Jews of Palestine have, apart from one or two training colleges for teachers, possessed nothing of a higher grade than a secondary school. In 1908, however, a project was launched for the foundation at the rising port of Haifa of a Jewish Polytechnic. This was to be the crown of the educational system.

Large sums of money were collected from various sources—some from Russia, some from the United States, some from Germany. Of the estimated total of £95,000 not more than about £28,000 is said to have come from German contributors. The seat of the board of management, however, was Berlin, and its most influential members (though other interests were also represented) were the leaders of the Hilfsverein der Deutschen Juden. This body had hitherto been far from unsympathetic towards the recognition of Hebrew. It was, therefore, with profound surprise and acute disappointment that the Hebraists learnt in November last the decision of the board of management to prescribe as the main language of instruction, not Hebrew, but German. That decision at once became the object of bitter attack. The teachers and pupils at the Hilfsverein schools demonstrated their indignation by an organized strike. Rival schools on a purely Hebrew basis suddenly sprang up; and it was enthusiastically resolved to attack the Hilfsverein all along the line. Its policy was criticised on other than purely academic grounds. It was given a political significance, and regarded as an attempt to turn a Jewish institution to the purposes of German propaganda. The Hilfsverein replied by denouncing its critics as the tools of Russian policy, by whose anti-Teutonic bias they were animated. The controversy was keenly taken up by the German Press, and so firm was the attitude of the Hilfsverein leaders that they were suspected in some quarters of being bound by assurances given at an earlier stage to an exalted personage, whom they were not at liberty to disappoint.

At this stage the Zionist organization stepped in. It gave immediate assistance to the Hebrew schools which had been hastily established by the dissenting Hilfsverein teachers, and in the permanent maintenance of which side by side with its own schools the Hilfsverein has now acquiesced. It assumed the responsibility of supporting a new educational system on a genuinely Hebraic basis. It rallied and made articulate the large body of Jewish opinion which felt that the policy of the Technicum authorities was out of keeping with the spirit of the times. It soon became apparent that the Zionist organisation would not be left to fight single-handed. The Technicum had received very substantial subventions from other than German sources. The Russian and American trustees were not slow in expressing themselves, and so effectively did they intervene that at the end of February a compromise was reached, under which the claims of Hebrew as against German received ample recognition. Mathematics and natural science are to be taught in Hebrew from the first so far as text-books are available; all teachers are to qualify themselves to give instruction in Hebrew; and at the end of the first four years' course the curriculum is to be revised with a view to further Hebraisation.

The attempt to stem the Hebrew movement has thus produced precisely the reverse result. It has given it a stimulating impetus. It has enabled the Hebraists to realize the strength of their own position, and, again, it has made it clear that even though the conditions of Jewish life in Palestine do not at present admit of exclusive reliance upon Hebrew for every purpose, the Jews of Palestine know their own minds as to the direction in which they intend to move, and can no longer be successfully interfered with from without.

Thus the controversy, instructive as it is in itself, is but the first chapter of what will prove to be a story of absorbing interest. Nor is the next chapter likely to be long delayed. At the Zionist Congress held in Vienna last sum-

mer a project was put forward for the foundation of a Hebrew University at Jerusalem. The suggestion was enthusiastically applauded. Some £15,000 (no more than a small beginning, it is true) was promised there and then; and committees were appointed in due course to formulate a working scheme. It seems clear that the present intention is to make the proposed University not only Jewish, but Hebrew. It is already being laid down that Hebrew is indispensable as the language of instruction. Here, too, as in the case of the Polytechnic, differences of opinion may arise; but the trend of local opinion in Palestine is unmistakable, and it is not unreasonable to expect that, with the establishment of a Hebrew University, a new and significant element will begin to enter into the common culture of the civilised world.

THE PRESS ON THE NEAR EAST.

The Okchilar Incident.

The gross insult offered to Mr. and Mrs. Musker by the Hellenic authorities at Okchilar (as reported by our Sofia correspondent in our last week's issue and in *The Times* of June 4) has naturally aroused a strong feeling of indignation in this country. Upon the whole, however, the comments in the Press have been marked by considerable restraint, which will, it is to be hoped, make it all the easier for the Greek Government to do its obvious duty in the matter. *The Pall Mall Gazette* says:—

The indignities . . . inflicted on an Englishman and his wife by Greek officials on the Bulgarian boundary call for the promptest intervention of British authority. Recent convulsions in the East have upset a good many formerly fixed ideas. It is essential that those of them which relate to the sanctity of British travellers should be re-established without delay.

The Globe "can very well understand that with the situation in the Balkans so delicate and perilous as it is our Foreign Office is very reluctant to stir up further trouble." Nevertheless, it considers that

If there be any truth at all in the story of outrageous insult inflicted upon Mr. and Mrs. Musker by Greek officials all other considerations must stand aside until redress has been obtained. . . . There must be adequate reparation, and condign punishment of the offenders. M. Venizelos will not, we trust, require to be reminded of the case of Don Pacifico.

The Newcastle Chronicle, after remarking that the case of Mr. and Mrs. Musker is not an isolated one, continues:—

Travellers in districts where the Greek official is master have complained of late of Hellenic arbitrariness and insolence. What is the matter? Is it that the Greeks, having been successful during the last war instead of submitting to ignominious defeats, as was the case in their previous conflict with the Turks, have lost their heads and fancy themselves lords of the world? Observers of Greek character—the modern Greek, of course—have said that it takes very little to depress him, but that, when elated, he is intolerable in his bombast and arrogance. However this may be, the experience of Mr. and Mrs. Musker appears to have been intensely disagreeable. . . . The authorities at Athens must certainly be requested to make an investigation, and to offer reparation should Mr. and Mrs. Musker's statements be proved.

And yet another note of warning comes from the West of England, *The Western Daily Press* observing:—

Some trivial excuse for the treatment meted out to the travellers has been put forward by the officials on the spot, but it is not considered to be at all satisfactory. . . . A blunder seems to have been committed through thoughtlessness, perhaps; and no doubt when the British Government brings the matter to the notice of the Government at Athens the *amende honorable* will be made. But it is urged that the case is one of some importance, having regard to the commercial relations subsisting between this country and the Hellenic kingdom. If British commercial travellers are to be wantonly persecuted, it will be difficult to maintain these important relationships.

Happily, the announcement made by the Athens correspondent of *The Times*, that a military officer of high rank has been sent to Okchilar by General Dimopoulos, to investigate the matter, seems to show that the Greek authorities intend to act correctly and promptly.

The Russian Move in Persia.

The Daily Graphic (June 5) has an interesting note on "The Russians in Persia," from which the following is an extract:—

We could understand some increase of military vigilance, and even an augmentation of the Russian army of occupation, if there were any evidence of an extension of anarchy; but we have M. Sazonoff's own testimony that "order and relative tranquillity have been restored," and, moreover, the new Russian intervention is not military at all. It has taken the form of a wide-reaching assumption of administrative functions. . . . What possible justification there can be for this outrageous invasion of Persian rights—not to speak of the guarantees of the Anglo-Russian Convention—is impossible to understand. It is true that by the Anglo-Russian Convention provision was made for intervention in the Customs Administration in certain circumstances and under certain safeguards, but in the present case it is not the Customs which are affected, and the circumstances contemplated by the Treaty have not arisen nor have the safeguards been observed. Some explanation is obviously needed, and when it comes we trust it will be studied by Sir Edward Grey with the seriousness it obviously demands.

The Powers and the Balkans.

In a leading article in *The Morning Post* (June 5), under the heading "A New Bone of Contention," it is urged that the best plan for the two interested Powers, Italy and Austria-Hungary, to adopt with regard to Albania is to let the Albanians fight it out among themselves; for any kind of intervention—by one Power singly or by two or more Powers jointly—would pose more problems than it would solve. In conclusion, the question is asked:—

Have the Powers done any good at all to the Balkan States by their interference? Servia and Greece, let alone, would have introduced some sort of order into Albania, if any was needed. If they had been left to their own policy they might have been able to agree with Bulgaria on the subject of Macedonia, and the second war might not have taken place. No doubt the statesmen did not foresee what was going to happen. But the gift of foresight is exceedingly rare, a fact from which the proper inference is that it is a mistake to enter into too elaborate plans for controlling the course of events. Accordingly we venture to hope that Sir Edward Grey will be slow to commit this country to new undertakings in regard to Albania and to any sort of partnership with Austria-Hungary and Italy in the attempt to make an Albanian Government out of nothing.

A Persian Policy.

A short note in *The Nation* (June 6) outlines a British policy in Persia. We quote below:—

Friendly observers, of course, are not agreed as to policy. But some of them hold that Northern Persia is gone to Russia, and that it is as well to reckon with that pretty well accomplished fact. What, then, is to happen to the centre and the south? There are two courses. We can go shares with Russia, advance our Indian border, infuriate native India, and spend millions of money on a new scientific frontier, and a great army to guard it. Or we can aim at a new Persia, with a capital shifted from Teheran (now almost a Russian city) to Ispahan, or better still to Shiraz, and at making this country secure in all the realities of national liberty, and yet signifying it as under our protection. In other words, we can constitute something like a second Afghanistan. Is not that the best issue? Would Russia oppose it? There is reason to suppose that she would not.

"Unruly Highlanders."

The Dundee Advertiser (May 28) has the following amusing comment on "Scotland and the Albanians":—

Prince William has discovered something more than the difficulties of ruling Albania during the short time he has been in his new kingdom. According to a letter he has caused to be written to an English antiquary, he has found out that the Albanians belong to the same family as the Scots, that they have the same clan organisation as existed here 500 years ago, and that they have also the "same unruly spirit as the ancient Gaelic clansmen, and the same virtues." This is all very interesting, but we remember that the same discoveries were made regarding the Cretans at the time they were particularly bothersome, and they were made the ground of a strong plea that Scottish kilted regiments should be sent to the island to inculcate into their Celtic relations a sense of better behaviour. We trust that Prince William has not the same idea in his mind, for the proposal is not to be entertained for a moment. If he is determined to continue trying what he can do to tame his "unruly" subjects, he must be content with his Italian and Austrian bluejackets to aid him in the task. Scotland is not to be drawn into such a hornets' nest, not even on the plea of intimate kinship.

Articles to Note.

Devonshire Square,
London, E.C.

So far as I can see, Dr. Paul Dvorkovitz, in his address to the Winchester House meeting of oil interests on Tuesday, seemed to be acting as a special pleader for people who are interested in maintaining the prices of petrol and other petroleum products. He represented the proposed agreement with the Anglo-Persian Oil Company as being at once unduly costly to the taxpayer and also injurious to the development of other oilfields under the British flag. But surely the learned doctor has over-reached himself. If the Admiralty has driven a bad bargain, then undoubtedly the competition will not injure other interests. But I cannot see that the Admiralty has driven a bad bargain. A fortnight ago THE NEAR EAST was able to announce that the mere report of the proposed agreement had had the effect of bringing down the price of oil offered to the Admiralty from 75s. to 40s. per ton. Nor is Dr. Dvorkovitz correct in stating that the outlay contemplated is merely to secure a supply of 170,000 tons of refined oil. A second and larger pipe-line is to be laid, and as the supply at the wells, of which by far the greater part at present cannot be transported to the refinery, is almost inexhaustible, the amount refined will be very largely increased. The address rather strikes me as being the complaint of one who regrets the good old days of "monopoly prices" and grieves to learn that competition has already secured contracts for supplying fuel oil at a lower figure than that indicated above—and, as was pointed out at the company's meeting, this price is a remunerative one. It seems hard to the taxpayer that indignant gentlemen should abuse the Admiralty for trying to save a very considerable sum on every ton of oil—a commodity which the Admiralty will have to buy to the extent of many hundreds of thousands of tons per annum.

***

I notice also that the "representative" meeting at which Dr. Dvorkovitz presided only mustered eleven votes—seven in favour and four against the resolution—and I hardly think this can be called representative of the oil industry, particularly in view of the fact that by far the larger portion of those present at the meeting declined to vote at all, and that no large interests were represented. Dr. Dvorkovitz is reported to have said that to secure 170,000 tons of fuel oil the Government were subsidising the company to the extent of £80,000 a year, but this is absolutely incorrect. The capital subscribed by the Government is for the purpose of building additional pipe-lines, refineries, etc., which will enable the company to deal with over a million tons of petroleum products. In *The Petroleum Review* of June 6, 1914, under the heading of "The British Government and the Petroleum Industry: A Study of Stubborn Facts," various statements are made which require examination. The assertion that the British taxpayer is paying for two-thirds of about 70 per cent. of the remaining profits of the company is incorrect. The writer presumably adds together 16 per cent. payable to the Persian Government, 12 per cent. of First Exploitation Company's profit, and 3 per cent. of Bakhtiari Oil Company's profits payable to the Persian shareholders, and 2 per cent. of Anglo-Persian profits payable to participating shareholders—a total of 33 per cent. These percentages have no connection one with the other. As a matter of fact, the total percentages payable to the Persian Government and the Persian shareholders amount to about 18 per cent. of the combined profits of the Anglo-Persian Oil Co. and its producing companies.

***

The reason that the Government is casting in its lot with one particular group is that it is the only British group possessing proved fields sufficient for the Admiralty's requirements. Any competition would be with foreign, and not with British, companies, and the creation of such competition, should it occur, would, of course, be beneficial to consumers generally, including the Admiralty. The "amazement and dismay" mentioned in the article to which I am calling attention is obviously confined to those who find their present monopoly threatened It is also quite inaccurate to state that a "free run" was given to the Burmah Oil Company in the selection of oilfields in Burmah, for, as a matter of fact, a large number of concessions are held by other British companies. The effect of protecting a home industry and the home public has been that the price of kerosene in India is cheaper than in any other part of the world. The Indian consumer has, in this respect, probably been saved from £800,000 to £1,000,000 per year for a number of years past. I may also point out that "no measure of protection" was given to any special oil company in India, but only to British producers as a whole. This is the policy which the present Government has adopted in the interests of British taxpayers in order to safeguard them from monopolists, and no one can reasonably question their wisdom in doing so.

***

I notice that "Corsair," in his notes last week, referred to the influence of Greek remittances from the United States upon the course of the Hellenic exchange. According to the report of the U.S. Consul at Tripolis, over £775,000 was remitted to the bankers of Tripolis by Syrians resident abroad during 1913, and he quotes a statement on reasonable authority that the five Syrian ports profited by money sent from abroad to the extent of no less than £1,775,000 during the year ending with June, 1913. If the Greeks of the United States built up the exchange-value of the drachma in Athens, the Syrians, in the Consul's opinion, saved their native town from an epidemic of bankruptcies during the financial depression occasioned by the war.

***

According to the figures of the new census which has just been taken, the population of Hellenic Macedonia amounted to 1,140,776, divided among five nomes: Salonika, 494,520; Kozani, 206,281; Florina, 133,003; Seres, 132,881; Drama, 174,091. Epirus has a population of 244,348, and the newly acquired islands 664,795, of which Crete contains 336,150, Mitylene 140,846, Chios 69,034, and Samos 53,229. A comparison with the last census in the case of the two islands which formerly enjoyed autonomy shows that the population of Crete has decreased by 7,851, which may partly be attributed to war losses, to the transfer of many Cretan gendarmes from the island to Salonika, and to the presence of some 2,500 Cretans in Epirus. Samos has lost 195 inhabitants since 1902.

***

According to *The Times*, it is probable that the Russians will establish a Consular post-office in Teheran, thus following their own precedent in Tabriz, which, as has frequently been pointed out in THE NEAR EAST, becomes daily more Russian and less Persian. In view of the number of Russian post-offices in Turkey and China, it is surprising that such a step has not been taken long ago, as a Consular post-office in a foreign State is at once an imposing manifestation of national prestige and also a lucrative form of battening on a neighbour's weakness. I agree with the correspondent who deplores this fresh attack on Persia, but it is now "up" to the Persian postal authorities to improve their own service, as the Turks have done under the sharp adversity of foreign competition.

***

I gather that those who estimated the resultant revenue from the new Sudan Tobacco duties as high as £E75,000 were unfortunately too optimistic. Official calculations show that in all not more than £E13,000 will be obtained from this source, which means that the Sudan Government expects that the new duties will increase its revenue only by £E10,000.

***

Busreh has long been famous for its dates, and anyone who travels up the Shatt-el-Arab and sees the countless date palms that line the banks of the river will find it easy to believe the natives' boast that the district could supply "the whole world" with all the dates it requires. But apparently it cannot, or does not, in fact, supply even the Indian market's full requirements. At any rate, some three years ago the Director-General of Agriculture for the Punjab procured some date suckers from the Busreh district, and, importing with them an Arab gardener, set to work to experiment with their cultivation in Bahawalpur State. Last year, fruit from these suckers was forwarded to Busreh, and after examining it, experts are of opinion that the result of the experiment is a success, and that if Busreh methods of cultivation are followed more closely in future the development of the industry in the Punjab should be quite satisfactory. Thus, there seems to be a chance of Irak Arabi making some return for the benefits it has received from India in the past.

Constantinople Business Letter

(From Our Own Trade Correspondent.)

Constantinople, June 6.

Treasury Returns.

The Treasury receipts during the month of February (Old Style), 1914, have just been published in the usual monthly returns, and amounted to £T2,351,317, as compared with £T2,513,411 during the corresponding month of the previous year. If, for sake of careful comparison, deduction be made of certain receipts not figuring in the present returns, some of which from outlying districts have not yet been reported, although appearing in last year's total returns for that month, this decrease is reduced to £T87,295 for the remainder of the Empire during February, 1914. There is a considerable decrease in the receipts during the month under consideration from monopolies, particularly salt, and the share of the Public Debt in the profits of the Regie Company, amounting to £T130,000, as also in the war tax amounting to over £T300,000. Increases occur in all the other revenues, particularly in the Customs duties as well as under the general heading, "Various Revenues."

The actual total receipts reported for the fiscal year ended February, 1914, amount to £T29,169,048, and are in excess of the previous year by £T709,968, and if deduction be made of the items already referred to (which, while appearing in the returns of the previous year, do not find a place in the present returns), this surplus is further increased to £T821,959 for the remainder of the Empire during the fiscal year. The war tax and the subscription to the war fund during the fiscal year amounted to £T1,942,579, and were in excess of the previous year by £T113,470. The Customs receipts during February, 1914, were greater by £T109,236 than during the corresponding month of the previous year, the increase in the import duties alone amounting to £T103,238. During the fiscal year ended February, 1914, the duties on imported goods exceed those of the previous year by £T646,210, and, notwithstanding the loss of territory, represent an apparent increase of almost six million Turkish pounds in the imports during the year, as compared with the previous year. The total of imports of the fiscal year thus amount to over £T40,000,000, which is the greatest on record.

State of the Market.

The import market has taken a decided turn for the worse during the last week or two. An important failure is reported in the cotton goods trade, and others are expected to follow. Owing to the steady arrival of Manchester goods, the shipments of which had been held back since last season, the market is considerably overstocked. Sales are small and payments are coming in with the greatest difficulty. This state of affairs is, by some, put down to the boycott, which, notwithstanding the attitude of the Government, is still in existence; by others, to fears of yet another war in the near future. Howbeit, there is an undoubted feeling of uncertainty, and the consequences are now becoming evident. I understand that Manchester still holds large stocks waiting to be shipped here, and were it not for the firmness of the home market, local conditions would have been even worse than they are. It will evidently take time for the market to get back to normal conditions, and in the meantime not a little caution will be necessary in transactions with this country.

Foreign Specialists.

Mr. Hermann Weit, a functionary of the Austrian Department of Forests, who has been appointed Director General of Forests in the Ottoman Service, has arrived here and taken up his duties. The five French specialists who are to be attached to the Ministry of Mines and Forests are also expected to arrive shortly.

New Companies.

The promulgation of an Imperial Decree sanctioning the formation of an Ottoman Co-operative Society with a capital of £T30,000 is announced. The capital will be entirely Ottoman. The Sublime Porte has approved the statutes of the Ottoman Société Anonyme with a capital of £T440,000 to take over the Dolma-Bagtché Gas Works. It will be remembered that a group guaranteed by the Perier Bank undertook to refund the Prefecture the sum of £T42,000, at which figure it acquired the gas works from the Ministry of Finance, and to pay a premium of £T120,000 for the granting of the concession. It further undertook to supply 200 street lamps free of charge, to furnish gratis a million cubic metres of gas to the Imperial Palaces, and to pay to the Prefecture a bonus of 2 paras (one-tenth of a penny) per cubic metre on all gas it supplied to the public.

The establishment of a new bank is also announced under the title of "Banque Indo-Egyptienne." The capital is said to be £800,000, which will be furnished by Egyptian capitalists. The Bank is authorised to establish branches in the Provinces and abroad.

Posts and Telegraphs.

The receipts of this Department during the month of March of the present year, just published, show continued increases compared with the previous year, as follows:—

	1914. £T		1913. £T
Post Office	29,000	..	22,000
Telegraph Department	40,000	..	28,000

The increase in the Post Office Department amounts to over 30 per cent. and that of the Telegraph Department to almost 45 per cent.

THE TRADE OF KHORASSAN.

(From Our Own Correspondent.)

Meshed, April 24.

The English Consular report on the "Trade of Khorassan" for 1912-1913 contains food for thought. It makes the statement that "There are at present no openings in Khorassan for British trade," and also that during the past eight years "the trade with Russia has doubled." It explains that a long time and high expense are involved in order for trade to be carried on between this district and India and the United Kingdom, and a merchant trading with India or the United Kingdom can turn over his money only once in the year as against five or six times in the case of the merchants dealing with Russia. But apart from the geographical advantages of trade with Russia, the report says that it is a "very important fact that in the Caucasus, in Central Asia, and in Persia, Russia possesses a large market inhabited by Mohammedans who are, more or less, in the same scale of civilisation, and who all desire cheap and, generally speaking, similar articles." There is also a distinct difference between patterns suitable to the Persian market and the gaudier article which finds favour in Bokhara; but, when everything has been said, the market is practically one, and is extensive and quite worth catering for, whereas, from the British point of view, many articles cannot be specially made for a small, limited, and distant market.

The report speaks of the increase in furniture and indigo imported from Russia, and the "large increase in sugar," "but the largest relative increase is in thread (cotton)" used in the manufacture of local cloth. The staple import of tissues (cotton) shows a very heavy increase. There was a large export of grain to supplement the scanty crops of Transcaspia. Both silk and wool (raw) show a satisfactory increase."

It is a matter of common talk that Meshed will, in the near future, be connected with the Trans-Caspian Railway by a branch line.

ROUMANIAN TIMBER TRADE.

(From Our Own Correspondent.)

Bucharest, May 27.

Interests of British Shipping.

A question much discussed in Danubian commercial circles, and which intimately concerns British shipping, is that of the increased cost of railway transport, for at least one-half of the timber exported from Galatz is carried in British bottoms. The cost of railway transport has been raised by 50 frs. per truck, and, also, the number of trucks with timber from Hungary allowed to pass the Pridese and Palanka frontiers has been limited to 40 and 20 respectively. These restrictions on a flourishing and profitable trade is said to be merely an attempt on the part of the Roumanian State Railways authorities to combat by illegitimate means the persistent complaints of the insufficiency of transport rolling stock.

The Trade via Galatz.

Since the timber trade in this district assumed such considerable proportions the export of timber from this country, as well as from Hungary and the Bukovina, has proceeded viâ Galatz. The harbour authorities have always encouraged this trade by all possible means, and the construction of a special dock for loading timber has even been proposed. Ten to fifteen years ago the trade had increased so much that up to 40,000 truck loads (400,000 tons) of timber were exported annually viâ Galatz, apart from the logs floated down by raft. Since then, however, owing to the various impediments put in the way of transport by the Roumanian State Railway authorities, this had been reduced to 12,700 trucks last year, while in 1911 it still amounted to 21,000 trucks.

Effect of Railway Regulations.

The bulk of the timber from the Bukovina has, in consequence, been diverted to Odessa, that from Galicia to Triest, and the major portion of that from Hungary to Fiume, as the geographical advantages of Galatz are now more than counter-balanced by the many difficulties of transport introduced on the Roumanian Railway system. The increase of transport charges will also have the effect of driving from Roumania to Hungary the timber orders for Servia and Bulgaria, for timber can now be sent more cheaply viâ Maroshevoz-Orsova, whereas it always used to be more advantageous to purchase in Roumania, because the water carriage enabled the Roumanian merchants to undersell the Hungarian. Moreover, the same policy is diverting practically all timber destined for Egypt or Great Britain to Odessa, Triest, and Fiume.

A Short-sighted Policy.

The measures introduced are the outcome of a most short-sighted policy, for the profits which can be made by this transport business are very great. In 1910 a single firm transporting timber from Bukovina and Hungary handled 8,000 trucks, or 80,000 tons, for which they paid to the Roumanian State Railways:—Dock rent at Galatz, 80,000 frs.; carting and moving timber, 28,000 lei; paid workmen loading, etc., 200,000 frs.; freight, about 30,000 frs. But instead of meeting the question of want of transport by legitimate means, a trade most profitable to the country is being rapidly killed by these arbitrary and short-sighted measures.

SERVIAN TRADE OPPORTUNITIES.

The Bankruptcy Laws of Egypt.

The Procureur-General's Note.

(From Our Cairo Correspondent.)

So much has been written of late on the subject of the Bankruptcy Laws in Egypt, and so many criticisms have been levelled at the system of "Concordat Preventif"—of arrangements with creditors—that the observations on the matter made by M. A. Eeman, the Procureur-General of the Mixed Courts, in his note on the work of 1913, attached to the Judicial Adviser's Report, acquire especial importance and interest.

M. Eeman declares that if, as is so often asserted, a failure is not only a bad affair for the creditors, but also extremely beneficial to the debtor. the fault lies not with the laws but with the dilatoriness with which the interested parties have recourse to them, and the manner in which they and the Courts apply them. And he proceeds to analyse the question very carefully. In the first place he quotes the President of the Commercial Court of Brussels, and asks with him whether merchants in Egypt are not themselves somewhat responsible for the losses they incur? Whether they are not too keen on doing business to inquire sufficiently as to the commercial morality and solvency of their clients? Whether they even remember that one bad debt can swallow up all the profit on ten good affairs, and that it is preferable not to sell at all rather than to deliver and receive either no payment or small instalments exacted after a long wait, and the expenditure of much money and pains? Such questions may well be asked in this country. I am afraid that many could not answer them satisfactorily, and therein reposes one of the reasons why the general position of affairs is to-day so unsatisfactory.

But, on the other hand, it is quite possible that however circumspect a trader may have been, circumstances may intervene and render insolvent the most firmly established client. In such an event the protesting of the bill is the first public indication, as a rule, of the tight position of that client. M. Eeman considers that at this juncture the Courts should intervene, and that the procedure adopted in Belgium should be introduced into Egypt. This procedure he describes as follows:—"The Court summons before it the traders whose names appear on the 'List of Protests.' It inquires into their financial position. If the trader is found to have been unfortunate he is advised at once to make an arrangement with his creditors, even sometimes to abandon a branch of business for which he may appear to have either no qualifications or insufficient capital. If, on the other hand, the Court considers that a debtor is really and by his own fault in a state of insolvency, it at once pronounces his bankruptcy."

Why, asks M. Eemen, should the Egyptian Courts not act in like manner, and why should there not be instituted a "List of Protests"? As he rightly says, the absence of publicity is at the bottom of the lack of commercial morality which allows a merchant, many a time quite a respected and respectable merchant, to let his signature be protested and continue trading and obtaining credit just as if nothing had happened. If this publicity existed we should no longer see creditors manœuvring each to get as much as he can out of his debtor, and the law intervening only at the last when the assets are practically nil. The law must be prompt and firm. Decisions in bankruptcy cases must "take account, not of the convenience of the petitioning creditor and the debtor, but of the interests of the whole body of creditors, whose protector is the Commercial Court."

Turning to the question of the "Concordats," M. Eeman refers to the abuse made of the terms "unfortunate and of good faith" with which the applications for the approval of these "arrangements" are supported. A debtor is not unfortunate if he has suffered no real misfortune, or if his critical position is but the result of the imprudent, callous manner in which he has traded. Neither is he of good faith if he knows, or ought to know, that he cannot meet his engagements and yet continues to trade. If, as so often happens, the debtor is not "unfortunate and of good faith," in the strict and proper sense of the terms, why do the creditors agree to the arrangement? After all, it is all in the hands of the creditors, since the debtor, in order to obtain approval by the Courts of his proposals, has to obtain the consent of the majority of his creditors, both as regards number and amount. As M. Eeman asks, "Is it reasonable or just to lay at the door of the law the unsatisfactory results of an imprudent acceptance (by the creditors), or of a, in many cases, guilty complacency of the interested parties themselves?" And, further, the approval of the Counts of the "Concordats" proposed should not be an empty formality—a mere confirmation of the decision taken by the creditors' meeting. There are many arrangements which are entirely inconsistent with the strict idea of what constitutes a debtor, who has been "unfortunate and of good faith." If the creditors have accepted such an arrangement that is no reason why the Court should approve it. Each arrangement should be looked into by the Courts and treated severely on its own merits. It may be that if the admission to the benefit of a concordat is made more difficult there will be more bankruptcies; but at the same time, they will be less disastrous, "and that will be a great thing; for it must be admitted that at the present time the liquidations of bankrupt estates produce very poor results."

With regard to these liquidations, too, M. Eeman thinks they could be effected in a much better manner. He does not consider that the receivers have sufficient time to deal properly with the administration of these bankruptcies and superintend the work of the liquidators. They have too many other duties to attend to. The position in regard to the liquidators is also unsatisfactory. After all they have a living to earn. They are no doubt fully qualified for their work, but "how can they make a profit if they do not correspondingly diminish what remains for the creditors?" It is only natural that they should want to make their profession as remunerative as possible. M. Eeman considers that instead of altering the present system of making, as has been suggested, the liquidators salaried servants of the Court, the Commercial Tribunal should exercise a close control over their administration of estates, and should reprimand or dismiss those whose zeal appears to be in direct proportion to the importance of the assets involved, and who are more intent in looking after their own fees; and that in taxing fees regard should be paid to the fact that they are being paid out of money due to the creditors. In fact, those fees should never exceed a certain percentage of the dividends paid to creditors.

M. Eeman closes his remarks with the following admonitory passage: "I spoke just now of severity. I should like to see a good deal more shown in the appreciation of the fact in matters of ordinary and fraudulent bankruptcy. I quite understand the compassion that may be felt for a trader who has lost everything, including often his honour, and who has to be sent to prison. But I should like some little thought to be given to the victims of that guilty trader, to the ruin that he may have caused, and to the necessity for protecting society and more especially the public credit, by the deterrent effect caused by the stern punishment of every breach of good faith of that morality, which are so indispensable in commercial matters."

All those who have been or are in any way connected with commercial affairs in Egypt will heartily endorse what M. Eeman has written. The community in general should take his words to heart, and the Courts and the officials will also do well to bear in mind his observations. In addition, it is to be hoped that as Sir Malcolm MacIlwraith said in his covering report, the suggestions made will receive attention, for they are certainly of a nature to merit every consideration.

ALEXANDRIA NOTES.

(From Our Own Correspondent.)

Alexandria, June 5.

The Share Market.

The market has shown a decidedly better tendency in spite of the apathy of London and Paris. Purely local shares have improved, whilst gilt-edged securities are in less demand. The Bill for the creation of Agricultural Co-operative Societies is about to be voted by the Legislative Assembly, and is expected to prove of very great benefit to the agricultural classes. Only a fear is sometimes expressed that if the Government does not reserve the right of controlling and dissolving them the new societies may become hotbeds of Nationalist agitation.

Zervudachi Assets.

The Sharbine estate, which belonged to the late George Zervudachi, is to be sold by auction shortly at the Alexandria Mixed Courts. This is the only important asset in Egypt belonging to this failure. The estate consists of nearly six thousand five hundred feddans of excellent agricultural land in the Gharbieh Province on the Damietta branch of the Nile. Another asset, consisting of 4,894 square pics of building land in the Kom-el-Dik quarter of Alexandria, is also to be disposed of at the Mixed Courts. The upset price is £E4,160.

Salt and Soda Co.

The Council of Ministers has decided to make a new contract with the Egyptian Salt and Soda Company for the sale of powder, which will give the company an annual amount of £E1,500 in order to cover its fixed expenses, plus a commission of twenty per cent. on the sales, with a reduction in the sale price of mining powder from P.T.8 to P.T.6 per kilogramme.

Near East Markets.

SPECIAL REPORTS.

(From Our Own Correspondent.)

Odessa. June 7.

The general rainfalls over the whole Southern Province have greatly improved the crop prospects. The same may be said of the Northern Caucasus, which feeds the increasingly important port of Novorossisk. In the Don country, too, the outlook is good, and a good season in the Azoff is confidently anticipated.

Sofia. June 6.

According to official reports received by the Ministry of Agriculture, the recent abundant rainfall throughout all parts of the country has greatly benefited the crops, and there is promise of an abundant harvest. In some parts of Southern Bulgaria, however, hail storms have done considerable damage to the crops.

A great increase in exports is noticeable lately at almost all the ports and frontier Customs stations. Between May 1 and May 15 (old style) grain and food stuffs exported from Burgas totalled £60,000; from Varna, grain to the value of £40,000; through Rustchuk, £16,000; through Dedeagatch, £26,000; and through the Tzaribrod Custom house, £16,000. This increase in exports has had a very favourable effect upon the country's money market.

Athens. June 2.

Telegraphic reports from Larissa to the Ministry of National Finance state that owing to the rainy weather last week throughout all the Thessaly district and the continuance of cold temperatures, the cereal crops, which were in danger, are now safe. The wheat harvest will start in about ten days from now. The barley harvest began last week.

PRODUCE REPORT.

London, June 11.

Sugar.

The market has been quiet this week with little business passing at more or less steady prices. Good rains in the Continent and finer weather in Cuba have enabled America to put down quotations for raw sugar on their market, while receipts at all ports in Cuba being now fully up to expectations here caused an easier tendency in this market also. Beetroot crops are reported in very good condition at present, while Russian sugars are getting much nearer to Hamburg parity, so that there may be some offers during the summer months. Visible supplies, up to now, are 3,873,600 tons, against 3,715,310 tons last year; the whole of the excess of 158,290 tons calculated to exist in Europe. Prices for beet sugar have been slightly easier this week. Refined, English, Tate's cubes No. 1 is quoted 18s. 3d.; granulated German, 13s. 3d.; crushed Austrian, 13s. 7½d. f.o.b. Hamburg.

Coffee.

The supplies that were offered at public sales this week have met with a steady demand at full prices. Costa Rica low mid. to mid. sold 70s. 6d. to 79s.; East Indian low mid. to mid., 69s. to 73s. 6d.; Santos, 50s. to 56s.; Mocha, 88s. to 100s.; Colombian 65s. to 85s. The speculative market has been quiet. July sold 44s. to 44s. 1½d.; September, 44s. 10½d. to 45s.; and December, 46s. A cable from Santos last week reported market firm, and the stock 985,000 bags.

Currants.

Owing to reports of bad weather in Greece forward prices are inclined to harden, but as United Kingdom stocks are fairly sufficient there is no corresponding improvement here. There is, however, a steady consumptive demand for all qualities, prices remaining unchanged.

Sultanas.

The unfavourable weather reports which continue to be received from Smyrna have caused further activity and a renewed rise in prices here. The small stocks of natural fruit remaining show the greatest advance, but all qualities have participated. The existing steady market demand may be taken as an indication that distributors have only small stocks. The small late arrivals of Greek sultanas have sold freely. From Liverpool the market is reported also strong. Full prices are being demanded, which buyers pay reluctantly, although the merchants' attitude is apparently justified by the unfavourable reports of the growing crop.

Figs and Dates.

There is nothing particular to report regarding figs. Bags of naturals are quoted 29s. to 30s.

Prices of dates are still very low, demand is poor. Persians are quoted 7s. to 12s.

Gums.

There is only a moderate activity in the market, but prices are well maintained. Turkey sorts 36s. to 55s. per cwt. East India common to fine, 28s. to 32s.; Tragacanth, first, 380s. to 480s.; low to good sorts, 90s. to 130s.; Myrrh, good to fine, 96s. to 100s.; Sandrac, 57s. to 85s.

PERSIAN AND TURKEY PRODUCE.

In their May report just received, Messrs. Bowyer and Bartlett state:—

Asphaltum.—Egyptian.—No change to report, no enquiries whatever. Values remain unchanged at 80s. per cwt. Syrian character.—Small sales at unchanged rates. Gum Ammoniacum.—The demand is very restricted, with new arrivals increasing in stocks. Values remain about the same, viz.—Good pale free drop 70s., medium block 50s., and low seedy, 50s. Gum Assafoetida.—No change to report, the market remains at a standstill. Stocks of low grade are very heavy, but finer qualities are scarce and we might recommend a few consignments of really good quality. Gum Arabic.—Egyptian.—Since our last report there has been a rapid rise in prices, owing to speculation in producing markets. The price now asked for ordinary natural sorts is about 36s. per cwt. c.i.f., but buyers on this side are not prepared to pay anything like this figure. On the spot, there has been a good demand, and some large parcels have been disposed of at a fair advance in price. Persian Insoluble.—During the past month there has been an increased demand, and practically all the good qualities "Bushire Sorts" which we have held for a long time have now been placed at very full values. Gum Tragacanth.—Sales have been of a steady nature throughout the month, but chiefly in the Persian descriptions. Good white Baghdad is extremely scarce, and realising very extreme prices. The present stock is 10,068 pkgs. of all descriptions. Gum Mastic.—Quiet market, with very few sales. Value, 2s. 6d., 2s. 7d. per lb. Galls.—There is rather more enquiry and we have sold a fair quantity of blues on the spot at 46s. per cwt., and whites at 42s. per cwt. Greens are in plentiful supply, but there is absolutely no demand for the quality. Senna.—Alexandrian.—After the large business during the past few months our buyers appear to be somewhat satisfied. We cannot report any change in prices, except pods, which we think could be bought at rather under recent value.

OPIUM MARKET.

Messrs. Barker Brothers, Smyrna, report as follows for the week ending May 29:—Very little business has been effected this week; nevertheless, several buyers have been again on our market, but sellers do not show any wish to sell. The only sales we have to report are 14 cases about 11 per cent. to 11½ per cent. Carahissar at 15s. 6d. The arrivals are 4,649 cases, against 2,425 at same date last year.

Mr. H. H. McCARTHY has acquired from Mr. Joseph Mason the business of Shippers to India and the Far East, recently carried on at 26 and 27, Bush Lane, under the style of MASON, MACLAREN & CO., and will, as and from June 6th, 1914, remove same to 8, Bush Lane. Mr. JOSEPH MASON will continue to carry on business as Government Contractor, etc., at 26 and 27, Bush Lane, under the style of JOSEPH MASON & CO.

XANTHI TOBACCO.

(From Our Own Correspondent.)

Sofia, June 6.

The Ministry of Finance has received several offers from foreign firms for the purchase of Xanthe tobacco, the prices of which are now a little higher than last year.

(From Our Special Correspondent.)

Sofia, June 1.

The far-famed Xanthi leaf, until the war exclusively grown in Turkish territory, is now apportioned to both Bulgaria and Greece. The actual district where this leaf is cultivated extends, roughly speaking, from Makri in the east to Kavalla in the west, and north across the Rhodope Mountains to the immediate valley beyond. The choicest leaf, however, and that which finds the greatest favour with British and American buyers, is grown in sheltered plots on the southern slopes of the Rhodope, immediately to the north of Xanthi and Gumuljina, and on both sides of the Greco-Bulgar frontier.

It is roughly estimated that 40 per cent. of the Xanthi leaf now put on the market will in future be grown in Greek Thrace, and 60 per cent. in Bulgarian Thrace. Accurate figures concerning the output in the Bulgarian section are not yet obtainable, and it is impossible to rely on pre-war figures, but the Director of the Statistical Department in Sofia estimates the Xanthi output at 2,000,000 okes, average crop, and the total output of tobacco for New Bulgaria at 6,000,000 okes (Old Bulgaria, in 1911, the latest statistics available, produced 106,473 quintals of tobacco). Xanthi experts, on the other hand, estimate the Xanthi leaf output in Bulgaria at 3,000,000 okes at an average price of PT. 25 per oke. Both authorities agree, however, that the cultivation of the leaf is susceptible of an enormous increase, both owing to the ever-growing demand abroad and the practicability of augmenting the area under cultivation, and they predict a doubling of the output within the next five years if no radical fiscal changes are introduced by the Government in the meantime.

Prior to the war, the Turkish Regie was established in Thrace, but their concession expired, and though it has been renewed in Greek Thrace in a modified form, it has not been renewed in Bulgarian Thrace. Under the old Regie system, there was no question of a monopoly as regards the purchase of the tobacco, which could be bought at best prices in the open market. The result was the establishing of a large number of merchants of different nationalities and the opening up, by big foreign importers, of buying and warehousing branches. The British firms thus interested in Xanthi were: the Commercial Company of Salonika, Limited; the Oriental Tobacco Company, Limited; the Export Leaf Tobacco Company (Orient), Limited; the Turkish Export Company, Limited; N. Meyer and Company, Limited; the Macedonian Tobacco Company, Limited; and Kiazim Emin and Company, Limited. Of these, the largest is the Export Leaf Tobacco Company, which supplies a lot of cheap tobacco, about 1,000,000 okes per annum to Germany; the Macedonian Tobacco Company, on the other hand, has withdrawn from Xanthi. To the list of the above British firms must be added the American Tobacco Company, one of the largest, if not the largest on the market, several other American firms and some six or seven German firms. It can roughly be estimated that these companies together annually bought tobacco in the Xanthi district to the value of £1,500,000—the figures for the American Tobacco Company being, I am told, 15,000,000 francs during the past three years.*

The creation of a buying monopoly, whether Bulgarian or foreign, would clash with the interests of the above firms, and with those of all merchants exploiting the Xanthi leaf. For the monopoly would be in a position to create and maintain a ficititous price without being at all interested in a strenuous development of the cultivation of the plant. An open market, keen competition, and State facilities to planters, would seem to be some of the essential requirements if the Xanthi tobacco trade is not to languish. As an offset, the banderole tax can be increased and

* Since writing the above a pamphlet has been placed at my disposal, arguing the pros and cons of the monopoly system. It is entitled "Monopole or Banderole," and is the report of a lecture given by the secretary of the Chamber of Commerce, who was one of the members of the Tobacco Commission.

Digitized by Google

it would appear that a suggestion to that effect was submitted by the merchants of Xanthi to the Commission appointed to study the tobacco question in New Bulgaria and to suggest new tobacco regulations. Up to the time of writing these have not been drafted.

The claims of the merchants and planters can therefore be summarised as follows:—(1) An open purchasing market which will create a healthy competition; and (2) greater facilities to planters for cultivating the leaf in small, sheltered plots on the slopes of the hills; as an off-set, an increase in the banderole tax. It stands to reason that the regulations when finally drafted will have to apply to the whole of Bulgaria, and not only to the Xanthi district, but, nevertheless, as the Xanthi leaf is that most in request abroad, its claims are deserving of special consideration. Regarding the formation of a monopoly, whether State or private, it is not generally favoured in financial circles in Sofia where the banderole system is preferred.*

In conversation with some members of the Commission the other day, I was informed that the bulk of the population in the Xanthi district, and even farther north, was Turkish, quite at home under Bulgarian rule; it was feared, however, that the creation of a monopoly would drive these Turks away. They are a peaceful, law-abiding and tax-paying community, whose whole lives are spent in their tobacco plots, out of which, in a good year, they can clear a profit of about £36 per acre, as against a maximum of £3 per acre with any other crop. Further, I was informed that the best tobacco-growing land was worthless for any other cultivation, so that a decrease in the former would not enrich the country. This year, owing to uncertainty as to the Government's policy, there has been a decrease in the area under tobacco, so that the crop outlook is not so favourable as it might be.

The Government's attitude regarding the banderole versus monopoly systems is at present unknown. The vested interests—warehouses, etc.—are enormous and, in case of the creation of a monopoly, would demand compensation; thousands of natives of Thrace would be without employment; the cost of organising the administration would be high; and not less costly would be the advertising abroad of a new brand of tobacco or cigarette.

However, some decision will shortly have to be taken. A lot will depend on the issue of the pending loan negotiations in Berlin. Should they, contrary to all expectations, prove a failure, the monopoly system might eventually have to be exploited; should they succeed, the banderole system, with an increased tax, will in all probability be maintained.

The Egyptian market is now the object of pourparlers between the Bulgarian and the Egyptian Governments. At present the Greek tobacco can be imported into Egypt at 2 PT. less per oke than the Bulgarian tobacco, but how long this will last is still unknown, the Greco-Egyptian treaty of commerce expiring this autumn.† The Greek Government is endeavouring to have the treaty prolonged for another period of ten years, but whether successfully or not is still an open question. The Bulgarian Government, on the other hand, is negotiating for a treaty with Egypt, which will give Bulgarian tobacco the same favoured conditions as the Greek. I understand that the pourparlers are advancing satisfactorily. They will greatly depend, however, on the results of the pending Greco-Egyptian negotiations.

* Egypt, it may here be mentioned, is an importan purchaser of Thracian tobacco.

† The Commercial Convention, concluded in 1895, between Egypt and Greece expires on July 17 next, After that date Greek tobacco imported into Egypt will have to pay the general tariff rates, *i.e.*, £E0.270 per kilog. on leaf tobacco, and £E0.320 on stripped tobacco.—Ed.

EGYPTIAN COTTON MARKET

(From Our Own Correspondent.)

Alexandria, June 5.

Prices have risen as a result of the sharp recovery in American. But the effects of this recovery have not been very marked, and we have only maintained the rise with difficulty. The existence of a large stock, the increase of acreage, and the brilliant prospects of the crop tend to neutralise this rise, and do not encourage the speculator to buy; and as the rise was only a slight one the margin between Egyptian and American is quite negligible. To this fact it must be added that speculators are bearish in their tactics, that the trade has sold futures in order to cover its purchases in the interior, and that realisations have depressed the market. It is thought that the future of the article will be ruled by the American markets, or, to speak more accurately, by the weather conditions ruling in the States. Reports regarding the new crop are satisfactory, and the warmth of the last few days has resulted in the plants making real progress. So far there has been no sign of the cotton worm making its appearance this year. The spot market is fairly active, and exports are larger than they were in the corresponding period of last year. Cotton-seed has rallied slightly, owing to an increase in the demand.

Messrs. Davies, Benachi and Co., of Liverpool, have received the following telegram from Alexandria, dated Wednesday:—

Market quiet. July, 18 $\frac{8}{32}$, November, 18$\frac{3}{4}$. Exchange, three months' date, 96$\frac{1}{4}$.

Steamers Sailed.

June 1.—"City of Cambridge." June 5, "Tudor Prince," Manchester.

LIVERPOOL REPORT.

Messrs. Reynolds and Gibson telegraph:—Egyptian Spot: The moderate inquiry experienced over the holiday period continued during the earlier part of the week, when only small business was put through. To-day there was quite a revival in the demand, and a fair amount of cotton changed hands. The medium grades of Nubari and Sakellarides seem to have been in most request. In other qualities—with the exception of Joannovitch, which does not seem to be in favour at the moment—only a moderate business has been put through. Quotations for all qualities and grades are reduced 15 points. Estimated sale for five days, 1,600 bales.

MANCHESTER MARKET.

(From Our Own Correspondent.)

Manchester, June 10.

There has been no encouragement for sellers in the market during the past week, the tone throughout being very quiet. To some extent the lack of activity in yarn and cloth is due to the high prices in raw cotton and consequent dear rates in yarn and cloth. We are undoubtedly passing through a period when operators consider the best policy is to hold aloof and wait further developments. The weather reports from the American cotton belt are of a varied character. Manchester does not believe some of the exaggerated reports as to the damage to the growth. On the whole the crop in Egypt appears to be making fair progress. Manufacturers of piece goods have only been able to secure small orders. Advices from Egypt are no better and business has continued to drag. The outlets of the Levant have given retail support and many difficulties are encountered in arranging fresh transactions. India is not doing much at the moment, and considerable interest is being taken in the reports as to the monsoon which broke at Bombay at the beginning of this week. According to some statements, the position in China seems to be a little better, but we cannot report a larger offtake in cloth. Owing to the unseasonable weather now being experienced, the home trade is not doing so well as expected. In certain weaving towns arrangements are being made to stop looms or extend the usual holidays this summer. American yarns for home use have been generally firm in quotation, but when prices have been thoroughly tested, some irregularity in the position of producers has shown itself. Most of the buying has been of a hand to mouth character. On the whole, the demand seems to be rather better in wefts than in twists.

GRECO-AUSTRIAN COMMERCE.

(From Our Own Correspondent.)

Athens, June 5.

A new treaty of commerce, chiefly bearing upon a reduction of the tariff rules on Greek figs and currants and on Austrian timber and cloths, also a treaty concerning navigation and a special convention regarding tobacco have just been concluded here between the Greek and Austrian Governments. The draft treaties have been initialled, and the definite signature will take place within a month.

RUSSO-PERSIAN POST.

(From Our Own Correspondent.)

Odessa, June 7.

Pending the completion of the Julfa-Tabriz Railway, the Russian authorities are establishing a regular tri-weekly postal service by fast motor-cars between those places. The whole of the Russian and foreign mails for the Persian interior will be carried by that route. The Russian post office in Tabriz is to be furnished with a well-staffed collecting and distributing department.

The construction of the Julfa-Tabriz railway is being vigorously pushed forward, and the new line will, it is expected, be opened for traffic early next year.

COTTON CULTIVATION.

Four meetings of the International Congress of Tropical Agriculture (June 23-30) will be devoted to discussion of cotton cultivation, and at one of them Lord Kitchener has promised to preside. On June 23, the Earl of Derby, President of the British Cotton-Growing Association, will take the chair at a meeting at which Mr. J. A. Hutton will give an account of the work of this association, of which he is chairman. On June 29 there will be a discussion on the "Improvement of Cotton Cultivation," to which the experts of the Department of Agriculture in Egypt will contribute, while Prof. Todd, of Nottingham University, will discuss the labour question as it affects cotton cultivation in the U.S.A. and Egypt, and Mr. Arno Schmidt, of the International Federation of Cotton Spinners, will give an account of his recent tour in the cotton districts of India. It is at this meeting that Lord Kitchener has consented to take the chair.

Engineering Notes.

Electric Lighting Installations.

Many people imagine that electricity generated by a small independent plant is necessarily very expensive and unreliable. This is quite a mistaken notion, as by the introduction of the internal-combustion engine the cost of generating electricity is comparatively so small that a complete lighting installation may now be considered a sound investment rather than an expensive fad. In addition to providing light, electricity can, of course, be utilised for cooking and heating, for charging accumulators for motor-cars, or for light power work, such as pumping water, driving a lathe, ventilating fans in the houses, or light machines in barns, etc. The approximate cost of an electric light installation, with 50 to 100 16-c.p. lights, comprising engine, dynamo, tanks, pipes, shunt, regulator, accumulators, switchboard, and accumulator stands, may be from £60 to £120. Almost any existing outhouse, stable, or barn that is weather-tight can be adapted to serve as an engine-room, and can be partitioned off for the accommodation of accumulators. The only foundation to be provided is a concrete base for the engine and dynamo. The engines can be made to work with either petrol or paraffin, but for reasons of economy and convenience to users in the Near East we would strongly recommend paraffin as a fuel. The oil consumption may be taken at three-quarter to one pint per brake horse-power. Roumanian, Russian, or Baku oil is better than the American for the purpose. To charge the accumulators the engine would run on an average four to six hours a week (according to consumption of light), which would require about fifteen minutes' attention at starting, and while running one or two visits to see that all is in order.

The Re-modelling of Athens.

Some interesting details of the plans for remodelling Athens are given in the report of H.M. Consul at the Piræus, which was published on Tuesday. A new Union railway station is to form a fitting entrance to the city, which, as our readers are aware, will soon be in direct communication with Paris. "The small and squalid buildings which at present disfigure and obscure the Acropolis and magnificent ancient ruins of Athens are to be removed. It is then hoped that further excavations of the ruins may be taken in hand. A good road is to be made between Constitution Square and the Zappion Gardens to the Acropolis, and skirting the base of the ruins. It is a noticeable fact that the population of Athens has increased by about 50,000 during the past year. This increase is to some extent due to the number of rich Greeks returning to Athens. A great feature of the proposed improvements is to be the planning and laying out of parks and boulevards. Already considerable progress has been made in the planting of pines and cypresses on the hills surrounding the city. The extension of this work is to be continued. The improvements will include several areas to be devoted to small houses for the working population whose houses have been, or will be, removed."

Piræus Harbour Works.

The same consular report states that "the Harbour Board is studying the practical means of enlarging the port of the Piræus. At present vessels discharge in the stream, and passengers have to land in boats, with their baggage. It is proposed to build a new Custom House, moles, and jetty heads, and erect special appliances of a modern type for discharging cargoes at the quays. The submerged rock, which has been a source of danger to vessels in the harbour, has been at last removed; the quantity of rock removed amounted to 3,000 cubic metres, at a cost of £4,240. The depth of water on it is now 8.5 metres (27 ft. 10 ins.)." British contractors will doubtless be interested in the proposals indicated; and, since the Greeks are gifted with a nice discrimination in the way of choosing the best men to carry out works of this kind, we may reasonably expect that one or other of our leading firms that have had so much experience in this direction will be employed for the work.

Trebizond Port Works.

The following is an extract from a forthcoming report of H.M. Consul at Trebizond (Mr. H. E. Satow), published by *The Board of Trade Journal*:—"Nothing further has transpired as to the building of a port at Trebizond, for which surveys were carried out in 1912 by a British firm. The delay is probably due to the fact that the negotiations as to the construction of the various railways projected have been prolonged. Although a line from Trebizond to Erzeroum has been mentioned as forming part of the scheme, it seems doubtful whether, in view of the heavy cost, it will be built in the near future. On the other hand, the chances of a railway being built from Samsoun seem more favourable, in which case Trebizond will probably lose some of its trade with the interior, which would be diverted to the new route.

Roumanian and Servian Engineers.

Our Bucharest correspondent writes under date June 7:—Next week a party of eighty Servian engineers and architects will arrive at Bucharest. The Society of Roumanian Engineers, under the presidency of M. Saligny, are arranging a hearty reception for their Servian colleagues, whose stay in the capital will last for five days, during which the salt mines at Slanic, the petroleum districts of Campina and Datchevo, and various industrial centres will be visited, as well as Sinaia and Constantza.

On October 17, 18, and 19 a Congress of Engineers will be held in Bucharest, when the general interests of the fraternity in this country will be fully discussed. The Congress, the first of its kind in this country, will be under the presidency of Professor Saligny.

TENDERS INVITED.

EGYPT.

Webbing, Hides, etc.—Tenders are invited by the Egyptian War Office for the supply of 50,600 yards of webbing, 3,540 hides, and 35 pigskins, 3,900 yards of felt, and 55,900 yards of canvas. July 14.

Olive Oil.—Tenders are invited by the Economat Central, Ministry of Finance, Cairo, for the supply of 7,390 okes and 272 dirhems of pure olive oil, necessary for Mecca and Medina. July 15.

Letter-Boxes.—Tenders are invited by the Postal Administration, Alexandria, for the supply of 600 cast-iron letter-boxes, similar to those employed in the rural service. June 20.

GREECE.

Dredger and Lighter.—Tenders are invited by the Harbour Board at the Piræus for the supply of a dredger and a lighter. July 14.

BULGARIA.

Creosote.—Tenders are invited by the Direction Générale des Chemins de Fer de l'Etat Bulgare for the supply and delivery of creosote of the upset value of £10,560. June 19.

Shipping Intelligence.

ROUMANIAN DANUBE NAVIGATION COMPANY.

(From Our Own Correspondent.)

Bucharest, June 6.

The new company for river navigation formed, as already announced, among the Roumanian banks with the title "Societata Anonima Romana de Navigatiune pe Dunare," or for short S.R.D., has been duly registered, and the other necessary formalities complied with.

The capital is 7,200,000 lei—5,200,000 in property and 2,000,000 in cash—as follows:—The Banca Romaneasca: Eleven lighters and one tug, value 1,123,000 lei; the Banca Agricola, the Banca Generala Romana Comertuliu of Craiova, the Berliner Kommerz und Diskontobank, twenty-eight lighters and four elevators; Banca Generala, 507,000 lei; Banca Comerciala, 258,500 lei; Banca Agricola, 569,000 lei; Kommerz und Diskontobank, 695,500 lei.

Besides this, the Banca Agricola brings in other lighters valued at 93,000 lei, and the Banca Comerciala, in similar fashion, brings in lighters valued at 444,000 lei. The firm Fratelli Bach also puts in thirteen lighters, value 1,143,000 lei, and Geo. Fernic four lighters, value 336,000 lei. The 2,000,000 cash is subscribed by Marmorosch Blanc and Co., Banca de Scont, Banca de Credit Roman, and Banca Comertuliu (Craiova) in equal proportions. If necessary the capital can be increased to fifteen millions. The board is composed of Messrs. Anghel Saligny, Vic. P. Stefanescu, Aristi Blanc, W. Dickin, Cr. Calinescu, N. Sgardelli, I. Savescu, Const. Neamtu, Josef Pincas, and Angelo Bach.

BLACK SEA FREIGHTS.

(From Our Own Correspondent.)

Odessa, June 7.

In the early part of the week there was a sudden and complete collapse of freights. From 8s. Rotterdam, 8s. 3d. Weser, and 8s. 6d. Hamburg, the rates fell, within a few days, to 6s. 6d. Rotterdam, 7s. Weser, and 7s. 3d. Hamburg (3d. less barley), and to-day even those reduced prices are scarcely obtainable. There is for the time being practically no demand for prompt tonnage. The previous and temporary rise in rates had attracted extra tonnage, and its arrival smashed the market. There are just now four Wilson liners in this port, and they take whatever the shippers offer, for the sake of despatch. These and three other British bottoms are loading in very small quantities at rates varying from 5s. 6d. to 6s. If, as would appear probable, there is to be a repetition of last season's superabundance of tonnage, then there is little or no prospect of an appreciable improvement in freights, even with the advent of the new harvest. At Nicolaieff business is at a complete standstill. Excepting some little cargo offering for Genoa at 7.50frs. there is nothing doing, and the scarcity of grain stocks is more marked than in any other Black Sea port. It is of extremely rare occurrence that the granaries in the Bug emporium are empty and the daily arrivals from the Hinterland so scant. Business at Kherson has quietened down in sympathy with other ports, the demand for tonnage has weakened and the grain arrivals from the upper reaches of the Dnieper are very small and precarious. A prompt steamer was berthed the other day for Hamburg at 7s., but she is loading in driblets. At Novorossisk there has been a little more demand during the week, but rates are unimproved at 6s. Rotterdam, 6s. 3d. Weser, and 6s. 6d. Hamburg. At Khorli-Skadovsk a steamer has been berthed for Rotterdam at 7s., completing the requirements of those two North Crimean and neighbouring ports until the new crop is harvested. The one steamer berthed at Theodosia last week had difficulty in completing in ten days, and in that port, also, there will be further business pending the new harvest.

BRAILA NOTES.

(From Our Own Correspondent.)

Braila, June 6.

The freight market has been very dull this week, the only inquiry being for picked ports in the United Kingdom, which commanded 8s. to 8s.3d. from the Danube and 7s. 3d. from Sulina. The Rotterdam, Antwerp and Hamburg berths were very quiet, the utmost obtainable being 7s., 7s 3d. and 7s. 9d. respectively from the Danube, and 6s. 3d., 6s. 6d. and 7s. from Sulina.

The Mediterranean market is inactive at 9 fr. Danube to West Italy, and 8.50 fr to the Adriatic or Marseilles.

Vessels can load up river down to 22ft. 3in., and can cross Sulina Bar drawing 23ft.

The "Romania Prima Societate Nationala de Navigatiune Maritima" have purchased from a local owner the s.s. "Ecaterini Mateoukis" for £39,000. The ship was built last year, and carries 5,600 tons.

H.-A. PERSIAN GULF LINE.

Yet another development of the Hamburg-Amerika Line was announced last Friday. The company's service to Arabia and the Persian Gulf, which has hitherto been only for freight, will now be extended by providing passenger accommodation. The "Christian X.," a motor ship which has been employed on the New York-Brazil line, will inaugurate the new service, starting on her first trip on the 27th inst., and several freight steamers already employed on the Gulf service are to be provided with cabins for passengers.

SUEZ CANAL TRAFFIC.

The Financial Times reproduces from the annual report of the Suez Canal Company some interesting particulars of the tonnage and voyages recorded by the leading shipping companies using the canal. The record as regards the leading half-dozen companies is as follows:—

Names of Owners	Tonnage.	No. of Voyages.
Ellerman Lines	1,328,000	298
Peninsular & Oriental..	1,205,000	251
Alfred Holt and Co. ..	1,162,000	244
Hansa Line	1,037,000	256
Hamburg-Amerika	790,000	190
Norddeutscher Lloyd..	630,000	106

It will be observed, says *The Financial Times*, that the Ellerman Lines still retain pride of place both as regards tonnage and number of voyages, exceeding by a substantial margin their nearest competitor, the P. and O. It is also satisfactory to note that, as last year, the three leading companies are again British. In the case of every company there is an increase in tonnage as against the total of the previous year, that of the Ellerman Lines amounting to 86,000 tons and of the P. and O. to 73,000 tons, while the other companies also record substantial advances. The total tonnage of vessels passing through the canal during 1913 has risen to the huge figure of 20,034,000 tons.

NEWS IN BRIEF.

Our Jerusalem correspondent telegraphs:—Three fatal cases of bubonic plague were reported from Jaffa last week. A strict quarantine has been imposed.

The French company, "Express de la Marmara," has arranged a regular service of steamers, leaving Constantinople every Thursday, and arriving at Dedeagatch next day.

According to *Al Moghreb al Aksa*, 2,737 Europeans landed at Casablanca during April. Of these 1,558 were French, 603 Spaniards, and 451 Italians.

The Mediterranean Fleet leaves Malta tomorrow for a summer cruise, visiting Corfu and Phalerum Bay. It is understood that a visit will also be paid to Smyrna, and that afterwards the Fleet will divide, the divisions visiting ports on the Syrian coasts, Cyprus, and Alexandria, returning to Malta at the end of July.

The British Syndicate (Messrs. Vickers, Barrow, and Armstrong, Whitworth, and Co., Elswick), which is entrusted with the building of battleships and other war vessels for the Turkish Navy, has, it is understood, arranged with Messrs. Hawthorn, Leslie, and Co., St. Peter's and Hebburn-on-Tyne, for that firm to build and engine six torpedo-boat destroyers for the Ottoman Fleet.

LONDON, June 11.

The failures of Messrs. Chaplin, Milne, Grenfell and Co. and the Canadian Agency have received much more attention than they deserved. Both concerns have long been in trouble. The market, so far from being depressed by the news, has turned optimistic. This is mainly due to the belief that the troubles in Paris are over. Consequently, bears have been buying back and quotations have been hard all the week. The rise seems likely to continue. We must not expect any sort of boom, only a gradual appreciation of gilt-edged securities, consequent upon a continuance of cheap money.

Russian Loan.

The Russian loan has made its appearance and seems likely to be well received. The City of Perm is in the market for £370,000, and it is said that St. Petersburg desires to borrow £2,300,000. The Canadian loan, which it was at first rumoured had been over-subscribed, now turns out to have been a frost.

Internationals Steady.

Foreigners have been steady all the week. Bulgarian 4½ per cent. are 82½. Chinese are steadier also, on talk of a big loan being assured. There has been persistent buying of Egyptian Unified, both for Egyptian and London account, and the price leaves off 99½. Greek Fours are quoted 54. Hungarian Rentes are 82. Tintos are better at 69. Turkish Unified have hardened to 82½. It is now stated that the Bulgarian Loan has fallen through.

Rails Improve.

Home Rails are better. The tone of the whole market has improved. The Southern stocks have been bought on the statement that the Burr family have retired from the management of Kent Coal. There is very little business in Americans and no likelihood of any boom. Trade continues very bad. Traffics grow worse, and the only inspiriting news comes from the Southern States, where the wheat crop is admirable.

Rubber and Oil.

Prices are dull in the Rubber market. The Batavia Investments report was good, the Dutch estates held by this company having done so well that a 15 per cent. dividend can again be paid. Java Para figures are not good, and the shares seem worth selling. The Oil market has again been in a very excited condition. Very large blocks of Spies and North Caucasians have been sold. It is said that these sales have been made by insiders who possess the shares, and are carrying them over in the market. Therefore, they can hardly be said to be genuine bear sales. Shell report was magnificent, the position of the company being stronger than ever. It is rumoured that this company has acquired a concession of Eastern Pioneer. The Egyptian output is excellent, but in spite of this the market in the shares remains dull. Indeed, slight declines have taken place.

Mines Better.

Mining shares have generally improved. A few Kaffirs have been bought, the dividends already announced being on the whole encouraging. The Chartered Company propose to issue a circular intended to reassure their shareholders, but the market is very weak. Russian Mining report should be out in a few days, and the shares have hardened in consequence.

Egyptians More Active.

The Egyptian market has been much more active. Paris, after having held off for some weeks, is now again a buyer, and although Egypt herself is not buying heavily, London is doing her share. National Banks have been a good market at 14 7-16, and there have been a number of bargains in Agricultural Bank, the bulk of them having been done round about 4¾. Land Banks have been purchased by some Paris houses, and have been bid up to 6½. The deferred are quoted 40-45. Bank of Abyssinia remain at 5s. Delta Light Railway prefs. have been asked for at 8½, and some have changed hands at a fraction under that figure. Delta Lands are 8s. 9d. The demand for Behera has fallen off, and the shares are slightly weaker at 8⅞-9. Union Foncière were not affected by the report, and are still 1⅛. Aboukir Land have been sold down as low as 20s., but are now harder at 21s. The United Land figures in the report are about as good as anyone could have expected, but the shares remain at 1s. 9d. Sidi Salem are 5s. Egyptian Investment Trust are 35s. 6d. There has been quite a considerable business in Salt and Soda. Apparently there is a shortage of shares. They are quoted at 15s. New Egyptian have also been bought, and the price has hardened to 10s. 9d. Markets remain at 23s. 6d. Khedivial Mail are unchanged, the prefs. being 3¾ and the ordinary 10s. Daira Sanieh remain at 3s.

BULGARIAN LOAN.

According to a Sofia telegram received in Paris yesterday, the Bulgarian loan negotiations, which were broken off in Berlin earlier in the week, have been renewed on the intervention of Count Berchtold. This is regarded as indicating that the loan is of a political character, and that, should the negotiations with Berlin again fail, Bulgaria would probably find the necessary money on the French market.

BULGARIAN STATE TREASURY.

(FROM OUR OWN CORRESPONDENT.)

SOFIA, June 7.

The Ministry of Finance has published returns of the State Treasury receipts for the period January 1-April 1 of the current year, which show that the Treasury receipts from the various revenues amounted to 46,641,915 frs. for this year's Budget, as compared with 34,868,718 frs. for the previous year, an increase of 11,773,197 frs. Bearing in mind that the collection of taxes for the first three months of the year is usually not an easy matter, these figures are a good sign of the Bulgarian taxpayer's economic ability and the country's financial resources.

The Minister of Finance has introduced into the Chamber a Bill authorising considerable increases of the indirect taxes, and the Estimates for the present year have been made in accordance with the taxation proposed in this Bill. The proposed increases are as follows:—From 10 to 15 centimes per decalitre on native and foreign alcohol; from 40 to 60 frs. per 100 litres on foreign alcoholic drinks; and from 10 to 14 centimes per litre on native and foreign beer. Sugar and confectionery imported is to pay 60 frs. per 100 kilog., instead of 40 frs.; biscuits containing over 25 per cent. of sugar are to be taxed 50 frs., and those containing less than 25 per cent. of sugar 12 frs. 50 centimes per 100 kilog. The tax on petroleum and other mineral oils is to be raised from 5 frs. to 10 frs. per 100 kilogs.; coffee is to pay 85 frs. instead of 50 frs., and cocoa 30 frs. instead of 20 frs. per 100 kilog. Edible oils are to pay 20 frs. instead of 10 frs. per 100 kilog., but cocus oil destined for industrial purposes is exempt. Ether and oils used as a basis for perfumes, and similar products for toilet use, are to pay 300 frs. per 100 kilog. Alcohol for fuel is to pay 10 centimes per litre, and manufactured vinegar the same rate.

THE GREEK BUDGET.

Reuter's Athens correspondent reports that in the Chamber on Tuesday the Minister of Finance submitted the Budget for 1914. The ordinary expenditure amounts to 220,000,000 drachmai (about £8,800,000) and the ordinary revenue to 224,000,000 drachmai (about £8,960,000). The extraordinary expenditure for the fleet and the army, provision for refugees, public works, etc., amounts to 184,000,000 drachmai (£7,360,000), which will be covered by a loan concluded in France.

COMPANY RESULTS, &c.

ALEXANDRIA WATER.—The directors recommend a dividend of 8s. 9d. per share, free of income-tax, for the half-year, payable June 15 (Coupon 51), making 12s. 9d. per share for the year, allocating £11,640 for depreciation and £16,500 to the municipality under the convention.

ANGLO-EGYPTIAN OILFIELDS.—Gemsah production for the week 3,511 tons (last week 2,475 tons). Hurgada production last two weeks 181 and 194 tons.

ANGLO-PERSIAN OIL.—Transfer register will be closed from June 17 to June 30 inclusive. An extraordinary general meeting will be held on Monday.

ANGLO-ROUMANIAN PETROLEUM.—Production for week ended 6th inst., 402 tons. No. 24 cleaning hard cork most of week; during cleaning, 8th inst., well made strong flow, blew out instruments.

BANQUE DE SALONIQUE.—The accounts for 1913 show a net profit of 1,266,322 francs, as compared with 866,980 francs in 1912. A dividend of 5 francs per share is announced. The capital of the company is to be raised from 20 million francs to 30 million francs in view of a fusion with the National Bank of Turkey.

BLACK SEA OILFIELDS.—Production of crude oil for week ending 6th inst., 19,556 poods (315 tons).

CAISSE HYPOTHECAIRE D'EGYPTE.—Payment of 9.60 francs on coupons dated June 15 at the Société Générale de Belgique and at the Banque de Bruxelles, etc.

EGYPTIAN DELTA LIGHT RAILWAYS.—Receipts for ten days ended May 20 amounted to £6,819, an increase of £370 on corresponding period of last year. Aggregate receipts from April 1, £37,534 (increase, £2,512).

EGYPTIAN MARKETS.—Receipts for week ended June 4 amounted to £795, a decrease of £62 on the corresponding period for last year. The aggregate to date is £25,437, a decrease of £1,480.

MINES DU LAURIUM.—The profits for 1912 are reported as 815,000 francs, which will allow of a dividend of 25 francs per share.

NEW EGYPTIAN.—Payment is announced of 5 per cent. (9d. per share) on Coupon No. 5.

OTTOMAN RAILWAY FROM SMYRNA TO AIDIN.—Transfer books of the 4 per cent. First and 5 per cent. Second Debenture stocks will be closed from June 13 to June 30 inclusive.

Receipts for week ended June 6 amounted to £7,285, an increase of £1,865 over the corresponding period of last year.

PIRÆUS, ATHENS, PELOPONNESUS RAILWAY.—Receipts for April amounted to 712,389 drachmai, an increase of 9,547 drachmai on corresponding period of last year. Aggregate from January 1, 2,794,840 drachmai (increase 302,421 drachmai).

SOCIETE ANONYME D'IRRIGATION DE BALIANA.—Payment of 39 P.T. on Coupon No. 4, dated May 29, at the Crédit Lyonnais, Alexandria.

TRAMWAYS D'ALEXANDRIE.—The receipts for seven months, October, 1913, to April, 1914, amounted to 1,372,206 francs, an increase of 49,729 francs over the corresponding period in 1912-13.

LYNCH BROS., LTD.

A "private" company with the above title was registered May 30 by Messrs. Bristows, Cooke and Carpmael, 1, Copthall Buildings, E.C., with a capital of £60,000, in £1 shares (50,000 Six per Cent. Cumulative Preference). The objects are: To take over the business of a merchant and commission agent, carried on by J. F. Lynch in London, Baghdad, Busreh, Mohammerah, and elsewhere in Turkish Arabia and Persia, as Lynch Brothers and Stephen Lynch and Co., and to carry on the same and the business of shipowners, shipbrokers, shipping agents, charterers of ships and vessels, etc. Mr. J. F. Lynch is permanent governing director.

COMPANY NOTES.

Constantinople Telephone.

The annual general meeting of the company was held at the company's office, Telephone House, Stamboul, Constantinople, on Thursday, the 4th inst., Mr. George Franklin, the president of the company, in the chair. The directors' report and accounts for the year ended December 31 last were unanimously adopted, and auditors were appointed for the current year. The prospects of the company continue to be very encouraging, orders having already been received for about 4,800 stations. It is expected that the sub exchanges will be opened, and all existing subscribers connected up within the next four months.

Suez Canal.

The general meeting of the shareholders of the Suez Canal Company was held in Paris on Monday. The president, M. Jonnart, gave an optimistic account of the company's prospects, which, he said, would be only slightly affected by the opening of the Panama Canal. Replying to the criticisms of some shareholders, M. Jonnart said that the fresh reduction of 50c. in the canal tolls was necessitated by the fact that those of the Panama Canal had been fixed at 1.25dol. He also justified the expenditure incurred in dredging and in improving the canal, in view of the tendency of shipping to increase in size. The report was read and adopted, and a dividend of 165fr. was declared. M. Cremer, a former Dutch Minister of Colonies, was elected a director in the place of M. Ruyssenaers, and the three retiring directors, M. Daubrée, Sir Thomas Sutherland and M. Verge, were re-elected.

United Egyptian Lands.

The report of the United Egyptian Lands, Ltd., for the year ended March 31 last, to be presented at the meeting on June 11, states that with the approval of the Mortgage Company of Egypt, Ltd., the area to be reclaimed has been reduced. At Kherba the reclamation of 167 feddans has been proceeded with and the levelling of 195 feddans has been completed. The whole of this part of the property is now ready for cultivation. The Mortgage Company of Egypt, Ltd., has advanced the fourth instalment of £E5,000 of the additional loan so as to enable the company to proceed with the reclamation of its lands at Montaz. This year it is proposed to improve 438 feddans, which will leave only 656 feddans unreclaimed. The cotton crop amounted to 2,300 cantars. In September the plants suffered greatly from the attacks of the ordinary cotton worm and to a larger extent of the pink boll worm. But for these unforeseen circumstances the crop would have yielded a much larger figure. Land sales during the year have been fed 89.7k. 8s., of which fed 25.3k. 21s. sold at £E25 per feddan were unimproved lands; one plot of fed 2.23k. 14s. was sold at £E50 and the remainder, namely fed 61.3k. 21s., at prices varying from £E72 to £E80 per feddan. There have been taken back about 8¼ feddans sold in previous years. Rodah sales were sq. m. 2,347.45 at a total price of £E2,944.550 m. There has not been a great demand for these lands, but it is hoped that the "Rodah Kursaal," which is being built at the north end of the island and which will be opened shortly, will materially help the sales there. The profit and loss account shows a profit of £E476.828 m., which it is suggested should be carried to special reserve fund for depreciation of assets, so as to cover any part of the company's assets the realisation of which might present any difficulty in the future.

Banque Hypothecaire Egyptienne.

The ordinary general meeting was held at the company's offices on May 28. The accounts and directors' report show that the bank had advanced on mortgage, mostly on rural properties, the sum of £E380,000; and that the net profits amount to £E6,762, which with the sum of £E4,514 brought forward makes a total of £E11,000. After setting aside 5 per cent. for statutory reserve, it was decided to distribute a dividend at the rate of 4 per cent., and to carry forward £E6,063. It is satisfactory to note that the affairs of the company are carried on on a basis of solidarity, and that the securities held are all of a first-class order.

COMPANY MEETING.

MORTGAGE COMPANY OF EGYPT.

The sixth ordinary general meeting of the Mortgage Company of Egypt, Limited, was held on Tuesday at the Cannon Street Hotel, E.C., the Right Hon. Viscount Milner (the Chairman) presiding.

The Secretary (Mr. T. F. Stevens) read the notice convening the meeting and the auditors' report.

The Chairman, in moving the adoption of the report and accounts, said: The accounts show that the record of the company during the past year has been one of steady progress. The number and amount of our loans, and the extent and value of the property pledged to us as security for them, have again increased, and there is a corresponding increase in our profits and in the sum available for distribution after providing for debenture and other interest and for the dividend on the preferred shares. We are accordingly in a position to declare a dividend of 8 per cent. on our ordinary shares, as compared with 7 per cent. in the two preceding years, to add £17,500 to our reserve, as compared with £15,000 last year and £12,500 for the year before, and also to wipe out entirely the balance of the expenses of the preferred share issue. After further allocating the usual annual sum of £2,800 to the reduction of the item of discount and expenses of the debenture issues we carry forward £6,184. The only point in which the past year, perhaps, compares somewhat unfavourably with its predecessor is in respect of the amount of new business. A considerable amount of new business has indeed been entered into, but not so large an amount as in previous years. When I last addressed the shareholders I anticipated this reduced rate of expansion and explained the reason for it—namely, the difficulty of raising fresh capital on sufficiently favourable terms. That difficulty has now been removed by the intervention of the Agricultural Bank. This institution was confronted with a position exactly opposite to that of the Mortgage Company, for it had surplus capital seeking investment, while we had more opportunities of investment than we had capital with which to avail ourselves of them. By the association of interests between the two concerns which has now been effected, the surplus capital of the one has become available for developing the business of the other. You will see in our balance-sheet an item of £645,000 of temporary loans. The bulk of this item consists of advances made to us by the Agricultural Bank at a fixed rate of interest, and secured by debenture scrip of the Mortgage Company. The Agricultural Bank, having acquired almost the whole of the ordinary share capital of the Mortgage Company, is interested in extending the business of the latter, and is, at any rate for the immediate future, in a position to provide us with all the money we may need for fresh mortgages of a desirable character.

A fair amount of good business is at present offering, and the current year is likely to show a somewhat greater proportionate increase in the total amount of our loans than the year just concluded. There are two other items in the balance-sheet to which it may be desirable to refer—namely, "Sundry debtors and debit balances" and "Properties acquired through expropriation." The former stands at the high figure of £234,000, the bulk of which represents arrears in the payment of their instalments by mortgagors. As long as arrears are not of too long standing or allowed to accumulate unduly on any particular property there is little cause for disquietude on our part, and we are reluctant to proceed to expropriation. But this step is, of course, sometimes necessary, and when on the occasion of such a forced sale there is no adequate bid we may be obliged ourselves to become the purchaser. This explains the second of the two items in the balance-sheet to which I have just referred—namely, "Properties acquired through expropriation, £39,000." We have no desire permanently to retain these lands, but simply take them over until they can be sold on advantageous terms. We have established a regular system of inspection by which all such properties are from time to time brought under review and the original estimate of their value checked by periodic re-examination.

Turning to the financial position of Egypt generally, there is no material change to record since our last meeting. These are not boom times, but the essential prosperity of Egypt is unassailable, as long as she enjoys political tranquillity and possesses a Government which looks after agriculture and public works. These two fundamentals are assured under the present régime, and as long as that remains the case Egypt will pull through all right, even when she has luck rather against her. Last year, as you know, there was the worst flood on record, and agriculture necessarily suffered to some extent. But while the area under other crops, especially in Upper Egypt, was considerably reduced, the cotton area has been larger than ever and the crop the biggest but one ever known. That this should have been the case, in spite of an extraordinarily bad flood, is the strongest evidence of the immense value of the irrigation works carried out in the last twenty years. If, as seems reasonable to hope, the flood of the present year is a fair one and the price of cotton keeps up, the balance of agricultural prosperity will quickly be restored. I wish I could say that the general business of the country was brisk, but that is not the case. A number of new developments—oil on the Red Sea, cotton in the Sudan, as well as the extensive reclamation of land in the Northern Delta which ought to result from the present drainage works, etc.—must presently make their influence felt; but at the actual moment trade is still dull. The long and painful liquidation which followed the crisis of 1907 has not yet been followed by any period of fresh activity. Egyptian investments continue out of favour. They have had another heavy all-round drop since last year, and now stand, in my opinion, at a price which, in most cases, is decidedly below their intrinsic value. But, as far as our own company is concerned, the depressed condition of Egyptian trade, however regrettable, affords no special cause for anxiety. We have never experienced any other condition. While a turn in the tide may some day bring us added prosperity, there is no reason to fear that we shall have to work under more unfavourable conditions than these, in spite of which we have hitherto thriven in a quite unmistakable manner.

The Hon. Sidney Peel seconded the motion, which was carried unanimously.

Coupon No. 1 of the Imperial Ottoman Government Five per Cent. Treasury Gold Bonds 1913, due on Saturday, will be paid on and after that date at the offices of Messrs. A. Rüffer and Sons, 39, Lombard Street, E.C.

CAISSE HYPOTHECAIRE D'EGYPTE

(Société anonyme).

NEWS FROM ALL SOURCES.

The preparations for the opening of a Faculty of Medicine in connection with the Belgrade University are so well advanced that it is believed that the Faculty will come into operation on September 14 of this year

The journey from Cairo to Alexandria in an automobile was made in 6½ hours on May 31 by Mr. Manhes.

Mr. Frank E. Gruchy, assistant superintendent of the Eastern Telegraph Company, is retiring on July 1, after having spent 41 years in Egypt.

The Egyptian Ministry of Agriculture has issued a circular (No. 49) on "Planting Fruit Trees," which gives valuable information on the subject of transplanting young fruit trees, either with soil attached or with naked roots.

The Government of Sofia has decided for the present not to re-establish the Bulgarian Legation in Cettinje, but will leave its interests to the care of the Austro-Hungarian Minister in that capital.

An exchange of Notes has passed between the United Kingdom and Greece, the text of which was issued [Cd. 7,361] on Wednesday, recording an agreement between the respective Governments relating to commercial travellers' samples

The Hestia announces the opening of a military flying school near Athens.

The importation of coal into Egypt from January 1 to May 28 amounted to 634,266 tons, as compared with 552,817 in the corresponding period of last year.

On May 26 Khartoum was visited by a "habub" which the local Press declares has hardly ever been surpassed for intensity.

An April report from the Berber Province states that the dom nut trade is developing remarkably, largely owing, no doubt, to the produce being cut up before export instead of being exported in bulk.

An attempt is being made by the Government of Egypt to build up native industries, says the U.S. Consul-General at Cairo. Silk weaving has been fostered at Damietta and elsewhere, and now the Government is endeavouring to develop carpet weaving. The industry was introduced at Beni-Suef three years ago, a year later at Abou Tig and Assiut, while at Nag Hamadi it is in its first year. At Beni-Suef a coarse carpet called Kelim is woven. The average price of all woollen carpets is 25s. to 36s. per yard. Formerly the colours were found to wash out, but now the wool is brought from Europe already dyed in fast colours.

Engineers, surveyors, and others who have to do mechanical drawings, and care for that finished appearance which can only be given to a plan or section by keeping the lines in it of an even thickness and securing a regular flow of ink, know well the difficulty of keeping their drawing pens clean and at the same time not varying the thickness of line. This is particularly the case in hot climates, where even the best ink will speedily cake on the pen, necessitating frequent loosening of the nibs. Those who have suffered from such aggravating experiences will be interested in a new patent "swivel-nib drawing-pen," invented and manufactured by Messrs. W. F. Stanley and Co., of 286, High Holborn, whose name alone is sufficient guarantee of its excellence. In this pen the nib is swivelled on a central screw, and when the pen is in use is held in position by a sliding ring; for cleaning it is only necessary to slide the ring back and turn the nib on its swivel; and by reversing the process the pen is at once ready to draw a line of the exact thickness of those drawn before the cleaning operation. Obviously this is a distinct improvement on the old hinged-nib form of pen.

COOK'S NILE STEAMERS AND DAHABEAHS.

THOS. COOK & SON have unequalled facilities for Travellers visiting Egypt, now the premier Winter Resort of the World. Their fleet of **Fourteen Large Passenger Steamers** consists of the finest vessels on the Nile, specially built, luxuriously appointed throughout, and fitted with every modern convenience.

TOURIST SERVICE.—These large and handsomely-fitted Steel Steamers sail once a week from **Cairo** to **Assuan**, and twice a week from **Assiut** to **Assuan**, the sailings from **Cairo** beginning in November, and from **Assiut** in January.

EXPRESS SERVICE.—The Express Steamers also leave **Cairo** twice a week, the Friday departures commencing in November, and the Monday departures in December.

There is thus a Service of **Five Cook's Steamers per week** ascending the Nile to the **First Cataract** during the Season—three from **Cairo** and two from **Assiut**—calling at all points of interest on the Nile, in connection with which complete arrangements for sightseeing and excursions are made, enabling Travellers to visit, to the best advantage, all the famous

PYRAMIDS, TEMPLES, TOMBS, RUINED CITIES, etc.

SECOND CATARACT SERVICE.—In connection with the above Services there is also a Service twice weekly by First-class Steamer from the **First** to the **Second Cataract**, with through bookings to **Khartoum, the Sudan, and Uganda.**

PRIVATE STEAMERS AND DAHABEAHS.—**Thos. Cook & Son** have several small Steamers for charter at moderate rates, specially adapted to the requirements of Families, Private Parties, Sporting Parties, etc., accommodating from eight to sixteen passengers, with competent crews, and thoroughly equipped. Also a large Fleet of First-class Sailing Dahabeahs, the best on the Nile.

NOTES OF THE WEEK.

During the past week the tension between Greece and Turkey has reached an acute stage. The streams of Greek refugees reaching the coast towns of Asia Minor showed no signs of diminution, while the reports of Turkish excesses in the interior multiplied. The Greek Government found itself compelled to take vigorous action. Speaking in the Chamber, M. Venizelos described the situation as grave, and even very grave, and added that "if a stop were not put to the lamentable conditions the Hellenic Government would be forced not to content itself with joining in the lamentations of the unhappy refugees." A strongly worded Note was presented to the Porte, and Greek naval circles became active. But it is by no means inevitable that war should break out between the two countries. The Government organs in the Greek Press announced last Saturday the publication of a Royal Decree formally annexing the islands of Chios and Mytilene to Greece. But the news was premature, for the decree has not yet been promulgated. If such a step were taken, it would undoubtedly exasperate the Turks, but would not eliminate the reluctance which both Governments must have to an outbreak of hostilities.

While the Turkish reply to the Greek Note has been delayed, Talaat Bey, Minister of the Interior, has been touring the affected parts of Asia Minor with a view to checking the persecution of the Greeks or reassuring the inhabitants. The Greek Government is no doubt prepared to learn that many of the reports which have reached it have been exaggerated. But there was probably good ground for the panic which set in among the Greeks, even if a large portion of the refugees have fled for no valid reasons. The circumstances in which this drama is being enacted are entirely foreign to Western conception. In the first place, there has been a steady stream of migration among the inhabitants of what was formerly European Turkey since their territory was apportioned between the Balkan States. Turks have left Greece and Bulgaria, Bulgars and Greeks have left Turkey, and persecution has not always been the cause. Many Moslems have changed their place of residence in preference to living under a Christian Government, while many Greeks and Bulgars have been impelled by patriotism, after the recent wars, to take up their abode in their own countries. It is not impossible that the menace of persecution has intensified these motives, and the migrants would often be anxious to qualify for sympathy and possibly material benefits by representing themselves as refugees and by dwelling on imaginary hardships. We shall hope to hear that the sufferings of the Greeks at the hands of the Turks in Asia Minor have been exaggerated; but the residue of truth in the reports will prevent any defence of the Porte's policy. As far as can be gathered, the persecution of the Greeks and their expulsion from their homes and villages was the first step in a definite plan to check Greek propaganda on the coast of Asia Minor; then the process quickly got out of hand, and systematic outrages became the order of the day. Both sides, unfortunately, have been playing with fire. There has been the boycott of Greeks in Turkey, while, notwithstanding the tension thus engendered, the Greeks decided to celebrate King Constantine's Name Day with ostentatious fervour, and to associate with it the memory of Constantine Palaeologus, the last Byzantine Emperor. The Turks replied by celebrating the anniversary of the capture of Constantinople. Both countries have acted unwisely, for if the two Governments could bring themselves to seek a peaceful relationship, it would be a simple matter to suppress all provocative acts on the part of their respective citizens.

The military intelligence at the disposal of Prince William of Albania has proved as defective as the political intelligence of his numerous advisers. Recent reports from Durazzo had all agreed in representing the insurgent forces outside the town as a dwindling menace. It was declared that there was no danger of an attack on the town, and the insurgents were said to be quarrelling among themselves, and returning in considerable

Digitized by Google

numbers to their respective districts. But on June 15, the day before the date fixed for a combined forward movement against them, the insurgents made a determined attack on Durazzo, and for some hours, if the more voluminous correspondents are to be believed, the fate of the town was in the balance. In the end the attacking force was repulsed with losses that are supposed to have been heavy. The Durazzo garrison lost two killed and thirty-five wounded; but among the former, unfortunately, was Colonel Thomson, the Dutch commander of the gendarmerie. He was shot early in the morning. According to the testimony of *The Times* correspondent, an eye-witness of his death, he had been among the Malissori in their trenches, urging them to advance. He himself led the way, and some followed him, but they soon returned to the cover of the trenches, and there remained. Colonel Thomson, still in the open, was shot shortly afterwards.

On the death of Colonel Thomson, Prince William rode out to the advanced posts, and his action, repeated several times during the day, appears to have encouraged the garrison. The mountain guns at the disposal of the defenders gave them a marked advantage over the attacking force, and even when due allowance is made for the untrustworthy nature of the Malissori, it must be doubtful whether Durazzo was at any time in any real danger of being captured. Fortunately, the panic of a previous occasion was not repeated. The foreign warships in the harbour were asked to turn their guns on the insurgents, but, as the person of the Mpret did not appear to the commander to be in danger, they refused. News of the defeat of a Malissori force sent against the rebels has since been received, and a further attack on Durazzo is reported. If this news be true, it suggests that the losses of the insurgents in the first attack were not as heavy as they were stated to be.

It is too early to gauge the effect of Monday's fighting upon the already complicated situation in Albania. If the defeat of the insurgents is really as thorough as has been represented, and if Colonel Thomson's successor is able to undertake the combined movement which the late commander of the gendarmerie had planned, the whole insurrectionary movement may collapse. On the other hand, the later news is not reassuring. The one satisfactory feature is that the Mpret's bearing during the insurgents' attack seems to have impressed the garrison most favourably, and he may yet be able to take up the line of action which he ought to have adopted at the outset, the line that will bring him into direct touch with his subjects and will alone lay the foundation of a successful reign.

The sad death of Colonel Thomson will have eased the situation in Durazzo in one respect. It will be remembered that the Italian Government was pressing for his dismissal in consequence of his refusal to express regret for the action of a subordinate in arresting two Italian subjects on suspicion of treasonable dealings. The Commission of Inquiry into the incident found among the papers seized certain references in a document which lent colour to the charge, and for this reason Colonel Thomson held that the arrest was justified. With the latter's death the matter will have to be regarded as closed; but it will be hoped that both the Italian and the Albanian Governments will profit by the incident, the one to discourage intrigue on the part of its subjects, the other to keep its advisers well in hand.

The cordiality that marked the meeting between the Emperor Nicholas and King Carol of Roumania at Constantza last Sunday has given satisfaction not only to the Roumanians but also in circles outside Roumania. A simple programme had been arranged for the day's visit. The Russian Imperial Family arrived on the Tsar's yacht "Standart," escorted by Russian men-of-war, and on landing they were received by King Carol, Queen Elizabeth, and members of their family, including Prince Carol, who had travelled from Germany on purpose to be present. Divine service at the cathedral was attended, and luncheon was served in the Royal Pavilion. On the way to the cathedral King Carol gave the name of the Emperor Nicholas II. Regiment to the 5th Regiment of Red Hussars, whose fine appearance had elicited the Tsar's approval. At the luncheon the warmth of the toasts exchanged provided a subject for general comment, the Tsar's expression of the hope that nothing will trouble the pacific development of Roumania being regarded as an indication that the latter may count on Russian support in her efforts to insist upon the maintenance of peace, at least for the present, in the Near East.

The British Government's proposal to acquire capital in the Anglo-Persian Oil Company to the amount of £2,200,000 for the purpose of maintaining an assured supply of oil fuel for the Navy has obtained the sanction of the House of Commons in regard to the money resolution introduced in Committee, and a Bill authorizing the project will shortly be submitted to Parliament. Perhaps the most significant feature of the debate was the manner in which the Foreign Secretary made light of the bearing that the investment of State funds should have on British foreign policy in Persia. "Even if the worst came to the worst," said Sir Edward Grey, "in the case of local disturbances the task of protecting those 150 miles of pipe line would not be so serious as was made out. Even if there were an emergency so great that it was necessary for the protection of the pipe lines to employ British troops it would not be such a very formidable operation." When it is remembered that for years the employment of British troops for the protection of British trade interests has been rejected—the troops now in the country being merely used as a consular guard—this sudden *volte face* in Sir Edward Grey's attitude can only be explained by the assumption that now that the Government itself has embarked upon a mercantile career in Persia it realises in *propria persona* where the commercial shoe pinches in that country. It is easy to preach at the Government for not having realised this before—on the evidence of others—but it is preferable to welcome its belated conversion, and prepare for the enhanced security which will benefit other British trade beside that which is expected to alleviate the taxpayer out of its profits.

The possibility of using a British airship for operations in Somaliland is under consideration, and two naval aeronauts have gone to Berbera to conduct investigations. In the circumstances it is natural that reticence should be observed regarding the details of the project. But the first question to be asked by those who have followed the recent course of events in Somaliland will be whether this new move by the British Government implies further activities on the part of the Mad Mullah, or whether the Secretary of State for the Colonies, who four months ago described the Mullah as an old man in an advanced stage of dropsy and physically immovable, is merely anxious to check his diagnosis by observations from an airship. The expedition can hardly fail to add to our knowledge, but whether in the domain of aeronautics or therapeutics only the event can prove.

The Government has introduced a Bill to alter the allocation of the £3,000,000 granted to the Sudan under last year's Loans Act. As the result of Lord Kitchener's personal inspection, it has been decided that more money than was originally intended could be devoted with advantage to the irrigation of the Gezireh Plain, while other projects could be postponed. The new Bill accordingly asks for authority for the expenditure of £2,000,000 on the Gezireh irrigation scheme, £200,000 on minor irrigation schemes, and £800,000 on railway extension. With the construction of a dam on the Blue Nile costing £1,400,000 and a canal costing £600,000, it is estimated that the area to be irrigated by these means will produce 10,000 tons of cotton annually, and that the result will be an increase of a quarter of a million pounds annually in the Sudan revenue.

CONSTANTINOPLE LETTER.

(From Our Own Correspondent.)

Constantinople, June 12.

The Greek Emigration.

Since the Œcumenical Patriarch, acting, it is generally believed, under pressure from the Holy Synod, decided to close the Greek schools and churches as a protest against the continuance of the anti-Greek boycott and the "forced emigration" of Greeks from Thrace and Asia Minor, the situation has changed for the worse. The Patriarch's decision was taken in consequence of the news that arrived here from various points on the Anatolian coast and from Samsun. At the latter place the Greeks who objected to housing Moslem refugees—and it is, of course, very difficult for Moslems and Christians, even if they are on good terms, to live *en famille* together under the same roof, for social reasons—made a "demonstration." It is quite impossible to say what happened because only the Greek account of the affair has been published; but the upshot of it was that the gendarmerie intervened, and one or more Greeks were killed. At the Dardanelles the refugees, encouraged by the local committee bosses, who are making a good thing out of the sale of cattle and sheep which they have bought dirt cheap from the Greeks who are quitting Thrace and Anatolia, entered the Greek villages, and in many cases beat and plundered the inhabitants, with the result that a general exodus began. The local Commandant of Gendarmerie intervened in one instance where bloodshed seemed inevitable, and ordered his men to fire upon the muhadjirs, who thereupon made off without waiting for a volley. He was shortly afterwards dismissed by telegraph—which certainly looks suspicious!

At Aivali and Edremid there seems to have been a good deal of ill-treatment of the Greeks. At one place in the Pergama region, Ayasmid by name, the muhadjirs and some local scamps plundered and threatened to kill the Greeks, but here, if report speaks truly, the troops intervened on the 8th instant and shot down some of the mob, with the result that quiet was quickly restored. On the coast opposite Chios the installation of a few refugees produced a regular panic among the Greeks, who fled to the islands, leaving all their property behind. In consequence of this a steamer bound for Syria, with Servian-Moslem (Bosniak) and Albanian refugees on board, was ordered to land her passengers at Tchesmé, which was done. In this region, in fact everywhere south of Aivali, no harm was done to any individuals.

Government and the Movement.

There is considerable difference of opinion among foreigners here as to the extent to which the Government is responsible for the anti-Greek movement that has created the general atmosphere of panic which now prevails. Some Europeans hold that the whole business has been engineered from on high. The majority, however, take the view that the authorities, while by no means averse to it at the outset and, indeed, anxious to strengthen the "Turkish garrison" in Thrace, for reasons which have already been set forth, were taken by surprise by the rapid southward extension of the agitation, and while not averse to the formation of strong settlements of Moslem colonists on the coast facing Chios and Mytilene, did not anticipate the rush for Greek villages which local politicians and wire-pullers would seem to have inspired. The attitude of the Vali of Smyrna and of the Minister of the Interior during the last week gives the impression that both these important members of the Government and of the party in power were obliged to modify their optimistic attitude rather suddenly. Rahmi Bey, so a well-informed correspondent tells me, was very anxious indeed on Monday last, and was actively engaged in taking precautionary measures. Talaat Bey suddenly left Constantinople for a tour in the country between the Dardanelles and Smyrna, after having a few days previously assured the world in general that nothing was really amiss. One cannot help doubting whether the young rulers of Turkey, strong-handed as they are, are quite as capable of controlling their subordinates and the masses as was Abdul Hamid. To give the devil his due, that sovereign had a most uncanny power over the Moslems of Turkey. He might order a massacre, he might give a hint that some element in the Empire needed "repressive treatment," but as soon as he felt that repression had gone too far and troublesome ambassadors made a fuss, or revolutionaries waxed too desperate, counter orders came, and were instantly obeyed. He could order what amounted to civil war on Monday and secure perfect peace—based perhaps on the emptiness of the land, —*solitudinem fecit pacem appellavit*—in a week's time. His successors have found that a movement based on national prejudices once set going cannot be easily kept under control. That seems to be the chief lesson of recent events.

The Boycott.

I regret to say that the anti-Greek boycott continues to exist in this part of Turkey, and has of late extended to foreign shipping. There have been cases of the boycotting of British ships at Bartin, Zunguldak, and in the Golden Horn itself. Consular protests have been temporarily successful, but as soon as the boycott terminates in one place it begins in another. The agent of the Messageries Maritimes at at least one port has informed the French Embassy that he will be obliged to advise that company to cease instructing its steamers to call if the boycott continues. It is to be hoped that those who direct the boycott will understand, or be forced to understand, that foreign capital and foreign political support will not be attracted to the Ottoman Empire by such means. The Near East has recently published in its correspondence columns letters from numerous British Turcophiles who demand that Great Britain should give Turkey more help than she is now inclined to do. Well, we have given Turkey some British officials and officers who do excellent work when they are allowed to do so, and have, to a large extent, improved affairs in the departments which they are helping to reform. But we do not, any more than any other nation, render aid to foreign Governments out of pure philanthropy, and these cases of the boycott of British shipping, coupled with the attitude of the authorities towards British companies, the publication, despite the severe Press Laws, of violently pan-Islamic articles in certain organs which cater for Indian and Egyptian readers, and the increase in the numbers of Turkish spies and *agents provocateurs* in Egypt, to which our Cairo correspondent has referred on more than one occasion, arouse the impression that the Turks have not yet mastered the meaning of the word "reciprocity," and that till they do so, British opinion will not, and cannot, second the efforts of Anglo-Ottoman Societies and Associations. For though we are emphatically a humanitarian people, we are also, on the whole, a business-like one.

The Moslems resident in London assembled at the Caxton Hall on the evening of June 12 to celebrate the fall of Constantinople. Ali Hikmet Nahid Bey, the Vice-President of the Islamic Society, was among the speakers. The Sphinx Society was represented in the celebration, which was simultaneous with a similar gathering in Constantinople itself, where the fall of the city into Moslem hands in 1453 is celebrated every year with great ceremony.

LETTER FROM CAIRO.

(From Our Own Correspondent.)

Cairo, June 11.

Lord Kitchener in the Provinces.

Lord Kitchener made a tour of certain parts of Lower Egypt last week, in order to see what progress had been made and the general state of the crops. The British Agent, who was accompanied by Mr. Ronald Graham, the Adviser to the Interior (whose contract, by-the-bye, has been renewed for two years), Major Fitzgerald, and Lord Colum Crichton Stuart, visited first of all Sharkia, where he inspected the schools at Zagazig and the land at Kanayat, which has resulted from the filling in of a large birket, 12 feddans in area, and the condition of which shows what benefits will accrue to the various communities as soon as the new law regulating the filling in of these swamps and pools comes into force. His Lordship afterwards proceeded to Mansura, the capital of the Dakahlia Province, and also visited Tanta and Damanhour, where he carried out similar inspections. The whole tour lasted two days, and the British Agent expressed his very great satisfaction at everything he saw, and at the rapid advance made with all the local improvements that have been undertaken. Yesterday he spent the morning in inaugurating the new branch-line which has been laid between Chohada and Menuf, and is expected to be of great benefit to the Menufia Province (by so many called the Garden of Egypt).

Apropos of the Khedive's recent tour through the Delta, his Highness ordered Hafez Bey Awad, the editor of *El Moayed*, to compile a complete history thereof. It appears that those who were honoured by a visit from their Sovereign have been requested to send their photographs and a remittance to cover the cost of manufacturing the blocks. A polemic has now arisen in the Nationalist Press in regard to the price at which this history is to be sold to the public, and the suggestion has been made that it should be distributed gratis. It would be interesting to know what amounts the notables are being asked to pay as a price of the printing of their photographs.

A Senussi Visitor.

On Friday last Sheikh Seyyid Idris Es-Senussi, grandson of the late head of the great sect, arrived in Alexandria. He was conveyed by special train from the terminus of the Mariut railway, and was met on arrival by the sub-governor of Alexandria. Seyyid Idris, who is staying at Ras-el-Tin Palace as the guest of the Khedive, has come from Jarabub, and is said to be on his way to the Hejaz, where he intends to make a pilgrimage. But there is a firm conviction that, notwithstanding the declaration made to the contrary in certain vernacular organs, his visit has some political object, and may not be unconnected with the difficulties between Italy and the Senussi sect.

The Secret Police.

Systematic attacks have been made of late from a certain quarter on the secret police. The force may at times appear to be unsuccessful in its efforts at tracing criminals, but it must be remembered that it works under peculiar difficulties, and that the activities of certain political agents are a great strain on its resources. Nevertheless, of late it has achieved some very signal successes; and that it is doing its duty is abundantly proved by the fact that the afore-mentioned attacks come from a quarter that has every reason to desire the removal of the present heads, whose activity and resourcefulness must ever be a great embarrassment to it.

The Legislative Assembly.

The Legislative Assembly has at length passed the Wakfs Budget. The discussion has taken up three sittings, leaving out of account the time wasted over the debate on the legality of the creation of the Ministry. Little profit has been derived from the discussion, as the Assembly in the end agreed to leave the whole question in the hands of the Minister, who promised to bear in mind all the points made by the Committee. It is regrettable that the second day of the debate witnessed a most disgraceful scene between two of the delegates, who were only prevented from coming to blows by the timely intervention of their colleagues.

LORD KITCHENER'S REPORT.

Egyptian Press Opinion.

(From Our Own Correspondent.)

Cairo, June 3.

As might be expected, Lord Kitchener's report has bulked largely in the local Press during the past few days. Once again a certain amount of disappointment is expressed at the omission of any comments or remarks on events of recent occurrence. This *Le Phare d'Alexandrie* voices when it says:—

> We would like to have known why such great haste was shown in transforming the Wakfs Administration into a Ministry without taking the opinion of the Legislative Assembly. We would like to have had Lord Kitchener's opinion on the recent Ministerial crisis . . . the phases of which still remain wrapped in mystery. . . . Likewise in connection with the Khedive's triumphal tour through Lower Egypt.

With regard to these alleged omissions, it is only fair to say that the Ministerial crisis and the Khedive's tour took place after the report had been penned—the footnote giving the reconstituted Ministry was added whilst it was still in the press—and as for the Wakfs affair the recent statement made by the Prime Minister demonstrated sufficiently why no explanation was afforded by the British Agent. *The Phare* makes a more or less veiled attack on Lord Kitchener, but those who are aware of the relations which it maintains with a certain well-known native circle do not pay much attention thereto.

With this and one other notable exception, to which I shall refer later on, the European Press is distinctly favourable to the report. *The Egyptian Gazette* states—

> That it is "in entire agreement with the British Agent's remarks on the subject" of the development of representative government and of public health. It approves of the warning conveyed to the Legislative Assembly, and with regard to Lord Kitchener's statement anent the reform or abolition of the Capitulations, it has "reason to believe that the British Government has not yet referred this matter to the consideration of the Powers interested," whilst "it is difficult to see how any change can be made unless Great Britain gives some undertaking that the occupation of this country will be permanent."

L'Egypte points out that certain clever people have drawn erroneous conclusions from this same statement of the British Agent, and that the latter, whilst he says he hopes that a settlement will not be delayed much longer, does not forecast the immediate abolition of the Capitulations or the Mixed Courts. It concludes by saying:—

> In our opinion, Lord Kitchener's report, which on the whole betrays his optimism, appears to us to be optimistic for the Egyptian people. And we think we are right; in any case we are full of confidence.

It also approves of the warning given to the Assembly.

Les Nouvelles agrees with the last remarks quoted from *L'Egypte*. It draws attention to "Lord Kitchener's Liberalism, which has helped to draw this country towards reforms, the details of which may be open to discussion, but the general utility of which cannot be doubted." It underlines the British Agent's absolute frankness, and says that the essay on Egyptian representative government contained in his report merits close study.

The Egyptian Mail says:—

> The tone of the introduction . . . is optimistic, and should go far to reassure those sections of public opinion at home, as represented by *The Economist* and *The Manchester Guardian*, as to the sound financial position of the country and the efforts being made to foster the growth of representative institutions,

and it hopes that the British Agent's warning to the Legislative Assembly will be heeded.

La Bourse Egyptienne considers that the Assembly has fully justified Lord Kitchener's optimistic expectations, for it appears to regard the actions of the delegates as due to inexperience, and it expresses the hope that the Co-operative Syndicate Bill will be dealt with in a purely practical manner. This journal is amongst those who have jumped to the conclusion that the "Capitulations" question will be settled almost immediately.

The one exception amongst the European papers is *La Reforme*, which makes a determined attack on the Five Feddan Law, and uses the statistics contained in

Digitized by Google

the report to prove its case. Its editor says that—

"Five years hence the Five Feddan Law will have produced its sure effect, but it will not be the one aimed at by Lord Kitchener," and in another article he says that "if the debts of the fellaheen are overwhelming, this is due to the action of the Five Feddan Law."

From quite an unexpected quarter comes a defender in the person of *Al Mahroussa*, usually an organ of somewhat extremist tendencies. It takes up the cudgels against *La Reforme*, and says in reply to the latter's question as to what will happen to the property of the small cultivators if in 1918, when the present loan deeds cannot be renewed any more, the creditors foreclose on it:—

If the Five Feddan Law had not been promulgated, would this property not have been lost? Would the fellah have increased his indebtedness or not? And this property, would it or would it not have become the property of the creditors? There is no doubt as to the reply to these questions, and the Five Feddan Law, even if its sole merit were the placing of a term on the increase of the indebtedness of the small fellah, would draw from this circumstance the amplest justification for its introduction.

Al Watan (Coptic) and *Al Ahali* (ex-Ministerial organ) both comment on Lord Kitchener's remarks anent the Legislative Assembly, and approve of the warning given, of which they hope the delegates will take the fullest note. *Al Ahali*, however, thinks that if one, two, or three deputies resort to extreme tactics, it is scarcely just to hold the entire Assembly responsible for this. It is of opinion that parties are necessary, but is certain that the moderate spirits will always succeed in overcoming the radicalism of a few isolated members.

The two Nationalist papers *Al Ahram* and *Al Afkar* both comment on Lord Kitchener's opening remarks, that tranquillity reigns in the country. Both affirm that it is to be inferred therefrom that the country was troubled and agitated before the present British Agent's advent, and whilst the first-named declares that the agitation was not national, but was due to a few individuals, the second affirms that the unrest was a pure fiction created by the late Premier, who thought to profit thereby by making out that he had saved the State by his efforts and exceptional measures.

Al Moayad publishes a series of articles wherein great satisfaction is expressed at the importance attached by the British Agent to the state of hygiene in the country. It criticises some of the administrative measures taken, and declares that the medical staff is inadequate, but it is of opinion that the system outlined by Lord Kitchener will attain the wished-for results, provided it is applied generally and simultaneously all over the country.

Several vernacular organs take up the question of the public security and Lord Kitchener's remarks on the subject. *Al Misr* (Coptic) lays particular stress on the fact that the British Agent throws all the responsibility on the shoulders of the Mudirs, and points out that Lord Kitchener very probably intends to appoint British inspectors in the Mudirias for the purpose of controlling the public security. It reminds its readers that Lord Cromer had a similar project in mind when he retired, and that Sir E. Gorst rejected the idea, preferring to give the Mudirs more authority; and it concludes, although the report is vague in its terms, that Lord Kitchener has decided to return to the first project.

One other comment merits quotation. It appears at the end of a long article published by *Al Bassir*, wherein Lord Cromer's report for 1906 is compared with the one just issued. It considers that conditions to-day are far more satisfactory taken all round, and it concludes with the following tribute:—"Lord Kitchener is a man of action, rather than a man of speech; after reflection he executes rapidly his projects. Many have criticised this rapidity, which is nevertheless justified by the economy in time which it effects. Al Lord does not cease his efforts to serve the country. Seeking to serve the interests of the fellah before those of the rich, and interesting himself in the agricultural, moral, and economic affairs of the country, Lord Kitchener merits the highest praise."

From the foregoing quotation it can be seen that Lord Kitchener's report has given general satisfaction. The one or two dissentient voices come from camps that are not entirely disinterested, and were expected to speak as they have spoken.

THE ARMENIAN QUESTION.

Interview with Boghos Pasha Nubar.

(From Our Own Correspondent.)

Cairo, June 3.

Boghos Pasha Nubar, who returned to Egypt in March after successful negotiations with the Powers and the Porte in connection with the Armenian question, is again leaving in a few days for Europe, where he will spend the summer. I had the pleasure of a conversation the other day with the President of the Armenian Delegation at his charming palace at Heliopolis, and he was good enough to explain the object of the agitation and to give me his views on the present situation.

The Armenians had been oppressed, outraged, and massacred for years. From a majority they had fallen to a minority, which laid them more than ever at the mercy of their non-Christian fellow Ottomans. Matters had gradually reached a point where they felt they could no longer endure in silence, and it was evident that unless reforms were introduced it would be impossible to avoid foreign intervention. Russia, urged by the large Armenian and Kurd population which lived within her frontiers adjacent to the scene of trouble, would have intervened, and European intervention would assuredly not have stopped there; for all the other Powers interested in the Eastern question could not be expected to remain inactive, and would certainly have scrambled for what they considered not unnaturally to be their rightful compensation for the extension by Russia of her sphere. In other words, troubles in Armenia would have entailed a general conflagration and the dismemberment of the Turkish Empire.

In reality, therefore, the granting of the demands of the Armenians was in the interest of Europe, which did not seriously want a war, and of Turkey, which would obviously be the loser by any intervention. It was certainly not under such circumstances in the interest of Armenians to provoke such intervention—though in sheer desperation they would undoubtedly have adopted such a course as a last resort; for they have no desire to become annexed to Russia, and, in fact, want to remain under the Ottoman flag, if they can only enjoy security and justice.

Nubar Pasha said that it was accordingly decided to appeal to the Powers who had been signatories to the Peace of Berlin. Since he was quite independent of the Turkish Government—he is, of course, domiciled in Egypt—and could also appear before Europe as a personally disinterested advocate, he was asked by the Catholicos of Etchmiadzin—whom one might term the Pope of the Armenian Church, and who, under the peculiar conditions existing in the Ottoman Empire, is the officially recognised head of the community and of Armenians all the world over—to accept the presidency of a delegation which should plead the cause of Armenia before the European Chancelleries.

His great difficulty had been to convince the Porte and the Powers—especially the Triple Alliance—that the people he represented did not ask for autonomy or anything that might be construed as leading to detachment from the Ottoman Empire, and that all they demanded was the introduction of reforms that would ensure to them justice and immunity from the attacks of their non-Christian fellow-subjects, from whom the local authorities afforded them no protection whatsoever.

As soon as the fears of the Powers and the Porte on this score had been set at rest they began to realise that the demands of the Armenians merited consideration. The door was thus opened to negotiation, and as the result a definite and satisfactory agreement was arrived at in February last. The Powers took two months to prepare their list of candidates for the two Inspector-Generalships, but Nubar Pasha did not regard that period as unduly long, considering that the sphere of selection was confined to subjects of the minor Powers, whose experience of colonial administration was naturally limited—the nature of the administration to be introduced in Armenia is to be what one might call colonial—and that great care had to be taken to choose the very best men. Indeed, he thought that by comparison with the usual diplomatic procedure the work had been done very speedily, and that this showed that the Powers were impressed with the urgency and justice of the Armenian demands. Moreover, the Porte showed great alacrity in making its selection, and this he regarded as a favourable symptom.

Questioned as to the probability of success crowning their efforts, Nubar Pasha said that he had every hope that the terms of the agreement and the very wide powers given to the Inspectors-General, who will very soon proceed to take up their duties, would enable them to introduce a state of affairs that would satisfy the Armenians and at the same time conciliate the other elements of the six vilayets. Thus his fellow-countrymen would be enabled to devote to useful purposes and the benefit of the Empire the intelligence and the energy for which they are renowned, and in time the "Armenian Question" would vanish into oblivion.

He added that he could not help regarding the promptitude with which the recent Kurdish outrages were handled as an earnest of the eventual success of the arrangement made, and of the desire on the part of the present Ottoman Government to do all in its power to assist. Heretofore the local authorities had looked on impassively at, if they did not actually encourage, such attacks on Christians, and the action taken in this instance might be looked upon as an eloquent sign of the times, and as an indication that the Porte was becoming alive to its own interests.

Nubar Pasha told me that when the agreement was settled he resigned the presidency of the Delegation, but that the Catholicos had asked him, as he had conducted all the negotiations, to assist in settling any difficulties that might arise in the course of the introduction of the new régime. As the work of reform is about to be taken in hand Nubar Pasha is proceeding to Europe, where he will hold himself in readiness again to intervene with the Powers and the Porte, though he has every hope that the necessity will not arise.

Undoubtedly the Armenians owe a great debt of gratitude to their compatriot, who has neglected his own important affairs in order to plead their cause, and who has succeeded so strikingly in obtaining a hearing for them. In time, too, Europe and Turkey will also realise how much they owe to the son of Egypt's famous statesman; for the settlement of the "Armenian Question" will remove from the Eastern political arena a point of contact that has hitherto been pregnant with danger for the peace of Europe, and will postpone the day of the dismemberment of the Ottoman Empire, which so many regard as inevitable. Indeed, the settlement of the Armenian Question might quite possibly lead to a consolidation of the Ottoman Empire if the Porte would only learn its lesson therefrom, and apply the same principles in its dealings with its other dependencies, at the bottom of whose present agitation lies after all but a longing for justice, peace, and security.

NOTES FROM BULGARIA.

(From Our Own Correspondent.)

Sofia, June 14.

Anti-Greek Feeling.

Public opinion here has been violently agitated by the constant influx of refugees expelled from Greek Macedonia, by their state of destitution, and by the tales they tell of what they have suffered at the hands of the Greeks. Since the Name Day of King Constantine, when the Greeks here and in Varna hoisted their flag over their churches, this feeling has manifested itself in marked fashion; and at Varna, Shumla, and Stainmaka churches and schools have been seized by angry crowds.

Questioned in the Chamber about these demonstrations, the Prime Minister stated that the Government highly disapproves of excesses and violence against the Greeks, and added that rigorous measures were being taken for their repression. The agitation is apparently engineered by the Opposition, for at Varna the demonstration was headed by the Mayor, who is an opponent of the present Government. At Burgas the movement was led by the Kavass of the Russian Consulate, who was subsequently handed over by the Consul to the authorities, that his conduct might be investigated. The Greek Church here, which is the property of the Legation, has been restored. But a great crowd, mostly refugees, attacked the Greek shops here, and destroyed their contents. As the police were not strong enough to quell the disorder, cavalry and the fire brigade were summoned to assist, and, after arresting many of the rioters, cleared the streets. In consequence of these disturbances the Prefect of Police has ordered that all bars, cafés, theatres, and music halls shall close at eight o'clock, and that nobody is to be abroad in the streets after ten.

The officials of the three allied Liberal groups have addressed a circular letter to their party organisations in the provinces urging their supporters to offer vigorous opposition to the anti-Greek movement, which is due to the political opponents of the Government, who seek to use it as a lever to overthrow their rivals.

The Government has instructed the Bulgarian Chargé d'Affaires at Athens to express its regret for the unfortunate events; to give assurances that it is taking steps to suppress the movement, and that it will seriously punish the culprits; and to request the Hellenic Government to adopt a more humane treatment of its Bulgar subjects in Macedonia, thus putting an end to the emigration that is the root cause of the trouble here.

Return of Mr. Toncheff.

Mr. Toncheff, the Minister of Finance, returned here yesterday from Berlin, although the agreement regarding the Loan has not yet been signed. He states that he has succeeded in securing for Bulgaria a loan of £20,000,000 on more favourable terms than either Greece or Servia was able to obtain. No monopoly of the tobacco export is to be granted; but the Minister added that it had been agreed in Berlin that the terms of the bargain should not be disclosed before the signing of the agreement. This, it is expected, will be accomplished here by next Wednesday, when a representative of the leading banks will arrive here bringing it for signature. The happy issue of the negotiations has had an immediate result, for yesterday the rate of exchange was down one point.

As the regular Budget for this year has not yet been considered by the Sobranje, one-twelfth (for the current month of June O.S.) has been voted, on the proposition of the Minister of Finance. During the month the Government will submit the new Loan for the guidance of the Chamber, and immediately afterwards the regular Budget for the current year will be introduced.

Bulgarian Mission to Persia.

The Prime Minister has informed the Cabinet that an invitation has been forwarded—through Berlin—by the Persian Government for Bulgaria to send a special mission to Persia for the Coronation of the young Shah, which will take place next month. The Cabinet decided that the invitation should be accepted.

THE CONSTANTZA MEETING.

(From Our Special Correspondent.)

Bucharest, June 13.

Does the solution of the Balkan imbroglio lie in Bucharest? Are Roumania's power, weight and influence to be the predominant factors in the peninsula which is slowly emerging from the effects of prolonged strife? The question is an interesting one, and one that concerns us more closely than might be judged by the unjustifiable silence of the British Press on an event of the first political importance, namely, the visit of the Tsar of Russia to the King of Roumania.

"I would rather be Cæsar here than the second man in Rome." Thus, graphically, can the position of Roumania in the Balkans be defined. A year ago the Roumanians expostulated when they were included among the Balkan States; to-day such a responsible organ as *Le Journal des Balkans* publishes a leading article defining the reasons why Roumania has become a Balkan State. The change is one that should not pass unperceived. Moreover, there is the Treaty of Bucharest, sponsored by Roumania under the auspices of the Powers. When Talaat Bey visited Bucharest he was officially assured that Roumania would not allow its terms to be violated. Statesmen here maintain emphatically that it is not a *lettre morte* as some fondly suppose, that it is very much alive, and that it will be kept alive, by force if necessary. The Powers, perhaps *faute de mieux*, agree, and thus, in a few words, we have the whole situation: Roumania is the one stable, reliable factor in the Balkan situation; possibly even Europe's mandate is in her possession.

The first overt sign of approval comes from Russia. If the Tsar disapproved of King Carol's policy he would not come to Constantza, and his Foreign Minister would not spend two days in the port and three at Bucharest. Shortly before the Balkan War the Tsar sent his Royal neighbour a field-marshal's baton, and the compliment was well deserved, and its recipient well pleased; for he is a soldier and a Hohenzollern who had done Russia yeoman service in the Russo-Turkish War. Austria was, of course, ill-pleased, but she kept her faith in her semi-ally, mainly because its ruler was a Hohenzollern and because a military convention united both countries (it was signed in 1896 for a period of 20 years; will it be renewed?). Then the Balkan War broke out—"it has cost Austria more than a hundred battles," I was told by a statesman a few days ago, and I have since seen the statement repeated by the Press. The timorous, halting policy of the Ballplatz, with now and again sudden flashes in the pan, quickly extinguished by the Wilhelmstrasse, has strengthened Eastern Europe in the belief, right or wrong, that the community of interests between the members of the Triple Alliance, more particularly as regards their actions in the Balkans, is even less pronounced than that between Great Britain and Russia—which is saying a good deal. The deductions are carried even further, and the scision is placed rather between Austria and Hungary than between Austria and Germany. Now, "Hungary is not a State, but a Government," and its Croats, its Serbs, its Roumans, and its Ruthenes are clamouring for the enjoyment of the rights and privileges of self-conscious nationality. Since the Balkan War this clamouring has become more pronounced, perhaps because Servia and Roumania have gained in strength, perhaps also because the Dual Monarchy itself is ageing. Be that as it may, we have the Servians of Servia and the Roumanians of Roumania unofficially supporting their respective nationalities in Hungary. Russia, on the other hand, views with favour these tendencies, not from any particularly humanitarian motive, but because Austria-Hungary is the enemy. "The Tsar's visit," I have been told, "may possibly strengthen our legitimate demands for reforms in Hungary in favour of our fellow-countrymen." In the meantime, there is no likelihood of a change in the Roumanian attitude (official, that is to say, for the people will have nothing to do with the Dual Monarchy) towards the Triple Alliance, but her hands will have been strengthened for the day when she demands justice for the Roumanians in Hungary.

These reflections on the general situation must be taken into consideration when referring to the Tsar's visit to Constantza. It is true that his Imperial Majesty is returning a visit paid him some long time ago by the King of Roumania; it is likewise true that shortly afterwards he is going to Kishineff, the capital of Bessarabia, to commemorate the centenary of the annexation of that province to the Russian Empire, and that this act, without some prior sweet drug, such as the Constantza visit, might have displeased the Roumanian people, as immense numbers of their kinsfolk live in those districts, some of which were actually part of Roumania until 1878. It is also quite possible that the object of the visit is merely in connection with the rumoured union between the two Ruling Houses, which union, we are assured, is devoid of ulterior political motives. On the other hand, however, Mr. Sazonoff remains three days longer in Roumania than his Imperial master, and the political situation is bound to be discussed. The Austrian Press is frankly nervous—this need hardly surprise us—and lectures Roumania on the dangers of the crooked path; while the German Emperor is to visit Bucharest in October to repair the damages suffered by the Triple Alliance in the Near East.

The fact is Roumanian prestige was never so high as it is now; the kingdom of the Lower Danube has reaped the advantages lost by Bulgaria as a result of the second war, and her diplomatists intend to make the best use of their opportunity. Her voice, in favour of Prince William of Wied and of the Treaty of London, has already been heard in the Austro-Italian squabble over Albania; and should Servia ever have to protest against an Austrian advance into that unfortunate country she will have Roumanian backing. Besides, will not the celebrated Vladisvostok-Adriatic line pass through Roumania, Servia, and Albania on its way to the sea—a circumstance not to be lost sight of in discussing the possibilities of friendlier relations between Russia and Roumania?

Last, but not least, at the gathering of Royalties and statesmen in Constantza to-morrow will be the question of a Greco-Turkish outbreak. Roumania's attitude will, in all probability, be defined by the terms of the Treaty of Bucharest, and on her firmness depends, more or less, the course of future developments. While she threatens Bulgaria, the latter can take no part in eventual hostilities, and cannot allow Turkish soldiery to cross her territory into Greek Thrace. The fate of the islands, moreover, hangs in the balance just now. Incidentally it is the aspect of the Balkan situation which interests us most directly, and any strengthening of the entente point of view (if such a point exist) by Roumanian adhesion will have an immediate effect, and will, moreover, convince the Triple Alliance that King Carol's kingdom is no longer to be regarded as a tool in the hands of those who mould the policies of Vienna and Berlin.

SERVIAN LETTER.

(From Our Own Correspondent.)

Belgrade, June 14.

Parliamentary Crisis.

The Parliamentary crisis lasted two weeks, and in the end the same Radical Cabinet was reinstated without any immediate change in the composition of its members, another proof of the weight, authority, and penetrating diplomatic insight of the Prime Minister, Mr. Pashitch. The alliance of the three parliamentary groups in opposition and the action of the clique of dissatisfied army officers caused the Cabinet to resign; but no sooner did they succeed in overthrowing the Administration than there arose dissension among them as to who should reap the benefits.

Dissensions of Opposition.

The Samostalni group considered that they were more numerous than the Progressives or the Nationalists, and wished to form the new Cabinet of their own members only, whereas the Progressives and Nationalists maintained that the battle was won by the three allied groups, and that each party should be represented in the new Administration. As, however, the Samostalni group as well as each of the other opposition groups was separately inferior in numbers to the Ministerialist deputies, the King decided that the Radicals should reconstitute the Cabinet, dissolve the Parliament, and order new elections.

It is thought that the Prime Minister, Mr. Pashitch, who knows his people thoroughly, foresaw what would happen, and calculated on the increased prestige the incapacity of his opponents would give him.

Precedence of the Army.

There was, however, one difficult point he had to overcome. The point of precedence of the military over the civil authorities, which was actively supported by the Army Conspirators of 1903, had considerable weight with the King. Eventually a *modus operandi* was found by which the susceptibilities of the officers would be appeased, leaving the dignity of the civil authorities untouched. But it must not be supposed that the army officers were all of one accord. About 200 officers of the Belgrade garrison, having at their head General Bozho Jankovitch and General Mikailo Rashitch, director of the Military Academy, handed in an address to the Minister of War praying that it might be forwarded to the highest quarter, in which they declared that they were against officers taking part in politics, and consequently condemned the action of the Conspirators, and also protested against those officers acting in the name of the whole body of officers.

In this connection the *Balkan* publishes a letter from a colonel on the active list, which states: "The Government must develop its entire energy, and in no case allow any further interference of the Conspirators in State affairs."

New Armaments Credit.

At the time of the crisis the *Stampa* and other daily papers expressed their regret at a change of Cabinet at a period when it was urgent to pass the Bill granting a credit of nearly £5,000,000 for the renewal of armaments so much needed at such a critical time.

To-morrow Parliament meets, and the first business it will transact will be the adoption of the Bill granting this large credit for military purposes; and after this and some other urgent business shall have been concluded Parliament will be dissolved and new general elections ordered.

External Dangers.

The public is in a very nervous state, and the frequent rumours of Bulgarian war preparations and the existing difficulties and recriminations between Turkey and Greece do not tend to allay anxiety in this country. The nervous feeling concerning Bulgaria and Albania has imposed on the Servian Government the necessity of keeping sufficient military forces on the boundaries of those two countries, and it has been found useful to erect a large number of frontier blockhouses. On the Serbo-Bulgarian boundary, along a distance of nearly 190 miles, ninety-one such buildings are being erected for the accommodation of frontier patrols.

IMPRESSIONS OF SALONIKA.

(From An Occasional Correspondent.)

Salonika, June 11.

St. Constantine's Day.

As the 3rd inst. was the Name Day of the King, the usual full-dress service was held in St. Sophia in the morning. As we have so many occasions in our calendar for services of this description, it is, to say the least, somewhat thoughtless on the part of the authorities that they should order all shops to close until noon and stop the tram service along the quay at the busiest time of the day, to the great inconvenience of a vast number of people. Were there any real necessity for it it would be another matter; but there is not, and the trouble it causes could easily be avoided. When the King himself is here and attends these services that, of course, alters the situation; but it cannot be said it is necessary for the ordinary civil and military officials of the town to disregard so entirely the convenience of the general public.

"Liberty" in New Greece.

In most countries there would be a big outcry in the papers, but here it is very risky to venture on any protest against the powers that be; the editor of the local *Avanti* has just tried the experiment, but was arrested on Tuesday afternoon for daring to criticise the police orders to close the shops on this occasion of his Majesty's name-day. Besides, only last week we had a suggestive and startling illustration of the danger of criticism. A very well-known gentleman of this town, under Austrian protection, was talking to a friend in the tram, speaking not very favourably (he and his friend declare) of the tram administration which recently, by raising the first-class fares, has caused considerable dissatisfaction. However, the gentleman in question was criticising something when an officious fellow-passenger, partly, and imperfectly it is supposed, overhearing the conversation, interfered, stopped the tram at a police station, called the gendarmes, and gave him into custody for insulting the Hellenic Government. Naturally, the accused protested and objected to get down when ordered by the police, but was made to do so by force, was roughly hustled into the station, examined and cross-questioned, and eventually walked off to the Procureur.

A Question for the Consular Court?

Two versions are given of what followed. The official one says that the Austrian Consul, having been informed of what had taken place, went and demanded the prisoner's release, but was told by the Procureur and Governor-General that no interference could be tolerated in favour of the accused; that the fact of being a foreign subject was of no weight in the matter of the administration of the Greek laws; and that he would be tried before the competent tribunal. The Austrian version is, however, somewhat different, being to the effect that the Consul went and energetically protested against the arrest, its illegality, and the manner in which it had been carried out; that the authorities apologised, promised to inquire into the circumstances, and to punish the gendarmes if it were found they had exceeded their duty; and that the accused would certainly have no further trouble in the matter. Anyhow, he was set at liberty; but people are now asking one another whether we are all running the risk of being ignominiously hustled off under arrest on a charge, made by any irresponsible individual, of having criticised the Government; and what protection we can hope for if the high stand taken by the authorities, according to the official version of the incident, is what we have to reckon upon. Moreover, what is to be said of the much-vaunted Greek liberty if it is a crime or misdemeanour to criticise the Government or local administration?

Turkish Tolerance and Christian Charity.

Our tramways are worked under a concession to, and are the property of, a Belgian company; and before the occupation the drivers and conductors were mostly Turks, Greeks, Jews, etc.; in fact, the Turkish authorities left the management with a free hand to engage whatever suited them best. Until the line was electri-

Digitized by Google

fied some four or five years ago there was no rule as to dress, but with the electric cars the men were smartened up in a more uniform manner, the fez being the general headgear. After the occupation the Greek employees ostentatiously discarded the fez and adorned themselves with caps of divers styles and patterns, according to their own individual fancy; but some few months ago peaked caps of a standard pattern, with the men's numbers on them in brass figures, were made compulsory for all except the Turks, who were allowed to retain the fez with their distinctive numbers thereon. Now, as the tram company is altogether a foreign concern, neither Governmental nor municipal, one would have imagined that if they were satisfied with the arrangement there was no call for interference; but our authorities evidently held different views, and accordingly they "invited" the tram management to intimate to those of its employees who wore the fez that they must adopt caps similar to those worn by the others. Of course, everyone knew what this "invitation" really meant, and it has had the anticipated result: the remaining Turkish employees, rather than discard their national headgear, have resigned, and are leaving here to escape the almost certain starvation their remaining would entail. Other Turks, hitherto engaged in municipal and other public work, teaching the duties to raw Greek colleagues, are in the same plight, and are being eliminated in the same manner; but what they really resent is that they are not sent off in a more straightforward manner. One of them told the writer he would far rather be ordered away and expelled than be squeezed out in so backhanded a fashion—but then it would be said the authorities are driving out the Turks, which is just what the former so stoutly repudiate.

THE EX-SHAH AND THE TSAR.

(From Our Own Correspondent.)

Odessa, June 14.

A report has been current in the local Persian colony during the last few days to the effect that Mohammed Ali Shah has urgently requested the honour and favour of a brief audience of the Tsar on the occasion of his Majesty's passage through this city to Kishineff, but with what result is not known. I doubt very much whether there be any real foundation for this rumour, and merely repeat it for what it is worth and under strict reserve. It is not, of course, inherently improbable that the Royal Persian exile should desire the Imperial audience the occasion offers; but that it should be graciously vouchsafed, all the circumstances considered, is altogether improbable, even though the proposal take the simple form and shape of a distinguished guest desiring to thank his Imperial host *in propria persona* for the "hospitality" he "enjoys" in this country.

A DISCLAIMER.

We have been requested to give publicity to the following disclaimer made by the Sardar-i-Zafar regarding statements made by Mr. Abdulla in a letter headed "The Tide of Persian Affairs," published in The Near East on May 8:—

May 26, 1914.

I read with great surprise the baseless imputation made against me in a letter on the situation in Ispahan, published in the issue of May 8 of The Near East. The writer, who signs himself "Abdulla," asserts that I am the Russian candidate for the Ispahan Governorship, and accuses me of conspiracy against my brother, Samsam-es-Saltaneh!

He bases his statements on my presence in Ispahan. My only intention in going to that city, as everyone knows, was to bring my family with me to Teheran, and my arrival in Teheran with my family on May 25 proves the utter baselessness of the writer's imputations and leaves no need for me to indulge in further arguments.

I have proved my patriotism by continued upholding of the cause of the Constitution, and my sons have distinguished themselves in fighting against the reactionary forces. My attitude towards the two great neighbouring Powers has always been courteous, but my actions have not been, and will not be, dictated by any motive except patriotism.

Sardar-i-Zafar, Bakhtiary.

PERSIA AND HER "PROTECTORS."

(From an Occasional Correspondent.)

Tabriz, April 30.

The number of Russian immigrants in Northern Persia is estimated to be between 20,000 and 25,000, and the tide is now flowing towards Azerbaijan, instead of to the north-eastern borders of Persia in the neighbourhood of Turkestan, as it flowed formerly. The Nationalist *Raad* remarked, concerning this Russian flood "According to the Treaty of Turkmanchai, Russians have no such rights." Has *Raad* never heard the everyday Persian saying, "When force comes in at the door, right flies out through the roof"? According to the Treaty of Turkmanchai, Russians had not many rights; but they are enjoying them all to the full now!

Some twenty or twenty-five years ago the Russian colony in Urmia wished to buy a vacant plot of land for a church building scheme, but it was not sold to them. M. Pelrove, the Russian Consul-General in Tabriz at that time, made a special petition to Muzaffer-ed-Din, the Crown Prince, on the subject, and the following summer the Prince, visiting Urmia, bought the piece of land in his own name and presented it to the Russian colony. *Now* Russians and Russian subjects are buying not only single pieces of land, a house, a garden, a water-mill, or a caravanserai, but groups of villages and hundreds of square miles of land. A Russian subject in Urmia has rented from a Persian Princess fifteen villages. Another Russian subject has "rented" 200 villages on the Turco-Persian border on the most acceptable terms, to wit, that one-half of the total income of these 200 villages shall go to the real owner and the other half to the Russian subject for his services in protecting them against Kurdish and Turkish robbers and looters. Allowing the average income for each village to be 2,000 tomans, the total income will be 400,000 tomans, and the Russian (or the man under Russian protection) will in five years (which is the time limit) become a millionaire! Still another has rented eighteen villages, all on the same satisfactory terms of getting one-half of the total income. These villages are "rented" to Russians because the real owners, who are natives, are not able to protect their property year after year against the numerous bands of Kurdish, Turkish, and Persian robbers. Russian subjects are strong, are protected by their Consuls and by their omnipresent army, hence these native landowners are willing to share their income with the hated foreigner, provided that their property is protected by him.

Up to now the *maliat*, or land taxes, of these villages have been paid to the Shah (through the Belgians), but the Russian subjects owning, or "renting," the villages have been ordered—but by whom I cannot tell you—to turn the *maliat* of their villages over to the Russian Bank in Tabriz henceforth. And I am informed that the sum thus realised is to be used for maintaining the Russian troops in this province, which, up to date, has cost the Russian Government some 5,000,000 roubles.

Six Armenian merchants, who are Russian subjects, have bought the famous Jabba Khana bazaar from the Governor-General, Shuja-ed-Dowleh, for 18,000 tomans, and are building new magazines and bazaars on the most up-to-date lines. The ground floor will all be given up to shops, while above will be rooms and offices for (future) doctors and lawyers. The managers propose to cover the entire open space in the centre of this bazaar with a glass roof. To spend 100,000 tomans or more in converting this ruined university into a Persian Crystal Palace will be to give us another ray of that Russian sunshine to which I have referred more than once in previous letters.

News of a small skirmish comes from Kurdistan. Sardar-Mukril ordered Kerim Agha (Kurd chief) to come to Suj Bulak. The Agha refused to obey the order, on the ground that the "Sardar is an agent and tool of the Russian Consul." Thereupon 100 Persian cossacks were sent to arrest him. In the resulting fight Kerim Agha, his two sons, and his brother, Ibrahim Agha, were killed. Four cossacks were killed and three wounded, but the other Kurdish chiefs have been cowed by the incident.

I am informed that the Constitutionalists and Democrats of Tabriz have sent thousands of letters, all written by hand, to the Consuls (British, German, French, and Turkish), complaining that Shuja-ed-Dowleh thwarts their wish to send representatives to Teheran. The liberal elements seem delighted that the Germans are taking a hand in Persian affairs, and most of these letters have gone to the German Consul here. The Germans may be "dipping their hand in the mud of Azerbaijan"; but if so, it is only in their own interests—or to injure Russian interests. As for Shuja-ed-Dowleh, he is a mere figurehead—a scarecrow! Our powerful neighbours in the north are the true masters in this province. Constitution! Do not ask for the impossible, my friends!!

NOTES FROM JERUSALEM.

(From Our Own Correspondent.)

Jerusalem, June 4.

There have been three fatal cases of bubonic plague at Jaffa, so that there is a strict quarantine against the port.

There has been a severe outbreak of typhus fever in the prison here. The patients have been isolated in a temporary hospital near the north-east corner of the walls. Of the Roman Catholic sisters who undertook the nursing no less than three died of the disease. The overcrowding and insanitary condition of this so-called hospital have been disgraceful.

Although there is a great demand for land along the route of the proposed new tramways, there is as yet no evidence of commencing construction. One report has it that the promoters have grave doubts as to the company ever being a paying concern, as the inhabitants of the city are so poor.

LETTERS TO THE EDITOR.

The columns of The Near East *are always open for the discussion of subjects of general interest to its readers. The publication of such letters must not be taken, however, as indicating that the views expressed by the writers are those of* The Near East.

Letters intended for publication MUST be accompanied by the writer's full name and address, not necessarily for publication, but as an evidence of good faith. They should be worded as briefly as possible and must be written on one side of the paper only.

"ROUMANIA TO THE RESCUE."
Idealism and Materialism in Politics.

To the Editor of The Near East

Sir,—The excellent suggestion in last week's Near East, that Roumania should lend a hand in Albania, raises the interesting question of the relative force of idealism and materialism as a political motive. Roumania, you say, is in a good position to render Europe a real service, and by disinterested intervention might add to the leaves of the laurel crown which she has recently been wearing. She would gain prestige.

What else would she gain?

That is unfortunately the question that most Roumanians will ask themselves. For Roumanian and Balkan politicians profess themselves worshippers of the idol of *Realpolitik*. When Roumania brought peace to South-Eastern Europe and established the principle of "Balkan equilibrium"—rather an afterthought, this—she also acquired a rich and prosperous territory and gained the strategic frontier which she had long been known to desire. But in the Roumanian plan of things Adrianople was to remain Bulgarian. King Charles told the Sultan so, and M. Take Jonescu put forward as a *ballon d'essai* the idea that the Roumanian army then near Sofia should march south-east and ensure the possession of Adrianople to Bulgaria. The idea fell perfectly flat. There was nothing to be gained by it. And probably the idea of intervention in Albania will meet with a similar reception in Bucharest.

Not that the materialistic view is by any means confined to South-Eastern Europe. It has become fashionable for the all-powerful "man in the street" to care nothing about foreign politics, except when his own immediate interests are concerned. There is less enthusiasm in England now than formerly for liberty and nationality for the sake of the principle.

Yet men will still lay down their lives most readily, in the Balkans as elsewhere, when the ideal is combined with the practical. The first Balkan war was to the Bulgarians, the Greeks, and the Servians a real war of liberation, undertaken (together with the hope of acquiring territory) on behalf of oppressed kinsmen living under a foreign yoke. And it is not fair, and it is childish, to speak of the Balkan States (as many people do) as "nuisances," just because they seem likely, like every other nation, to achieve their destinies through bloodshed. Much remains to be done by each before it reaches its normal expansion. Their progress has been stayed 500 years by the heavy hand of the Osmanli. They have lost time to make up. Each one desires to improve its international status, and The Near East is heartily to be congratulated on its work in putting this aspect of the Near Eastern question forward and in sympathetically interpreting Balkan aspirations to the British public. In spite of excesses, in spite of meannesses, in spite of savagery, occasional hypocrisy and lapses into barbarism, each country of South-Eastern Europe is breathing daily a fuller, freer national life.—I am, Sir, yours, etc.,

London, June 16, 1914. A. L. Kennedy.

THE ISLANDS OF THE ÆGEAN.

To the Editor of The Near East.

Sir,—Your correspondent, Dr. Nakis, in your issue of June 5, surpasses all precedent even in Near East controversy in his wanton disdain of the most universally known and easily accessible facts.

To take one of his most palpably false statements: "I wish to inform you that Greece's naval supremacy is exclusively due to her excellent seamanship; the Turks possessed two more big warships than the 'Averoff.'" This curious sentence is devoid of truth. Turkey had, and still has, no ship as large as the "Averoff." Dr. Nakis has such an evident distaste for hard, cold facts that one feels some compunction in asking him to glance at a comparison between the "Averoff" and the largest Turkish vessel:—

"Averoff."—Displacement, 10,118 tons. Laid down, 1907; finished, 1911. Guns, 12 heavy, 18 light. Torpedo tubes, 3. Guns electrically controlled.

"Haireddin Barbarossa."—Displacement, 10,060 tons. Built, 1891. Guns, 6 heavy, 16 light. Torpedo tubes, 2. Guns controlled by hydraulic and hand gear.

Thus it will be evident that the "Averoff" had superiority in size, and enormous superiority in newness and equipment to anything the Turks possessed.

I have to thank Dr. Nakis, too, for other pieces of "information" which I know from personal experience to be inaccurate, and for a good deal of unworthy and scurrilous abuse of the Turks as a whole. He tells us that he has been in the East for forty years. One can only say that one would have expected him to be better informed.

He says: "Except the Jews dwelling in great towns and the strangers enjoying particular privilege, all the *other natives* of this country, including the Turks themselves, have a desperately bad opinion of Turkish rule." This statement again is untrue. Nearly everyone is agreed that the rule of Abdul Hamid was desperately bad. That was not the rule of the Turk: it was the tyranny of a selfish and unscrupulous criminal. Brave soldiers and single-hearted patriots like Shevket Pasha and Enver Pasha overthrew the reign of terror and won for Turkey her Constitution, which her least generous enemies—and I am sorry to see Dr. Nakis among them—either in the ignorance of bigotry or in cynical spitefulness make the target of their abuse. Never has a new and inexperienced Government had to struggle against so many crushing difficulties crowded into so short a space of time. Who that thinks but for a moment of the constant succession of disasters that have crowded on Turkey during the past four years could in fairness look for any progress to have been made in them? And yet progress has been made in many directions—in what particulars I am perfectly prepared to inform Dr. Nakis if he should be ignorant of them. Far from its being the case that everyone has a desperately bad opinion of Turkish rule, the general feeling and conviction in the country is that the Government is doing well under exceptionally great difficulties. As everywhere, there is, of course, no lack of grumblers. Who ever met an English farmer on a wet day at harvest time that didn't revile the Government?

If your correspondent had taken a little more trouble to understand the Turk's character he would not have charged him with hypocrisy. That is not one of his failings. The fact of the matter is that many people think that by virtue merely of travelling and seeing they will understand the Turk, but they will never do so until they try to see things for a moment from his point of view. The Pharisee never understood the Publican because he never tried to enter into his point of view.

Lastly, your correspondent wishes to know my grounds for supposing that the friends of Turkey in Europe are increasing. If he would study the growth and work of the Ottoman Association and the Anglo-Ottoman Society, the latter of which has extensive and extending membership on the Continent, he would, I think, be convinced of the truth of the assertion.—Yours, etc.,

Constantinople. Charles Mayo.

THE THRACIAN "PERSECUTIONS."

To the Editor of The Near East.

Sir,—Your correspondent Mr. Arthur Field, without any authority, couples my name with his own when he expresses his regret that he misunderstood the remarks made by "A Member of the Ottoman Association." I would point out to Mr. Field that had I wished to reply to the "Member's" letter in your issue of June 5 I could have done so, and, further, that I am quite capable of expressing my views without Mr. Field's assistance.

Of course, I do not accept Mr. Field's unwarranted assumption.

Your correspondent writes about "my general attitude of scepticism" about outrages. I cannot accept his description of my views. I have expressed these quite definitely, not only in your valuable columns, but also in the general Press and on the lecture platform. I think most people interested understand my views—for what they are worth—quite distinctly.

I admit the ultra-pro-Turk Press will not accept my correspondence. Of course it would be unpleasant for this section of the Press to have its fictions refuted. The public can form their own opinion of these pictures that will not bear the daylight of criticism.

As I have expressed the opinion, and still hold it, that the "atrocity" controversy should be dropped in the interests of all parties I will not further discuss your correspondent's remarks on this subject.

Now, as regards the present troubles in Macedonia, New Servia, and Montengro's new territory, to which your correspondent

Digitized by Google

refers. In the first place, the various and varying accounts of racial or religious persecutions differ so largely that it is difficult to determine what is accurate. But assuming your correspondent's statements to be correct, surely, if he feels the matter so strongly, he should lay the matter strongly before the diplomatic authorities, or, if he can get no satisfaction in this direction, I venture to suggest his society should send out to the districts concerned some strong, impartial men to investigate the facts and accurately report them, and also use their personal influence to make peace. Further, your correspondent might start a relief fund for the sufferers he mentions, and the men sent out might administer the relief funds. If your correspondent will show some *practical* sympathy towards the people he states were ill-treated I am ready to do my utmost to support him, if he will accept my service, in the same manner as I have done hitherto where the Balkans are concerned.

It is hateful to think that the inhabitants of the Balkan Peninsula should be the victims of Stock Exchange speculators, armament manufacturers, and intriguers amongst the Powers. The recent wars abundantly show the presence of all these factors. History, past and present, shows there is no worse intriguer than the Turk.—I am, Sir, yours, etc.,

G. W. C. Hollist, M.R.C.S., etc.

Riseley Lodge, Maidenhead, June 16.

MIGRATION IN THE NEAR EAST.

To the Editor of The Near East.

Sir,—From reports continually coming to hand we know that at the present moment in the Near East the hapless peasantry of various nationalities are being subjected to lawless eviction, often accompanied by great brutality. We read of Greeks being compelled to leave Thrace and Asia Minor, while the Ottoman Association has in its possession ample evidence that Moslems are suffering the same fate in Macedonia. Here they have Bulgars for their fellow-sufferers, and in Bulgaria there are natural reprisals, and the Greeks are insulted, outraged, and driven out. Meanwhile, in the case of Turkey and Greece, at any rate, the respective Governments give assurances that the reports are either false or exaggerated, or, at any rate, that where the subject nationalities have real grievances the central authorities are desirous of putting an end to them.

We may fairly concede the probability of exaggeration in some of the reports, and there is no need to accuse the Governments concerned of the wilful folly of deliberately conniving at disorder, but none can look at the facts of the case without realising that, in view of the hideous racial antipathies which unfortunately exist—antipathies which are quite as strong between the different Christian races as between them and the Mohammedans—there seems little prospect that in the near future these different peoples will live peaceably side by side, and, therefore, their present migration to the territories governed by their respective States is ultimately the best thing that can happen. The pity of it is that this salutary process should be accompanied by violence and outrage, and especially that in such impoverished communities the destruction of both life and property should continue. I suggest, therefore, that the best thing which the friends of the various nationalities can do is to endeavour to induce the respective Governments to put their heads together and assist these wholesale migrations in an orderly and peaceful manner. In this way much needless suffering would be prevented and the probability of further warfare considerably lessened.

I would also make a special appeal to my phil-Hellenic friends at the present juncture. At the moment when they ought to be recovering from the effects of two wars, which have exhausted the treasuries of all concerned, and when each has got thousands of homeless refugees to support, maimed soldiers, and, alas! non-combatants also, to care for and old antagonisms to heal, these two Powers are wasting their resources on battleships. Undeniably the Greeks are the aggressors.

Instead of whining about the grievances of our respective clients, as though there were no grievances on the other side, let the friends of the various nationalities work together to remedy these mutual wrongs and try to get the Balkan Governments to do the same.—Yours faithfully,

William H. Seed, Secretary.

Ottoman Association, 44, Dover Street, London, W.,
June 12, 1914.

HEAT WAVE AT PORT SAID.

From Our Own Correspondent.

Port Said, June 6.

After an unusually cool spring, Port Said has been prostrated during the past week by a heat wave of considerable intensity. On Monday last the temperature rose to 106 degrees in the shade, which, combined with a depressing sky and moist-laden atmosphere, made the day the most unpleasant, if not actually the hottest, during the last ten years.

The weather during the rest of the week can best be described as a "hot hurricane." Squalls followed each other in rapid succession, the wind completely boxing the compass in a few hours. Everything tastes and smells of sand, while a goodly proportion of the sandy soil thrown up from the drainage trenches finds its way into office, shop, and house, to add to the general discomfort.

NEAR EAST IN PARLIAMENT

HOUSE OF COMMONS.

Trans-Persian Railway. June 11.

Colonel C. E. Yate asked the Secretary for Foreign Affairs whether, in view of the positive declaration contained in the correspondence in connection with the Russian Convention of 1907 respecting the special interests possessed by Great Britain in the Persian Gulf and the Russian acknowledgment of the same, he would give an assurance that in the negotiations regarding the Trans-Persian Railway there would be a stipulation that no line on a foreign gauge should run to the shores of the Persian Gulf, and that the line to the south of the Russian sphere should be constructed on an Indian and not a Russian gauge, so that British and Indian goods would have the same facilities for entering Persia in the south, without break of gauge, as Russian goods would have in the north.

Sir E. Grey replied that the question was still under discussion, and he could not add anything to the answer to a question on the subject which he answered some time ago. He hoped to be able to make a statement in due course when the discussions were further advanced. In reply to further interrogation, he added that the question of the gauge had been and would be carefully considered. He could say no more on that point at the present moment.

Britain and Greece. June 16.

Sir J. D. Rees asked what satisfaction had been obtained from the Greek Government for the treatment to which Mr. and Mrs. Musker were subjected recently at Okchilar, on the Greco-Bulgarian frontier.

Sir E. Grey: I am in communication with his Majesty's Legation at Athens on this subject, and have been informed that inquiries are being made by the Greek Government, but I am not yet in a position to make any definite statement.

Russian Post Office in Teheran.

Mr. Ponsonby asked the Foreign Secretary if he had any official information to the effect that a Russian post office was about to be established in Teheran.

Sir E. Grey: The answer is in the negative, though I understand that a postal official is to be employed at the Russian Legation to deal with the correspondence arriving there by the messenger service. I have heard that a post office has been established for this purpose at Tabriz.

British Troops in Persia.

Sir J. D. Rees asked whether the British Government or the British Indian Government had not sent troops to Shiraz, Bushire, and elsewhere when it desired to do so in Persia.

Sir E. Grey: Perhaps the hon. gentleman would give notice of that question.

Busreh Harbour Board. June 17.

Mr. George Lloyd asked the Secretary for Foreign Affairs whether an international harbour board was about to be formed at Busreh, and whether he could say what the composition of that board was likely to be.

Mr. Acland: An Ottoman Commission is to be instituted to improve the conservancy of the Shatt-el-Arab. Full partiuclars of this Commission will be furnished in the papers, which I hope to lay at an early date.

Smyrna-Aidin Railway.

Mr. George Lloyd asked the Secretary for Foreign Affairs whether he could state the final nature of the arrangements come to between the Smyrna-Aidin Railway Company and the Porte in regard to the application made by the Italian Government for a railway from Adalia.

Mr. Acland stated that the arrangement is still forming the subject of negotiation.

The War Cloud in the Near East.

Mr. Aubrey Herbert asked the Secretary of State for Foreign Affairs if, in view of the threatened renewal of hostilities by the Hellenic Government against Turkey, his Majesty's Government would consider the possibility of offering its friendly services to the two Governments concerned.

Mr. Acland: His Majesty's Government, in common with other Powers, will take advantage of any opportunity which may present itself to endeavour to preserve peace between Greece and Turkey, but, as a rule, friendly offices are only effective when desired by both parties to a dispute.

Mr. Herbert: Will the hon. gentleman consider what steps it would be necessary to take to protect our great commercial interests at Smyrna and also at the mouth of the Dardanelles, if, unfortunately, these friendly offices should not be accepted?

Mr. Acland: That is being considered.

Great Britain and Albania.

Mr. Fell asked the Secretary for Foreign Affairs whether this country had any forces at present in Albania, and whether they were to take any part in the present commotion in that country.

To this Mr. Acland replied that there was a British detachment of the international force, whose duty it was to preserve order. It was not proposed to extend the scope of the duties so far as the British detachment was concerned.

Anglo-Persian Oil Company.

Mr. Churchill informed Mr. Joynson-Hicks that the Burmah Oil Company had paid the dividend on the preference shares of the Anglo-Persian Company. They had advanced £144,848 6s. 11d. for this purpose.

NEAR EAST BOOKSHELF.

GREECE OF TO-DAY.*

The bane of too many writers on the Balkans and Turkey is their inability to rid themselves of bitter antagonisms or ardent preferences. In most cases their loves and their hatreds are equally violent. This is very unsatisfactory to those who wish to form a balanced opinion on the many momentous questions that vex those regions, and the distressing confusion of assertion and counter-assertion provokes a distrustful impatience of so much prejudice and bias, and a hasty endorsement of the wise King's unqualified generalisation about the lack of human veracity. Miss Lucy Garnett, however, has a mind so happily constituted that she can write with equal fairness on "Turkey of the Ottomans" and on "Greece of the Hellenes." Her knowledge and competence are undeniable, and the publishers are fortunate in being able to add a book on modern Greece by such an authoritative writer to their useful Countries and People's Series.

South-Eastern Europe is one of the great melting pots of the world, and, moreover, one that continually simmers and only too often boils over. Miss Garnett describes the principal types of the heterogeneous population of modern Greece. As a rule, a certain type is special to a certain district, but in the larger towns and in the streets of Athens a great number of different types may be seen—

> The swarthy, black-eyed, Asiatic-looking peasant of Thessaly, the brown or fair-haired and blue-eyed Messenian or Arcadian, the long-headed Islander from Chios, and perhaps a further type seemingly akin to neither, with a skin of clear olive utterly different from that of either the Southern Spaniard or the Italian.

Everywhere, too, among the higher and lower classes of the population "a type of quite classical purity may be met with," though it is most common in the wilder parts of Greece.

Several chapters are devoted to a brief but lucid exposition of the system of government, the organisation of army, navy, and police, the monarchy, the system of education, and kindred topics. In the short space which could be allotted to the subject it was impossible to give more than a general outline of the structure, but a useful introduction to a more detailed study of Greek politics is provided. Two most remarkable characteristics of the Greek system of government are the antiquity of its foundation and the newness of the superstructure.

> The system of communal administration which the successive conquerors of the country found in operation was never seriously interfered with by them, even the Turks having refrained from interference with the municipal liberties of the subject nationalities. A considerable amount of administrative experience was, consequently, on the creation of the Hellenic kingdom, at the service of the new constitutional government.

The Greek Monarchy is in many ways unlike that of any other European State, and it—

> Has hitherto been regarded merely as a convenient political institution, calling for no particular display of loyalty, though the diplomatic advantages accruing to Greece from the connection of its dynasty with so many of the Royal Families of Europe has long been recognised by the nation.

It is shown, however, that this attitude of indifference is being changed for one of affectionate loyalty. Miss Garnett thus refers to the recent growth of monarchial sentiment:—

> The new political situation created by the successes of the Hellenic army under the leadership of King Constantine, who, born and bred in Greece, is the first Greek sovereign to profess the creed of the National Church, has excited in the Hellenic nation an extraordinary degree of loyalty, not only for their monarch individually, but also for the dynasty generally.

One of the most interesting chapters is on "Monks and Monasteries." Greek monasteries were once numerous and populous; they have now dwindled to twenty-four, with a population of less than 200 monks. A delightful description is given of the "great nucleus of monastic life in the Levant" throughout the Middle Ages and up to the present time—the monkish Republic on Mount Athos. As, however, the exclusion of womenkind is absolute not only from the Holy Mountain itself, but from the whole peninsula, Miss Garnett has made use of the notes of a friend. Here we enter an atmosphere alien to the bustling commercial spirit of modern Greece. The writer of the notes was hospitably entertained by the monks in several of the convents, and he also visited some of the most famous hermits.

The final chapter on the traits of the Greek national character, as revealed in Greek folk-poesy, is remarkably well done. It is based on the following theory:—"The characteristic traits of their mythical heroes may, indeed, not be commonly found among the Greek people; but the character of a man's heroic ideal, however far his own conduct may fall short of it, always affords some indication of his own character, or at least of its possibilities. So is it likewise in the case of a people." There is some cogency in the argument. The modern Greek does not in practice combine Christian chivalry with pagan fortitude. Some of his faults are obvious and irritating; some are excusable on historical grounds, for religious feuds and hereditary hatreds do not die easily or quickly. But he has great qualities—industry, adaptability, and, above all, patriotism. Miss Garnett quotes from several folk tales and historical ballads and legends, illustrating the virtues of courtesy, gratitude, truthfulness, honesty, magnanimity, and patriotism. With regard to these historical ballads and legends, "their most remarkable feature is the length and unbroken continuity of the traditional memories of national history to which they testify." This alone is a proof of unquenchable national spirit. As Miss Garnett eloquently concludes her book:—

> A passionate patriotism is indeed one of the leading characteristics of the Hellenic nation at large. And every true Hellene cherishes the idea of a New and Greater Greece, which at no far distant date will, it is hoped and believed, consolidate the now widely dispersed forces of Hellenism into a united and powerful State. . . . The forces of national character are usually but little studied by statesmen, and with the consequence that the elaborate schemes on which they plume themselves are constantly shattered to pieces by the forces they vainly despise. And such ignoring of the forces of national character has been shown to be especially inexcusable in the case of the Hellenes. For a nation whose mythical heroes are such as we have seen them to be, whose family life is so exceptionally strong and pure in its mutual ties, whose political memories are of such an unparalleled vigour, and whose patriotism is so intense, cannot be permanently crushed.

This is a shrewd and thoroughly deserved hit at the diplomatists who still believe that countries may be cut up as easily as Dutch cheeses. But some may think that Greek patriotism is a little too aggressive, and that the virtues of restraint and moderation need to be cultivated.

It is not possible now to do more than refer to many other aspects of modern Greece which have been ably handled in the book under review, such as "Rural Life and Pursuits," "Urban and Social Life," "Commerce

and Natural Products," and the like. There is also an excellent chapter on "Classic Survivals." Within the compass of upwards of two hundred and fifty pages it would be difficult to say more or to say it better than Miss Garnett has done.

NEAR EAST BOOK NOTES.

Messrs. Constable and Co. are preparing for publication late in the autumn "The Sudan in Evolution," by Mr. Percy F. Martin, F.R.G.S. It is described as a critical study of the economic, financial, and administrative conditions of the Anglo-Egyptian Sudan. The author has recently returned to England from a prolonged sojourn in the Sudan, where he travelled last year for the purpose of making a close personal investigation into the conditions of the country and of its commercial, financial, and industrial future. The preface will be by Sir F. Reginald Wingate, the Governor-General of the Sudan. We understand, however, that Mr. Martin's book will be in no way "official," but will give an independent and frank exposition of the subject. The book will be comprehensive and expansive, and the lighter side of life and travel in the Sudan will not be neglected. The price will be only 10s. 6d. net.

The Trustees of the British Museum have issued a new volume of the Coptic Texts series, which contains narratives of ten Coptic martyrdoms, lives of great ascetics, two texts on asceticism, and a discourse on the Angel of Death. The MSS. were copied during the second half of the tenth century, and are of great value as portraying the religious life and beliefs of the monastic communities of Upper Egypt at their meridian. The book has been edited with English translations by Dr. E. A. Wallis Budge, of the British Museum, who, in his preface, says that the editing of the texts has been carried out by an arrangement with his colleague Dr. L. D. Barnett. The Director of the Museum, Sir F. Kenyon, has deciphered the Greek portions of the colophons.

The Cambridge University Press are publishing "The Press and Poetry of Modern Persia," by Professor E. G. Browne. Those of our readers who are interested in modern Persia will find a wealth of interesting material in this book. The price is 12s. net.

TANGIER TO TEHERAN.

It is a pity that the Greeks, who are at present eagerly appealing for sympathy in Europe for their cousins in Turkey, should be so perverse in Macedonia. The very people who complain that their compatriots are being expelled from Turkey to make way for Moslems are penalizing Bulgars and Turks in Macedonia for not being Hellenes. The folk who deafen heaven with their prayers for King Constantine in Cyprus consider it "unimaginable audacity" on the part of Bulgarian Uniats to wish to pray for King Ferdinand at Yanitza. In these circumstances the friends of Greece find it hard to advocate her cause whole-heartedly—it is so difficult to present the Greeks as being only anxious to live and let live when so many of them are working hard to prove that they are wonderfully sensitive to anything which concerns themselves, and careless to the verge of brutality, which should not be the mark of a recent conqueror, of the susceptibilities of others. I notice that this failing in the national character is becoming known—and the effect is that Greek complaints of ill-treatment are viewed with a certain distrust as tending to be exaggerated and in need of pinches of salt before being accepted, while complaints against Greeks, possibly also inflated, are being more readily accepted by the public than was the case a year ago.

***

In view of the tension which exists in Greco-Turkish relations and the feverish anxiety displayed in both countries in naval "futures" and the prospects of buying up other people's warships, it is interesting to learn that reports are current to the effect that the delivery of Ottoman Dreadnoughts from British yards is still in the dim future and is unlikely to take place in time for either vessel to participate in the expected hostilities. It would be a pity to expose a brand new and very expensive ship at once as a target for Greek shellfire—so perhaps the Turks will be able to draw some sort of comfort from the absence of their "big sticks," which will at least be kept nice and safe for them out of harm's way.

***

Times are indeed changing in Turkey. It is but a few years ago that any pictorial representation of the Sultan was forbidden, and one French almanack which annually published photographs of all reigning sovereigns used to insert an explanation instead of a portrait of the Padishah. Now one may buy a picture of H.I.M. Mohamed Reshad Khan on a £T2 stamp, the *Jeune Turc* publishes a portrait of his illustrious predecessor Mohamed the Conqueror, and pictures of the Sultan are being sent to Turkish regiments from the Seraskierate. The picture of the reigning sovereign has an immense official vogue in some parts of the Near East, and in Orthodox countries it enjoys a semi-sacred position in most households; but the features of Abdul Hamid Khan in his earlier days were not so well known to his subjects as are those of his brother—indeed, the only cheap lithograph of an Ottoman Khakan that I ever saw before the resurrection of the Constitution was one of Murad V., hanging in a little Turkish shop in Nicosia.

***

A correspondent tells me that there is, just at present, a considerable recrudescence of what diplomatists call "unrest" in the Ispahan district. My informant goes on to say that the gendarmerie show no particular activity in trying to cope with the bands of evilly-disposed persons who are responsible for the nuisance, and suggests that those who have Russian interests at heart are smiling gently as they see in this "band-activity" a pretext for further armed intervention should one be needed. It must always be remembered that Russian peacemaking is strangely like charity in being twice-blessed—as will readily be seen by those who consider to what the pacification of Azerbaijan has led.

***

I gather that the Italians, perhaps basing their activities on one of the interpretations of King Victor Emmanuel's motto "F.E.R.T.," have spent a good deal of time, trouble, and money on the restoration of some of the buildings of the Knights in Rhodes. Those who visited the island while it was under the Turks will remember that the Ottoman garrison inhabited the convent of the Order of the Hospital, and that the Grand Master's house was used as a prison. The Turks certainly did amazingly little damage to the remarkable buildings and fortifications erected by the Order and its Moslem slaves, but, on the other hand, they did little or nothing to repair the ravages of time and earthquakes. It may be that the Army of Occupation has felt itself in need of something to do—or perhaps it has been smartening up the island in view of a prolonged stay; but, in any case, no one can deny that in carrying out a careful restoration of hitherto neglected historical monuments the Italians have done much to reconcile *antikajis* and historians at least with their continued presence in the Dodekanese.

***

I notice that the Bulgarian Press of all shades of political opinion, in common with many speakers in the Sobranje, has reprobated the recent outbreaks against Greek residents in various parts of Bulgaria. The Greek may be an uneasy subject, and the Macedo-Bulgar refugees very full of unpleasant memories of their treatment by Greeks over the border, but the bullying of racial minorities is a thing which can lead to no good—even to the bully; and the commission of such acts only tends to damage the reputation of the country in which they occur. The Bulgarians, however, have very properly repaired the damage, dismissed the Chief of Police, and restored the legation chapel in Sofia to its proprietors, and it is to be hoped that they will not again imitate their neighbours in the treatment accorded to unpopular racial or religious minorities.

***

I see that the Bulgarians are perturbed because a French cinematograph film is to be prepared professing to illustrate the siege of Adrianople—in which they fear that numerous inaccuracies will be perpetrated and scant justice done to the Bulgarians. It is stated that arrangements have actually been made to show "Bulgarian soldiers" in the act of mutilating "Turkish women," and that actual villages are to be burnt in order to illustrate the horrors of war. I can sympathize with the Bulgarians. During the Boer war I used to see ridiculous French films representing "British defeats" by the dozen, with highly imaginative representations of British regiments being put to flight by a mere handful of *les braves Boërs*. Even now absurd Yankee films abound, pouring contempt and scorn on the British Army, and some picture-houses have the shameless impudence to show them over here.

PERSONAL & SOCIAL

CALENDAR OF THE WEEK.

Showing Concordance of the Gregorian, Julian, Moslem, and Jewish dates.

Gregorian. New style.	Julian. Old style.	—	Moslem.	Jewish.
1914.	1914.		1332.	5674
June.	June.		Rejab	Sivan
19	6	Friday	25	25
20	7	Saturday	26	26
21	8		27	27
22	9	Sunday	28	28
23	10	Monday	29	29
24	11	Tuesday	30	30
		Wednesday	Shaban	Tamuz
25	12	Thursday	1	1

To-morrow, Rejab 26, will be the anniversary of the wedding of H.I.H. Mediha Sultana, sister of the Sultan, to Senator Damad Ferid Pasha Bushati.

Monday, Rejab 28, is the birthday of H.I.H. Emine Sultana, the youngest daughter of the Sultan Abdul Aziz Khan, and sister of the Heir Apparent.

Tuesday is the birthday of Prince Henry XXXIX. of Reuss-Köstritz, nephew of the Queen of the Bulgarians.

Wednesday, Rejab 30, is the birthday of H.I.H. Nemika Sultana, daughter of the eldest son of the ex-Sultan and wife of Damad Kenan Bey.

Thursday is the birthday of H.R.H. Prince George of Greece, who was formerly High Commissioner for Crete.

Our Port Said correspondent writes :—The birthday of his Majesty King George V. was celebrated in Port Said as a day of rejoicing for the small but patriotic British Colony. At an official reception given in the morning by Mr. Vice-Consul Chafy his Majesty was cordially toasted by all present, including the Governor of the Suez Canal District, Mohammed Heddaya Bey, and the foreign Consuls. The Union Jack flew from every English house in the town, and many British vessels in harbour "dressed ship" for the occasion, a particularly fine display of bunting being made by the P. and O. mail boat "Osiris," which arrived from Brindisi early in the morning. After the official reception the Acting Consul-General received the members of the British community, who pledged his Majesty's health with marked enthusiasm.

The same day was observed by the Greek Colony as the Name Day of King Constantine, it being the Festival of the King's patron saint. Mass was said in the morning at the Greek Orthodox Church, at which the Greek Consul and officials and members of the Greek community attended. The Consul afterwards gave a reception to the colony, at which several patriotic speeches were made, and the celebrations were pleasantly concluded by a "soirée de gala" at the Theatre Eldorado.

On Wednesday Viscount Kitchener of Khartoum, H.B.M. Agent and Consul-General in Cairo, celebrates his birthday.

Queen Alexandra, the Empress Marie Féodorovna of Russia, and Prince Christopher of Greece witnessed the performance of "Otello" at the Royal Opera, Covent Garden, last Friday evening.

His Majesty the King of Montenegro has left Cettinje for Venice, accompanied by T.R.H. Prince Peter and Princess Vera.

H.R.H. the Crown Prince of Montenegro is acting as Regent during his father's absence.

Her Majesty the Queen of the Hellenes, with several members of her family, will arrive at Eastbourne next Friday for a stay of several weeks as last year, and it is expected that her Majesty will, towards the end of her visit, be joined by King Constantine. Their Majesties' third son, Prince Paul, is at Eastbourne College.

Prince and Princess Arthur of Connaught and Prince Christopher of Greece were present at the performance of "Madama Butterfly" at the Royal Opera at Covent Garden, on Thursday night last week.

H.R.H. Prince Carol of Roumania arrived at Constantza from Berlin for the Tsar's visit.

H.H. the Turkish Ambassador and H.E. the Servian Minister called at the Foreign Office on Monday, and were received by Sir Edward Grey.

H.H. the Turkish Ambassador and H.E. the Servian Minister were among the guests at a dinner given by the Austro-Hungarian Ambassador at the Embassy in Belgrave Square on last Friday evening, which was honoured by the presence of H.R.H. Princess Christian and Princess Victoria of Schleswig-Holstein.

H.E. the Roumanian Minister and Mme. Mishu left town early this week for a short visit to Germany.

Mr. Passaroff, Bulgarian Chargé d'Affaires in Vienna, has been appointed Minister in Athens.

Mr. Ratcho Kosseff, who was at one time Secretary-General of the Ministry of Commerce in Sofia, has been appointed to the Secretaryship-General of the Foreign Office, of which Mr. Hadjimisheff, formerly Bulgarian Minister in Athens before the war, has been temporarily in charge.

It is thought possible that Mr. Hadjimisheff may go to Vienna as Bulgarian Minister. Meanwhile, Mr. N. Stancioff has been appointed Chargé d'Affaires, Vienna, vice Mr. Passaroff.

His Excellency M. Michel Majaroff, the Bulgarian Minister, and Mme. Majaroff have returned to the Legation from the country.

Mr. Serafimoff, at present a Deputy in the Sobranje, has been appointed Bulgarian Consul-General at Adrianople, vice Mr. Nedcoff, transferred to Salonika.

Mr. Mincoff, Secretary to the Bulgarian Legation, handed to Dr. G. W. C. Hollist on Tuesday evening the Red Cross Medal for services rendered by him during the recent fighting in the Balkans.

F. Orkhan Bey, the secretary to the Turkish Embassy in London, leaves London next week for the Turkish Embassy in St. Petersburg, where he has been appointed.

Mr. Gourinescu is acting as Roumanian Chargé d'Affaires in Sofia during the absence of the Minister, Mr. Derussi.

Atta Bey of Mosul, has been appointed President of the Court of Appeal at Bitlis.

Mr. Voislav M. Petrovitch, of the Servian Legation, has left London for Belgrade on short leave.

The Sheikh Seyyid Idris es Sennussi left Alexandria last Sunday *en route* for Mecca by way of Port Said and Haifa.

The President of the French Republic has conferred the Grand Cordon of the Order of the Legion of Honour on Djavid Bey.

Jellal Nury Bey, the Turkish historian and writer, has returned to Constantinople from the United States.

Prince Antoine Bibescu, the newly appointed First Secretary of the Roumanian Legation, arrived in London from St. Petersburg on Monday.

Our Odessa Correspondent writes (June 14):—This city has arrayed herself in gala attire for to-morrow's reception of the Tsar, Tsaritsa, Cesarevitch, and the Imperial princesses, who arrive early in the forenoon by the Imperial yacht "Standart" from Constanza. On alighting at the port pavilion their Majesties will receive the homage of the local civil, military, and ecclesiastical dignitaries, and various deputations who will present the customary bread and salt and loyal addresses. Other deputations and the foreign Consular Corps will subsequently be received by his Majesty in the Imperial pavilion at the railway terminus. A brief but ceremonious visit will be made to the cathedral, after which a review of the garrison troops will be held in the summer camp outside the city. The Imperial party will, about 7 p.m., entrain for Kishineff, where on Tuesday the Tsar will unveil the memorial to Alexander I. From the Bessarabian capital, it is understood, the Imperial Court will proceed northward by rail direct for Tsarskoe Selo.

Sir Mark and Lady Sykes have arrived at the Hotel Lotti, Paris.

Borton Pasha, the Egyptian Postmaster-General, left Port Said early last week for Europe on leave. He will attend the International Postal Congress at Madrid in November.

Mme. Gennadius and the Countess of Bessborough, are among the ladies who are taking an active interest in the concert to be held at the Ritz Hotel on Friday, June 26, in aid of Miss Plows-Day's Mercédès work.

WHERE TO STAY.

LAUSANNE-OUCHY (Switzerland).

SAVOY HOTEL.
Near the lake, with splendid park.

CECIL HOTEL.
In the town and 5 minutes from the station.

Two First-class Family Hotels.
High-class Cuisine. French Chef.
J. SUMSER, Manager-Proprietor.

Mr. H. M. Bowden Smith, of the Ministry of Finance, Cairo, has arrived in England on leave.

Rear-Admiral the Hon. Horace L. A. Hood, who has been appointed Naval Secretary to the First Lord of the Admiralty, was mentioned in despatches for service with the gunboats employed on the Nile during the operations in the Sudan in 1898. He was present at the battles of Atbara and Khartoum, and received the medal and promotion to commander, in addition to the Fourth Class of the Order of the Mejidieh. Since then Rear-Admiral Hood has occupied several important commands, and was in charge of the naval brigade which stormed the Somali Mahdi's stronghold in 1904, his excellent work there being rewarded with the D.S.O.

Colonel H. G. Frith, who has been appointed to the command of the Lancashire Fusilier Brigade, was for ten years (1885-1895) employed with the Egyptian Army, during which time he saw service in the Sudan in 1885-86, including the action at Giniss, and again in 1889. For his services on these occasions he had the medal and clasp, the bronze star, and the Fourth Class of the Order of Mejidieh.

Lieutenant-Colonel M. Peake, C.M.G., who had such a distinguished career with the Egyptian Army, has taken up the appointment of Assistant Adjutant-General at the War Office.

Sir Gaston Maspero, the retiring Director General of the Antiquities Department, has issued a denial of the statement made by the French newspaper the *Cri de Paris* that his resignation is due to a dispute with Lord Kitchener. Sir Gaston alleges that he has always had excellent relations with Lord Kitchener, and that he recently received through him a letter from Sir Edward Grey expressing his keen regret at his resignation and thanking him for his services to Egypt.

The annual dinner of past and present members of his Majesty's Consular Service will take place at the Whitehall Rooms, Hôtel Métropole, on Wednesday, July 8. Sir Cecil Hertslet, Consul-General for Belgium, will preside. Sir Edward Grey, Secretary of State for Foreign Affairs, will be the guest of the evening, and Sir William Tyrrell, of the Foreign Office, has also accepted an invitation to be present.

Mr. Ahmad Shafeek, L.R.C.P., Lond., Cairo, and St. Thomas's Hospital, has been admitted Fellow of the Royal College of Surgeons.

Mr. A. P. Bolland, Commercial Secretary at the Sudan Agency, was to have left Egypt on Thursday last week for London in order to be present at the International Rubber and Cotton Trades Exhibition to be held in Agricultural Hall, London, at the end of this month, and at which Mr. Bolland is in charge of the exhibits sent by the Sudan Government.

The Khedive has conferred the Third Class of the Order of the Mejidieh on Kaimakam Black Bey, of the Sudan Medical Department, on the occasion of his retirement on pension.

H.H. the Khedive has conferred the honorary rank of Lewa upon Miralai Palmer Bey, Financial Secretary at the War Office, and the rank of Temporary Lewa on Miralai Wilson Bey, of the Sudan Government. The rank of Lewa gives the bearer the title of Pasha.

The marriage arranged between W. M. MacLachlan, of Suakin, Sudan, eldest son of the late Mr. W. H. MacLachlan and Mrs. MacLachlan, of West Dulwich and Kingsgate, Thanet, and May Caroline, youngest daughter of the late Mr. and Mrs. Alfred Carpenter, of Worcester Park, Surrey, and Bratton, Clovelly, Devonshire, will take place quietly on June 23, at the Parish Church, Laleham-on-Thames.

Mr. Orme Clark, an English barrister who is to act as adviser to the Ministry of Justice, has arrived in Constantinople.

General Francis Hastings, C.B., late Royal Artillery, who served in the Crimea, and was present at the siege and fall of Sevastopol, entered his ninetieth year last Wednesday.

Captain Arthur Montagu McMurdo, D.S.O., F.R.G.S., of Ranger Lodge, Glandyfi, Cardiganshire, late of the Yorks and Lancs Regiment, formerly Director of the Egyptian Slavery Department and Secretary of the Egyptian Agricultural Society, youngest son of the late General Sir H. McMurdo, and a grandson of the late Sir Charles Napier, left unsettled property of the gross value of £4,394.

Mr. Adolphe Abraham Green, of Alexandria, who died at Trieste on May 25, aged sixty-five, leaves a fortune which is estimated at £E400,000. He was the builder of the synagogue in the Moharrem Bey quarter of Alexandria.

Our Belgrade correspondent informs us that the following diplomatic changes have taken place:—

Mr. M. Ristitch, formerly Minister at Bucharest, is transferred in the same capacity to Rome; Dr. M. Gavrilovitch, formerly Minister at Cettinje, is transferred in the same capacity to Bucharest, Mr. D. Jankovitch, Chief Secretary of the King's Household, is appointed Minister at Berlin; Mr. L. Mihailovitch, Chargé d'Affaires at Cettinje, is promoted to the post of Minister at Cettinje. A Servian legation is to be established in Albania, and it is proposed to nominate as Servian Representative Mr. Panta Gavrilovitch, now Diplomatic Agent at Durazzo.

A meeting of the Persia Committee was held on the 10th inst. at the House of Commons. Lord Lamington, President of the Committee, was in the chair, and there were also present Mr. J. Dillon, M.P., Mr. T. E. Harvey, M.P., Mr. Philip Morrell, M.P., Mr. Arthur Ponsonby, M.P., Sir J. F. L. Rolleston, M.P., Professor E. G. Browne, Mr. G. P. Gooch, Mr. Holford Knight, Mr. C. J. O'Donnel, Mr. M. Phillips Price, Mr. G. D. Turner, and Mr. Frederick Whelen. The following resolution was unanimously passed:—"That this Committee strongly protests against the reported collection and appropriation of Customs by Russian Agents in the Province of Azerbaijan in North Persia, as a grave breach of the Anglo-Russian Convention of 1907, and calls on his Majesty's Government to make representations to that effect."

We regret to announce that Mr. Bennet Burleigh, the famous War Correspondent, died at Bexhill on Wednesday. Since 1882, when his long association with *The Daily Telegraph* began, he has represented that journal as War Correspondent in most of the wars that have been fought in every part of the world. After his return from the late Balkan Campaign his health broke down, and he never completely recovered afterwards.

FRIDAY, JUNE 19, 1914.

THE ÆGEAN CRISIS.

The peace which not many months ago was ratified between Turkey and Greece without conviction has since been maintained without enthusiasm. It was one thing for Turkey to yield to the logic of events when it was driven home with the united forces at the Allies' disposal; it was another thing for the Committee of Union and Progress to find itself at loggerheads with Greece alone and to be compelled to accept peace more or less on her terms. That peace has never been kept in spirit, any more than the Balkan States have conformed with the provisions of the Berlin Treaty in regard to the equal rights of religious or national minorities. Almost before the ink on the treaties which brought the two Balkan wars to a close was dry the various countries had with one accord set about to rid themselves of their neighbours' nationals. Greece and Servia expelled Bulgars, Bulgaria expelled Turks, Turkey expelled Greeks from their respective territories. The earlier victims were the Bulgarians, but their protests passed more or less unheeded, as Europe was wearied of the subject of Balkan excesses, and had abandoned the attempt to adjudicate between charges and counter charges. When the Turks began the systematic expulsion of Greeks from Eastern Thrace, Greece found the process less to her liking than when she was herself merely expelling Bulgars from her own territory. She began to protest loudly against the action of the Turkish authorities, but the stream of refugees had already reached formidable proportions when the Porte found itself compelled to listen to the Greek complaints and an investigation of the state of affairs in Thrace was undertaken. The marked success of the policy had turned the heads of the Turkish authorities. Military exigencies had prompted the expulsion of Greeks from their European frontiers; racial antipathy alone stirred them up to extend the system to Asia Minor. While regrets were being expressed and amends promised for the "misunderstandings" in Thrace, compulsory emigration became the *mot d'ordre* along the Asiatic coast, and the policy was carried out with even greater vigour than in Europe. Not only was the prestige of Greece affected, but a serious drain was placed upon her resources by having to make provision for thousands of refugees. As representations to the Porte produced little effect, the Greek Government felt obliged to adopt more radical measures.
